Foreword

Education is currently becoming the most important contributor to national economic growth and it also have primary goal in society moral development. Moreover, since Knowledge should create network of ideas in a societies mind through education, it had vital role in creating fruitful citizenship in which governed by paradigm shift of new era, which are leading our country forward to bright future.

Oromia Education Bureau is one of education sector which play a vigorous role in Ethiopian education system. Accordingly, the Bureau wants to provide this annual abstract for users, in displaying how our educational outcomes were move to the expected paradigm shift approach of the millennium Goal. This document would definitely meet the interest of planners, policy makers, researchers, educational stakeholders and analyzers in obtaining information for their decision. Besides, this annual educational abstract would enable educational planners and policy makers in targeting their future goals in terms of our educational standard by allocating the needed resource for improving and implementing quality of education.

Therefore, this Education Statistic Annual Abstract gives emphasis to the provision of relevant and articulated information at all levels of education taking place in our region for implementation of millennium development goal in education sector. The graphs and tables in this publication present a relevant and accurate picture of our progress on an annual basis. In presenting this overview, we allow the key partners and stakeholders to see at a glimpse how quickly the changes have been taking place in our Region.

Introduction

This Education Statistics Annual Abstract is the document that addresses educational information for the concerned bodies, in order to make them to know our yearly performance of education. The education performance indicator presented in this document is calculated based on the projected school age population of Central Statistics Agency population and housing census held in 2006/07 G.C. The regional population growth rate is also taken from the Oromia Region Finance and Economic Development Bureau statistic department.

This publication has been written by Oromia Education Bureau EMIS team, with the significant support and cooperation of the thousands of school educationist who submitted documentation of educational statistics from the schools up to zone education offices. To accomplish these activities Data was collected based on standardized questionnaires designed for pre-primary (KG), Alternative Basic Education, Primary and Secondary education and Integrated Functional Adult Literacy programs.

This annual abstract contains both descriptive and analytical summaries of equitable access, quality and efficiency of education of our education Bureau in detail. The data are further disaggregated by the level of education, gender, and localities in order to show detailed educational information of the region. Accordingly, we hope that this publication may provide a basis for monitoring the system and having educational information for policy makers, planners and also references for researchers as well.

Finally, EMIS team wants to thank all of our staffs who are involved in the data collection, data entry and verification. The entire mentioned processes would not have been possible without the important contributions of our staff from the school to zonal level. A special note of thanks is also reserved for all experts of our regional bureau planning and project work process and other work processes, for their cooperative effort on the publication of this abstract.

ABBREVIATION

ABE	Alternative Basic Education
AIR	Apparent Intake Rate
AAGR	Annual Average Growth Rate
CE	Coefficient of Efficiency
CRC	Cluster Resource Center
CR	Completion Rate
CSA	Central Statistics Agency
CTE	College of Teachers Education
DR	Dropout Rate
EFA	Education For All
EMIS	Education Management Information System
GER	Gross Enrolment Rate
GIR	Gross Intake Rate
GPI	Gender Parity Index
IER	Internal Efficiency Rate
IOR	Input Output Rate
IFAL	Integrated Functional Adult Literacy
KG	Kindergarten
MDG	Millennium Development Goal
NER	Net Enrolment Rate
NIR	Net Intake Rate
NGO	None Governmental Organization
OEB	Oromia Education Bureau
PI	Parity Index
PSR	Pupil Section Ratio
PTR	Pupil Teacher Ratio
PYW	Pupil Years Wasted
PPAPS	Pre- Primary Attached to Primary Schools
PR	Promotion Rate
RR	Repetition Rate
RUPI	Rural Urban Parity Index
SMASEE	Strengthening Mathematics And Science Education in Ethiopia
SR	Survival Rate
SAP	School Age Population
TR	Transition Rate
TPY	T Pupils Years
UPE	Universal Primary Education
WR	Wastage Rate

1. Pre-Primary Education Program

Pre-primary Education basically includes enrollment of children from age 4-6. The program is the initial stage of organized instruction provided as a bridge between home and school. The main purpose of early childhood education is to develop the mental and physical capability of children. Non-governmental organizations, communities, private institutions and religious based organizations are the operators of kindergarten program whereas, government is involved in developing curriculum, training teachers and providing supervisory supports for kindergarten program. Additionally, our Regional Government Education Bureau was involved on pre-primary attached to primary schools (PPAPS) program since 2001 E.C (2008/9 G.C), to access rural children of the level.

Accordingly, participation of pre-primary education has been continuously increasing in our region, since “PPAPS” were implemented. So, children enrollment in pre-primary schools was increasing from year to year.

As indicated on graph 1.1 above, the number of kindergartens raised in between 2002 E.C (209/10 G.C) and 2006 E.C (2013/14 G.C), from 1004 to 1402. Whereas, as shown from table 1.1 above, 7244 government primary schools are implementing 8343 PPAPS and 615 Child to Child program in the region in 2006 E.C. (2013/14 G.C)

1.1. Gross Enrolment Ratios in Pre-primary Education

GER of pre-primary education is defined as the percentage of T number of children in the level out of T population of 4-6 age, irrespective of age groups in the region or in a given zones.

As shown from Table 1.2 above, the Gross Enrolment Rate (GER) for Kindergarten (KG), Pre-Primary Attached to Primary Schools (PPAPS), and the aggregated of both KG and (PPAPS) was 4.86% (M=4.93%, F= 4.79%), 12.98% (Male 13.46%, Female 12.49%), 17.84% (M= 18.39% F= 17.28%); and their GPI are also (0.97, 0.93 & 0.94) respectively. As indicated on the same table, when we compare GER and GPI of the zone to the regional average, GER of 7 zones and all Administrative towns is greater than the regional average whereas, regarding the gender equity 5 administrative towns and 7 zones is also greater than that of the regional aggregated GPI. In addition, graph 1.2. is also indicating that GER of preprimary education by zone in the year 2006 E.C (2013/14 G.C). The Gross Enrolment Rate (GER) of the level also increased from 14.21% (M= 14.85%, F=13.56%) (2002 E.C (2009/10 G.C.) to 17.84% (M=18.39%, F= 17.28%) in 2006 E.C (2013/14 G.C.) with Average Annual Growth Rate of 4.65% in the last five years interval.

Graph 1.1.2. Pre-Primary Education Gross Enrollment Rate for the last five years
2002-2006 E.C (2009/10-2013/14 G.G)

As we can compare the Growth Enrolment Rate /GER/ of Kindergarten and Pre-primary Attached to Primary Schools of the past five years from graph 1.3 below, it was varied randomly. However, GER of 2006 E.C (2013/14 G.C) 17.8% (M= 18.4%, F=17.3%) has shown a little bit increment than 2004 E.C (2013/14 G.C) 14% (M=14.4%, F=13.5%). As the data indicates the issue needs attention from concerned bodies. Because, millions of (4-6 age) group children in the region are still out of pre-primary school.

2. Primary Education Program

2.1. EQUITABLE ACCESS

In Ethiopia, primary education is defined as education in Grades 1-8 in two cycles 1st cycle, (grades 1-4) and 2nd cycle (grades 5-8). The program is normally designed on a unit or project based on basic education to develop pupils' ability to obtain and use information they need, about their home, environment/community or country.

2.1.1. Intake Rates

Intake rate is used to indicate the extent of new entrants to the first grade of primary education. It indicates the proportion of children who join the primary education system for the first time in terms of official school age for the first grade. It compares children who come to school for the first time, registered at first grade (grade 1) with children of official school admission age (7 years old children). Under this umbrella Apparent Intake Rate (AIR), Net Intake Rate (NIR), Early Starters and Late Starters are analyzed.

2.1.1.1 Apparent Intake Rate (AIR)

AIR is the percentage of new entrants (irrespective of age) in Grade 1, out of the T number of children of the official primary admission age 7, in a given year. Sometimes, it is also called the Gross Intake Rate (GIR). AIR tends to reflect those students, who may have not been enrolled in school at the appropriate age, and often reflects the "backlog" of students who could not be enrolled before.

A high Apparent Intake Rate indicates a high degree of access to the first grade of primary education. The calculation includes all new entrants to first grade (regardless of age). The Apparent Intake Rate can be more than 100%, due to over- and under-aged children entering primary school for the first time, and this makes inconsistencies in population data. Here is the formula to calculate AIR.

$$\text{AIR} = \frac{\text{Number of New Entrants in first Grade}}{\text{Population at the official school-entrance age}} \times 100$$

Graph 2.1.1.1.1 AIR of the Region in the Last Five Years (2002-2006 E.C/2013/14 G.C)

As shown in graph 2.1.1.1.1 above, AIR of the Region was greater than 100% for the last five years; it is because of over and under age children of the enrolment. Besides, one can observe from the indicated data shown that AIR of male is greater than that of female. This indicates that the access to grade 1 is still more accessible for males than females. Even though the reason has to be identified through research, the AIR has been fluctuating from year to year. For example, it was 130.3% (M=136%, F=124.3%) in 2002 E.C (2008/9 G.C) and then rose to 161.5% (M=168.8%, F=154.0%) in the following year. However, in 2006 E.C (2013/14 G.C), it decline by 13.8% (M= 13.4%, F=14.1%) and reached to 147.7% (M=155.4%, F=139.9%) when compared to the year 2003 E.C (2009/10 G.C) 161.5% (M=168.8%, F=154.0%). This shows that, there are children in the system which have not been enrolled in schools until this year, and often reflects the “backlog” of children who could not enrolled before.

As indicated from table 2.1.1.1.1 above, it is possible to see that, AIR of Oromia in 2006 E.C (2013/14 G.C) is **147.7% (M=155.4% and F=139.9%)**. The table also shows that almost all zones and administrative towns have AIR greater than 100%. Concerning GPI seven zones have GPI less than that of the regional average (0.90). Additionally within this year 1,488,790 (**M=793,633, and F=665,157**) children were enrolled as new entrants in grade 1, among them **986,223 (M=519,984 and F=466,239)** are 7 years old, (Refer page 41 table 2.1.6.1 for more information)

2.1.1.2. Net Intake Rate (NIR)

Net Intake Rate shows new entrants in the first grade of education system who are of the official school-entrance age, expressed as a percentage of the population of the same age.

The calculation requires new entrants in the first grade of education cycle which are the official school-entrance age and population at the official school-entrance age. The method of calculation is as follows:

$$(NIR) = \frac{\text{New entrants in the first grade of education cycle who are of the official school-entrance age}}{\text{Population at the official school-entrance age}} \times 100$$

A high Net Intake Rate for primary education of official primary school-entrance age children indicates a high degree of access to the first grade of primary education.

Oromia Total		99.5	90.3	95.0	120.1	121.1	120.6	101.8	93.8	97.9	0.9	0.8	8.0	25.6

Graph 2.1.1.2.1 above, indicates the trend of past five years NIR at regional level. The graph also shows that NIR of Grade 1 by 2002 E.C was 66.3% (M= 68.4%, F= 64.2%) and then this rate has climbed to 97.9% (M=101.8%, F= 93.8%) by 2006 E.C (2013/14 G.C) with AAGR of 8.1%.

As shown from table 2.1.1.2.1 above, NIR of the regional average is 97.9% (M=101.8%, F=93.8%). Among all zones and Administrative towns of the region, 8 of them have NIR greater than or equal to the regional average. Unfortunately, nine of them are having more than 100%, which is out of logical assumption of NIR. This may happened due to many reasons, among these assumptions; wrong pupils' age registration during data collection at the school level, errors of CSA data capturing and migration are the major suspected reasons. On the contrary, there are also zones and administrative towns which have low NIR as compared to the regional average.

Concerning to GPI, among all zones and administrative towns of the region 19 of them have greater than or equal to the regional average of GPI which is 0.92. On the other hand seven of them have GPI more than 1.0, which is the level of the standard for equity of gender.

2.1.2. Early and Late Starters

2.1.2.1. Early Starters

Students said to be early starters if their actual enrolment age is less than that of official school admission age /7 years old/. If all children of official school admission age/7 years old/ of a specific area at a given year have join school, the AIR of that area will be 100%. But, due to the inclusion of under-aged and over-aged children, AIR can be over 100%. Therefore, timely entrance into the education system is important to minimize such gaps.

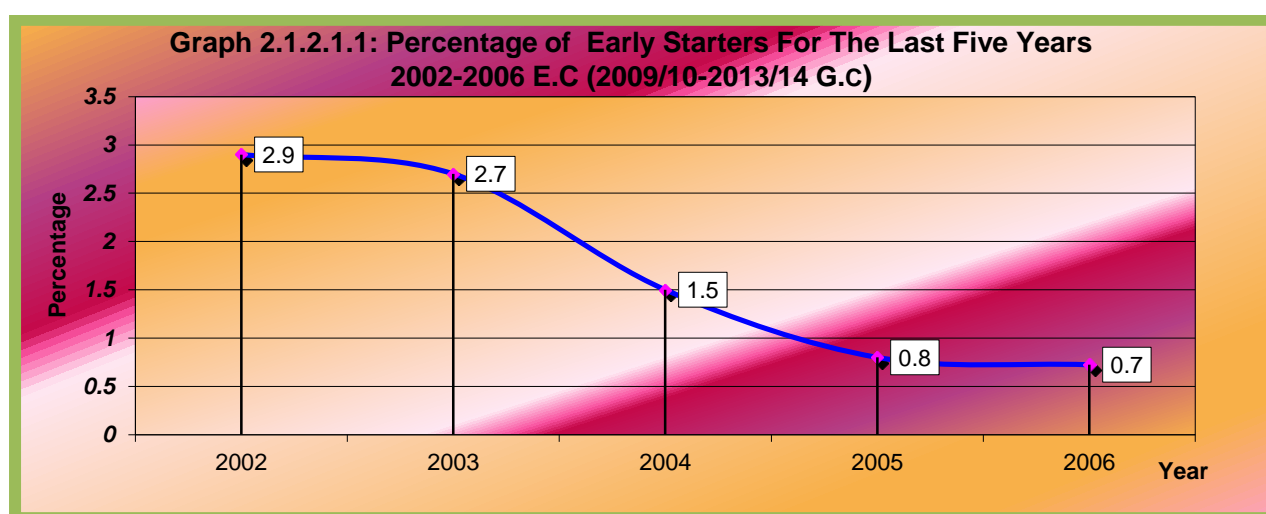

Table 2.1.2.1.1: Percentage of Early Starter by Zones in 2006 E.C(2013/14 G.C)

As we can see from graph 2.1.2.1.1 above, the percentages of early starters have been dropped from year to year, For example; it has been 2.9% (in 2002 E.C), then continuously declining from year to year and finally dropped to 0.72% (M=0.72% F=0.73%) by 2006 E.C (2013/14

G.C). From this progress, we can imagine that, timely entrance of children into education system is getting inclined in the last five years by AAGR of 24.32% at regional level. Additionally, Table 2.1.2.1.1 above also shows early starters at zonal and administrative town.

