6. Different Indicators by Woreda,	158-231

Foreword

Education is taken to be essential for sustainable development and participation in democratic social and political processes. It is also currently becoming the most important contributor to national economic growth. In particular, it is the perfect weapon to realize “Universal Primary Education” with the specific target of ensuring by 2015, children everywhere, boys and girls alike, will be able to complete a full course of primary schooling. On the top of that, for it is believed that education is the basis for other remaining MDG goals.

Accordingly, this Education Statistic Annual Abstract is also gives emphasis to the provision of relevant and articulated information on all levels of education taking place in our region for implementation of MDGs. The charts, graphs and tables in this publication present a relevant and accurate picture of our progress on an annual basis. In presenting this overview, we are allowing the key partners and stakeholders to see at a glance how quickly the changes have taken place in our Region.

Therefore, this document would definitely meet the need of planners, policy makers, researchers, and educational stakeholders in obtaining information for their decision. Besides, it also enables educational planners and policy makers in targeting their future goals in terms of our educational standard by allocating the needed resource for improving and implementing quality of education. Finally, this educational annual abstract gives as the mission of reducing the gap seen in different indicators of the year, particularly in improving quality of education, so that hard work is expected from all of us to fill the gap and to attain our target of the Millennium development Goal.

Introduction

Education Statistics Annual Abstract is, intended to communicate the stakeholders towards the performance of the education system on a yearly basis in targeted areas, such as enrollment trends, educational qualities and efficiency of our education system. Besides, it also used in providing the most recent educational information of the Region. The education performance indicator presented in this document is calculated based on the projected school age population of Central Statistics Agency population and housing census held in 2006/07 G.C and the regional population growth rate, taken from the Oromia Region Finance and Economic Development Bureau.

This publication has been written by Oromia Education Bureau EMIS team, with the considerable support and cooperation of the thousands of teaching staff who submitted documentation of educational statistics from the school up to zone education office. The collected data was based on basic variables from all levels of education based on standard questionnaires designed for pre-primary (KG), Alternative Basic Education, Primary, Secondary, preparatory, Integrated Functional Adult Literacy program and Colleges of Teachers Education. This annual abstract contains both descriptive and analytical summaries of equitable access, quality and efficiency of education in detail. The data are further disaggregated by the level of education, sex, and location in order to show detailed educational information of the region. Accordingly, we hope that this publication may provide a basis for monitoring the system and having educational information for policy makers, planners and also references for researchers as well.

Finally EMIS team want to thank all of our staffs who are involved in data collection, data entry and verification for this publication starting from the school up to the zonal level, because the data collection, entry and verification would not have been possible without the important contributions of them. A special note of thanks is also reserved for all experts of our regional bureau planning and project work process, for their cooperative effort on the publication of this Abstract.

ABBREVIATION

ABE	Alternative Basic Education
AIR	Apparent Intake Rate
AAGR	Annual Average Growth Rate
CE	Coefficient of Efficiency
CRC	Cluster Resource Center
CR	Completion Rate
CSA	Central Statistics Agency
CTE	College of Teachers Education
DR	Dropout Rate
EFA	Education For All
EMIS	Education Management Information System
GER	Gross Enrolment Rate
GIR	Gross Intake Rate
GPI	Gender Parity Index
IER	Internal Efficiency Rate
IOR	Input Output Rate
IFAL	Integrated Functional Adult Literacy
KG	Kindergarten
MDG	Millennium Development Goal
NER	Net Enrolment Rate
NIR	Net Intake Rate
NGO	None Governmental Organization
OEB	Oromia Education Bureau
PI	Parity Index
PSR	Pupil Section Ratio
PTR	Pupil Teacher Ratio
PYW	Pupil Years Wasted
PPAPS	Pre- Primary Attached to Primary Schools
PR	Promotion Rate
RR	Repetition Rate
RUPI	Rural Urban Parity Index
SR	Survival Rate
SAP	School Age Population
TR	Transition Rate
TPY	Total Pupils Years
UPE	Universal Primary Education
WR	Wastage Rate

1. Pre Primary Education Program

The program is basically includes children of ages 4-6 enrolled in Kindergarten and Pre-primary attached to primary schools. The main purpose of early child hood education is to develop the mental and physical capability of children. It is the initial stage of organized instruction to provide a bridge between home and school.

Early child care and pre-primary education can significantly improve the cognitive, social and emotional development of the child. These benefits have been found to last well into adult hood. Non- governmental organizations, communities, private institutions and faith based organizations are the operators of kindergarten. The government is involved in this regard, in developing curriculum, training teachers and providing supervisory support. Oromia regional government Education Bureau was opened a new program of pre-primary attached to primary schools since 2001 E.C. to access rural children of the level.

Accordingly, participation of pre-primary education has been continuously increasing in our region since the Pre-primary attached to primary schools were established. So that, children enrollment in pre- primary schools were increased from year to year, the Gross Enrolment Ratio (GER) of the level also jumped from 3.4% (2001E.C) to 13.97 (2004 E.C) for the three consecutive years.

As indicated on chart 1.1 the number of kindergartens raised in between 2000 E.C and 2004 E.C, from 903 to 1281. Whereas, as shown from table 1.1, 7129 government primary schools are implementing pre-primary attached to primary education program in the region in 2004 E.C.

1.1. Gross Enrolment Ratios in Pre-primary Education

GER of pre-primary education is defined as the percentage of total number of children in the level irrespective of age, out of total population of 4-6 age groups in the region or in a given zones.

As shown from Table 1.2, the Gross Enrolment Rate (GER) of 2004 E.C/2011/12 G.C for Kindergarten (KG), Pre-Primary attached to Primary schools (PPAPS), and the aggregated of both KG and (PPAPS) was 4.35%, 9.62% and 13.97%; and their GPI are also (0.97, 0.92 & 0.94) respectively. As indicated on the same table, when we compare GER and GPI of the zone to the regional average, GER of 7 zones and all Administrative towns are greater than the regional average. Whereas, regarding to gender equity 5 administrative towns and 7 zones are also greater than that of the regional aggregated GPI. Additionally chart 1.1.1.is also indicating GER of preprimary education by zone in the year 2004 E.C (2011/12 G.C).

As we can see from chart 1.1.2 when we compare the growth rate of GER of Kindergarten and Pre-primary attached to primary schools of the past five years, it was varied unpredictably. However, GER of 2004 E.C has a little bit increment than 2003 E.C. As indicated in the chart the participation of (2003-2004 E.C) is (13.1% and 14.0%) respectively. To retain this fluctuation, the concerned body should pay attention to equitable access of per- primary schools. Moreover, about **2.4** million children in the region are still out of school; so that, the issue needs attention to improve it.

Chart 1.1.2. Kindergarten Gross Enrollment Ratio for the last five years

2. Primary Education Program

2.1.EQUITABLE ACCESS

In Ethiopia, primary education is defined as education in Grades 1-8 in two cycles 1st cycle, (grades 1-4) and 2nd cycle (grades 5-8). The program is normally designed on a unit or project based on basic education to develop pupils' ability to obtain and use information they need, about their home, environment/community or country.

2.1.1. Intake Rates

Intake rate is used to indicate the extent of new entrants to the first grade of primary education. It indicates the proportion of children who join the primary education system for the first time in terms of official school age for the first grade. It compares children who come to school for the first time, registered at first grade (grade 1) with children of official school admission age (7 years old children). Under this umbrella Apparent Intake Rate (AIR), Net Intake Rate (NIR), Early Starters and Late Starters are analyzed.

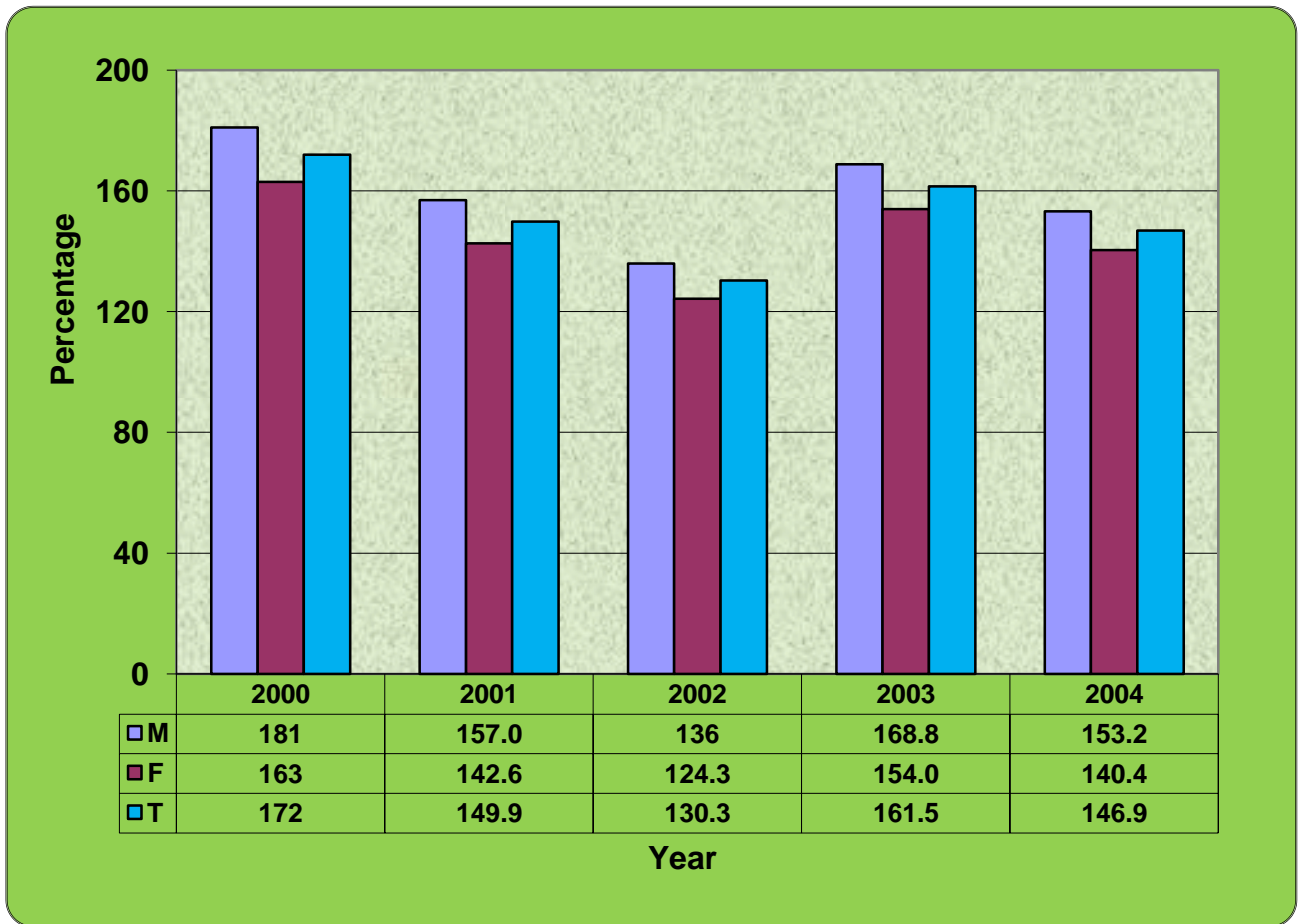

2.1.1.1. Apparent Intake Rate (AIR)

AIR is the percentage of new entrants (irrespective of age) in Grade 1, out of the total number of children of the official primary admission age 7, in a given year. Same times, it is also called the Gross Intake Rate (GIR). AIR tends to reflect those students, who may have not been enrolled in school at the appropriate age, and often reflects the “backlog” of students who could not enrolled before.

A high Apparent Intake Rate indicates a high degree of access to the first grade of primary education. The calculation includes all new entrants to first grade (regardless of age). The Apparent Intake Rate can be more than 100%, due to over- and under-aged children entering primary school for the first time, and this makes inconsistencies, in population data. Let us see the formula to calculate AIR.

$$\text{AIR} = \frac{\text{Number of New Entrants in first Grade}}{\text{Population at the official school - entrance age}} \times 100$$

Chart 2.1.1.1.1 Trend of AIR for the Last Five Years

As shown in chart 2.1.1.1.1 above, AIR of the region was greater than 100% for the last five years; it is because of over and under aged children enrolment. Additionally, one can observe from the indicated data shown that, AIR of boys is greater than that of girls, and this indicates that the access to grade 1 is more accessible for boys than girls. Even though the reason has to be identified through research, the AIR has been fluctuating from year to year. For example, it was 130.3% in 2002 E.C and then rose to 161.5% in the following year, however in 2004 E.C, it decline by 14.6% when compared to the previous year and reached to 146.9%. This indicates that, there are children in the system, which have not been enrolled in schools till this year, and often reflects the “backlog” of children who could not enrolled before.

24	Wellega West	131.5	124.1	127.8	157.7	165.6	161.7	134.1	128.2	131.1	0.96	0.79	5.8	33.8
	Total Oromia	150.8	136.4	143.7	173.4	173.9	173.7	153.2	140.4	146.9	0.92	0.83	12.8	30.0

As indicated from table 2.1.1.1.1 it is possible to see that, AIR of Oromia in 2004 (2011/12) is **146.9%** (M=153.2% and F=140.4%). As we can see from the table, all zones and administrative towns have AIR greater than 100%. Concerning to GPI nine zones have GPI less than that of the regional average (0.92). Additionally by this year **1,400,933** (M=740,518, and F=660,415) children were enrolled as new entrants in grade 1, among them **835,896** (M=437,582 and F=398,314) are 7 years old.

The table also indicates the level of Urban/Rural disparity by zone. Among all zones and six administrative towns of the region, only five of them have RUPI (Rural Urban Parity Index) greater than the regional average of 0.83 of GPI.

2.1.1.2. Net Intake Rate (NIR)

Net Intake Rate shows new entrants in the first grade of education system, who are of the official school-entrance age, expressed as a percentage of the population of the same age.

The calculation requires new entrants in the first grade of education cycle who are of the official school-entrance age and population at the official school-entrance age. The method of calculation is as follows:

$$(NIR) = \frac{\text{New entrants in the first grade of education cycle who are of the official school-entrance age}}{\text{Population at the official school-entrance age}} \times 100$$

A high Net Intake Rate for primary education indicates a high degree of access to the first grade of primary education, for the official primary school-entrance age children. Fortunately, for the countries which have subscribed to the policy goal of UPE, NIR of 100% will be a necessary condition. Chart 2.1.1.2.1, shows the trend of previous five years NIR of our region. As shown, the NIR of Grade 1 at 2000 E.C was 69% and then it's climbed to 87.7% by 2004 E.C by AAGR of 6.17%.

22	Shoa West	60.9	57.8	59.4	72.8	80.8	76.7	62.1	60.0	61.0	0.97	0.77	2.1	17.3
23	Wellega East	75.9	71.3	73.6	142.1	146.0	144.1	80.8	76.9	78.9	0.95	0.51	3.9	70.5
24	Wellega West	97.3	93.2	95.3	119.3	125.1	122.2	99.5	96.4	97.9	0.97	0.78	3.1	26.9
	Total Oromia	89.8	83.2	86.5	96.7	97.4	97.0	90.6	84.7	87.7	0.93	0.89	5.9	10.5

As shown from table 2.1.1.2.1 NIR of the regional average is 87.7%. As indicated, among all zones of the region, seven of them are having NIR greater than the regional average. Unfortunately, three of them are having more than 100%, which is out of logical assumption of NIR. These zones are Jima, West Hararge and East Hararge, having 109.9%, 108.6% and 103.8 respectively. This may be happens due to many reasons, among these assumptions; wrong pupils age registration, errors of CSA data capturing and migration are the major reasons. On the contrary, there are also zones and administrative towns which are having low NIR as compared to the regional average.