2.1.2.2. Late Starters

Late Starters are new entrants to grade one whose age is greater than the official school admission age (7 years old). The indicator points out the proportion of children come to school for the first time after their official school admission age of the level. It is expected that the percentage of the new entrants to grade one whose age is greater than the official school admission age (7 years old) has to decrease from year to year till it reaches 0%. However, in the last five years the percentage of late starters have been fluctuating up and down from year to year which shows that the number of over age children admitted to school is not plummeted continuously.

Graph 2.1.2.2.1 above shows, the regional late starters' percentage of last five years. It can be observed that the percentage went down gradually from year to year. For example it is 60.9% in 2002 E.C (2008/9 G.C) then it is dropped to 33.03% (M=33.76%, F=32.2%) in 2006 E.C (2013/14 G.C) with AAGR of 11.52%. Even though the figure shows progress in minimizing late starters, the data indicates until now 33.03% (M=33.76%, F=32.2%) of over aged students were enrolled to grade one at regional level. As we can see from table 2.1.2.2.1 above, among all Zones and Administrative towns of the region, 7 zones and 10 administrative towns have late starters' percentage above regional average which is 33.03%, whereas, the rest have below the regional average.

2.1.2.3. Percentage of Not Admitted

It is the proportion of 7 years old, in other words, it is the percentage of children who did not admit the school at their official age of schooling. It can be derived simply from the NIR in such a way that (100-NIR) for both M and F.

**Table 2.1.2.3.1 Percentage of Not Admitted Children by Zones in 2006 E.C

As can be seen from graph 2.1.2.3.1 above, in 2004 E.C (2011/12 G.C) the percentage of children who did not join the school at the right age was 12.3% (M= 9.4%, F= 15.3%). However as shown from the table 2.1.2.3.1 by 2006 E.C /2013/14 G.C/ the percentage of children which is not-admitted to the school has been decreased to 6.19% (M= 0%, F= 6.19%),which are only Female. Even though, the data shows progress to attain the goal, still there are about 6.19% of female children that are not admitted to the school at the right age at regional level. Although the percentage of not admitted for male shows 0% at regional level, it varies from 0% to 32% at zone level. Thus, it is our responsibility to bringing those children to schools.

2.1.3. Gross Enrolment Rate (GER)

Gross Enrolment Rate is, defined as the T enrolment in a specific level of education, regardless of age expressed as a percentage of the official school-age population corresponding to the same level of education in a given school year. GER is a crude measure of education coverage. Since it includes under-aged and over-aged pupils, GER can be greater than 100%, and frequently in countries to attempt in addressing the backlog of students attending the school because of different reasons, such as financial need, family issues, or lack of schools.

The data required to calculate GER is, T enrolment in a specific level of education, regardless of age and official school-age population corresponding to the same level of education. The method of calculation is as follows

$$(GER) = \frac{\text{Total enrolment in a specific level of education, regardless of age}}{\text{official school- age population corresponding to the same level of education}} \times 100$$

2.1.3.1. Gross Enrolment Rate of Primary First Cycle /1-4/

Gross Enrolment Rate of first cycle primary is the rate calculated simply by dividing the T number of students enrolled in first cycle primary (irrespective of their age) to the T population of 7-10 years old.

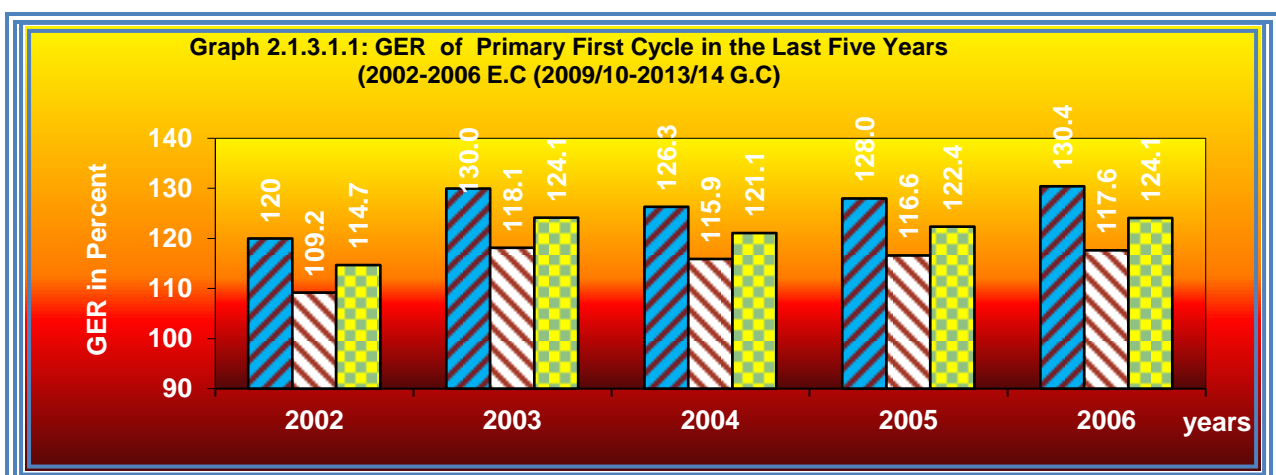

Table 2.1.3.1.1. Gross Enrolment Rate /GER/ and Equity Indicators of Primary 1st Cycle (1-4) in 2006 E.C (2013/14 G.C.)

As graph 2.1.3.1.1 above shows, by 2002 E.C (2009/10 G.C) GER of the region was 114.7% (M=120%, F= 109.2%) and then the GER has increased to 124.1% (M=130.4%, F=117.6%) by 2006 E.C (2013/14 G.C). As shown from the data the number of over age or under age children in the system has not decreased yet. As shown from table 2.1.3.1.1, in 2006 E.C (2013/14 G.C), GER of primary first cycle of six zones and five administrative towns is above the regional average 124.1% (M=130.4%, F=117.6%), while GER of the rest zones and administrative towns is below the regional average.

Concerning to GPI, six zones and all Administrative Towns have greater than or equal to regional GPI which is 0.90. Among these, nine of them have GPI equal to one or greater than one. Concerning to the ‘RUPI’ (Rural Urban Parity Index), ten zones have PI (Parity Index) greater than the regional average which is 0.75.

The other method in analyzing gender issue is comparing the gender gap of the level. Accordingly, gender gap is expected to be zero, which indicates whether both genders have got equal chance to join school equally or not. Negative gender gap indicates female participation is greater than that of male and positive gender gap indicates male participation is greater than that of female. As table 2.1.3.1.1 shows, among all zones and Adm. Towns, only five zones and two Adm. Towns of the region have gender gap greater than the regional average which is 12.77%.

2.1.3.2. Gross Enrolment Rate of Primary Second Cycle /5-8/

Gross Enrolment Rate of primary second cycle (5-8) is the rate calculated simply by dividing the T number of students enrolled in second cycle primary (irrespective of their age) to the T population of 11-14 years old.

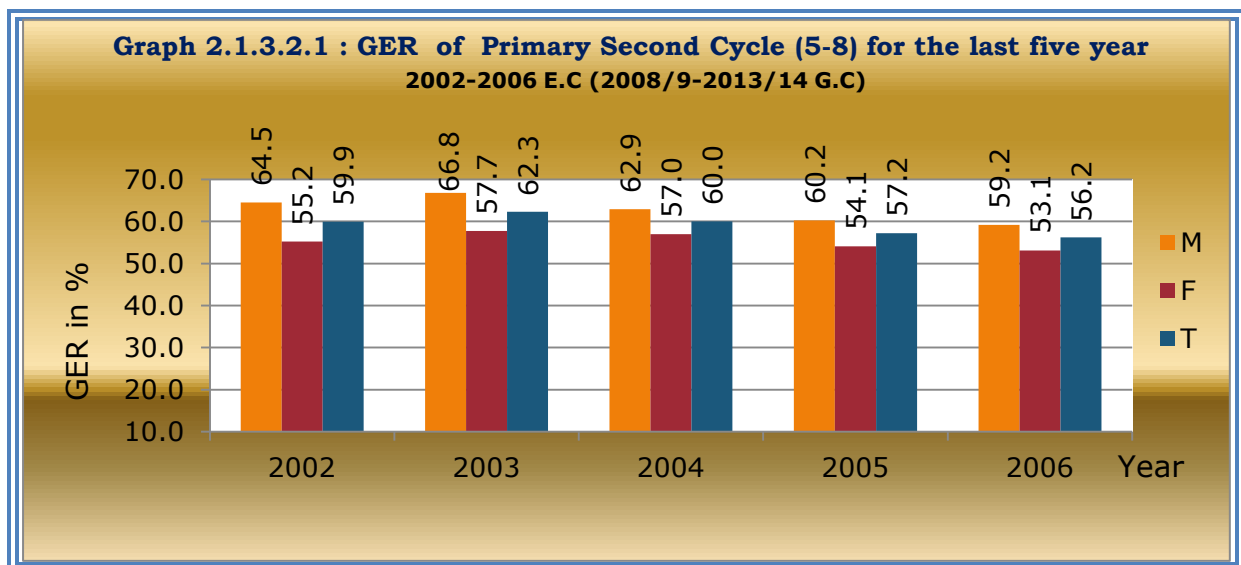

Table 2.1.3.2.1: Gross Enrolment Rate and Equity Indicators of Primary 2nd Cycle (5-8) in 2006 E.C (2013/14 G.C.)

As shown on graph 2.1.3.2.1 above, the Gross Enrolment Rate of primary second cycle (5-8) shows fluctuation during the last five years. It was 59.9% (M= 64.5%, F= 55.2%), in the year 2002 E.C (2009/10 G.C). After fluctuating up and down, finally, it was dropped to 56.2% (M=59.2%, F= 53.1%) by the year 2006 E.C (2013/14 G.C), as the data indicates the issue needs more attentions of concerned bodies. As Table 2.1.3.2.1 above indicates, the second cycle primary GER of 10 zones and 12 administrative towns exceed the regional average of 56.2% (M=59.2%, F= 53.1%).Whereas, the other eight zones are registered less than the regional average GER.

Regarding to GPI, nine zones and ten administrative towns of the region have GPI greater than that the region average (0.90), On the other hand, three zones and nine administrative towns have GPI greater than or equal to one (1.0).

2.1.3.3. Gross Enrolment Rate /GER/ Primary (1-8)

Gross Enrollment Rate of primary education (1-8) is a crude measure of primary educational coverage, which indicates the percentage of T enrollment in primary schools irrespective of age out of the corresponding primary school age (7-14) population.

Apparently, it includes under-aged and over aged pupils. GER can be higher than 100%.

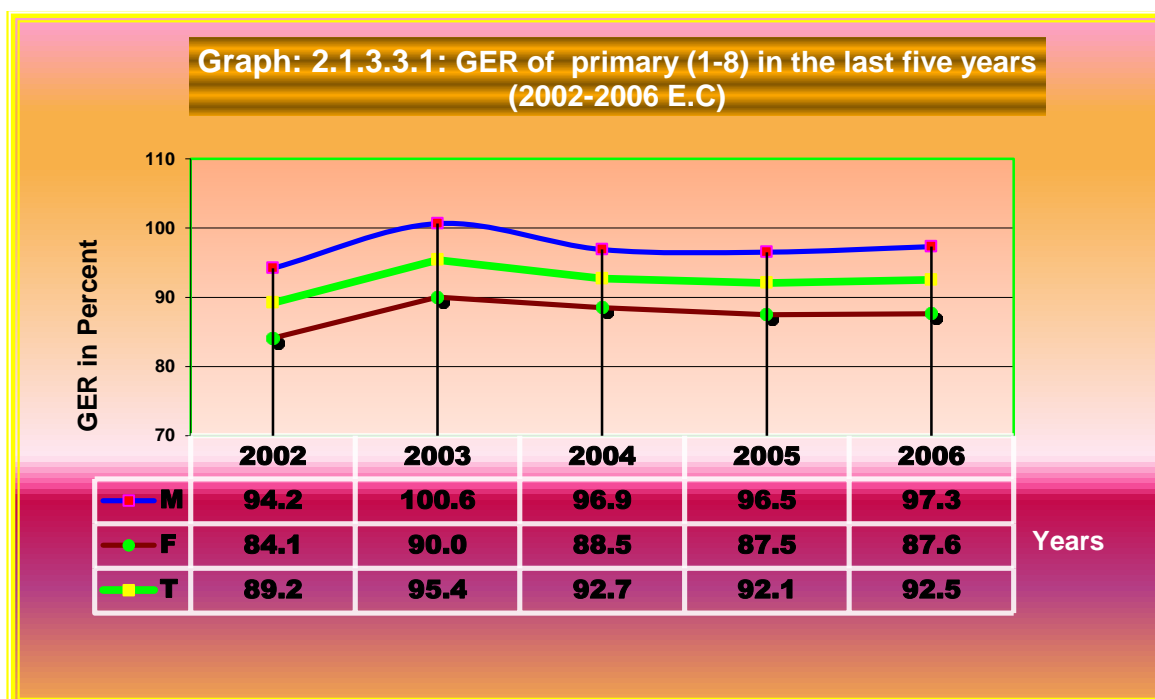

Table 2.1.3.3.1: Gross Enrolment Rate and Equity Indicators of Complete Primary (1-8) in 2006 E.C (2013/14 G.C)

As shown in Graph 2.1.3.3.1 above, the past five years trend of GER for primary education of the region tells us that, it has been fluctuating up and down. Accordingly, GER of the region was 89.2 % (M=94.2%, F=84.1%) in 2002 E.C and then by 2006 E.C shown a steady increment by reaching 92.5% (M=97.3%, F=87.6%). As the data shows, fluctuation was frequent in the middle of the past five years due to many reasons. Apparently, since it is difficult to list those reason here, it is better to conduct basic research to find the problem of the issue on the ground.