Concerning to GPI, 12 zones and all the 6 Administrative Towns are having greater than or equal to regional GPI 0.93, amongst eight of them are having GPI more than (1.0), which is the level of the standard for equity of gender. Regarding to RUPI, among 18 zones of Oromia, four are having PI (Parity Index) greater than or equal to the regional average.

2.1.2. Early and late Starters

2.1.2.1. Early Starters

Students said to be early starters if their actual enrolment age is less than that of official school admission age/7 years old/. If all children of official school admission age/7 years old/ of a specific area at a given year have join school, the AIR of that area will be 100%. But due to the inclusion of under-aged and over-aged children, AIR can be over 100%. Therefore, timely entrance into the education system is important to minimize such gaps. As we can see from chart 2.1.2.1.1 below, the percentages of early starters have been dropped from year to year, for example it has been 3.5% in 2000 E.C (2006/07) and decline from year to year and reached 1.5% by 2004 E.C. From this progress, we can imagine that, timely entrance of children into education system is getting improved for the last five years by AAGR of 23.6% at regional level. Additionally, Table 2.1.2.1.1 shows early starters at zonal and administrative town level.

Chart 2.1.2.1.1: Percentage of Early Starters for the Last Five Years

2.1.2.2. Late Starters

Late Starters are new entrants to grade one whose age is greater than the official school admission age (7 years old). The indicator points out the proportion of children come to school for the first time after their official school admission age of the level. It is expected that the percentage of the new entrants to grade one whose age is greater than the official school admission age (7 years old) has to decrease from year to year till it reaches 0%. However in the last five years the percentage of late starters has fluctuated up and down from year to year, this shows that the number of over age children admitted to school is not plummeted continuously.

Chart 2.1.2.2.1 shows the regional late starters' percentage of last five years. As indicated, the percentage went down gradually from year to year, for example it was 96.6% in 2000 E.C (2006/07) then it is dropped to 57.8% in 2004 E.C (2010/11) with AAGR of 13.7%. Even though the figure shows progress, the data indicates still more than half of the students enrolled to grade one are over aged. As we can see from table 2.1.2.2.1, percentage of late starters to grade one, in 11 zones and 5 administrative towns are above half of the total enrolment, whereas in seven zones and in one administrative town it is below half.

2.1.2.3. Percentage of Not Admitted

It is the proportion of 7 years old, in other words, it is the percentage of children who did not admit the school at their official age of schooling. It can be derived simply from the NIR in such a way that (100-NIR) for both boys and girls.

In 2003 E.C (2010/2011 G.C) the percentage of children who did not join the school at the right age was 13 % (10.2% of boys and 15.8% of girls). However as shown from the table 2.1.2.3.1 by 2004 E.C /2011/12 G.C/ the percentage of not-admitted has been decreased to 12.3% (9.4% of boys and 15.3% of girls). So that, the data shows there is still a lot of

children who are not admitted to the school, so that bringing those children to the school will be the responsibility of the concerned body.

2.1.3. Gross Enrolment Rate (GER)

Gross Enrolment Rate is, defined as the total enrolment in a specific level of education, regardless of age expressed as a percentage of the official school-age population corresponding to the same level of education in a given school year. GER is a crude measure of education coverage. Since it includes under-aged and over-aged pupils, GER can be greater than 100%, and frequently in countries to attempt in addressing the backlog of students attending the school because of different reasons, such as financial need, family issues, or lack of schools.

The data required to calculate GER is, total enrolment in a specific level of education, regardless of age and official school-age population corresponding to the same level of education. The method of calculation is as follows

$$(GER) = \frac{\text{Total enrolment in a specific level of education, regardless of age}}{\text{official school - age population corresponding to the same level of education}} \times 100$$

2.1.3.1. Gross Enrolment Rate of First Cycle Primary /1-4/

Gross Enrolment Rate of first cycle primary is the rate calculated simply by dividing the total number of students enrolled in first cycle primary (irrespective of their age) to the total population of 7-10 years old. As chart 2.1.3.1.1 shows, by 2000 E.C (2006/07) GER of the region was 129%, after that it is dropped to 114.7% by 2002 E.C (2008/09), and then the data climbed to 121.1% by 2004 E.C as well. The trend shows fluctuating up and down in the middle of 2000 E.C (2006/07 G.C) to 2004 E.C (2011/12) years. As one can observe from the data, number of over age and under age children in the school system has not decline continuously as expected to the standard.

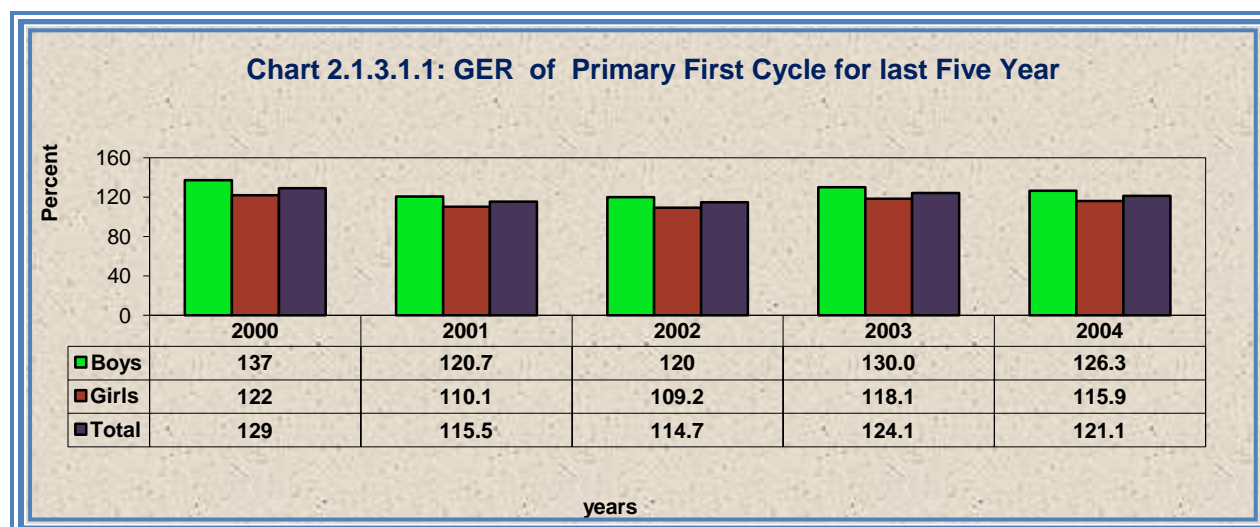

Table 2.1.3.1.1 shows GER of first cycle primary in 2004 E.C. As shown among all zones and Administrative Towns, nine zones and five administrative towns is below the regional average (121.1%). whereas one administrative town and nine zones are above.

Concerning to GPI, 11 zones and all the six Administrative Town of Oromia have greater than regional GPI of 0.92. Related to the 'RUPI' (Rural/ Urban Parity Index), five zones are having PI (Parity Index) greater than the regional average (0.79). On the other hand among 18 zones, 13 of them have had PI less than the regional average.

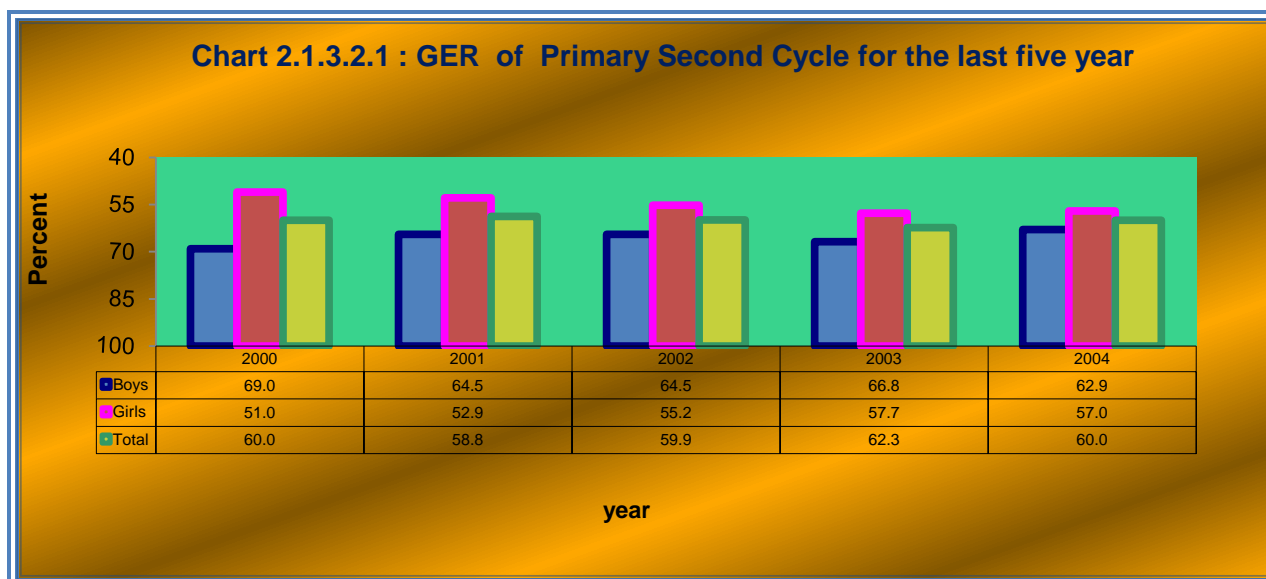

The other method in analyzing gender issue is comparing the gender gap of the level. Accordingly gender gap is expected to be zero, which indicates whether both are joined the school equally or not. Negative on the gender gap indicates that, rate of female participation is greater than that of male.

2.1.3.2. Gross Enrolment Rate of Primary Second Cycle /5-8/

Gross Enrolment Rate of second cycle primary (5-8) is the rate calculated simply by dividing the total number of students enrolled in second cycle primary (irrespective of their age) to the total population of 11-14 years old. As shown on Chart 2.1.3.2.1, the Gross Enrolment Rate of primary second cycle (5-8) shows fluctuation during the last five years. It was 60%, 58.8%, 59.9%, and 62.3% from 2000 -2003 E.C. In 2004 E.C it has dropped to 60%.

As Table 2.1.3.2.1 below indicates, the second cycle primary GER of eleven zones and six administrative towns exceed the regional average of (60.0%). Whereas, amongst seven zones are registered less than the regional average GER.

Regarding to GPI, 12 zones and all the six administrative towns in the region have GPI greater than that of the region (0.91), amongst two zones and four Administrative towns are having GPI more than (1.0).

2.1.3.3. Gross Enrolment Rate /GER/ Primary (1-8)

Gross Enrollment Rate of primary education (1-8) is a crude measure of primary educational coverage, which indicates the percentage of total enrollment in primary schools irrespective of age out of the corresponding primary school age (7-14) population.

Apparently, it includes under-aged and overages pupils, GER can be higher than 100%. The trend of GER for primary education of the region over the past five years period tells us that, it has been fluctuating up and down. Accordingly, GER of the region was 101.4 % in 2000 E.C (2006/07) and then plummeted to 89.03% in 2001 E.C (2008/09), next to that it's also jumped to 95.4% in 2003 (2010/11) finally, decline to 92.7% in 2004 (2011/2012). As the data shows, even though fluctuation is frequent, until now the issue didn't identify through research. Even though there is a lot of expectation for the reason of fluctuation, it is difficult to list those reason here, however it is better to go through making basic research on the issue.

As table 2.1.3.1.1 demonstrates among the zones in the region by 2004 E.C (2011/12) about nine zones and five administrative towns have GER above the regional average (92.7%). On the other hand, nine zones and one administrative town are having GER below the regional average. Regarding to GPI, 13 zones and all of administrative towns are having GPI greater than the regional average 0.9. Amongst all town and 13 zones registers GPI greater than or equal to 1.0, which means GER of girls is greater than that of boys. Finally, regarding to the regional disparity, (Urban and Rural), among 18 zones of Oromia eleven of them have RUPI greater than or equal to the regional average (0.6)

Pastoralist Woredas Average		119.0	94.6	107.1	128.7	101.0	115.2	38.5	25.8	32.3	82.4	63.3	73.1	87.7	66.8	77.5	0.8	20.9

As shown on table 2.1.3.3.2, the pastoralist woreda GER shows that, fifteen woredas were having greater than or equal to the regional pastoralist Woredas' average GER (**77.5%**). On the other hand, six pastoralist woredas were having greater than the regional average GER which is **92.7%**. However, the rest have less than the regional pastoralist Woredas' GER. Regarding to GPI, thirteen pastoralist woredas had GPI greater than pastoralist Woredas' average 0.8.

2.1.4. Net Enrolment Ratio (NER)

It is the rate of the official age group for a given level of education expressed as a percentage of the corresponding school age population. NER is the best way of measuring organized timely school participation and is a more refined indicator of school and enrolment coverage in terms of explaining the proportion of pupils enrolled from the official age group. NER is usually lower than the GER since it excludes over-aged and under-aged pupils. NER is calculated by dividing the number of properly aged primary students (for Ethiopia ages 7-14) by the number of children of school age (7-14) population.

$$NER = \frac{\text{Total Enrolment in a specific level of Education with official age - group}}{\text{Official school age population corresponding to the some level of Education}} \times 100$$

A high NER denotes a high degree of participation of the official school-age population. The theoretical maximum value of NER is 100%. Increasing trends can be considered as reflecting improvement in participation of official school age population at the specified level of education. When NER compared with GER, the difference between the two ratios highlights the incidence of under-aged and over-aged enrolment. If the NER is below 100% then the difference with 100% provides a measure of the proportion of children not enrolled at the specified level of education. However, some of these children could be enrolled at other levels of education.

2.1.4.1. NER in first cycle Primary (1-4)

It is the percentage of students who enrolled in first cycle primary, whose age is 7-10, compared to the school age population of this level; that is total population of 7-10 years old.

Chart 2.1.4.1.1 below shows the trend of last five years NER at regional level. Accordingly, the NER of primary in first cycle was 85% in 2000 E.C and then decline to 82.6% in 2002 E.C. then by 2004 E.C this value has climbed to 92.3%.

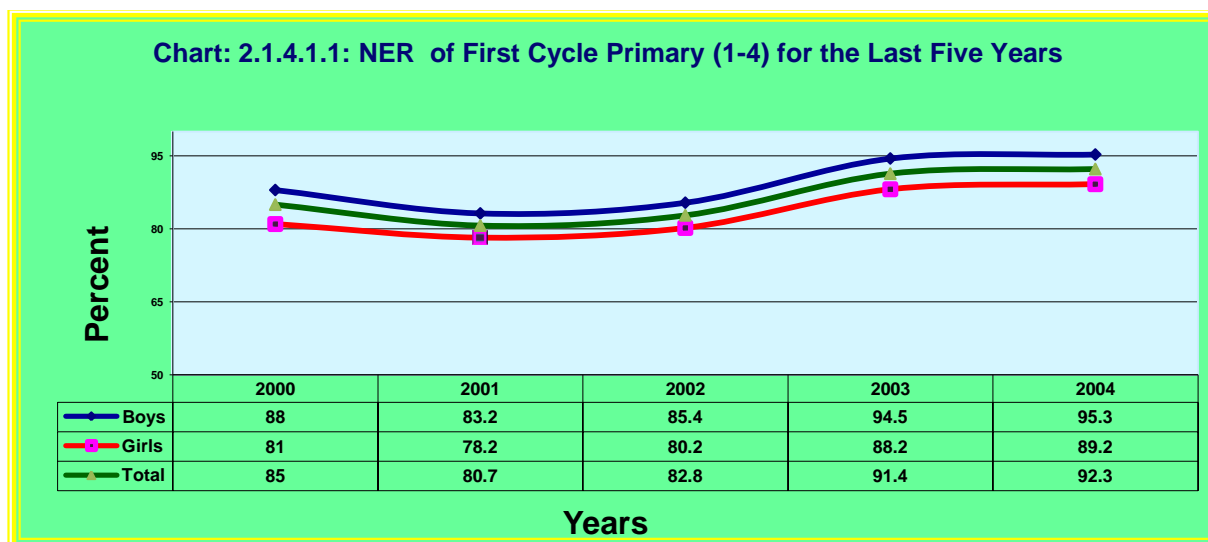

Table 2.1.4.1.1 also indicates that seven zones have greater than the regional average NER of first cycle primary (92.3%). On the other hand eleven zones and six administrative towns in the region have less than the regional average.

However, logically NER could never be more than 100%. There are different assumptions for such kinds of inaccuracy. Among the major assumption, firstly; some students might be migrated to those zones from other places for attending schooling, where as those students might not be included in the SAP of the zones. Secondly; wrong registration of Pupils age during recording and thirdly the CSA census capturing problems are the major assumptions. Regarding to gender disparity, 11 zones and six Administrative towns have more than the regional average GPI (0.94). Among them three zones and five Administrative towns have GPI more than 1.0. Concerning to (Urban and Rural disparity), from 18 zones of Oromia only three are having **RUI** of greater than the regional average (**0.83**).

2.1.4.2. NER in the Second cycle Primary (5-8)

NER at primary second cycle is the proportion of enrolment of students in second cycle primary of the age (11-14), with eligible school population of age (11-14). As can be seen from Table 2.1.4.2.1 below; twelve zones and six administrative towns have registered above the regional average NER of second cycle primary (44.1%), whereas six zones are having less than the regional average. Out of 18 zones and six Administrative towns in the region 13 zones and all Administrative towns exceeds the regional GPI (0.96). Concerning Rural/Urban parity Index/, among 18 zones of Oromia, only five of them have RUPI greater than the region average (0.43).

As chart 2.1.4.2.1 above indicates, the trend of the NER of primary second cycle school in the region has shown increment. Accordingly, in 2000 E.C it was 38% and then increased to 41.9% in 2002 E.C. The same way, by 2004 E.C this value has rose to 44.1% with the annual growth rate of 2.59%. As the growth rate indicates, NER of the level shows steadily increased, so that educational practitioners have to give serious attention to fill the gap.

2.1.4.3. Net Enrolment Rate in Complete Primary (1-8)

The Net Enrolment Rate (NER) for complete primary can also calculated in a similar way of calculating NER for first cycle and second cycle primary. It is the proportion of the appropriate school age (7-14) children enrolled in primary school with the total school age (7-14) population. When the first and second cycle NER separately compared with complete primary in the region, it would take more time to achieve 100%. This is because those children in first cycle primary of age 11-14 who are over aged for first cycle, and students of age 7-10 who are under aged for the second cycle are included while calculating NER for complete primary. As indicated from chart 2.1.4.3.1 during the last five years NER of complete primary school has increased from 82% in 2000 E.C to 84.2% in 2004 E.C. with

annual average growth rate of 0.66%, which means the increment almost steady in the past five years, so that, the issue needs attention from the concerned body.

As illustrated from Table 2.1.4.3.1 among all zones of the region, NER of ten zones' and one Administrative town exceeds the regional average of primary education (84.2%). whereas, eight zones and five administrative towns have below the regional average.

In the year 2004 E.C. thirteen zones and the entire Administrative town of the region have GPI greater than the regional average (0.93). Among them all administrative towns and three zones have GPI of more than 1.0. Whereas regarding to RUPI, from all zones of the region, only seven of them have PI greater than the regional RUPI which is 0.70.

2.1.5. Enrollment of Children with Special Needs

According to Table 2.1.5.1 the total enrolment with Special Needs Education in 2004 E.C of primary schools was **22,338** at regional level. This data indicates that, there are a lot of children with Special Needs who are currently not attending schools throughout the region. Therefore, the issue needs attention to bring those children to the school, in order to make them to get opportunities for learning in an inclusive environment. So that, it requires attention from government side, by providing teachers training, physical infrastructure and the provision of learning equipment. Additionally it needs full participation of society as well, in the process of implementing special needs education.

2.1.8. Primary Gender Equity in the Last Five Year

As noted on table 2.1.8.1, the primary gender equity of the last five years have been fluctuating up and down, gender gap of primary (1-8) GER has decreased gradually from 17.7% in 2000 E.C (2006/07) to 10.6% in 2003 (2010/11) and then to 8.4% in 2004 (2011/12). Additionally, as can be seen from table 2.1.8.2, gender gap of primary (1-8) NER has dropped from 10.0% in 2000 (2006/07) to 5.9% in 2004 (2011/12).

Table 2.1.8.1: Primary Gender Gap by GER for the Last Five Years									
Year	GER Primary (1-4)			GER Primary (5-8)			GER Primary (1-8)		
	Male	Female	Gender Gap	Male	Female	Gender Gap	Male	Female	Gender Gap
2000	137	122	15.0	69	51	18.0	110.1	92.6	17.5
2001	100.8	92.9	7.9	67.4	57.1	10.3	84.8	76.3	8.5

Table 2.1.8.2: Primary Gender Gap by NER for the Last Five Years									
Year	NER Primary (1-4)			NER Primary (5-8)			NER Primary (1-8)		
	Male	Female	Gender Gap	Male	Female	Gender Gap	Male	Female	Gender Gap
2000	88	81	7.0	41	35	6.0	87	77	10.0
2001	69.4	65.9	3.5	41.7	39.9	1.8	74.7	70.3	4.4
2002	85.4	80.2	5.2	43.1	40.6	2.5	81.7	75.8	5.9
2003	94.5	88.2	6.3	45.3	42.4	2.9	88.7	81.8	6.9
2004	95.3	89.2	6.1	45.0	43.2	1.8	87.1	81.2	5.9

2.2. Quality

Educational key indicator that universally accepted to detect whether a given country is on the right track to achieve its education system is quality. Quality of education system may refer to many different characteristics, such as quality of inputs into education system, quality of educational outputs, process and outcomes. Here in this publication we focus on quality, in relation to educational inputs such as, teacher's quality, and different ratios. Some indicators of quality depend on the total number of student enrolment. If the number of students increases, the number of teachers, classrooms and textbooks, etc. should increase at the same proportion.

2.2.1. Qualification of Teachers in Primary Education

One of the main factors, which affect the quality of education, is the qualifications of the teacher. That is, whether the educational qualifications of the teacher meet the requirements of the level he/she is teaching. According to national standards, primary education requires teachers with minimum qualification of Diploma from College of Teachers Education.

Percentage of Qualified Primary School Teachers

As illustrated from table 2.2.1.1 percentage of qualified primary/1-8/ teachers in 2004 E.C, have been 59.6% (Male =56.4% Female =59.6%) at regional level. Teacher's qualification for first and second cycle primary is also indicated on the table. As indicated, percentage of qualified teachers for first cycle primary at regional level are 39.2% (Male=31.5% & Female=50.8%), whereas for the second cycle primary the percentage is 88.9% (Male=86.5% & Female=94.9%). From the data shown one can understand that percentage of qualified teachers for first cycle primary/1-4/ is very low. So that policy makers, planners and concerned bodies have to, give due attention for the issues.

2.2.3. Different Ratios in 2004 E.C

2.2.3.1 Pupil - Teacher Ratio (PTR)

This is one of the most common indicators of quality education used in educational planning. It is believed that a lower number of pupils per teacher indicate that pupils will have better chance of contact with their teachers. The standard set for pupil teacher ratio for primary education is 50:1. As shown on chart 2.2.3.1, during the last five years the PTR of primary education is highly fluctuated by increasing and decreasing from year to year. However, in the last two consecutive years improvement have been seen in PTR. Accordingly, it was 59:1 in 2003 E.C. then by 2004 the PTR have reached 57:1. The ratio indicates that as the rate at which number of teachers increased, it shows that enrolment of students increased. Therefore, even though the performance was satisfactory for the time being, we expect to have more effort to train additional teachers to bring this ratio back down to the standard 50:1.

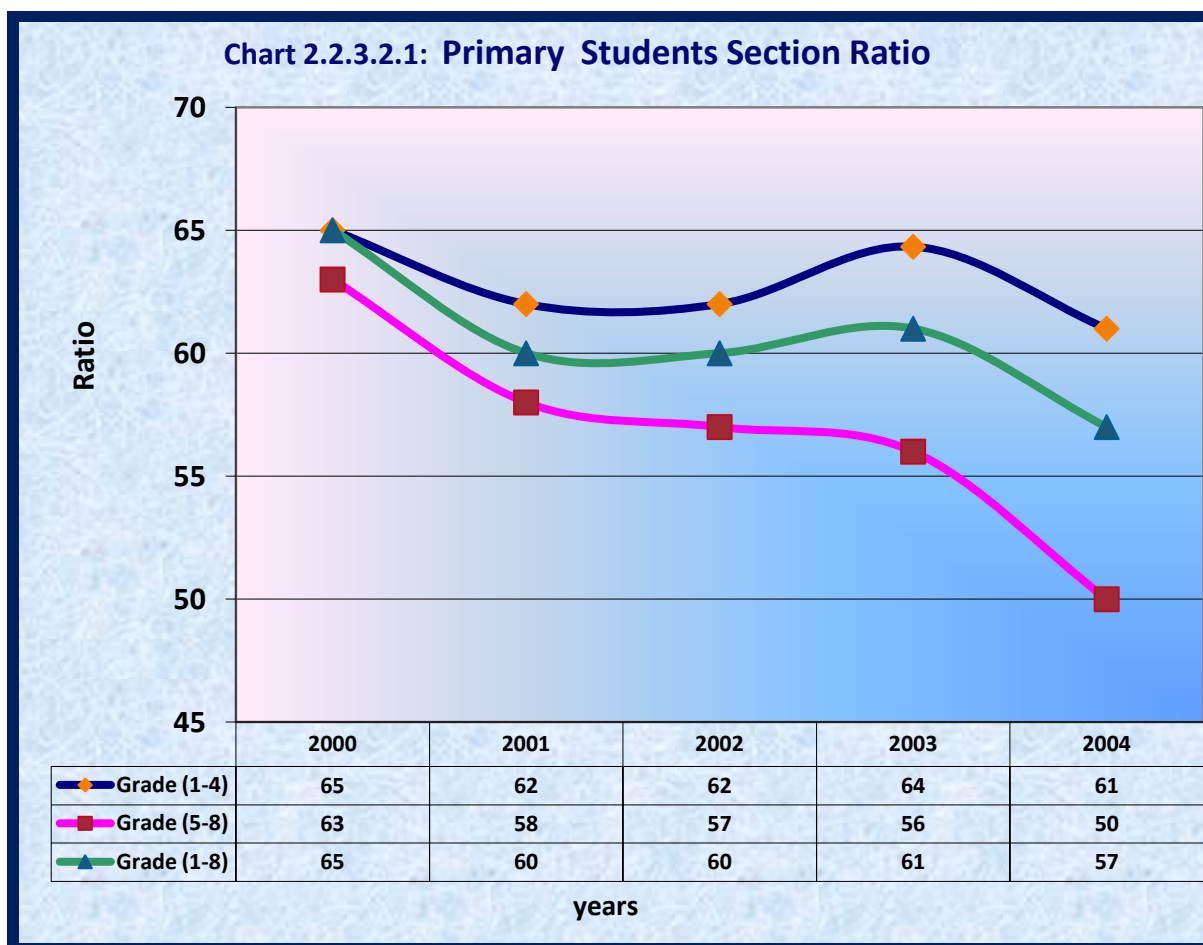

Furthermore, calculating pupils to teacher ratio by cycle also presents a more realistic view of pointing out the problems and gaps of the issue. In this regard, by 2004 E.C PTR at first cycle primary (1-4) has improved to 67:1, while in the second cycle primary (5-8) it was reached 43:1 and 57:1 for full primary (1-8). As shown on table.2.2.3.1.1 below Jima, East and West Hararge zones have PTR of 79:1, 76:1 and 75:1 which is quite far from the standard. Therefore, due attention from the concerned body is mandatory for the issue.

2.2.3.2. Pupil -Section Ratio (PSR)

It is one of the educational quality indicators that indicate average number of pupils per class. It gives a rough estimation of class size, assesses the efficiency of resource utilization and it also used to assess the teaching- learning process. The national standard of PSR is 50:1 for primary education. As one can see from chart 2.2.3.2.1 in the last five years, PSR in primary school has improved from 65:1 in 2000 E.C to 57:1 in 2004 E.C. additionally, PSR of 2004 E.C at regional and zonal level were illustrated on table 2.2.3.2.1.

As table 2.2.4.1 shows, among the primary schools of the region 43.71%, 64.36%, 15.89%, 59.62% of them have Library, Pedagogical Centre, Electric Power and water service respectively. Additionally, regardless of the quality standard all primary schools in the region reported that as they have latrines.

2.2.5. Finance of Primary Schools

Education in our country was financed through two step process. The first, involves fiscal transfers from the federal government to the regions and the second, from regional governments to *woredas*. Most transfers operate through large federal block grants which our region and *woredas* Finance and Economic Development Sectors may allocate freely. A ‘three parameter’ formula for grant allocation to the regions takes into account population size, poverty status and development levels. Our Regional Government also uses these three-parameter formulas to allocate the grant to *woredas*.

The financial information demonstrate on tables 2.2.5.1 to 2.2.5.2, are gathered from the schools by 2004 E.C annual questionnaire of the school Census. The tables indicate revenue of the region by zonal level. The data specify all about the information of primary education program of government and non-government school’s revenues.

2. 3. EFFICIENCY

Education system is said to be efficient if maximum output is obtained from a given input or if a given output is obtained with minimum possible input. The problems of measuring efficiency in education, however, are considerable. There are several indicators used to measure the efficiency of the education system.