As table 2.1.3.3.1 illustrates, eleven zones and five administrative towns in the region have GER below the regional average 92.5% (M=97.3%, F=87.6%) in the year 2006 E.C. On the contrary, the rest zones and administrative towns are above the regional average. Regarding to GPI, twelve zones and eleven administrative towns have registered GPI greater than the regional average which is 0.90. Amongst seven towns and one zone have GPI greater than or equal to 1.0, which means participation of Female is seems more than that of Male in those areas. Finally, regarding to the regional disparity, (Urban and Rural), among 18 zones of Oromia only nine of them have RUPI greater than the regional average (0.63).

2.1.4. Net Enrolment Rate (NER)

It is the rate of the official age group for a given level of education expressed as a percentage of the corresponding school age population. NER is the best way of measuring organized timely school participation and is a more refined indicator of school and enrolment coverage in terms of explaining the proportion of pupils enrolled from the official age group. NER is usually lower than the GER since it excludes over-aged and under-aged pupils. NER is calculated by dividing the number of properly aged primary students (for Ethiopia ages 7-14) by the number of children of school age (7-14) population.

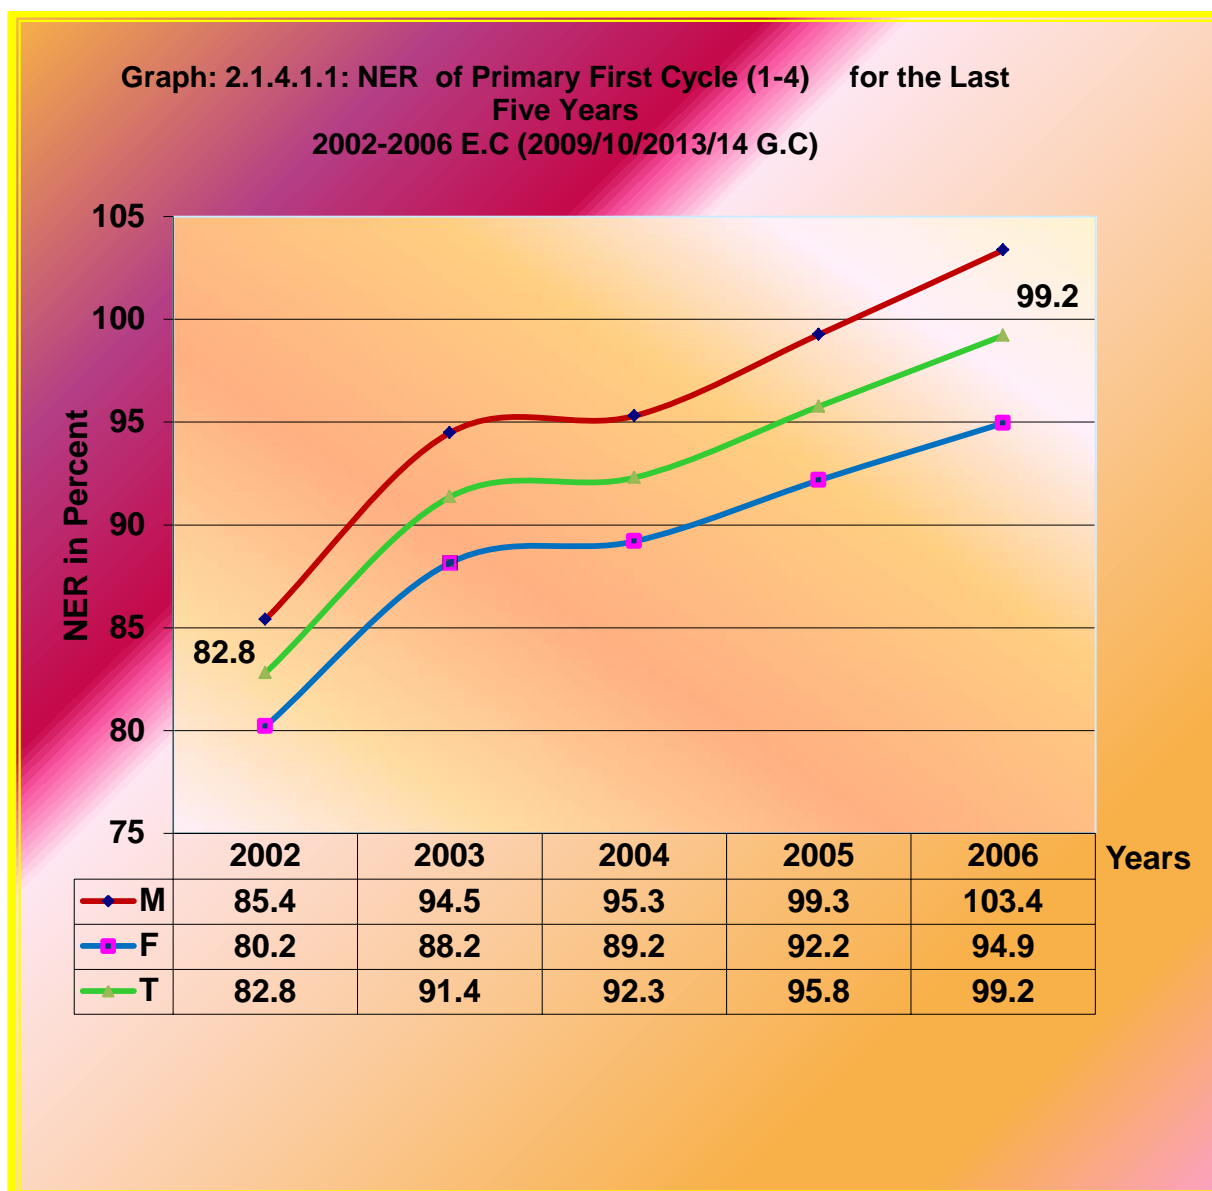

$$NER = \frac{\text{Total Enrolment in a specific level of Education with official age - group}}{\text{Official school age population corresponding to the some level of Education}} \times 100$$

A high NER denotes a high degree of participation of the official school-age population. The theoretical maximum value of NER is 100%. Increasing trends can be considered as reflecting improvement in participation of official school age population at the specified level of education. When NER compared with GER, the difference between the two ratios highlights the incidence of under-aged and over-aged enrolment. If the NER is below 100% then the difference with 100% provides a measure of the proportion of children not enrolled

at the specified level of education. However, some of these children could be enrolled at other levels of education.

2.1.4.1. Net Enrolment Rate (NER) in Primary First Cycle (1-4)

It is the percentage of students who enrolled in primary first cycle, whose age is 7-10, compared to the school age population of this level; that is T population of 7-10 years old.

**Table 2.1.4.1.1: Net Enrolment Rate and Equity Indicators of Primary First Cycle (1-4)
in 2006 E.C (2013/14 G.C)**

Graph 2.1.4.1.1 above shows, the trend of last five years NER at regional level. Accordingly, the NER of primary in first cycle was 82.8% (M=85.4%, F=80.2%) in 2002 E.C and then inclined to 99.2% (M=103.1%, F=94.9%) by 2006 E.C with AAGR of 3.68%.

Table .2.1.4.1.1 also demonstrates that, seven zones and five administrative towns have greater NER of first cycle primary 99.2% (M=103.1%, F=94.9%) than the regional average. Unfortunately, five of them have registered greater than 100% NER. However, logically NER could never be more than 100%. There are different assumptions for such kinds of inaccuracy, among the major assumption, some students might be migrated to those zones from other areas to attend their schooling, where as those students might not be included in the SAP of the zones or administrative towns. Secondly; wrong registration of Pupils age during recording of registration process, and finally the CSA census capturing problems on those areas, are the major suspected assumptions for the problem.

Regarding the gender disparity, only six zones and one administrative town have less than the regional average GPI (0.92). The rest have greater or equal to the regional average, among them ten administrative towns and two zones are registered GPI greater than or equal to on

2.1.4.2. Net Enrolment Rate (NER) in Primary Second Cycle (5-8)

NER at primary second cycle is the proportion of enrolment of students in second cycle primary of the age (11-14), with eligible school population of age (11-14).

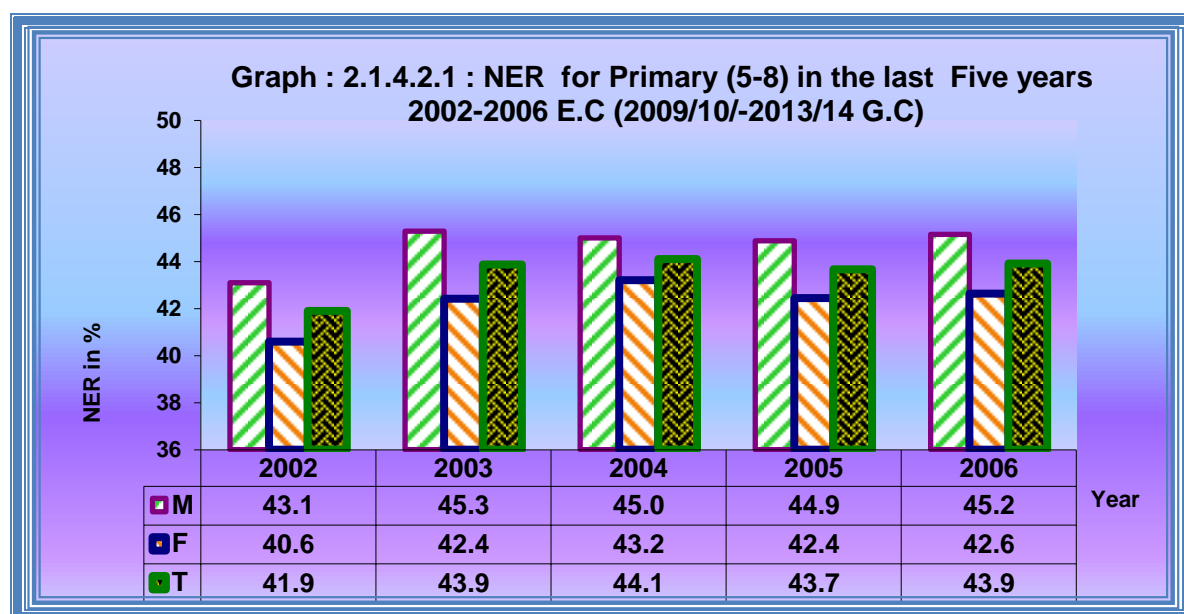

Table 2.1.4.2.1: Net Enrolment Rate and Equity Indicators of Primary Second Cycle (5-8) in 2006 E.C (2013/14 G.C)

As graph 2.1.4.2.1 above indicates, the trend of the NER of primary second cycle school in the region has shown a little bit progress over five years period. Accordingly, in 2002 E.C it was 41.9% (M=43.1%, F=40.6%) and then by showing a bit increment it rose to 43.9% (M=45.2, F=42.6%) by 2006 E.C, with the average annual growth rate of 0.94%. As the growth rate indicates, NER of the level shows unsatisfactory increment so that, it is recommended that a serious attention has to be given by the concerned bodies to for the issue. As can be seen from table 2.1.4.2.1 above; ten zones and eleven administrative towns have registered above the regional average NER of second cycle primary 43.9% (M=45.2, F=42.6%), whereas eight zones and one Adm. Town are having less than the regional average. Out of all zones and Administrative towns in the region nine zones and ten Administrative towns exceeds the regional GPI (0.94). Concerning Rural/Urban parity Index/, among 18 zones of Oromia, only six of them have RUPI greater than the region average (0.44).

2.1.4.3. Net Enrolment Rate (NER) in Complete Primary (1-8)

The Net Enrolment Rate (NER) for complete primary can also be calculated in a similar way of calculating NER for first cycle and second cycle primary. It is the proportion of the appropriate school age (7-14) children enrolled in primary school with the T school age (7-14) population. When the first and second cycle NER separately compared with complete primary in the region, it would take more time to achieve 100%. This is because those children in first cycle primary of age 11-14 who are over aged for first cycle, and students of age 7-10 who are under aged for the second cycle are included while calculating NER for complete primary.

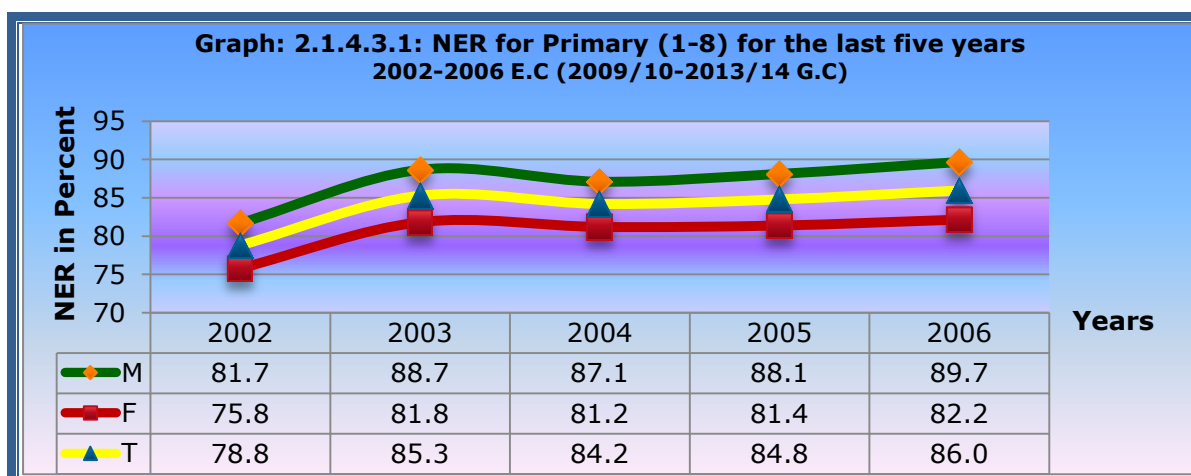

Table 2.1.4.3.1: Net Enrolment Ratio and Equity Indicators of Complete Primary (1-8) in 2006 E.C (2013/14)

As illustrated on the graph 2.1.4.3.1; in between the years 2002E.C to 2006 E.C, NER of complete primary school shows steady increment from 78.8% (M=81.7%, F=75.8%) in 2002 E.C to 86.0%(M=89.7%, F=82.2%) in 2006 E.C. with annual average growth rate of 1.76%, which means the increment was almost steady in the past five years so that the issue needs our attention to keep the progress ahead.