2.3.1. Indicators of Internal efficiency with Different Profiling Methods

The Internal Efficiency Rate (IER) is the ratio of number of student's years that should be, ideally spent to carry out a certain number of students at the end of primary cycle out of the number of students-years effectively spent.

$$IER = \frac{\text{Student's years that should be ideally spent}}{\text{Number of student's years effectively spent}}$$

Internal Efficiency Rate (IER) is calculated with different methods such as Transverse, Longitudinal and Pseudo-Longitudinal Methods,

I. Methods of Calculating IER by Transverse Method

$$IER = \frac{(\text{Survival Rate (Transverse Method) for the final grade}) * (\text{Duration (in years) of the education level})}{\text{SUM of Survival Rates (Survivors) From the first to the final grade of the same education level}}$$

$$IER = \frac{SR_G8 * 8}{SR_G1 + SR_G2 + SR_G3 + SR_G4 + SR_G5 + SR_G6 + SR_G7 + SR_G8}$$

SR_G1: Survival Rate for Grade1,

SR_G8 = Survival Rate for Grade8

II. Methods of Calculating IER by Longitudinal Method

$$IER = \frac{(\text{Survival Rate (Longitudinal Method) for the final grade}) * (\text{Duration (in years) of the education level})}{\text{SUM of Survival Rates (Survivors) From the first to the final grade of the same education level}}$$

III. Methods of Calculating IER by Pseudo-Longitudinal Method

$$IER = \frac{(\text{Survival Rate (Pseudo-Longitudinal Method) for the final grade}) * (\text{Duration (in years) of the education level})}{\text{SUM of Survival Rates (Survivors) From the first to the final grade of the same education level}}$$

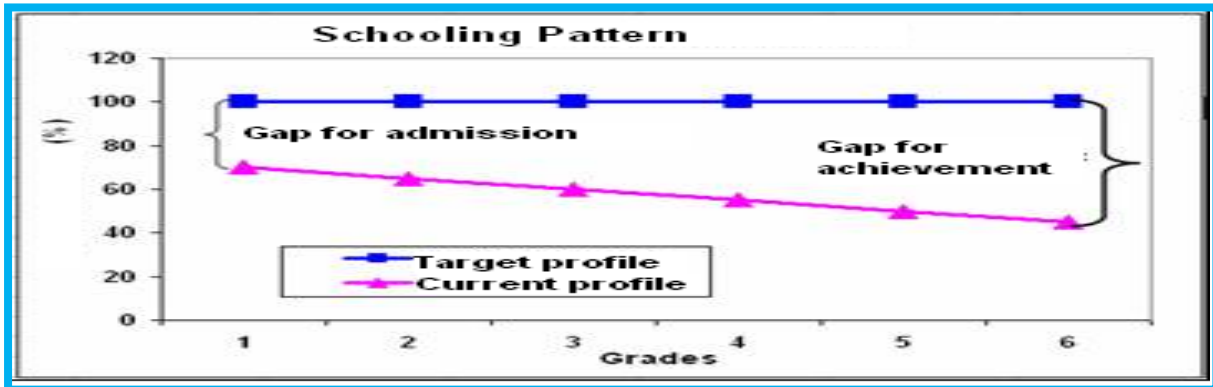

Table 2.3.1.1: Internal Efficiency Rate (IER) with Different Method									
Internal Efficiency Rate (IER) with Transverse Method									
Grades	G1	G2	G3	G4	G5	G6	G7	G8

Survival Rates/Retention Rates	100.0	85.0	67.0	57.5	47.6	39.5	35.9	29.1	
Efficient Students-years	233								
Effective Students-years	462								
IER	0.50								

2.3.2. Interpretation of the Internal Efficiency Rate

Internal Efficiency Rate is a number between 0 and 1. The more this ratio is close to 1, the more the system is efficient. It is complementary to 1 (1-IER) is interpreted as the percentage of resources wasted, because these resources have been used to finance dropouts and repeaters.

2.3.2.1. Schooling Profile /Enrolment Pattern/

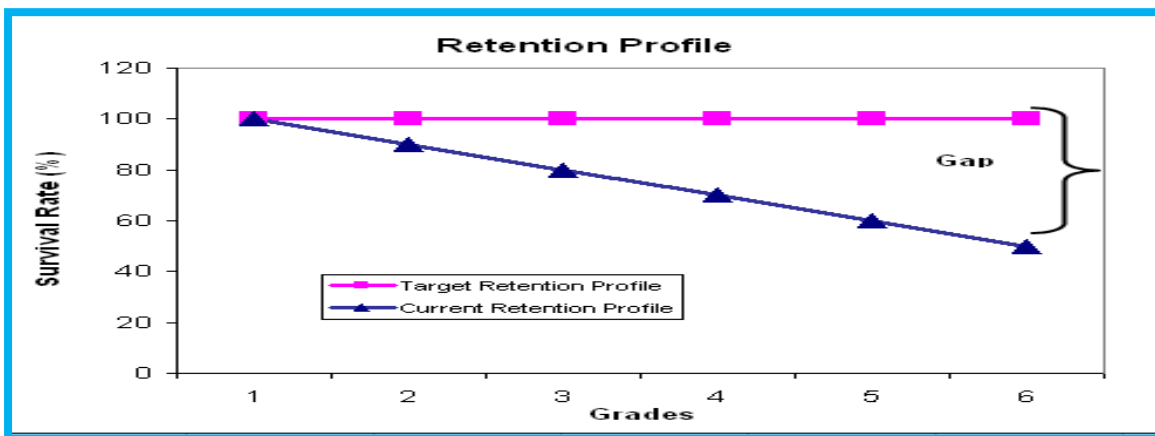

The schooling profile is, constituted of Age-Specific Enrolment Ratio for a given cycle of education system.

The schooling pattern interpreted us the student flow through the education cycle. Its trend determines the efficiency of the system to keep students in the system until they complete their schooling

2.3.2.2.Retention Profile

The retention profile is, constituted by the series of survival rate at each grade level. It measures the capacity of the system to keep students in the system until they complete their schooling. Data required to determine retention profile are Enrolment and News entrants by grade at least for two years

2.3.2.3.Survival Rate (SR)

A survival rate approaching 100% indicates a high level of retention and low incidence of dropout. Survival rates may vary from grade to grade, giving an indication of grades with relatively more or less dropouts. The distinction between survival rates with and without repetition is necessary to compare the extent of wastage due to dropout and repetition.

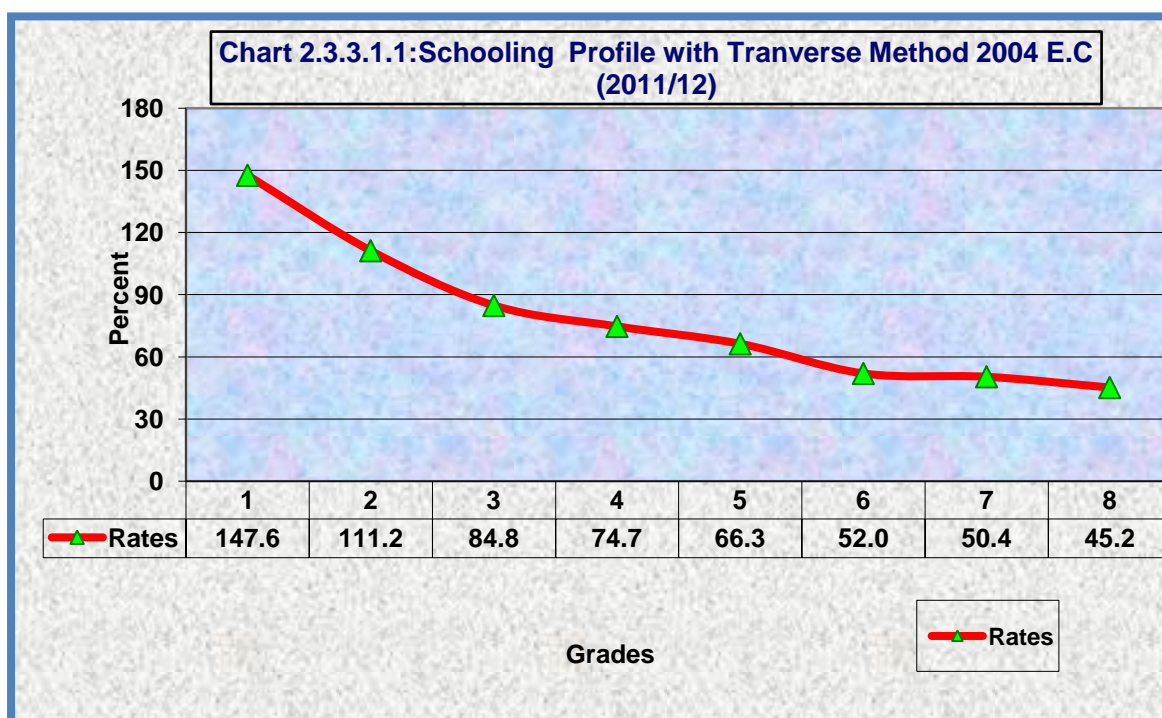

2.3.3. Different Types of Schooling Profiles and Retention Profiles:

There are different types of schooling profiles, which determine Age-Specific Enrolment Ratio for a given cycle of education system namely; Transverse, Longitudinal method and Pseudo-longitudinal method.

2.3.3.1. Transverse method

Data required for Transverse method are, new entrants by grade and population at official age corresponding to each grade. Let a look, the 2004 schooling profile with this method

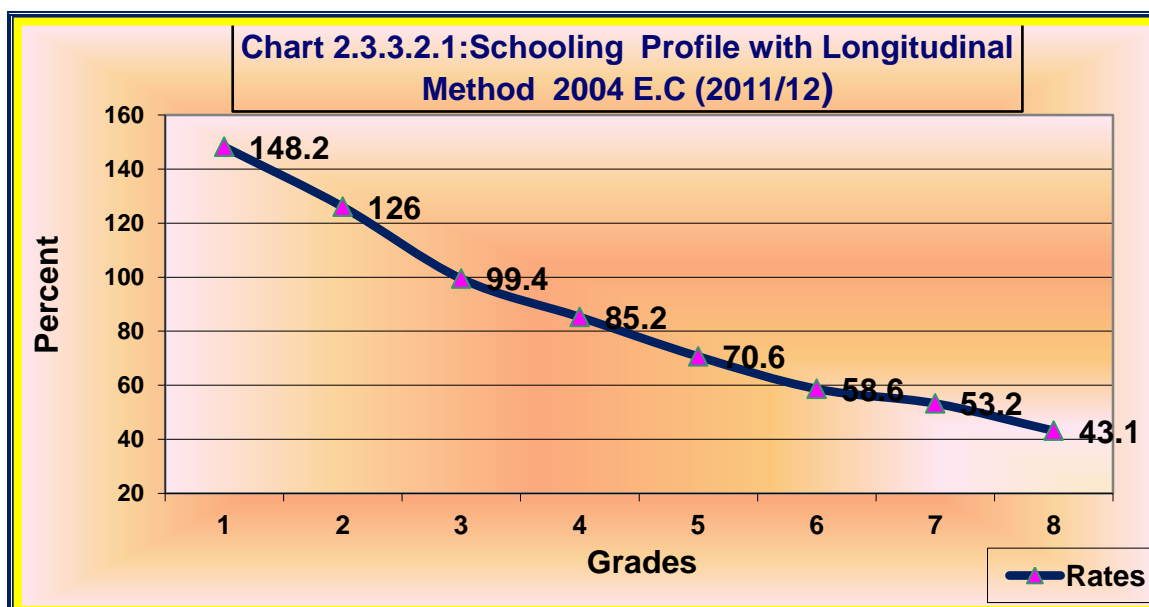

Year 2004 E.C	G1	G2	G3	G4	G5	G6	G7	G8
Enrolment	1578930	1127580	834977	721410	614466	461089	443629	369262
repeaters	152710	87021	66604	67770	54590	37143	47135	27113
Readmiters	19102	15377	12912	11272	10216	7787	7520	4581
New Entrants	1407118	1025182	755461	642368	549660	416159	388974	337568
Ages	7	8	9	10	11	12	13	14
School-Age Population, 2003 E.C	953515	922111	891009	860054	829092	799704	772605	747061
Schooling profile,	147.6%	111.2%	84.8%	74.7%	66.3%	52.0%	50.3%	45.2%
(Retention Rate/Survival Rate)	100.0	72.9%	53.7%	45.7%	39.1%	29.6%	27.6%	24.0%

2.3.3.2. Longitudinal Method

Data required for Longitudinal Method are, new entrants by grade for consecutive years of the total duration of education level. For instance, in Ethiopia, we need data for 8 consecutive years and population at the official school entrance age, 8 years ago to implement this method.

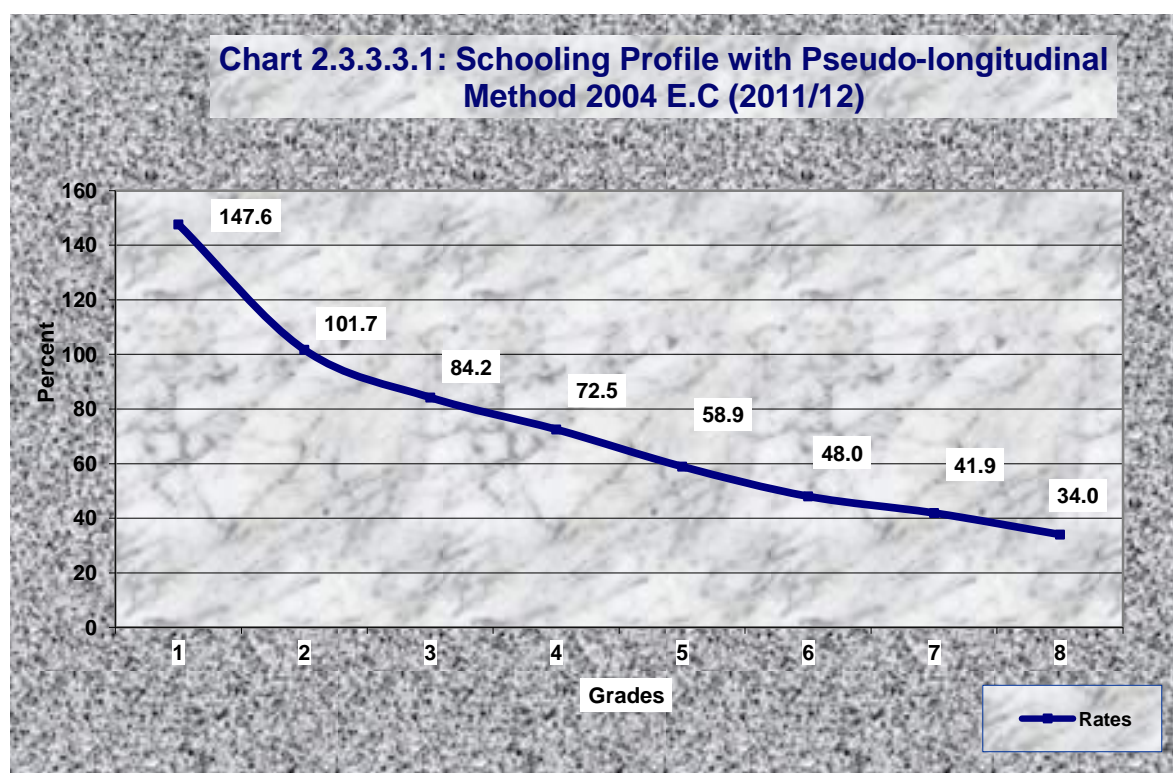

Table 2.3.3.2.1: Schooling profile Longitudinal Method 2004 E.C (2011/12)								
Population with 7 years old in 1997	753,817