As illustrated from Table 2.1.4.3.1 among all zones of the region, NER of seven zones' and four Administrative towns exceeds the regional average of primary education 86.0% (M=89.7%, F=82.2%). whereas, eleven zones and eight administrative towns have below the average. Additionally, among all of zones and Administrative towns only seven zones and one Administrative Towns were registered below the regional average GPI (0.92). The remaining is above the regional average; amongst two zones and ten administrative towns are registered greater than or equal to 1.00. Regarding to RUPI, from all zones of the region, only eight zones have PI greater than the regional RUPI which is 0.68.

2.1.5. Enrollment of Children With Special Needs

Table 2.1.5.1 illustrate that, the T enrolment with Special Needs are **27,124 (Male 16222, Female 10902)** in 2006 E.C (2013/14 G.C) at the regional level. This data indicates that, there are a lot of children with Special Needs who are currently not attending schools throughout the region as comparing to 10% of school age population of their level. Therefore, the issue needs our attention to bring those children to the school, in order to make them get opportunity to learn in an inclusive environment. So that, the issue needs attention from government side, by providing teachers training, contraction of infrastructure and the provision of learning equipment's. It also needs full participation of society as well.

2.1.8. Primary Gender Equity in the Last Five Years

Table 2.1.8.1: Primary Gender Gap by GER for the Last Five Years									
Year	GER Primary (1-4)			GER Primary (5-8)			GER Primary (1-8)		
	M	F	Gender Gap	M	F	Gender Gap	M	F	Gender Gap
2002	120	109.2	10.8	64.5	55.2	9.3	94.2	84.1	10.1
2003	130.0	118.1	11.8	66.8	57.7	9.1	100.6	90.0	10.6
2004	126.3	115.9	10.4	62.9	57.0	5.9	96.9	88.5	8.4
2005	128.0	116.6	11.4	60.2	54.1	6.2	96.5	87.5	9.0
2006	130.4	117.6	12.8	59.2	53.1	6.0	97.3	87.6	9.7

Table 2.1.8.2: Primary Gender Gap by NER for the Last Five Years									
Year	NER Primary (1-4)			NER Primary (5-8)			NER Primary (1-8)		
	M	F	Gender Gap	M	F	Gender Gap	M	F	Gender Gap
2002	85	80	5.2	43	41	2.5	82	76	5.9
2003	95	88	6.3	45	42	2.9	89	82	6.9
2004	95	89	6.1	45	43	1.8	87	81	5.9
2005	99.3	92.2	7.1	44.9	42.4	2.5	88.1	81.4	6.7
2006	103.4	94.9	8.4	45.2	42.6	2.5	89.7	82.2	7.5

As noted on table 2.1.8.1 above, the primary gender equity of the last five years by GER has been fluctuated up and down. For example, it has been fluctuating from 10.1% in 2002 E.C (2009/10 G.C) to 10.6% in 2003 (2010/11 G.C.) and then to 9.7% in 2006 (2013/14). In addition, as can be seen from table 2.1.8.2 above, gender gap of primary (1-8) by NER has inclined from 5.9% in 2002 (2009/10) to 7.5% in 2006 (2013/14).

2.2. Quality Of Primary Education

Quality of education is the key indicator to detect whether a given country is on the right track to achieve the intended goal of its education system. Quality of education system may refer to many different characteristics, such as quality of inputs into education system, process, quality of educational outputs and outcomes. Here in this publication we focus on quality, in relation to educational inputs such as teacher's quality, class size and textbooks in our education system. Some indicators of quality depend on the total number of students enrolled.

2.2.1. Qualification of Teachers in Primary Education

One of the main factors, which affect the quality of education, is the qualifications of the teacher. That is, whether the educational qualifications of the teacher meet the requirements of the level he/she is teaching. According to national standards, primary education requires teachers with minimum qualification of Diploma from College of Teachers Education.

As illustrated from table 2.2.1.1 percentage of qualified primary/1-8/ teachers in 2006 E.C, is 72.4% (M=69.4% F=77.3%) at regional level. Teacher's qualification for primary first and second cycle is also indicated on the table. It also reveals that the percentage of qualified teachers for primary first cycle schools at regional level is 58.3% (M=49.4% & F=69%), Where as in primary second cycle schools the percentage of qualified teachers is 93.0% (M=91.5% & F=96.7%) Consequently, the data indicates that the qualification of teachers is another area which needs special attention from concerned bodies particularly for primary first cycle.

2.2.3. Different Ratios in Primary Education

2.2.3.1 Pupil-Teacher Ratio (PTR)

This is one of the most common indicators of quality education used in educational planning. It is believed that a lower number of pupils per teacher indicate that pupils will have better chance of contact with their teachers. The standard set for pupil teacher ratio for primary education is 50:1.

As shown on graph 2.2.3.1.1 above, during the last five years the PTR of primary education is fluctuated by increasing in 2003 E.C and slightly decreasing for the other three years. However, in the last two consecutive years improvement has been seen in PTR. Accordingly, it was 59:1 in 2003 E.C. whereas by 2006 the PTR have reached 54:1. Even though the performance seems satisfactory for the time being, we expect to have more effort to train additional teachers to bring this ratio back down to the standard 50:1.

Furthermore, calculating pupils to teacher ratio by cycle also indicates more realistic view of the problems and gaps of the issue. In this regard, PTR at primary first cycle (1-4) was registered 67:1 in 2004 E.C; apparently the value showed steady improvement by decreasing to 66:1 in 2006 E.C. on the contrary, in the second cycle primary (5-8) it showed a little bit improvement by decreasing from 41:1 to 39:1 whereas, improvement was also registered at primary (1-8) education program from 56:1 to 54:1 in comparing with the last year data.

As shown on table 2.2.3.1.1 above, in comparing student to Teacher ratio, Jimma, East and West Hararge zones have PTR of 71:1, 73:1 and 71:1 respectively which is quite far from the standard. Therefore, due attention from the concerned body is mandatory for the issue.

2.2.3.2. Pupil -Section Ratio (PSR)

It is one of the educational quality indicators that indicate average number of pupils per class. It gives a rough estimation of class size, assesses the efficiency of resource utilization and it also used to assess the teaching- learning process. The national standard of PSR is 50:1 for primary education.

As it is indicated on graph 2.2.3.2.1 above, in the last five years, PSR in primary school has improved from 60:1 in 2002 E.C to 58:1 in 2006 E.C. Furthermore, PSR of 2006 E.C at regional and zonal level were illustrated on the table 2.2.3.2.1 above.

As table 2.2.4.1 above shows, among 12,792 primary schools of the region 11,918 (93.16%) of them reported that they have school facilities. Again among 11,918 those which have Library, Pedagogical Centre, Electric Power, Water and Clinic service are 50.3%, 66.5%, 17.8%, 37.3%, 12.7% respectively. Additionally, regardless of the quality standard all primary schools in the region reported as they had latrines in their compound.

2.2.5. Primary Schools Finance

Education in our country was financed through two step process. The first, involves fiscal transfers from the federal government to the regions and the second from regional governments to *woredas*. Accordingly, Woredas allocate the block grant for primary and secondary general education and the regional education Bureau for preparatory schools, based on the enrollment they had. Additionally the GEQIP school grant also allocated accordingly based on the number of students

However, all levels of schools independently generate additional budget from different source, for example by generating their internal income, community participation and NGO donation. The Tables 2.2.5.1 and 2.2.5.2 illustrated below is the overall revenue with Government and none Government, it demonstrates the financial information of the year, which was collected from the annual school census questionnaire. The tables indicate revenue of the region by zonal level.

2. 3. Efficiency Of Primary Education

Education system is said to be efficient if maximum output is obtained from a given input or if a given output is obtained with minimum possible input. The problems of measuring efficiency in education, however, are considerable. There are several indicators used to measure the efficiency of the education system.

2.3.1. Indicators of Internal efficiency with Different Profiling Methods

The Internal Efficiency Rate (IER) is the ratio of number of student's years that should be, ideally spent to carry out a certain number of students at the end of primary cycle out of the number of students-years effectively spent.

$$\text{IER} = \frac{\text{Student's years that should be ideally spent}}{\text{Number of student's years effectively spent}}$$

Internal Efficiency Rate (IER) is calculated with different methods such as Transverse, Longitudinal and Pseudo-Longitudinal Methods,

I. Formulas for Calculating IER by Transverse Method

$$\text{IER} = \frac{(\text{Survival Rate (Transverse Method) for the final grade}) * (\text{Duration (in years) of the education level})}{\text{SUM of Survival Rates (Survivors) From the first to the final grade of the same education level}}$$

$$\text{IER} = \frac{\text{SR}_{G8} * 8}{\text{SR}_{G1} + \text{SR}_{G2} + \text{SR}_{G3} + \text{SR}_{G4} + \text{SR}_{G5} + \text{SR}_{G6} + \text{SR}_{G7} + \text{SR}_{G8}}$$

SR_G1: Survival Rate for Grade1,

SR_G8 = Survival Rate for Grade8

II. Formulas for Calculating IER by Longitudinal Method

$$\text{IER} = \frac{(\text{Survival Rate (Longitudinal Method) for the final grade}) * (\text{Duration (in years) of the education level})}{\text{SUM of Survival Rates (Survivors) From the first to the final grade of the same education level}}$$

III. Formulas for Calculating IER by Pseudo-Longitudinal Method

$$\text{IER} = \frac{(\text{Survival Rate (Pseudo-Longitudinal Method) for the final grade}) * (\text{Duration (in years) of the education level})}{\text{SUM of Survival Rates (Survivors) From the first to the final grade of the same education level}}$$

Table 2.3.1.1: Internal Efficiency Rate (IER) with Different Method in 2006 E.C (2013/14)

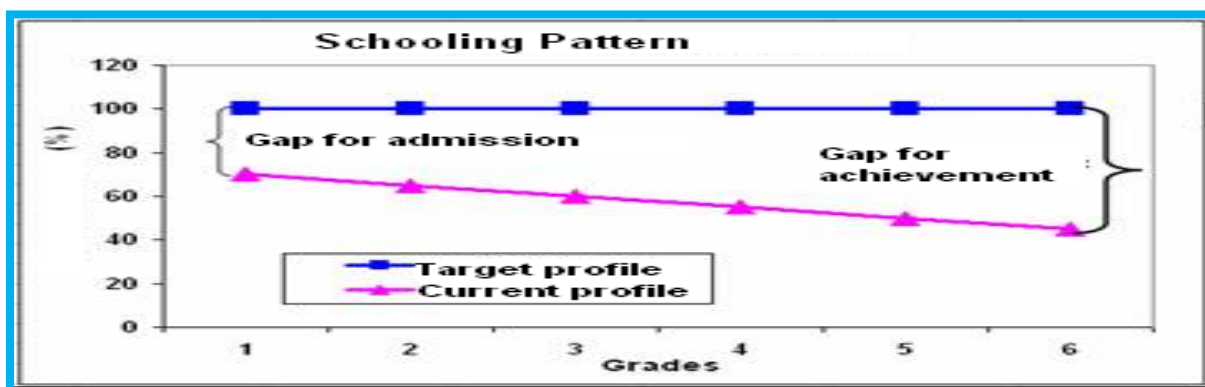

Internal Efficiency Rate (IER) with Transverse Method									
Grades	G1	G2	G3	G4	G5	G6	G7	G8

Effective Students-years	441								
IER	0.52								
1-IER (wasted Resource)	0.48								
Internal Efficiency Rate (IER) with Longitudinal Method									
Grades	G1	G2	G3	G4	G5	G6	G7	G8	
Survival Rates/Retention Rates	100.0	92.9	73.3	62.9	52.1	43.2	39.2	31.8	
Efficient Students-years	254								
Effective Students-years	495								
IER	0.51								
1-IER (wasted Resource)	0.49								

2.3.2. Interpretation of the Internal Efficiency Rate

Internal Efficiency Rate is a number between 0 and 1. The more this ratio is close to 1, the more the system is efficient. It is complementary to 1 (1-IER) is interpreted as the percentage of resources wasted, because these resources have been used to finance dropouts and repeaters.

2.3.2.1. Schooling Profile /Enrolment Pattern/

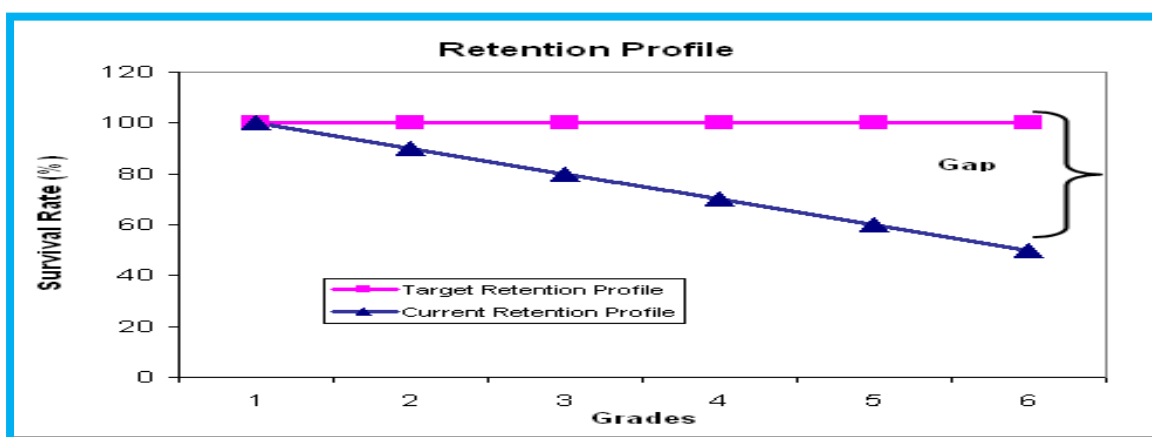

The schooling profile is, constituted of Age-Specific Enrolment Ratio for a given cycle of education system.

The schooling pattern interpreted as the student flow through the education cycle. Its trend determines the efficiency of the system to keep students in the system until they complete their schooling.

2.3.2.2. Retention Profile

The retention profile is, constituted by the series of survival rate at each grade level. It measures the capacity of the system to keep students in the system until they complete their schooling. Data required to determine retention profile are Enrolment and News entrants by grade at least for two years

2.3.2.3. Survival Rate (SR)

A survival rate approaching 100% indicates a high level of retention and low incidence of dropout. Survival rates may vary from grade to grade, giving an indication of grades with relatively more or less dropouts. The distinction between survival rates with and without repetition is necessary to compare the extent of wastage due to dropout and repetition.

2.3.3. Different Types of Schooling Profiles and Retention Profiles:

There are different types of schooling profiles, which determine Age-Specific Enrolment Ratio for a given cycle of education system namely; Transverse, Longitudinal method and Pseudo-longitudinal method.

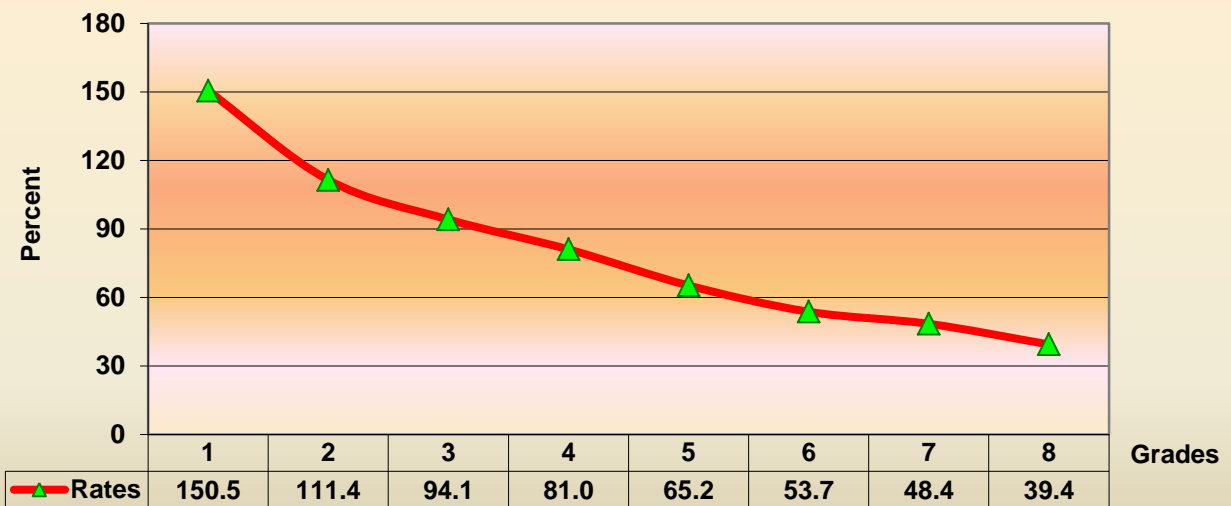

2.3.3.1. Transverse method

Data required for Transverse method are, new entrants by grade and population at official age corresponding to each grade. Let us see the 2006 E.C (2013/14 G.C); schooling profile with this method

Table 2.3.3.1.1: Schooling profile with Transverse Method in 2006 E.C (2013/14)

Year 2006 E.C	G1	G2	G3	G4	G5	G6	G7	G8
Enrolment	1676617	1181027	958417	798876	624048	487948	431623	326833

2.3.3.4. Schooling Profiles With Three Methods

2.3.3.5 .Survival Rate With In Three Methods

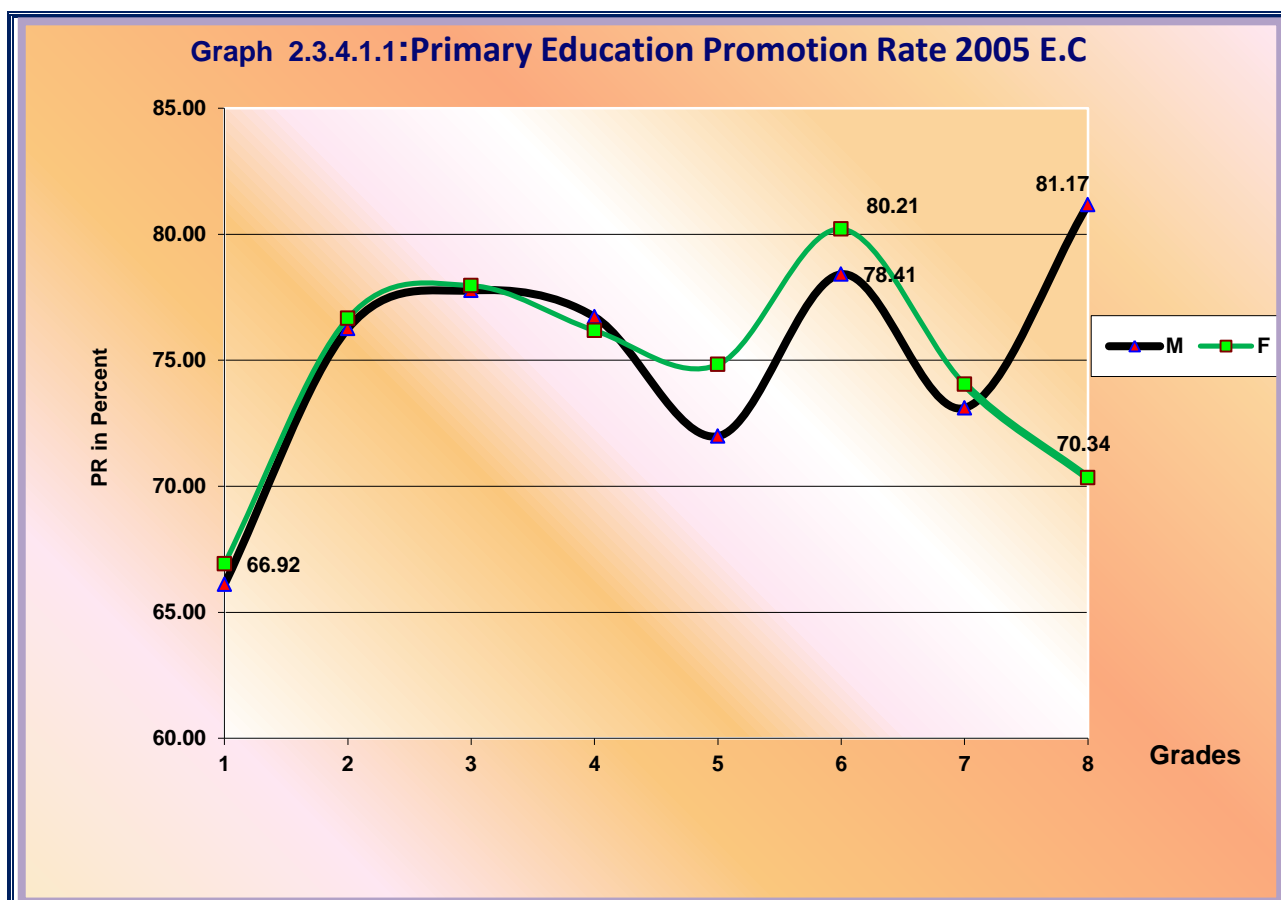

2.3.4. Internal Efficiency and Flow Rate

Promotion, Repetition and Dropout rates are the paths of student flow from grade to grade and characterize the efficiency of the education system in generating graduates. These rates are used for evaluating, monitoring and projecting the efficiency of students flow in our education systems. In this publication the primary education system of Oromia can be evaluated in terms of internal efficiency indicators.

2.3.4.1. Promotion Rate (PR)

Promotion Rate is the proportion of pupils enrolled in a given grades that reach the next grade in the following year. The data required in this calculation is new entrants in grade **j** for year **T** and enrolment in grade **j-1** for year **T-1**. It is also interpreted as a high level of promotion rate indicates a high level of retention or survival rate.

$$PR = \frac{\text{New entrants in grade } j \text{ for year } T}{\text{Enrolment in grade } j-1 \text{ for year } T-1} \times 100$$

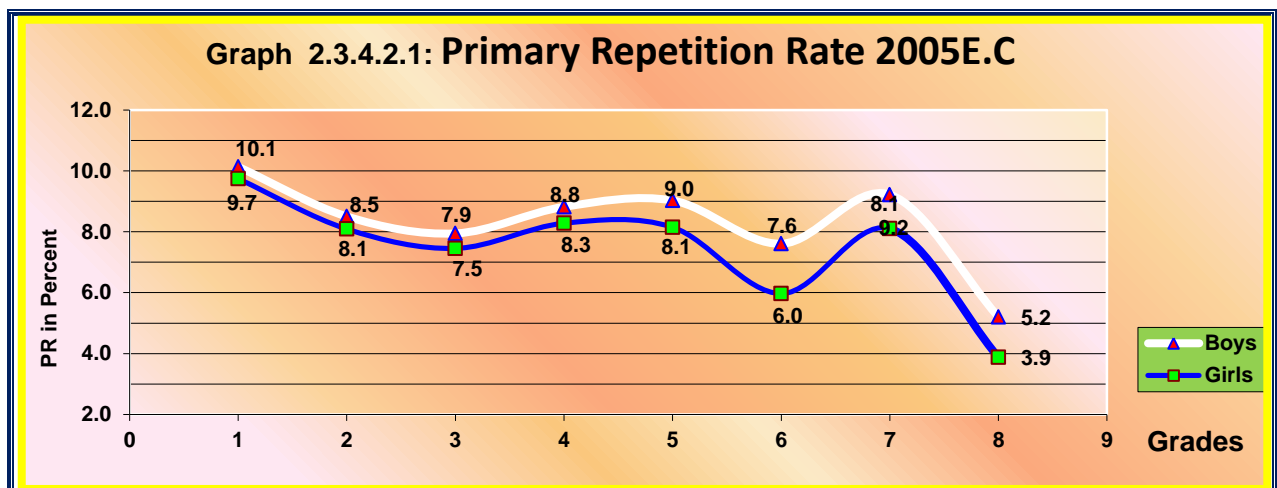

2.3.4.2. Repetition Rate (RR)

Repetition Rate is the proportion of pupils enrolled in a given grade for a given year who studies in the same grade for the following year. Data required for this calculation is repeaters of grade j , in year T and enrolment of grade j of year $T-1$. It is interpreted as a high level of the repetition rate indicates a high level of repetition of grades. The problem of repeating has impact on the system. Because.

1. Repeating has wasted the resources they have used while they repeat in the same grade.
2. They occupied a school space that can be used by the other new comers. The formula to calculate Repetition Rate

$$RR = \frac{\text{Repeaters of grade } j, \text{ year } T}{\text{Enrolment of grade } j, \text{ year } T-1} \times 100$$

2.3.4.3. Dropout Rates (DR)

Dropout Rate is proportion of pupils who with draw from education system for more than one year. It corresponds to the difference between one and the sum of promotion rate and repetition rates. Data required for the calculation of dropout rate are, Promotion Rate and Repetition rate. High dropout rate constitute, interpreted as an obstacle in the achievement of UPE. Dropout problem has different impact on the system. Because

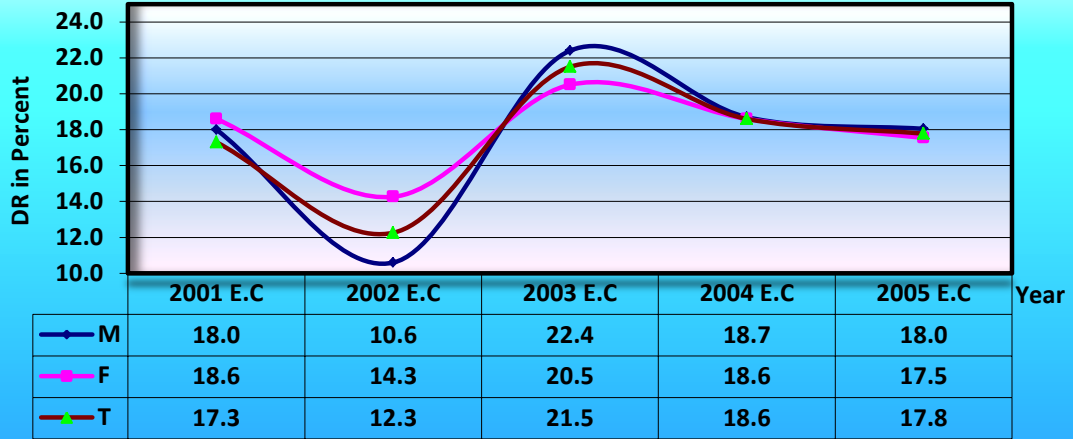

1. Dropouts have wasted the resources.
2. They occupied a school space, which could use the other new comers if they readmitted.
3. They have not acquired the minimal levels of literacy and numeracy if they dropped out in early grades.

The formula to calculate dropout is,

$$\text{Drop-out Rate} = (100 - \text{promotion rate} - \text{repetition rate})$$

As graph 2.3.4.3.3 above demonstrates that grade one dropout rate was 30.4% (M=29.8%, F=30.9%) in 2001 E.C (2008/9 G.C). But, in the following year the dropout rate had been decreased to 22.0% (M=22.0%, F=22.0%) in 2002 E.C (2009/10 G.C). However, the rate again climbed to 23.6% (M=23.3 F=23.8%) in 2005 E.C (2012/13 G.C). As the data shows such kind of high dropout rate that leads to high level of wastage in the system, the issue needs special attention from concerned bodies.