2.3.3.4. Both Schooling Profiles with Chart

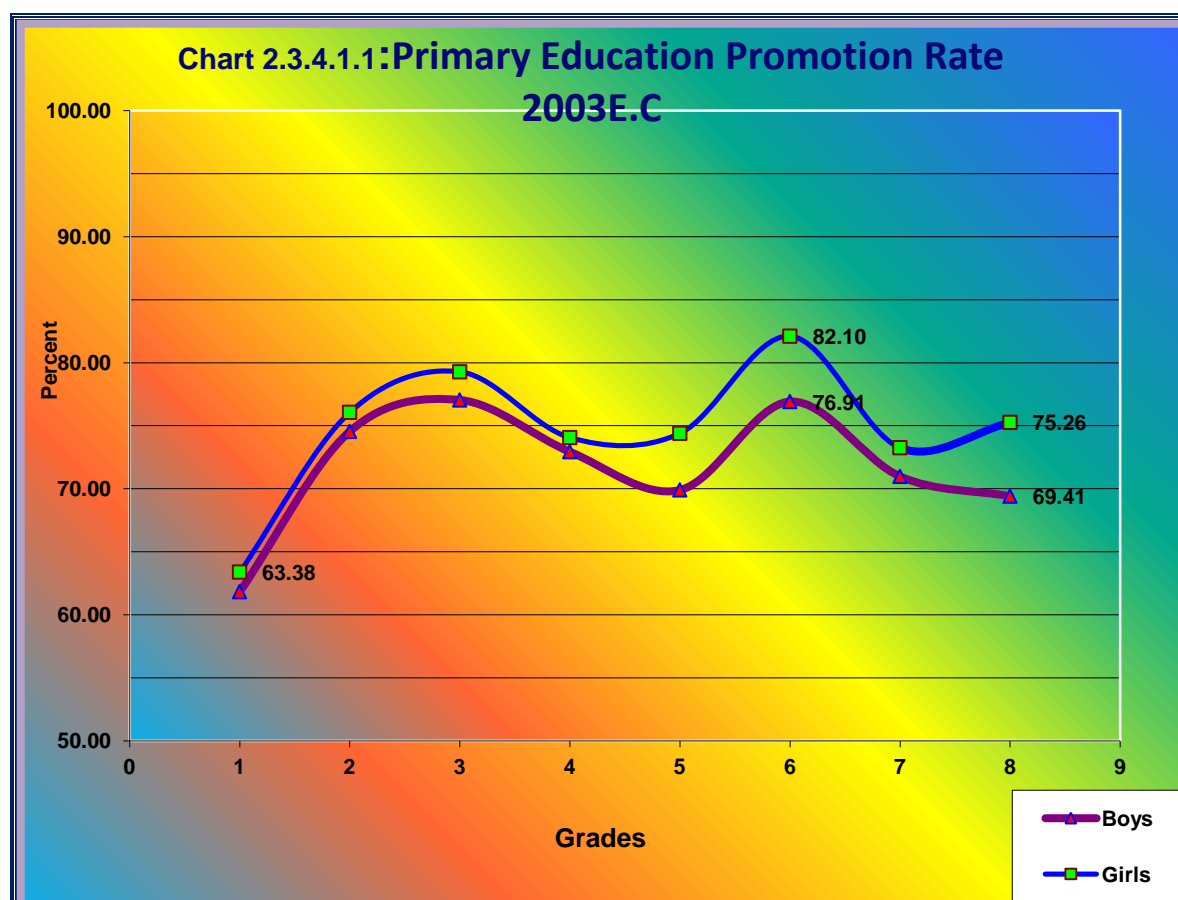

2.3.4. Internal Efficiency and Flow Rate

Promotion, Repetition and Dropout rates are the three paths of student flow from grade to grade and characterize the efficiency of the education system in generating graduates. These rates are used for evaluating, monitoring and projecting the efficiency of students flow in our education systems. In this publication the primary education system of Oromia can be evaluated in terms of internal efficiency indicators.

2.3.4.1. Promotion Rate (PR)

Promotion Rate is the proportion of pupils enrolled in a given grade that reach the next grade in the following year. The data required in this calculation is new entrants in grade **j** for year **T** and enrolment in grade **j-1** for year **T-1**. It is also interpreted as a high level of promotion rate indicates a high level of retention or survival rate.

$$PR = \frac{\text{New entrants in grade } j \text{ for year } T}{\text{Enrolment in grade } j-1 \text{ for year } T-1} \times 100$$

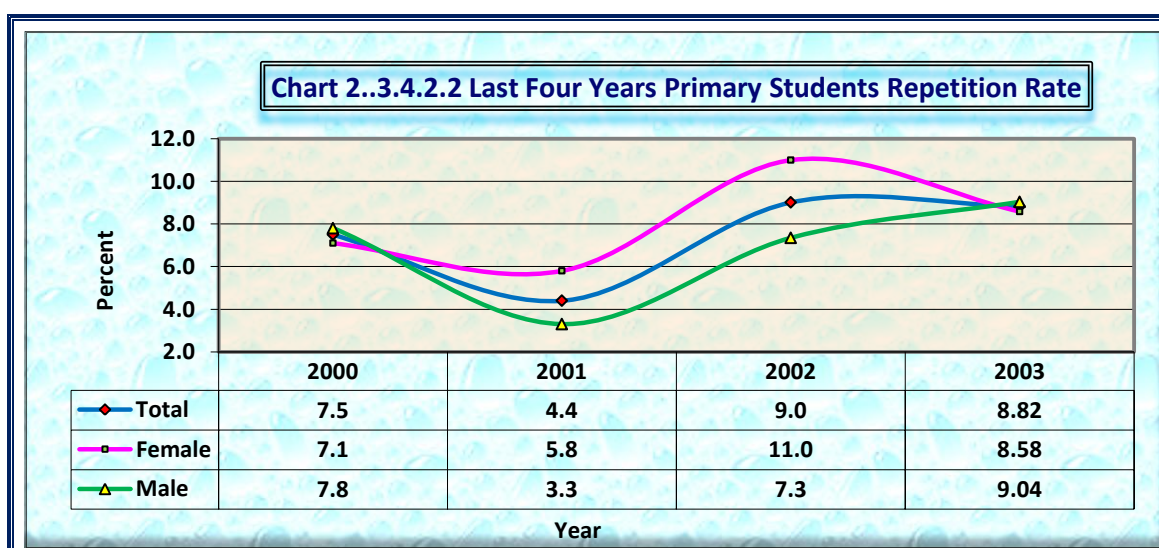

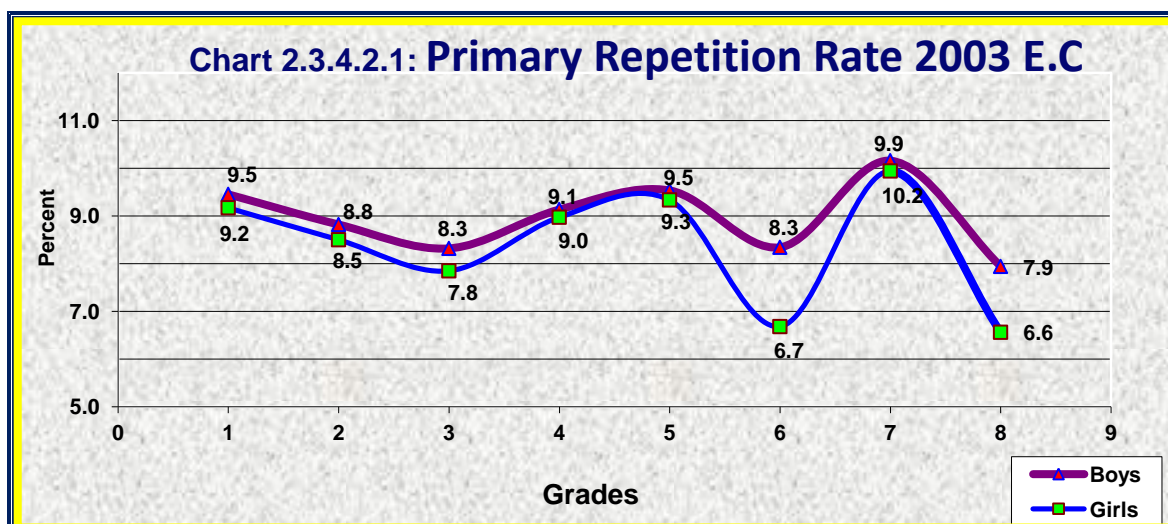

2.3.4.2. Repetition Rate (RR)

Repetition Rate is the proportion of pupils enrolled in a given grade for a given year who studies in the same grade for the following year. Data required for this calculation is repeaters of grade *j*, in year *T* and enrolment of grade *j* of year *T-1*. It is interpreted as a high level of the repetition rate indicates a high level of repetition of grades. The problem of repeating has impact on the system because.

1. Repeating has wasted the resources they have used while they repeat in the same grade.
2. They occupied a school space that can be used by the other new comers. The formula to calculate Repetition Rate

$$RR = \frac{\text{Repeaters of grade } j, \text{ year } T}{\text{Enrolment of grade } j, \text{ year } T - 1} \times 100$$

2.3.4.3. Dropout Rates (DR)

Dropout Rate is proportion of pupils who withdraw from education system for more than one year. It corresponds to the difference between one and the sum of promotion rate and repetition rates. Data required for the calculation of dropout are, Promotion Rate and Repetition rate. High dropout rate constitute, interpreted as an obstacle in the achievement of UPE. Dropout problem has different impact on the system because

1. Dropouts have wasted the resources.
2. They occupied a school space, which could use the other new comers.
3. They have not acquired the minimal levels of literacy and numeracy.

The method to calculate dropout is the following;

$$\text{Drop-out Rate} = (100 - \text{promotion rate} - \text{repetition rate})$$

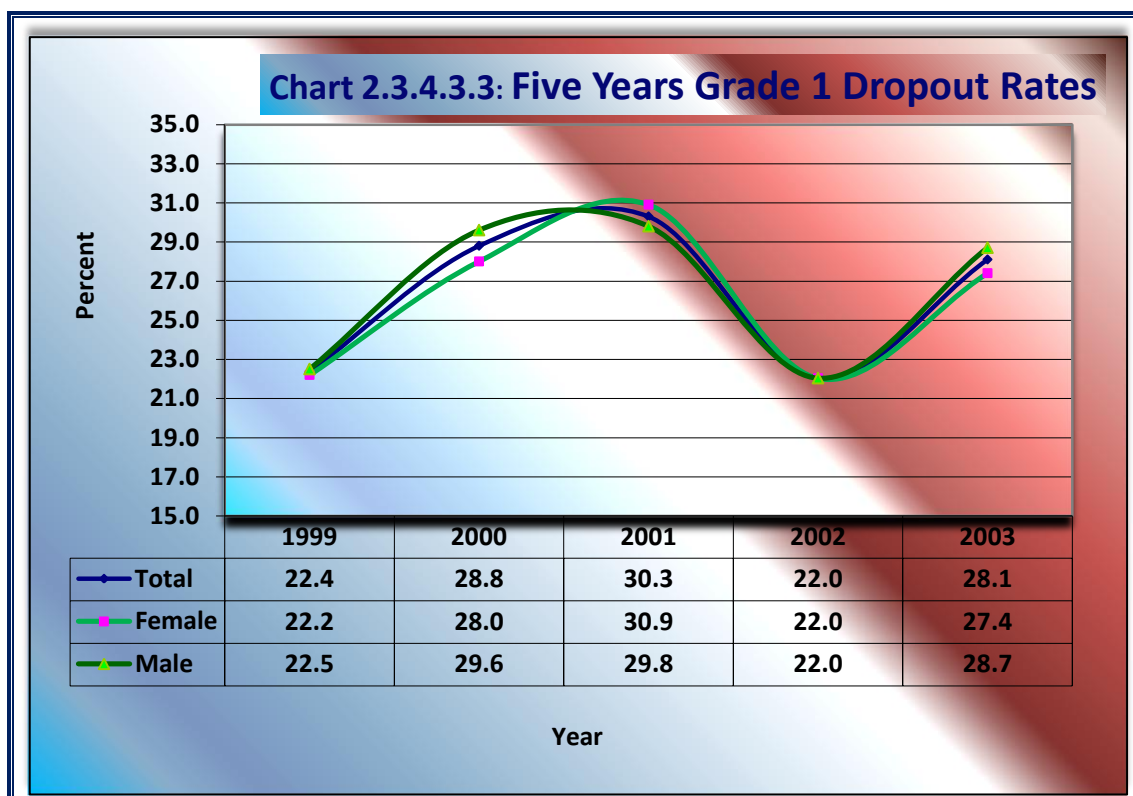

Table 2.3.4.3.1: Primary Students Dropout Rate By Zone 2003 (2010/11)

Name of Zones	Grade (1-4)			Grade (5-8)			Grade (1-8)		
	M	F	T	M	F	T	M	F	T
Adama /Town/	2.7	4.8	3.8	8.5	8.5	8.5	5.6	6.7	6.2

Wellega East	21.2	17.9	19.6	16.7	15.2	16.0	19.5	16.9	18.2
Wellega West	14.3	12.3	13.4	15.3	13.0	14.2	14.7	12.6	13.7
Total Oromiya	23.7%	22.4%	23.1%	19.5%	16.1%	18.0%	22.4%	20.5%	21.5%

As chart 2.3.4.3.3 demonstrates, grade one dropout rate is 30.3% by 2001 E.C. But in following year the dropout rate at regional level has decreased to 22.0%. However by 2003 E.C the rate climbed up again to 28.1%. Therefore, the data shows as it needs considerable attention by the concerned bodies, to minimize the educational wastage happens because of dropout. From this data one can understand that grade one dropout rate has been fluctuating for the last three years.

Rates	(1-4)			(5-8)			(1-8)		
	Boys	Girls	Total	Boys	Girls	Total	Boys	Girls	Total
<i>Promotion Rates</i>	67.3%	68.9%	68.0%	71.4%	75.6%	73.3%	68.6%	70.9%	69.7%
<i>Repetition Rates</i>	9.0%	8.7%	8.9%	9.1%	8.3%	8.7%	9.0%	8.6%	8.8%
<i>Dropout Rates</i>	23.7%	22.4%	23.1%	19.5%	16.1%	18.0%	22.4%	20.5%	21.5%

2.3.4.4. Transition Rate (TR)

Transition Rate is new entrants to the first grade of the end of primary second cycle (5th grade) or the beginning of secondary first cycle (9th grade) in a given year, expressed as a percentage of the number of pupils enrolled in the final grade of primary first cycle or primary second cycle education in the previous year respectively. Data required for calculating is new entrants in first grade of primary second cycle or first grade of secondary first cycle for a given Year **T**, and Total Enrolment in final grade of primary first cycle or primary second cycle for Year **(T-1)**. For example, if the increment of transition rate of primary students to secondary is raised, in the same way the proportion of pupils from primary education who reaches secondary education also elevated up. Method of calculation for **TR** is the following;

$$\text{TR to 5}^{\text{th}} = \frac{\text{New entrants in 5 th for Year T}}{\text{Enrolment of 4 th for Year T - 1}} \times 100$$

$$\text{TR to 9}^{\text{th}} = \frac{\text{New entrants in 9th for Year T}}{\text{Enrolment of 8th for Year T - 1}} \times 100$$

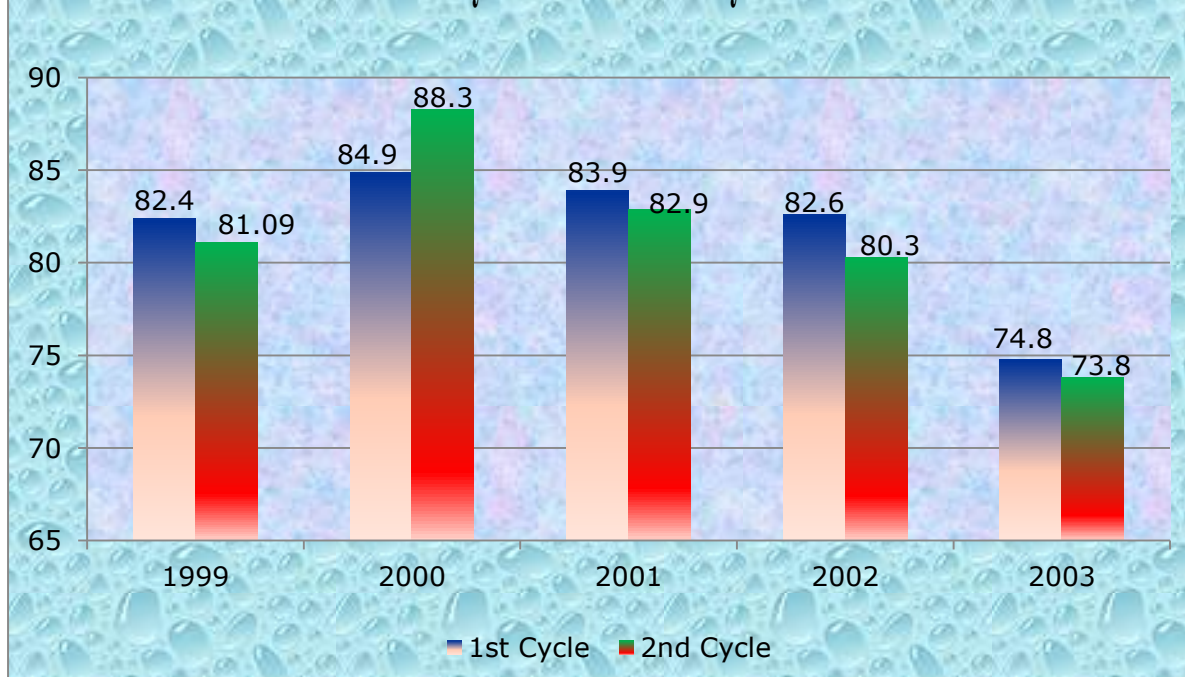

Table 2.3.4.4.1: Transition Rate of First Cycle Primary 2004 (2011/12)