2.3.4.4. Transition Rate (TR)

Transition Rate is new entrants to the first grade of primary second cycle (5th grade) or the beginning of secondary first cycle (9th grade) in a given year, expressed as a percentage of the number of pupils enrolled in the final grade of primary first cycle or primary second cycle education in the previous year respectively. Data required for calculating is new entrants in first grade of primary second cycle or first grade of secondary first cycle for a given Year **T**, *and* total enrolment in final grade of primary first cycle or primary second cycle for Year (**T-1**). For example, if the increment of transition rate of primary students to secondary is raised, in the same way the proportion of pupils from primary education who reaches secondary education also elevated up. Method of calculation for **TR** is the following;

$$\text{TR to 5}^{\text{th}} = \frac{\text{New entrants in 5 th for Year T}}{\text{Enrolment of 4 th for Year T - 1}} \times 100$$

$$\text{TR to 9}^{\text{th}} = \frac{\text{New entrants in 9th for Year T}}{\text{Enrolment of 8th for Year T - 1}} \times 100$$

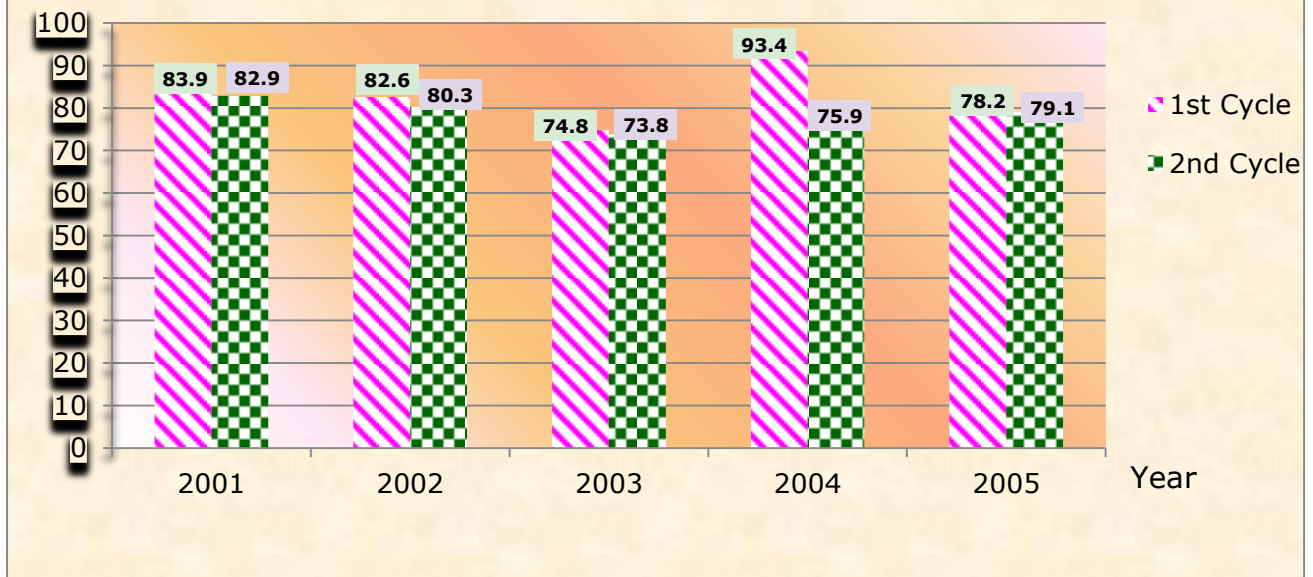

Table 2.3.4.4.1. Transition Rate of Primary First cycle in 2005-2006 E.C (2012/13-2013/14 G.C.)

Graph 2.3.4.4.1 Transition Rate of Primary Education of Last Five Years

2.3.4.5. Primary Completion Rate

Primary Completion Rate is highly dependent on the accuracy of the single age population for both points of measurement (for Grade 8, age 14 and for Grade 5 age 11) Table 2.3.4.5.1; shows the Completion Rates for both Grade 5th and Grade 8th. The Primary Completion Rate is internationally an established measure of the outcomes of an education system and calculated with the following formula.

$$\text{Completion Rate} = \frac{\text{New entrant in last Grade}}{\text{Population official age in last grade}}$$

Where “New entrant in last Grade”= (Total pupils in last Grade – repeaters in last grade)

Table 2.3.4.5.1: Grade 5th Completion Rate by Zone in 2005-2006 EC (2013-2014 G.C.)

2.4. COHORT ANALYSIS

Cohort analysis is based on the three basic flow rates namely repetition, promotion and dropout rates. We evaluate the effectiveness of our education system by it. To perform cohort analysis it is imperative to have at hand indicators like survival rate by grade, indicators of the duration of the study, and indicator of the wastage. This cohort method allows us to predict future trends of the education system. However, the model has its own limitations. In order to understand the limitations of the model, there are a number of assumptions made to interpret the results of calculations of indicators of internal efficiency.

Assumptions behind cohort analysis

1. Only cohort of 1000 pupils is considered and no re-entrants admitted. Assuming that new entrants admitted at grade one, and no in-migration or out- migrations throughout the cohort years.
2. It also assumes that no pupil skips a grade, i.e., there is no double promotion.
3. The same flow rates apply to all pupils enrolled in a given grade, regardless of whether a pupil has reached that grade directly or only after a number of repetitions. This assumption is sometimes, referred to as the assumption of homogeneous behavior.
4. Pupils in a grade are, allowed to repeat only twice. This is in line with existing policy. However, in reality, a pupil may repeat a grade more than twice. In this case, the assumption remains constant and allows only for the repeating of the grade twice.

2.4.2. Internal Efficiency of the Cohort in Primary Education

I. Pupils Year By Grade Of The Cohort

Table 2.4.2.1: Pupils Year by Grade of Cohort Analysis								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	1112	802	662	562	470	363	310	238
F	1107	805	665	563	464	367	318	244
T	1109	803	663	562	467	365	314	240

II. INDICATORS OF RETENTION BY GRADE OF THE COHORT

a. Survival Rate of the Cohort

The purpose of survival rate is to measure the holding power and internal efficiency of the education system. It illustrates the situation regarding retention of pupils from grade to grade in school, and conversely the magnitude of dropout by grade. Survival rate is the proportion of cohort pupils who reached the subsequent grade expressed as a percentage of pupils enrolled in the first grade of a given cycle in a given school year. It also used to measure the impact of repetition and dropout on internal efficiency. Survival by grade obtained by adding the number of pupils who eventually will promoted to the next higher grade. In each grade, some pupils promoted to the next grade without repeating a grade and others after repeating once or twice.

Table 2.4.2.2: Rates of Survival by Grade from the Cohort Analysis								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	73.48	61.12	51.48	43.09	34.07	28.50	22.68	19.28
F	74.08	61.68	51.83	42.85	34.89	29.44	23.51	17.13
T	73.78	61.38	51.64	42.98	34.46	23.07	23.07	18.31

As the table 2.4.2.2 above shows among 1000 students enrolled in grade 1, only 73.78% (M=73.48%, F=74.08%) are survived in the cohort. The rest 26.22% (M=26.52%,

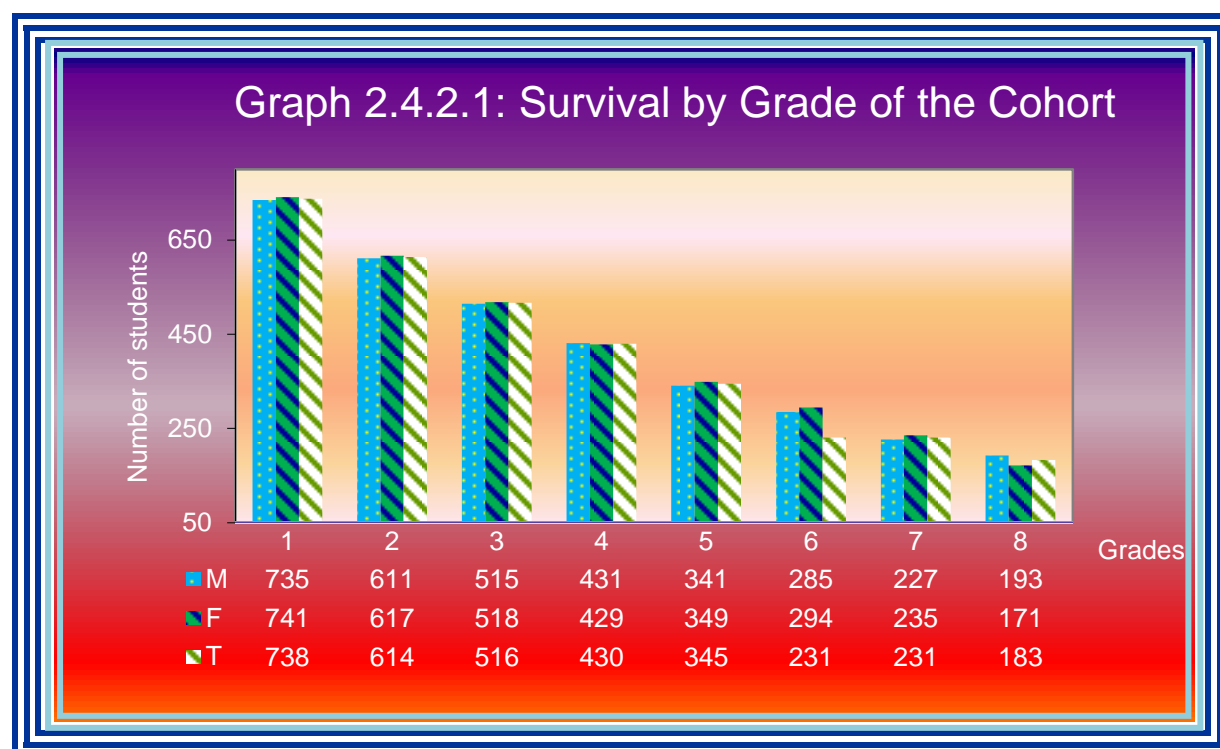

F=25.92%) left the school before completing grade 1. Besides, only 42.98% (M= 43.09% and F= 42.85 %) students survived to complete first cycle primary.

From the 1000 pupils started the cohort, only 18.31% (M=19.28%, F= 17.13 %) will finally survive at grade 8th. This shows that, 81.69% (M=80.72%, F=82.87%) of students left the system without completing primary education. So we can imagine how the issue needs serious attention from the concerned bodies and policy makers to fill this wide gap of educational wastage.

Table 2.4.2.3 :Number of Pupils Survived in Each Grade of the Cohort

Sex	Grade							
	1	2	3	4	5	6	7	8
M	735	611	515	431	341	285	227	193
F	741	617	518	429	349	294	235	171
T	738	614	516	430	345	231	231	183

Graph 2.4.2.1: Survival by Grade of the Cohort

b. Dropout by Grade of the Cohort

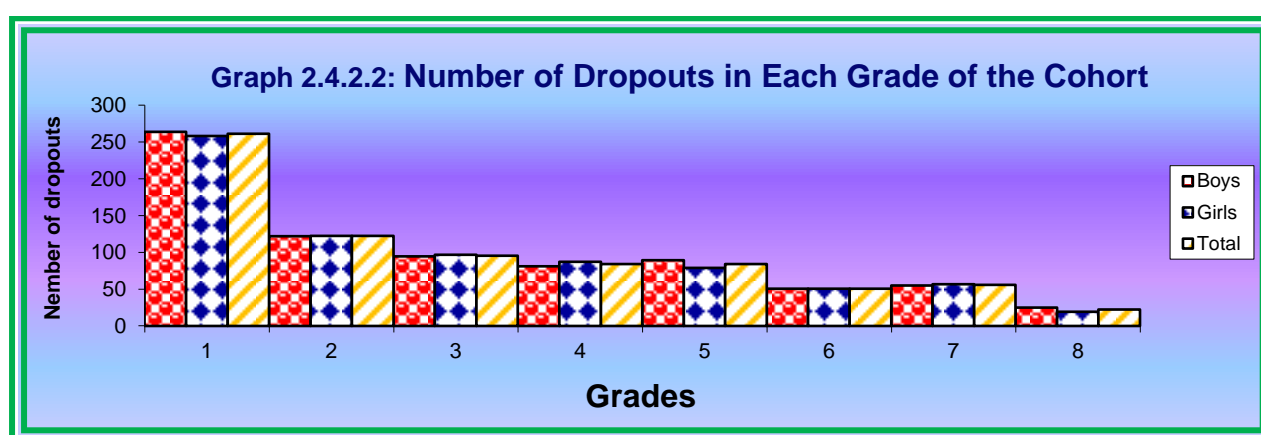

Dropout is the proportion of students who leave the system at each grade. It is the most serious problem in education system. As the cohort data on the table 2.4.2.5

shows that among the cohort of 1000 pupil, 261 of them left the school before completing grade one.

Table 2.4.2.4: Percentage of Dropout by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	26.41	12.22	9.45	8.12	8.92	5.08	5.48	2.51
F	25.83	12.27	9.69	8.74	7.89	5.07	5.67	1.92
T	26.14	12.24	9.57	8.41	8.44	5.08	5.57	2.23

As shown in the table 2.4.2.4.above, most of the students leave the system early in grade 1 and 2. About 26.14% (M=26.41%, F=25.83%) of the cohort left the system before completing grade one. Majority of children leave the system at an early stage compared to dropouts at upper grades. This is an undesirable situation, to which planners and decision makers should pay immediate attention to it.

Table 2.4.2.5: Number of Dropout by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	264	122	95	81	89	51	55	25
F	258	123	97	87	79	51	57	19
T	261	122	96	84	84	51	56	22

c. Repeaters by Grade of the Cohort

Table 2.4.2.6:Repeaters by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	113	68	53	50	42	28	29	12
F	108	65	50	47	38	22	26	9
T	110	67	51	48	40	25	27	11

The cohort data on the table 2.4.2.6 above shows that, among the cohort of 1000 pupils 110 of them repeated at grade one.