Gender	Enrolment Grade 4 th 2003	Enrolment Grade 5 th 2004	Repeaters Grade 5 th 2004	Transition Rate 2003
Boys	395639	324738	29687	74.58
Girls	352614	289728	24903	75.10
Total	748253	614466	54590	74.82

Table 2.3.4.4.2: Transition Rate of Complete Primary 2004 (2011/12)

Boys	206372	174659	27317	71.4
Girls	163522	146023	20562	76.7
Total	369894	320682	47879	73.8

Chart 2.3.4.4.1: Transition Rate of Primary Education of Last Five years

2.3.4.5. Primary Completion Rate

Primary Completion Rate is highly dependent on the accuracy of the single age population for both points of measurement (for Grade 8, age 14 and for Grade 5 age 11) Table 2.3.4.5.1; shows the Completion Rates for both Grade 5th and Grade 8th. The Primary Completion Rate is internationally an established measure of the outcomes of an education system and calculated with the following method.

$$\text{Completion Rate} = \frac{\text{New entrant in last Grade}}{\text{Population official age in last grade}}$$

Where “New entrant in last Grade”= (total pupils in last Grade – repeaters in last Grade)

ZONE	Grade 5th Completion Rate			Primary Completion Rate

2.4. COHORT ANALYSIS

Cohort analysis is based on the three basic flow rates namely repetition, promotion and dropout rates, we evaluate by it the effectiveness of our education system. There is a number of assumptions made to interpret the results of calculations of indicators of internal efficiency, in order to understand the limitations of the model. To perform cohort analysis it is imperative to have at hand indicators like survival rate by grade, indicators of the duration of the study, and indicator of the wastage. This cohort method allows us to predict future trends of the education system.

➤ **Assumptions behind cohort analysis**

1. Only cohort of 1000 pupils is considered and no re-entrants admitted. Assuming that new entrants admitted at grade one, and no in-migration or out- migrations throughout the cohort years.
2. It also assumes that no pupil skips a grade, i.e., there is no double promotion.
3. The same flow rates apply to all pupils enrolled in a given grade, regardless of whether a pupil has reached that grade directly or only after a number of repetitions. This assumption is sometimes, referred to as the assumption of homogeneous behavior.
4. Pupils in a grade are, allowed to repeat only twice. This is in line with existing policy. However, in reality, a pupil may repeat a grade more than twice. In this case, the assumption remains constant and allows only for the repeating of the grade twice.

2.4.1. Flow Rate of Primary Education in Cohort System

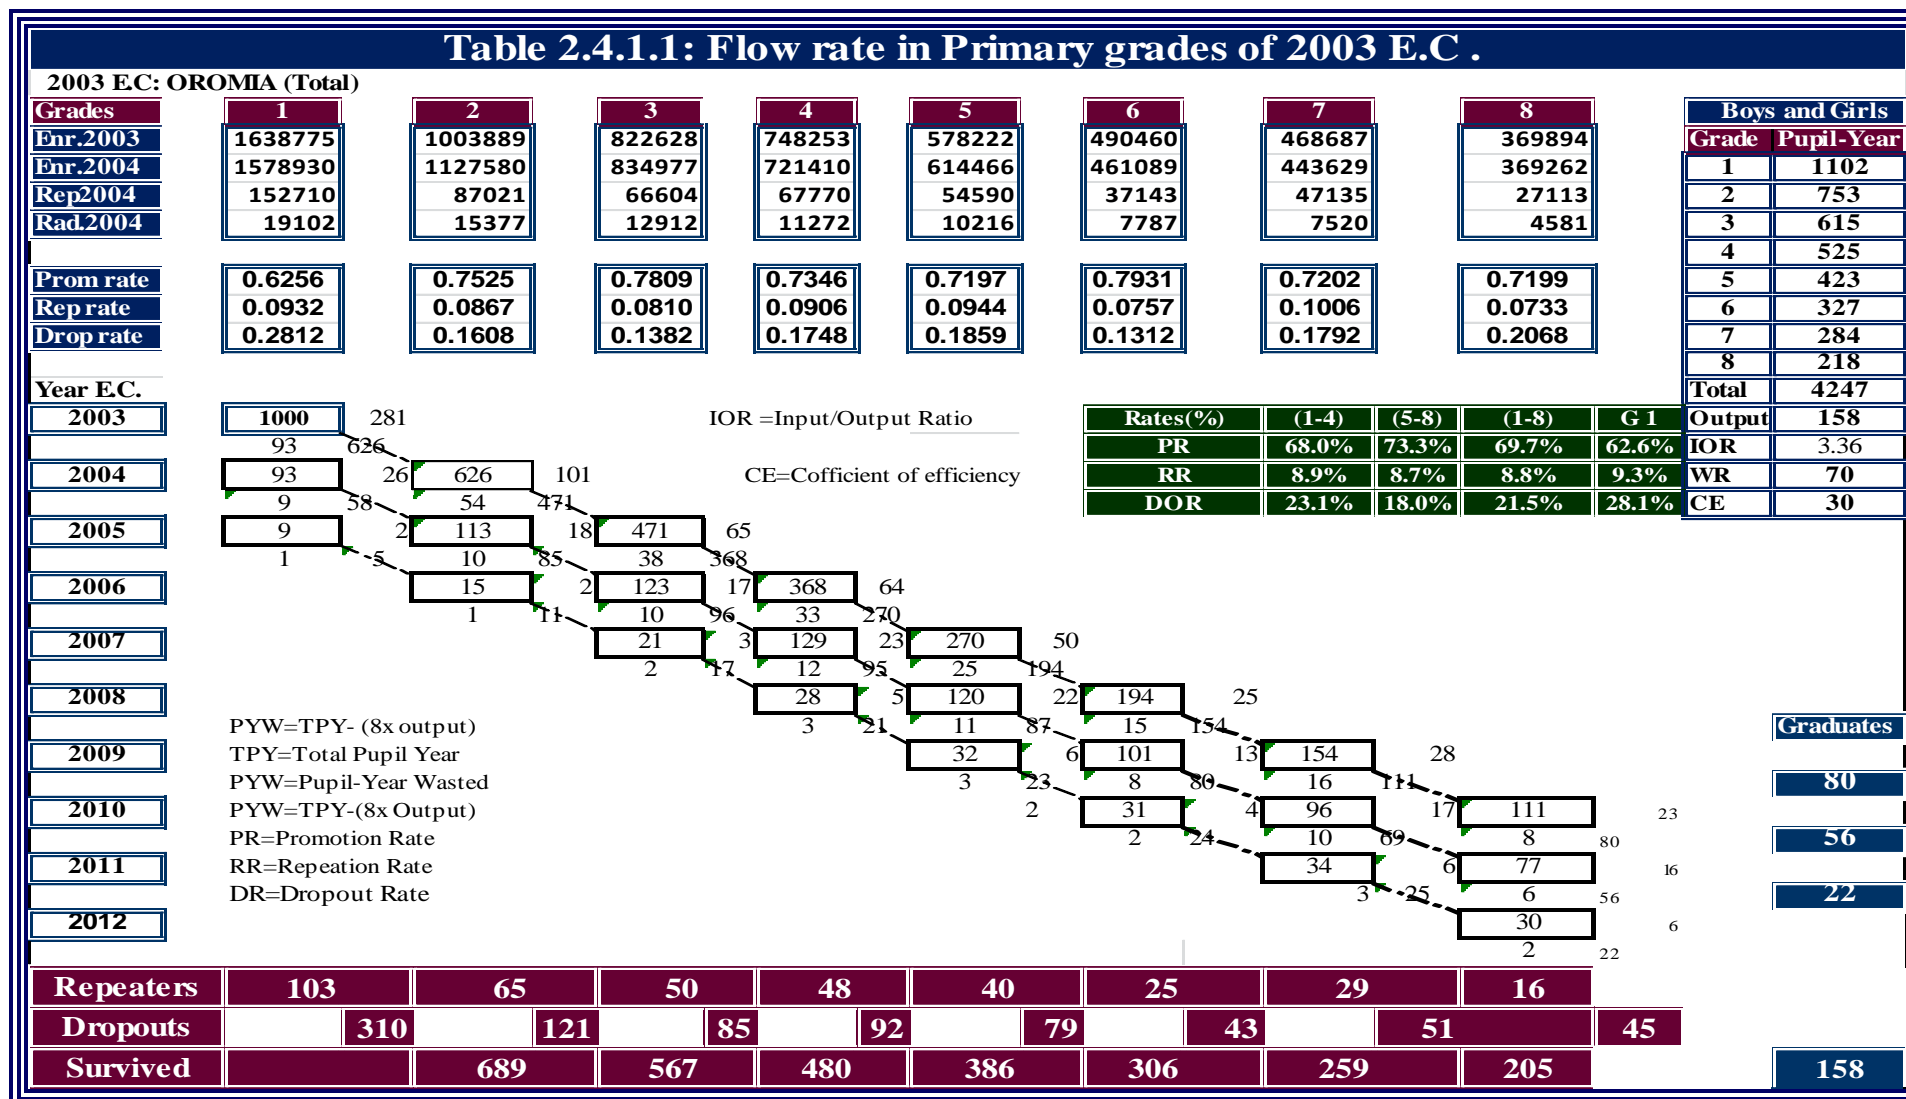

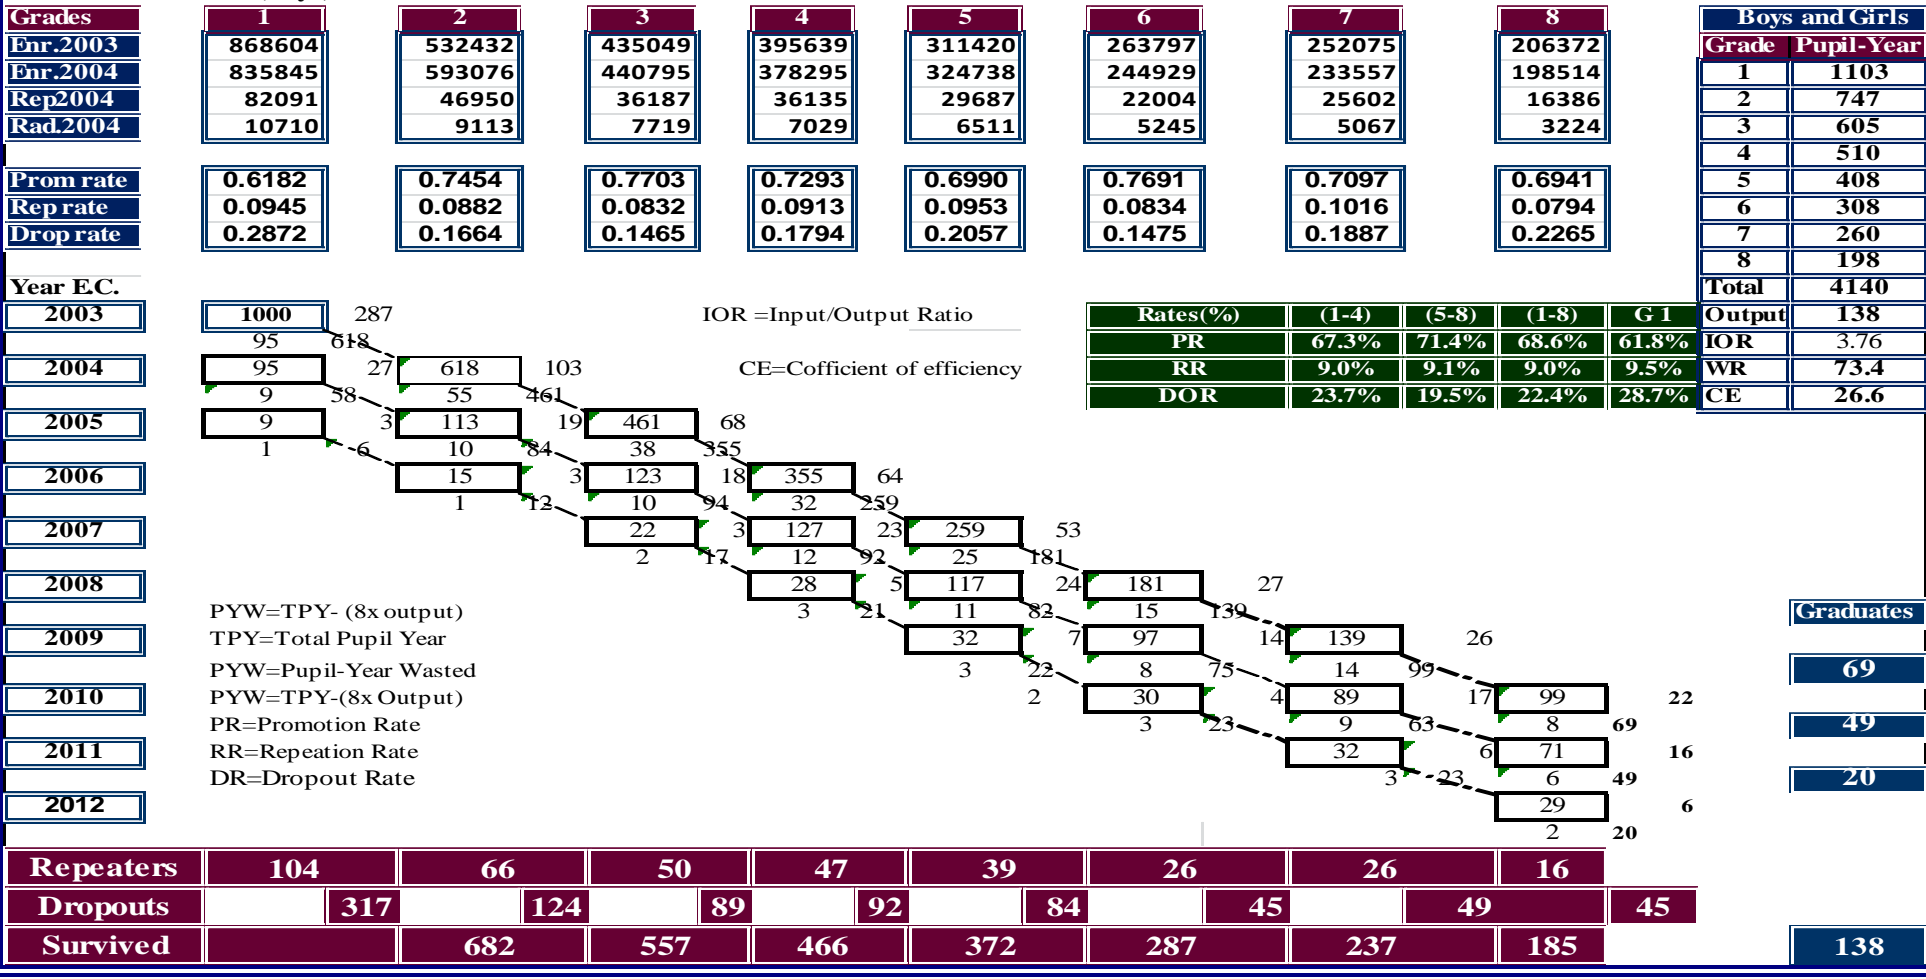

Table 2.4.1.2: Flow rate in Primary grades of 2003 E.C.

2003 EC OROMIA (Boys)

2.4.2. Internal Efficiency of the Cohort in Primary Education

I. Pupils Year By Grade Of The Cohort

Table 2.4.2.1: Pupils Year by Grade of Cohort Analysis								
Sex	Grade							
	1	2	3	4	5	6	7	8
Boys	1103	747	605	510	408	308	260	198
Girls	1100	761	626	542	440	348	313	243
Total	1102	753	615	525	423	327	284	218

II. INDICATORS OF RETENTION BY GRADE OF THE COHORT

a. Survival Rate of the Cohort

The purpose of survival rate is to measure the holding power and internal efficiency of the education system. It illustrates the situation regarding retention of pupils from grade to grade in school, and conversely the magnitude of dropout by grade. Survival rate is the proportion of cohort pupils who reached the subsequent grade expressed as a percentage of pupils enrolled in the first grade of a given cycle in a given school year. It also used to measure the impact of repetition and dropout on internal efficiency. Survival by grade obtained by adding the number of pupils who eventually will promoted to the next higher grade. In each grade, some pupils promoted to the next grade without repeating a grade and others after repeating once or twice.

Table 2.4.2.2: Rates of Survival by Grade from the Cohort Analysis								
Sex	Grade							
	1	2	3	4	5	6	7	8
Boys	68.22	55.66	46.61	37.21	28.72	23.71	18.47	13.76
Girls	69.73	57.85	49.63	40.16	32.93	28.59	22.96	18.32
Total	68.93	56.69	48.02	38.58	30.64	20.47	20.47	15.73

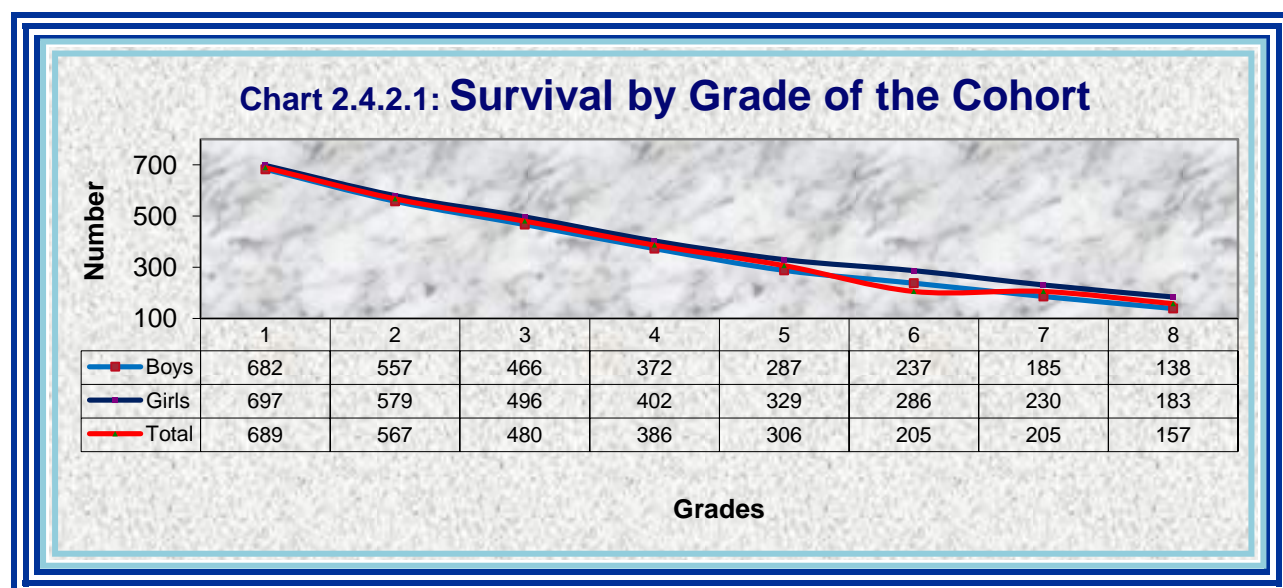

As the table 2.4.2.2, shows among 1000 students enrolled in grade 1, only 68.9% are survived in the cohort. The rest 31.1% left the school before completing grade 1. Only about 30.58% (Boys=37.21% and Girls= 40.16 %) students survived to complete first cycle primary.

From the 1000 pupils who started the cohort only 15.73% (Boys=13.8%, Girls= 18.3 %) will finally survived at grade 8th. This constitutes 84.3% of students leave the system without completing primary education. So we can imagine how the issue needs serious attention from the concerned bodies and policy makers to fill this wide gap of educational wastage.

Table 2.4.2.3 :Number of Pupils Survived in Each Grade of the Cohort

Sex	Grade							
	1	2	3	4	5	6	7	8
Boys	682	557	466	372	287	237	185	138
Girls	697	579	496	402	329	286	230	183
Total	689	567	480	386	306	205	205	157

Chart 2.4.2.1: Survival by Grade of the Cohort

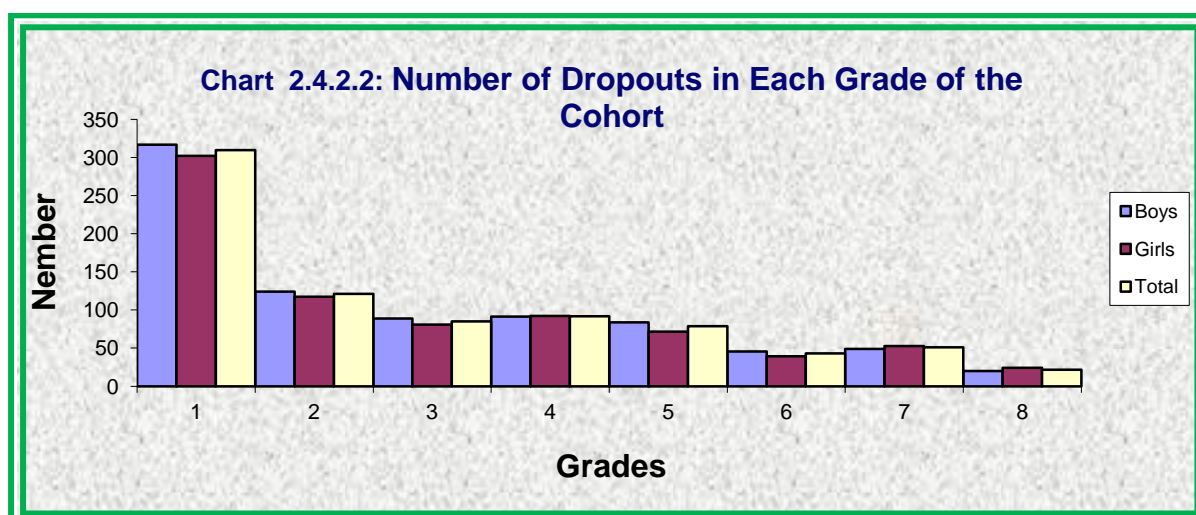

b. Dropout by Grade of the Cohort

Dropout is the proportion of students who leave the system at each grade. Dropout is the most serious problem in education system. The cohort data on the table 2.4.2.5 shows, among the cohort of 1000 pupil, 310 of them left the school before completing grade one.

Table 2.4.2.4: Percentage of Dropout by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
Boys	31.70	12.42	8.86	9.15	8.39	4.55	4.91	1.98
Girls	30.19	11.75	8.06	9.21	7.15	3.91	5.27	2.41
Total	30.99	12.11	8.50	9.18	7.86	4.28	5.09	2.18

Most of the students leave the system early in grade 1 and 2. About 30.9% of the cohort leaves the system before completing grade one. Majority of children leave the system at an early stage compared to dropouts at upper grades. This is an undesirable situation, to which planners and decision makers should pay immediate attention to the issue.

Table 2.4.2.5: Number of Dropout by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
Boys	317	124	89	92	84	45	49	20
Girls	302	117	81	92	72	39	53	24
Total	310	121	85	92	79	43	51	22

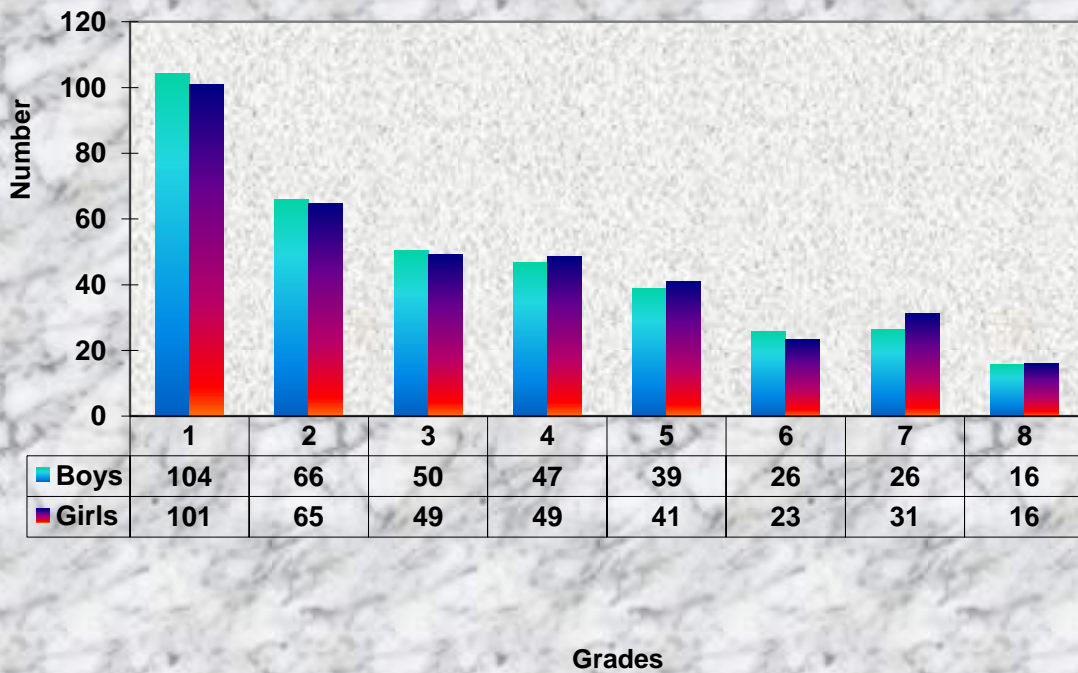

c. Repeaters by Grade of the Cohort

The cohort data on the Table 2.4.2.6 shows that, among the cohort of 1000 pupils 103 of them repeated at grade one.

Table 2.4.2.6: Repeaters by Grade of the Cohort

Sex	Grade							
	1	2	3	4	5	6	7	8
Boys	104	66	50	47	39	26	26	16
Girls	101	65	49	49	41	23	31	16
Total	103	65	50	48	40	25	29	16

Chart 2.4.2.3: Number of Repeaters of the Cohort by Grade

As Table 2.4.2.7 shows, 10.3 % of the cohort repeats at grade 1. The majority of children repeat in the early grades, compared to repeaters at the upper one.

Table 2.4.2.7: Percentage of Repeaters by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
Boys	10.4	6.6	5.0	4.7	3.9	2.6	2.6	1.6
Girls	10.1	6.5	4.9	4.9	4.1	2.3	3.1	1.6
Total	10.3	6.5	5.0	4.8	4.0	2.5	2.9	1.6

d. Number of Graduates from the Final years of the Cohort

Graduates from the final year is the number of pupils who eventually graduate (Complete) from the final year of the cycle. In other words, those who successfully complete first cycle primary of 4 years of study and promoted to the first grade of second cycle primary (Grade 5). Otherwise, those who successfully complete second cycle primary of 8 years of study and promoted to first cycle secondary (Grade 9). According to the cohort, out of **1000** pupils registered in 2003 at grade one, 368 pupils will graduate grade 4 by 2006 E.C, without repeating any grade during their stay in school. Another 128 pupils will graduate grade 4 after repeating once and 28 of them graduated after repeating twice in any of the grades. Total number of graduates of first cycle primary for this cohort is 524.

Similarly 80 pupils will graduate grade 8 by 2010 without repeating, 56 pupils will also graduate grade 8 by 2011 by repeating once, finally 22 pupils will graduate grade 8 by 2012 by repeating any of the grade twice. Therefore, in primary schools of Oromia, the possible number of pupil graduates from the complete primary system or grade 8 is only 158. In other words, only about 15.8% of the pupils who started the cohort of 8 years will be able to complete 8 years of education, whereas, 842 (84.2%) pupils were not successful completing primary education in the cohort flow system. Therefore, Educational planners, policy makers, decision makers, stakeholders and communities must work towards finding the solutions to improve this huge gap.

Wastage Due to repetition	14.0%	8.1%	7.5%

3. Secondary Education

3.1. Equitable Access of Secondary Education

Access is the extent to which the secondary school age population is able to join this particular level of education. Equity implies a reduction in disparities based on gender (Male/Female) and geographical location (Urban/Rural). Equity also ensures that, all students in every school will be able to avail themselves of the services, technology, materials and the qualified teaching staff that able to achieve educational success. Beside this, it indicates fairness in the distribution of opportunities for education, and is the main indicator that shows educational performance.

Secondary education is composed of two cycles. They are General Secondary Education (9-10) and Preparatory classes (11-12). General secondary education (9-10) is designed to continue the basic programs of the primary level, but the teaching is typically more subject focused and requires more specialized teachers for each subject area. The end of this level often coincides with the end of compulsory education. A preparatory class (11-12) is the final stage of secondary education and the entry point of higher institution. So that, instruction is often organized and even more along subject lines and teachers, typically need a higher or more subject-specific qualification. Let a look at different indicators of secondary education of our region.

3.1.1. Gross Enrolment Rate (GER) of General Education Grade (9-10)

GER of general secondary education (Grade 9-10) is the proportion of all enrolments regardless of age out of the school age population at this level. It compares the total number of students in the general secondary school with the school-age population of this level.

In Ethiopia, the official school age for secondary first cycle is 15-16 years old. As shown in chart, 3.1.1.1 the GER of secondary first cycle in 2000 E.C was 39% and then increased to 40.3% in 2002 E.C with the annual growth rate of 0.59%. But, apparently the rate were slumped to 36.5% by 2004 E.C. The reasons for the highly dropped of GER were not yet identified through research. However, whatever the reason was it needs serious attention from the concerned bodies.

Chart: 3.1.1.1: GER of Secondary First Cycle (grade 9-10) for the Last Five Years

As shown from Table 3.1.1.1, the data demonstrate that, GER of 2004 E.C is 36.5% for secondary school (9-10) at regional level. From the same table we can see that there are also few Administrative towns that are having GER greater than 100%. Even though, we didn't identified with basic research yet, the major reason behind we suspect for the reason, why the GER of those administrative towns exceeds 100% were that, the students who are living in surrounding zones come to those towns to attend their high school education. Therefore, this may led to the increment of enrolment in secondary education at those areas.