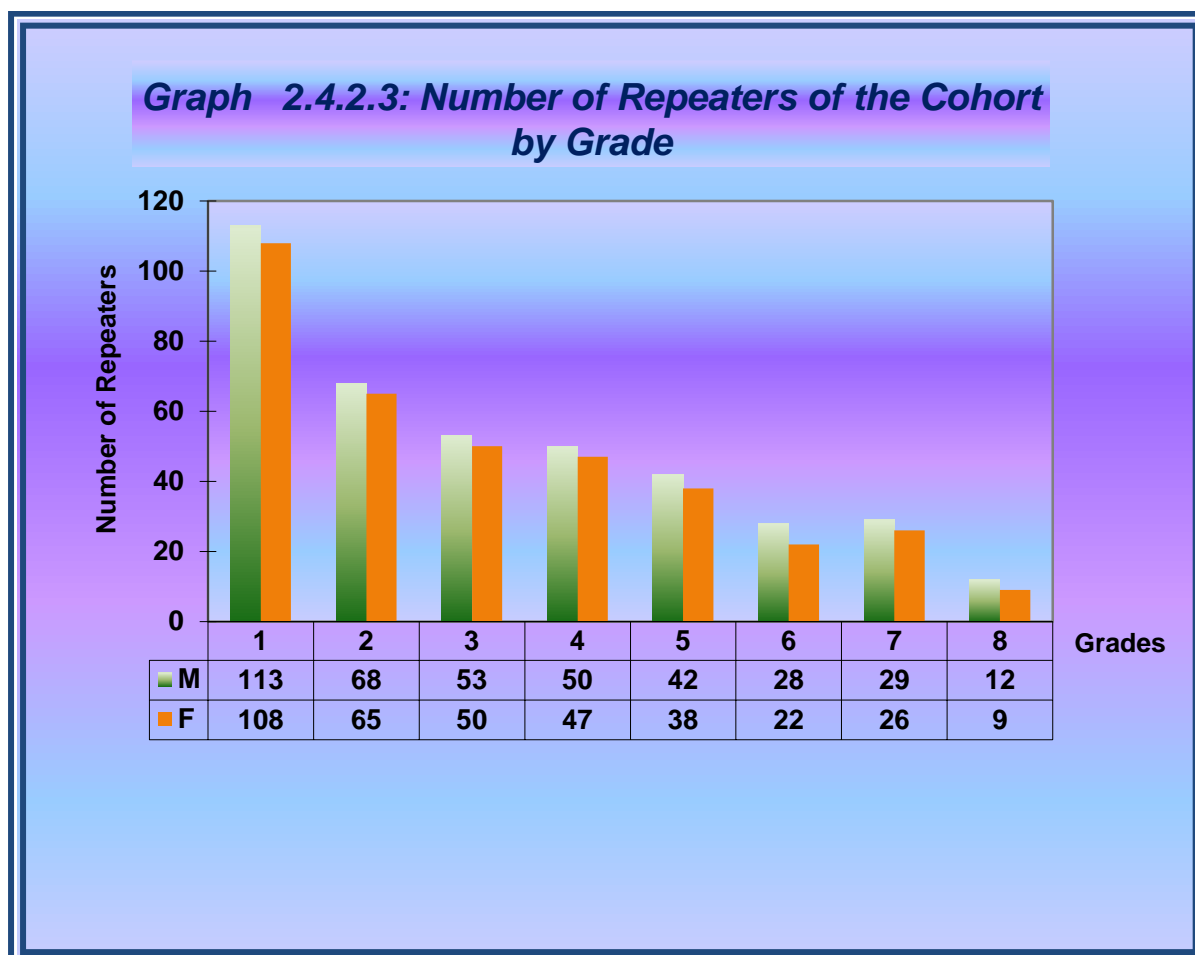

Table 2.4.2.7: Percentage of Repeaters by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	11.3	6.8	5.3	5.0	4.2	2.8	2.9	1.2
F	10.8	6.5	5.0	4.7	3.8	2.2	2.6	0.9
T	11.0	6.7	5.1	4.8	4.0	2.5	2.7	1.1

Table 2.4.2.7 above shows that 11.0 % (M=11.3%, F=10.8%) of the cohort repeats at grade 1. When we compare both levels, majority of children repeat in the early grades than the upper one.

d. Number of Graduates from the Final Years of the Cohort

Graduates from the final year is the number of pupils who eventually graduate (Complete) from the final year of the cycle. In other words, those who successfully complete primary first cycle of 4 years of study and promoted to the first grade of second cycle primary (Grade 5). or those who successfully complete second cycle primary of 8 years of study and promoted to first cycle secondary (Grade 9). According to the cohort, out of **1000** pupils registered in 2005 E.C at grade one, 396 pupils will graduate grade 4 by 2008 E.C (2015/16 G.C.), without repeating any grade during their stay in school. Another 137 pupils will graduate grade 4 after repeating once and 30 of them graduated after repeating twice in any of the grades. T number of graduates of first cycle primary for this cohort is 563.

Similarly, 98 pupils will graduate grade 8 by 2012 E.C. without repeating, 62 pupils will also graduate grade 8 by 2013 E.C by repeating once, finally 22 pupils will graduate grade 8 by 2014 E.C by repeating any of the grade twice. According to the cohort, the possible number of pupil graduates from the complete primary system or grade 8 is only 183. Accordingly, only about 18.3% of the pupils complete primary education out of 1000 pupils of the cohort system. Unfortunately about, 817 (81.7%) pupils of the cohort were left the system before completing primary education. Therefore, Educational planners, policy makers, decision makers, stakeholders and communities must work towards finding the solutions to improve this huge gap.

3. Secondary Education Program

3.1. Equitable Access of Secondary Education

Access is the extent to which the secondary school age population is able to join this particular level of education. Equity implies a reduction in disparities based on gender (Male/Female) and geographical location (Urban/Rural). Equity also ensures that, all students in every school will be able to avail themselves of the services, technology, materials and the qualified teaching staff that able to achieve educational success. Besides, it indicates fairness in the distribution of opportunities for education, and is the main indicator that shows educational performance.

Secondary education is composed of two cycles. They are General Secondary Education (9-10) and Preparatory classes (11-12). General secondary education (9-10) is designed to continue the basic programs of the primary level, but the teaching is typically more subject focused and requires more specialized teachers for each subject area. The end of this level often coincides with the end of compulsory education. A preparatory class (11-12) is the final stage of secondary education and the entry point of higher institution. Therefore, instruction is often organized and even more along subject lines and teachers, typically need a higher or more subject-specific qualification. Let us look at different indicators of secondary education of our region.

3.1.1. Gross Enrolment Rate (GER) of General Secondary Education Grade (9-10)

GER of general secondary education (Grade 9-10) is the proportion of all enrolments regardless of age out of the school age population at this level. It compares the T number of students in the general secondary school with the school-age population of this level. In Ethiopia, the official school age for secondary first cycle is from 15-16 years old.

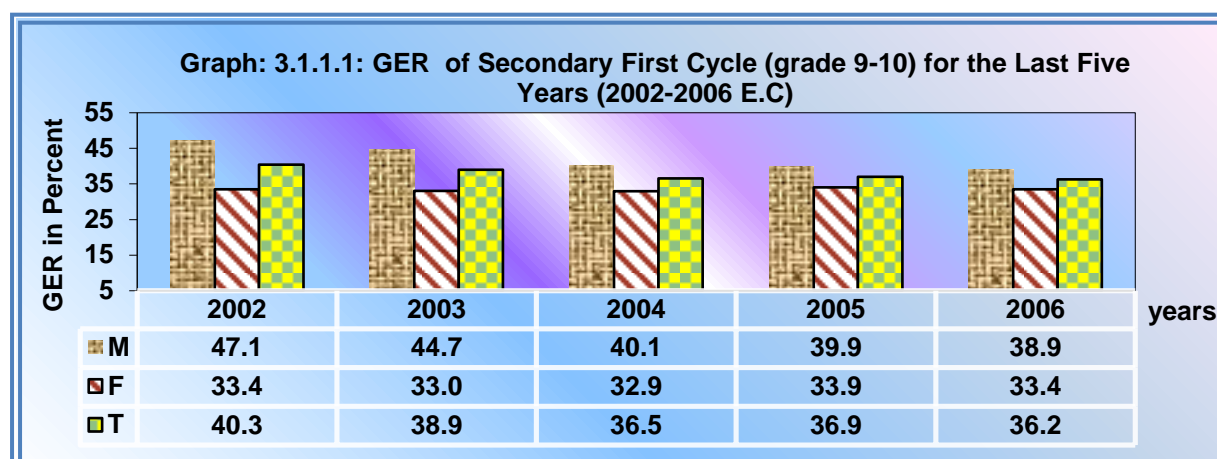

Table .3.1.1.1: GER and Equity Indicators of Secondary Education (9-10) by Zone; in 2006 E.C (2013/14 G.C)

SN	Zones	Rural			Urban			Urban + Rural			Parity Index		Gap

Oromia Total		5.0	3.7	4.4	233.9	202.9	218.5	38.9	33.4	36.2	0.86	0.020	5.5	214.1

As shown in graph, 3.1.1.1 above, GER of secondary first cycle in 2002 E.C was 40.3% (M=47.1%, F=33.4%) and then decreased to 38.9% (M=44.7%, F=33.0%) in 2003 E.C. Apparently the rate was slumped to 36.2% (M=38.6%, F=33.4%) by 2006 E.C. However, the reasons for the highly declining of GER were not yet identified through research. Thus, whatever the reason is it needs serious attention from educational officials and concerned bodies.

The table 3.1.1.1 above also shows that, GER of 2006 E.C is 36.2% (M=38.6%, F=33.4%) for secondary school (9-10) at regional level. From the same table it is possible to see that there are eight Administrative towns that have GER greater than 100%. Even though, the causes haven't been identified with basic research yet, the major suspected reason behind, GER of those administrative towns exceeds 100% is students who are living in surrounding zones came to those towns to attend their high school education. Therefore, this may led to the increment of enrolment in secondary education. So, when the rate was calculated in respect of school age population of those towns it may exceed more than the expected rate.

3.1.2. Net Enrolment Rate (NER) in Secondary First Cycle (9-10)

For this level, we consider students enrolled in secondary first cycle whose age is from 15-16 and compare it to the total number of population belonging to the mentioned age group.

Graph: 3.1.2.1: NER of Secondary First Cycle for the Last Five Years (2002-2006 E.C)

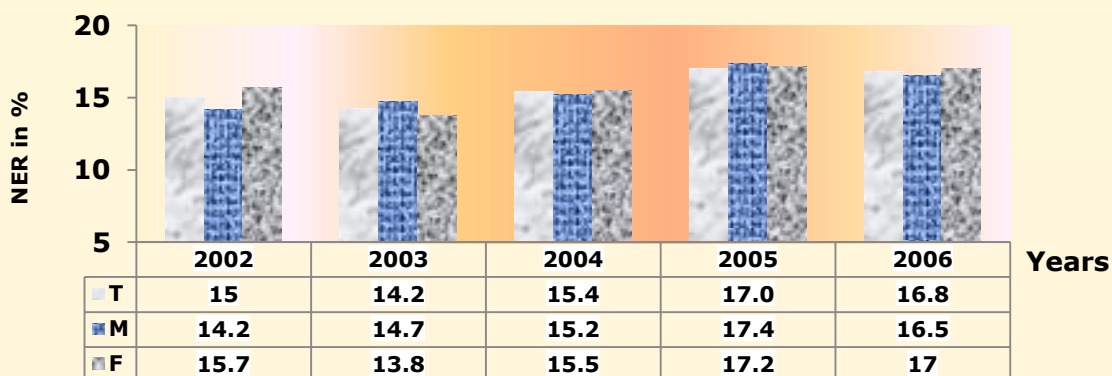

Table .3.1.2.1: NER and Equity Indicators of Secondary Education (9-10) by Zone; in 2006 E.C (2013/14 G.C)

Graph 3.1.2.1 above indicates the NER of the past five years. For example, in 2002 E.C. the NER of secondary (9-10) was 15.0% (M=14.2%, F=15.7%) and rose to 16.8 % (M=16.5, F=17.0%) in 2006 E.C. As the data indicates NER of the level didn't show significant change during the last five years so that the issue needs attention from the education officials and concerned bodies.

Table 3.1.2.1 above shows that NER of secondary education (9-10) at regional level in 2006 E.C. is 16.8% (M=16.5, F=17.0%). Likewise, nine zones and all administrative towns have registered above the regional NER whereas; nine zones of the region have registered less than the regional average. Therefore, the issue needs attention to improve this huge gap in these zones in particular.

Table 3.1.2.2: Secondary & Preparatory Education Gender Gap by GER for the Last Five Years						
Year	GER Secondary (9-10)			GER Preparatory (11-12)		
	M	F	Gender Gap	M	F	Gender Gap
2002	47.1	33.4	13.7	9.5	5.2	4.3
2003	44.7	33.0	11.7	8.5	4.9	3.6
2004	40.1	32.9	7.2	8.8	5.6	3.2
2005	39.9	33.9	6.0	9.1	6.1	3.0
2006	38.9	33.4	5.5	8.7	6.3	2.4

Concerning the gender gap, table 3.1.2.2 shows better improvement in the last five years. The gender gap of (9-10) decrease from 13.7% in 2002 E.C. to 5.5% in 2006 E.C. with AAGR of 16.7% whereas, the gender gap of (11-12), decline from 4.3% in 2002 E.C. to 2.4% in 2006 with AAGR of 11%.

3.1.3. Gross Enrolment Rate (GER) of Preparatory (11-12)

Oromia Total		0.2	0.2	0.2	54.9	39.8	47.4	8.7	6.3	7.5	0.7	0.004	2.4	47.2

As shown in graph 3.1.3.1 above, the GER of preparatory (11-12) shows a little improvement in the last five years. For example, it was 5.7% (M=8.1%, F=3.3%) in 2002 E.C and increased to 7.5% (M=8.7%, F=6.3%) in 2006 E.C (2013/14 G.C) with the average annual growth rate of 5.6%.

As indicated on table 3.1.3.1 above, all administrative towns except Gelan/Town and six zones have GER which is greater than the regional average which is 7.5% (M=8.1%, F=3.3%). On the other hand, twelve zones and Gelan/Town have less than the regional average. Thus, the data indicates the issue needs special attention for improvement.