3.1.2. Net Enrolment Rate (NER) in First Cycle Secondary (9-10)

For this level, we consider students enrolled in first cycle secondary whose age is (15-16) and compare it to the total number of population belonging to the mentioned age group. Chart 3.1.2 below indicates the NER of the past five years. For example at 2000 E.C. the NER of secondary (9-10) was 11.7% and rose to 15.4 % in 2004 E.C. As the data indicates NER of the level didn't show significant change during the last five years, so that the issue needs attention from the concerned body.

Chart: 3.1.2.1: NER of Secondary First Cycle for the Last Five Years

Table 3.1.2, shows NER of secondary (9-10) education at regional level by 2004 E.C. is 15.4%. Nine zones and all administrative towns have registered above the regional NER. Whereas, nine zones in the region have less than the regional average. Therefore hard work has to be done, to improve this huge gap in these zones in particular.

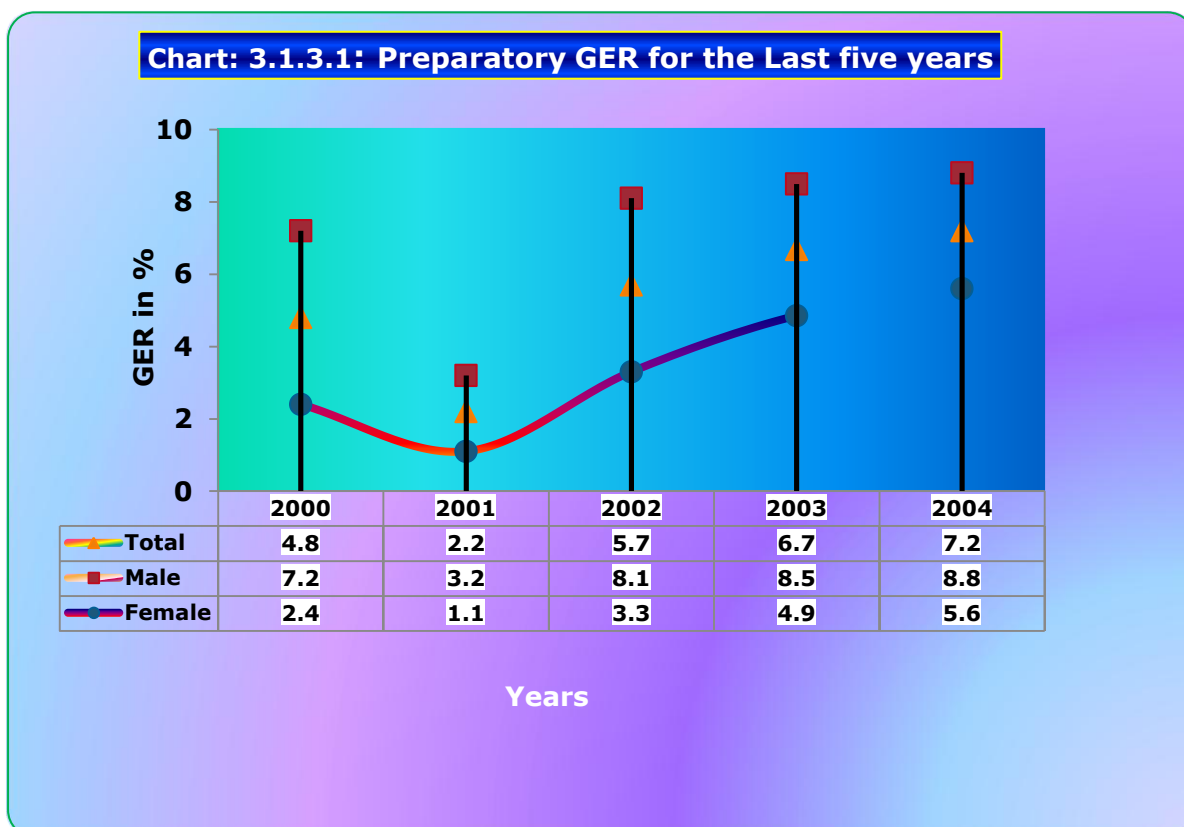

Concerning to gender gap, table 3.1.2.2 shows better improvement in the last five years. The gender gap of (9-10), dropped from 22.0% in 2000 E.C. to 7.2% in 2004 with AAGR of 32.2%. Whereas, the gender gap of (11-12), decline from 4.8% in 2000 E.C. to 3.2% in 2004 with AAGR of 10.7%.

Table 3.1.2.2: Secondary Education Gender Gap by GER for the Last Five Years						
Year	GER Secondary (9-10)			GER Secondary (11-12)		
	Male	Female	Gender Gap	Male	Female	Gender Gap
2000	50	28	22.0	7.2	2.4	4.8
2001	48.9	31.2	17.7	7.6	2	5.6
2002	47.1	33.4	13.7	9.5	5.2	4.3
2003	44.7	33.0	11.7	8.5	4.9	3.6
2004	40.1	32.9	7.2	8.8	5.6	3.2

3.1.3. Gross Enrolment Rate (GER) of Preparatory (Grade 11-12)

As shown in chart, 3.1.3.1 below, the GER of preparatory (11-12) have increased insignificantly for the last five years. For example it was 4.8% at 2000 E.C and then dropped to 2.2% in 2001 E.C (2007/08) and also increased to 7.2% in 2004 E.C (2011/12) with the average annual growth rate of 10.7%.

As indicated on table 3.1.3.1, all administrative towns and eight zones have GER greater than the regional average which is 7.2%. On the other hand ten zones of the region have GER less than the regional average. As the data indicates the issue needs due attention for improvement..

In pastoralist Woredas of the Region, GER of preparatory is much less than that of none pastoralist Woredas. But apparently, there are few Woredas those are having GER exceeding the rural areas regional average. As we can see from Table 3.1.3.2 below some pastoralist woredas have GER more than the rural (9-10) GER (3.7%) of Regional average. Among these areas, the three highest GER of pastoralist woredas are Moyale, Fentale and Wadera, having GER of (58.9, 51.5 & 31.7) respectively .Whereas, concerning to GPI, only there pastoralist woredas having GPI greater than that of rural Oromia regional average (0.60). As this indicator shows the issue needs due attention for better improvement.

3.1.4. Net Enrolment Rate (NER) of Preparatory (Grade 11-12)

As shown in chart 3.1.4.1 below, NER of Preparatory schools (Grade 11-12) has steadily increased for the last three years. For example it was 1.9% in 2001 E.C. and then rose to 3.4% in 2004 E.C. with AAGR of 21.4%.

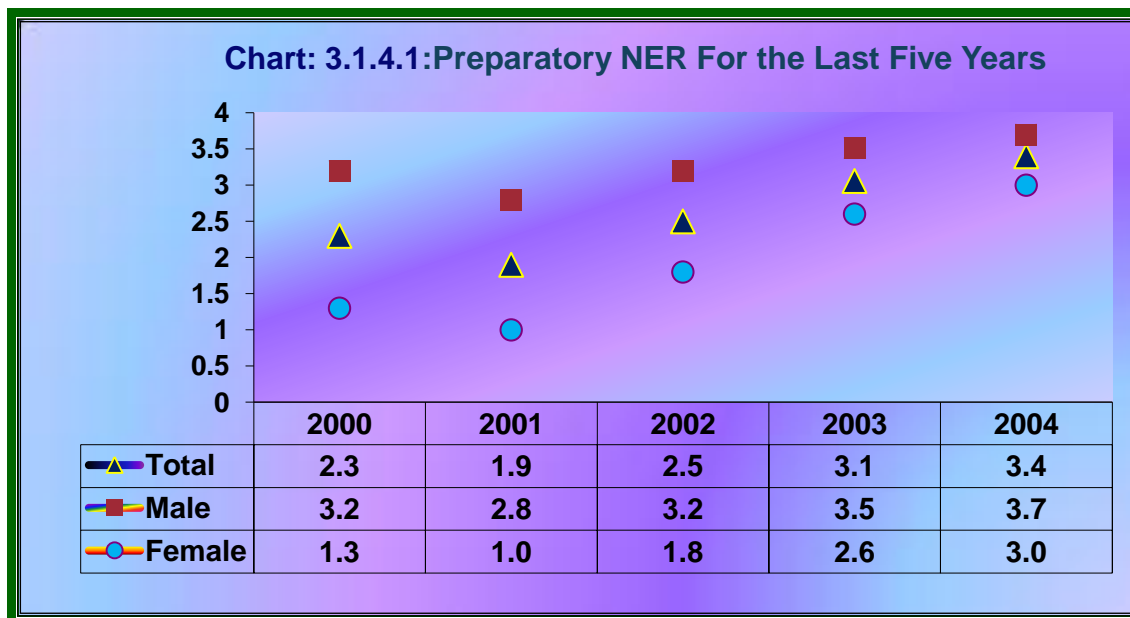

Table 3.1.4.1 also shows NER and GPI of 2004 E.C. As illustrated on the table, zonal and administrative town's level, NER is quite far apart from one to another. Accordingly the three high NER registered administrative towns are Nekemte, Asella and Bishoftu having 31.7%, 27.1 and 25.8% respectively. Whereas Borena, Guji as well as Jima zones are the three least NER registered zones having 1.2%, 1.1% and 0.8% respectively. Concerning gender equity index /GPI/, it has been 0.7 in 2003 E.C and this value is improved to 0.8 in 2004 E.C.

3.2. Quality of Secondary Education

One of the educational inputs that contribute a remarkable role to ensure quality of education is the availability of sufficient and qualified teachers. When compared to the primary education, the percentage and student to teacher ratio is better than that of secondary education in the region.

3.2.1. Percentage of Qualified Secondary School Teachers

The minimum qualification required for first cycle and second cycle secondary school teachers are BA/BSc/ or BEd. By 2004EC (2011/12) as shown from table 3.2.1.2 the percentage of qualified teachers for first cycle (9-10) and second cycle secondary (11-12) were, 89.8% (90.1% male and 88.5% female) and 92.3% (92.7% male and 86.7% female) respectively. As illustrated from the same table percentage of qualified teachers of the zones and administrative town are varies from each other. For instance, for first cycle secondary (9-10) eight zones in the region have less than the regional average of 89.8%. Among them three zones are having the least percentage of qualified teachers, whereas Jima, Shashemene and Bishoftu are the leading zones with high percentage of qualified teachers by having percentages of 96.6%, 95.8% and 95.3% respectively.

3.2.2. Different Ratios in Secondary Education

3.2.2.1. Student to Teacher Ratio

As shown on the table 3.2.2.1.1. Pupil to Teacher ratio of secondary school (9-10 and 11-12) was 32 and 29 respectively. As data shows Ilu Aba Bora, Borena and Jima zones have the least Pupil to Teacher ratio in secondary first cycle /9-10/ that was 24, 26 and 27 respectively. At preparatory /11-12/ Guji, Ilu Aba Bora, Jima Borena zones are having the least teacher-pupil ratio with 18, 18, 20 and 20 respectively.

ZONE	Enrolment		Number of Teachers		Stu:Tea Ratio

3.2.2.2. Student-Section Ratio

As can be seen from chart 3.2.2.2.1 the trend of Student to teachers ratio for secondary first cycle /9-10/ shows improvement to fit the standard. By 2000 E.C. it has been (1:78), however it shows improvement in 2004 E.C by reaching to (1:59). Regarding to the preparatory /11-12/ the ratio was (1:45) for this year. Table 3.2.2.2.1 also shows the Pupil to Section ratio at zonal level too. Accordingly, Hararge West and Ilu Aba Bora zones as well as Bishftu and Assela Administrative towns have the smallest section-pupil ratio of the year.

As table 3.2.3.1 shows, among the secondary schools of the region; **91%**, 89.1%, 53.2%, 75.6%, 17%, 24.6% of the schools are having Laboratory, Library, Pedagogical Centre, Electric power, Internet access and clinic service respectively. Additionally, all of them are reported, as they were having latrine and water service in their compounds.

As table 3.3.3.1 illustrates by 2004 E.C the repetition rate of secondary school /9-10/ at regional level was 10.4. Nevertheless, this value is not the same in all areas. For instance Guji, Hararge East and Hararge West zones have registered the highest repetition rate having, 17.1%, 16.7% and 15.7% respectively. Whereas, Adama administrative town, Bale zone and Asela Administrative town have registered the least repetition rate 4.6%, 4.8% and 4.9% respectively. This table also elaborates the repetition rate in preparatory school, having repetition rate of 2.2% at regional level. This data have difference in values in all over the zones and Administration towns of the region. For instance Hararge East, Shoa South West and Shoa West are having the highest repetition rate of 6.5%, 4.7% and 4.1% respectively. On the other hand Nekemte Administrative town, Welega West and Ilu Aba Bora zones are also have the least repetition rate of 0.1%, 0.3% and 0.4% respectively.

Regarding to dropout, as table 3.3.3.1 demonstrates, it is 23.6 % and 14.2% of grade 9th and 11th respectively. The three zones that are having large dropout rate of grade 9th in 2004 E.C. are Hararge West, Guji and Jima which is 35.4%, 32.4% and 30.6% respectively. For grade 11th the highest dropout registered zones are Nekemte Administrative town, Shoa East and Kelem Welega are having 42.3%, 28.6% and 22.5% respectively as well. On the other hand the three zones that are having least dropout rate for grade 9th are Shoa North, Adama Administrative town and Welega East which is 8.5%, 14.5% and 15.5% respectively. Regarding to grade 11th grade dropout rate Adama Administrative town, Jima and Horo Guduru Welega zones are having the least dropout rate 4.3%, 5.7% and 6.7% respectively.

4. Alternative Basic Education and IFAL Program

Basic education is the whole range of educational activities taking place in various settings (formal, non-formal and informal) that aimed to meet basic learning needs. In Dakar Framework, the term is having an implication similar to the broad EFA agenda. The program should receive wide spread public support for reasons that include considerations of literacy as fundamental human right. As the fact indicates illiteracy accompanies poverty and a low life expectancy.

Alternative Basic Education (ABE) is intended to address the Primary education needs of children who are substantially older than primary school ages of 7-14. Moreover, ABE enrollments have contribution in reporting GER and NER of 1st cycle primary with regular program. In paying attention our region has planned to reduce illiteracy in this regard, even though great efforts have made to meet the access, still hard work is expected to attain the plan. In this publication under this title we attempted to specify the data of Alternative Basic Education (ABE) of three years information and Integrated functional adult literacy (IFAL) program of the 2004 E.C as well.

Year in E.C	Number of Adult			Number of ABE Children		
	Male	Female	Total	Male	Female	Total
2002	112089	59676	171765	101460	82443	183903
2003	175045	110679	285724	91032	74286	165318
2004	814485	526267	1340752	71978	58353	130331
AAGR	93.6	106.6	98.4	-10.8	-10.9	-10.8

As indicated on table 4.1: Enrolment of Adult Education has increased in 98.4% (93.6%, 106.6%) of AAGR (Average Annual Growth Rate) in the past three years as total, male and female respectively. Whereas ABE enrolment was decreasing from year to year, this might be show the assumption of decreasing enrolment in ABE as out of school children join the regular schools than ABE centers. Nevertheless, the cause of decrement of ABE enrolment in the past three years might not be such reason because millions of out of school children are still not joining the school. Accordingly, even though basic research didn't attempt to identify the cause yet, our assumption for the challenges happened might be; low community

participation, low supervision and low follow-up of education sector at grass-root level, less interest and motivation of ABE facilitators, low participation of NGOs (both local and international) to promote the ABE program in the region and the like. So that, policy makers, planners and the concerned body has an assignment to fill all this gaps to attain UPE accordingly.