3.1.4. Net Enrolment Rate (NER) of Preparatory (11-12)

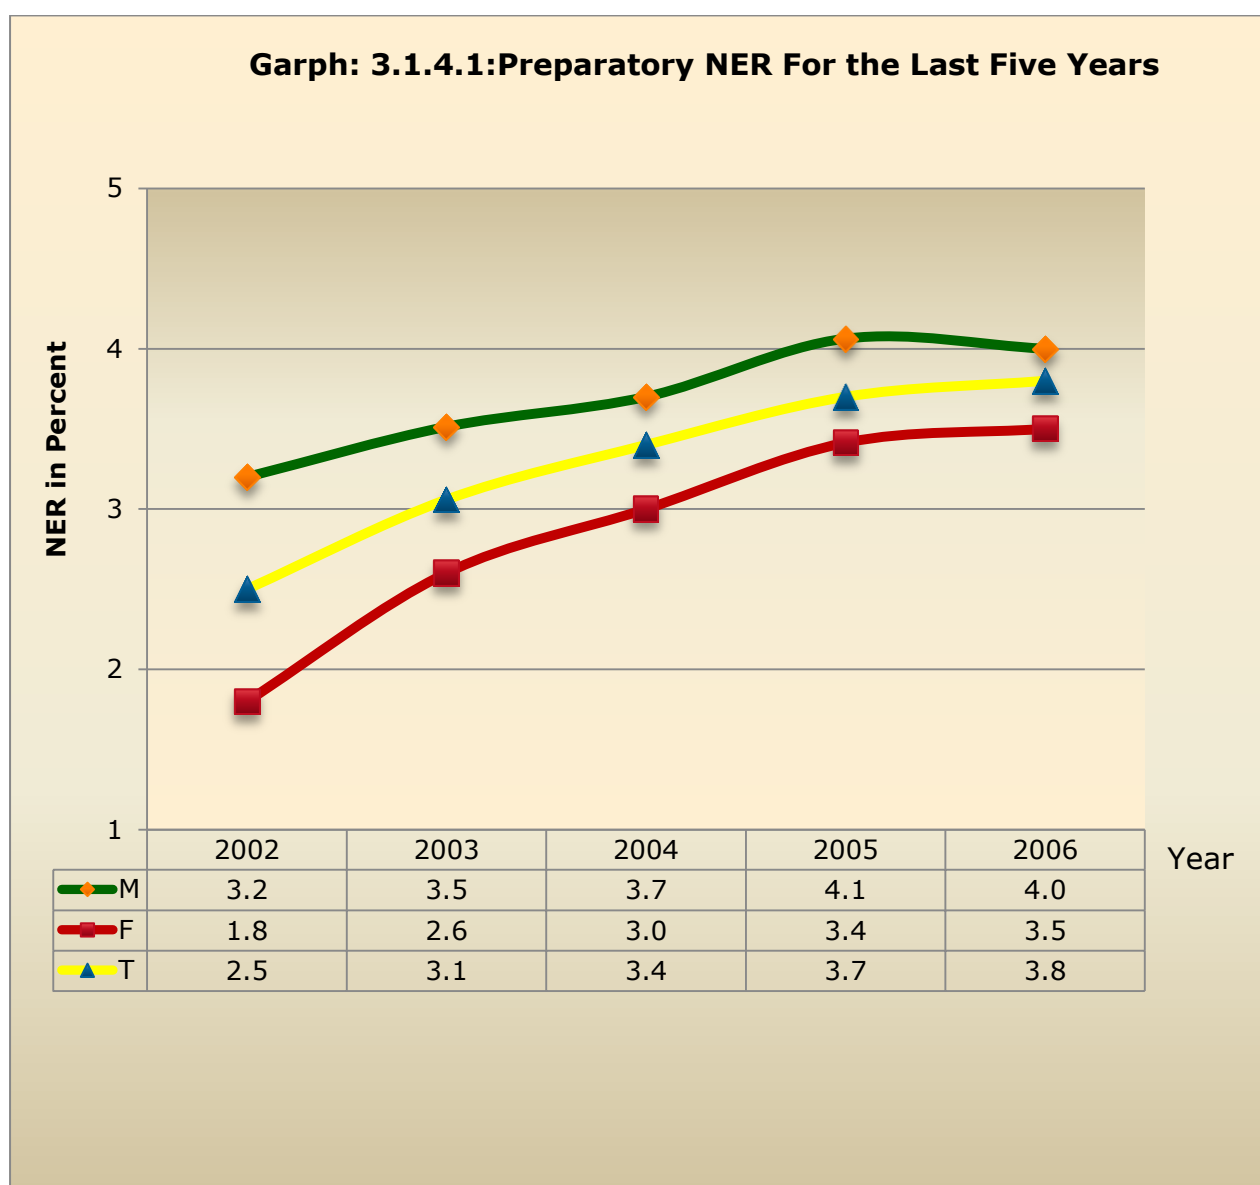

Table 3.1.4.1: NER and Equity Indicators of Preparatory By Zones, in 2006 E.C (2013/14G.C)

As shown in graph 3.1.4.1 above, NER of Preparatory schools (11-12) has steadily increased for the last five years. For example, it was 2.5% (M=3.2, F=1.8%) in 2002 E.C. and then rose to 3.8% (M=4.0%, F=3.5%) in 2006 E.C. with AAGR of **8.73%**.

Table 3.1.4.1 above also shows, NER and GPI of preparatory in 2006 E.C. As illustrated on the table, zonal and administrative town's level of NER is quite far apart from one to the other. Accordingly, the three high NER registered administrative towns are Nekemte, Asella and Shashamene have 41.0% (M=38.5% 43.5%), 30.9% (M=34.4, F=237.4%) and 23.5% (M=23.2%, F=23.8%) respectively. Whereas, Gelan/town, Jimma and Guji zones are the three least NER registered zones have 0.9% (M=1.9%, F=0%), 0.9% (M=0.9%, F=1.0%) and 1.3% (M=1.6%, F=1.0%) respectively. Concerning gender parity index /GPI/, it has been 0.84 in 2005 E.C and this value is improved to 0.9 in 2006 E.C.

3.2. Quality of Secondary & Preparatory Education

Major educational inputs that contribute a remarkable role to ensure quality of education are the availability of sufficient and qualified teachers, class size and text books. When compared to the primary education, the percentage of qualified teachers, student-teacher ratio, student-section ratio and student-text book ratio are better for secondary & preparatory education in the region.

3.2.1. Percentage of Qualified Secondary & Preparatory School Teachers

The minimum qualification required for first cycle and second cycle secondary school teachers is BA/BSc or BEd.

Table 3.2.1.1: Secondary & Preparatory Education Teachers by Teaching Level and by School ownership in 2006 EC (2013/14 G.C.)

As shown in table 3.2.1.2 above, the percentage of qualified teachers for first cycle (9-10) and secondary second cycle (11-12) of 2006 E.C (2013/14G.C) were 91.4% (M=91.8%, F=89.2%) and 93.4% (M=93.9%, F= 86.8%) respectively. As illustrated from the same table percentage of qualified teachers of zones and administrative towns varies from each other.

As shown in the table 3.2.2.1.1 above, in 2006 E.C (2013/14 G.C), Teacher to student ratio of secondary & preparatory education (9-10) and (11-12) were 1:29 and 1:22 respectively. As data shows Borena, Bale and West Harerge Zones have the least Teacher to student ratio in secondary first cycle /9-10/ which are 1:23 & 1:24 respectively. In preparatory grades (11-12) Gelan Town, LegeTafo Town and Ilu Aba Bora Zone have the least teacher-student ratio, 1:3, 1:9 and 1:13 respectively.

OromiaTotal		5106	3870	8976	1032	976	2008	543661	104117	61	52

As can be seen from graph 3.2.2.2.1 above the trend of Student-Section ratio for secondary first cycle /9-10/ has been slightly fluctuating from year to year. In 2002 E.C. it has been (1:68) however it shows improvement in 2006 E.C by declining to (1:61). Additionally table 3.2.2.2.1 above also shows the Student-Section ratio at zonal level too. Accordingly, for grade (9-10) among Towns like Asella, Jimma and LegeTafo as well as zones such as Bale, Arsi and Borena are approaching to the standard with regard to student-section ratio of the year.

As table 3.2.3.2 shows, among 863 Government secondary & preparatory schools of the region 644 (74.6%) schools reported that they have at least one school facility. Out of 644 schools which have Laboratory, Library, Pedagogical Centre, Electric power and Internet access are **94.4%**, **80.0%**, **46.6%**, **82.4%**, and **12.7%** respectively. Besides, all of them are reported, as they were having latrine and water service in their compounds.

The table 3.3.3.1 above illustrates that by 2006 E.C (2013/14 G.C.) the repetition rate of secondary school /9-10/ at regional level is 10.1% (M=7.2%, F=13.4%). Nevertheless, zones are having different value than the region. For Instance, Burayu, Gelan and Sebeta Administrative Towns have the lowest repetition rate, 2.9% (M=2.7%, F=3.1%), 3.3% (M=2.6%, F=4.5%) and 3.9%(M=3.5%, F=4.3%) respectively. On the other hand East Hararge, South West Shoa, West Harerge and Guji zones have the highest repetition rate, 16.7% (M=7.85, F=34.4%), 16.0% (M=10.9%, F=22.3%), 16.0% (M=9.3%, F=28.8%) and 16.0% (M=10.3%, F=24.2%) respectively. This table also elaborates the repetition rate in preparatory school by indicating repetition rate, 3.0% (M=1.4%, F=5.4%), at regional level. Meanwhile, this data have difference in values in all over the zones and Administration towns of the region. For instance Shoa South West, Hararge East and West Harerge have the highest repetition rate of 9.5%(M=4.4%, F=19.5%), 7.7 % (M=1.4%, F=38.4%) and 7.1% (M=0.9%, F=31.7%) respectively. On the other hand, Nekemte Administrative Town, Adama Administrative Town and Ilu Aba Bora Zone are also have the least repetition rates.

Regarding to dropout, as table 3.3.1.1 demonstrates, it is 20.8 % (M=25.3%, F=15.5%) and 10.9% (M =11.0%, F=10.8%)for grade 9 and 11 at Regional level respectively. The three zones that have large dropout rate of grade 9 are Guji, East Hararge and West Hararge, 31.9% (M=37.7%, F=23.8%), 29.5% (M=37.7%, F=12.5%) and 25.8% (M=31.0%, F=16.7%) respectively. For grade 11 the highest dropout registered in East Harerge, Sululta Administrative Town and Shashamane Administrative Town, 23.5% (M=23.2%, F=24.9%), 20.2% (M=26.4, F=9.7%) and 20.0% (M=22.4%, F=16.7%) respectively. On the other hand, the three zones that have least dropout for grade 9 are Nekemte Administrative Town, Gelan Administrative Town and Asela Administrative Town, 2.6% (M=0.25, F=4.7%), 8.6% (M=0.8%, F=20.5%) and 9.3% (M=9.5%, F=9.0%) respectively. Regarding to grade 11 Burayu Administrative Town, Asela Administrative Town and Oromia Special Zone Surrounding Finfine have least dropout rate, 2.3% (M=0.7%, F=4.7%), 2.6% (M=3.7%, F=0.8%) and 4.5% (M=0.4%, F=10.1%) respectively.

4. Non Formal Education

4.1 Alternative Basic Education /ABE/

Basic education is the whole range of educational activities taking place in various settings (formal, non-formal and informal) that aimed to meet basic learning needs. In Dakar Framework, the term is having an implication similar to the broad EFA agenda. The program should receive wide spread public support for reasons that include considerations of literacy as fundamental human right. As the fact indicates illiteracy accompanies poverty and a low life expectancy.

Alternative Basic Education (ABE) is intended to address the Primary education needs of children who are substantially older than primary school ages of 7-14. Moreover, ABE enrollments have contribution in reporting GER and NER of 1st cycle primary with regular program. In paying attention for the issue, our region has planned to reduce illiteracy in this regard. Even though great efforts have made to meet the access, still hard work is expected to attain the plan. In this publication under this title we attempted to specify the data of Alternative Basic Education (ABE) and Integrated functional adult literacy (IFAL) program.

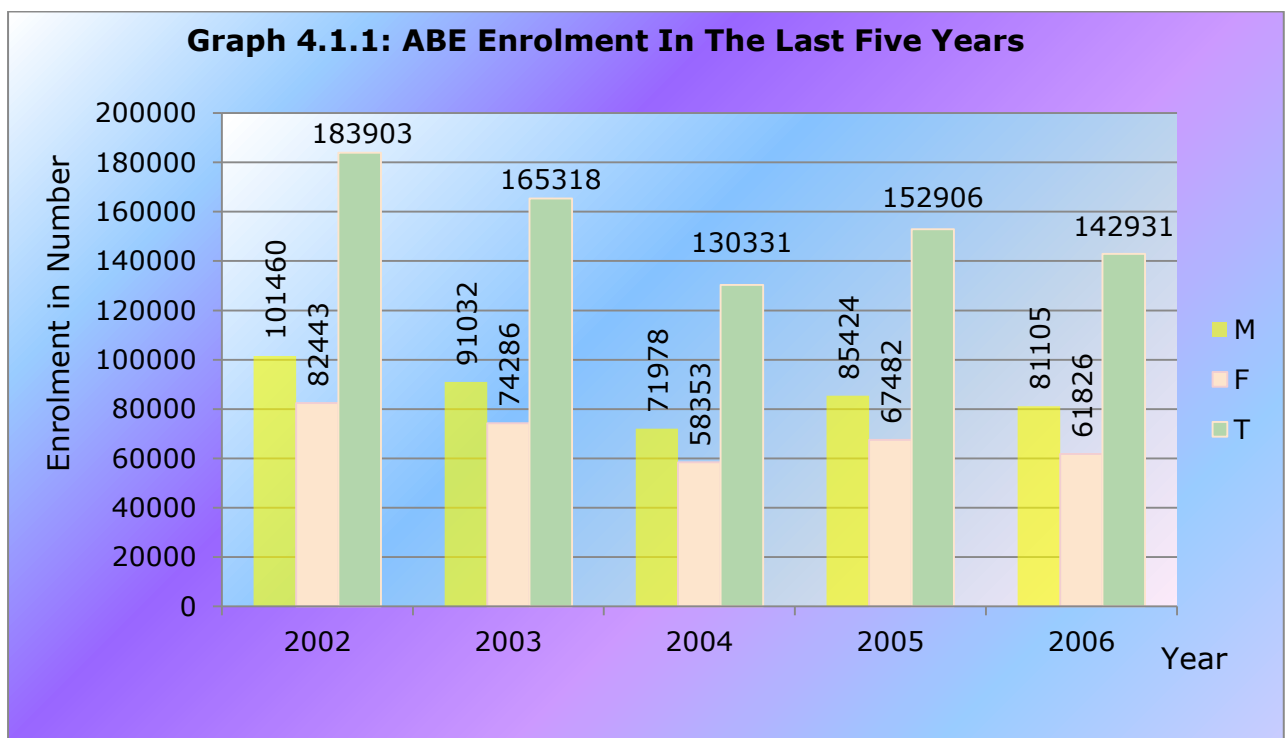

Table 4.1.1: Number of children enrolrd in Altenative Basic Education for the Last Five Years

Year in E.C	Number of ABE Children		
	Male	Female	Total
2002	101460	82443	183903
2003	91032	74286	165318
2004	71978	58353	130331
2005	85424	67482	152906
2006	81105	61826	142931

As indicated on table 4.1.1, ABE enrolment was decline from year to year. This might be taken as the indicator of the assumption that, out of school children enrolled (joined) the regular schools than ABE centers. Therefore, the participation of children in ABE program decreases from year to year. Nevertheless, the assumption for the cause of decrement of ABE enrolment in the past five years might not be correct because of different reasons. For example, practically millions of out of schoolchildren are still not joining the school system in our region. Hence, even though basic research didn't attempt to identify the cause yet, our assumption for the challenges happened might be; low community participation, low supervision and low follow-up of education sector at grass-root level, less interest and motivation of ABE facilitators, low participation of NGOs (both local and international) to promote the ABE program in the region and the like are the expected assumptions. Therefore, it is hoped that the policy makers, planners and the concerned body might have serious concern to fill all the gaps to attain UPE accordingly.
