Foreword

Education is an essential sector to ensure sustainable development in a given country and that enables citizens to participate in democratic, social and political aspects. It is also the most important contributor to national economic growth and development of nations. To evaluate whether it is going on the right track or not as well as to check whether the intended goal is achieved or not, there should be an analysis on the education sector performance indicators. Oromia Education Bureau is therefore collects, compiles, analyzes and delivers educational data in such publications yearly for decision makers, planners, researchers and stockholders. Accordingly, this Education Statistic Annual Abstract is also giving emphasis to the provision of relevant and articulated information in all levels of education taking place in our region for the attainment of SDGs. The charts, graphs and tables in this publication present a relevant and accurate picture of our progress on an annual basis. In presenting this overview, we allow the key partners and stakeholders to see the glance of alteration and how quickly the changes have taken place in our Region.

Therefore, this document would definitely meet the need of decision makers, planners, policy makers, researchers and educational stakeholders in obtaining information regarding educational performance indicators of our region. Besides, it also enables educational planners and policy makers in targeting their future goals in terms of our educational standard by allocating the needed resource for improving and implementing quality of education. Finally, this educational annual abstract gives direction in filling the gaps seen aligned with different key education performance indicators in the region, particularly in improving the quality of education. Moreover, hard work also expected from all education partners to fill the gaps seen in the sector too.

Introduction

Oromia Government Regional State Education Bureau has been preparing Annual Abstract every year in improving and creating conducive work environment to plan and monitor the provision of quality and relevant education for the Region. As known, we had been launched the preliminary quick abstract from preliminary data for the temporary utilization till this annual abstract comes to be active. Accordingly, starting from the beginning of this year till now educational data of the year have been collected, entered and verified at Zonal level and then finally the data were verified at Regional level, recently this final annual abstract of the year is compiled and ready for use by now.

This publication has been written by Oromia Education Bureau EMIS team, with the significant support and cooperation of the thousands of school educationist who submitted documentation of educational annual census from the school up to zone education office. Data was collected based on standard questionnaires designed for pre-primary (KG), Alternative Basic Education, Primary and Secondary education and Integrated Functional Adult Literacy program. This annual abstract contains both descriptive and analytical summaries of equitable access, quality and efficiency of education of our region in detail manner. The data are further disaggregated by the level of education, gender, and localities in order to show detailed educational information of the region. Accordingly, we hope that this publication may provide a basis for monitoring the system and having educational information for policy makers, planners and also references for researchers as well.

Finally, EMIS team would to thank all of our staffs who were involved in data collection, data entry and data verification at school, woreda, admin town and zonal level, because the data collection, entry and verification would not been possible without the important contributions of you. A special note of thanks is also reserved for all experts of our bureau in general and ICT & EMIS directorate in particular for their cooperative effort on the publication of this document.

I. Data Gathering Process

The Annual School Census (ASC) 2017/18 G.C covered all educational institutions across the Region. These institutions are distributed in 20 zones, 19 Administrative Towns, 317 districts and 2766 Cluster Resource Centers (CRC) in the Region. The educational data gathering process has passed through;

- The Regional EMIS team conducted the Training of Trainers (ToT) for all District Education Office (DEO), Zonal/Admin Town Education offices (ZEO) statistician on how to fill annual census questioners, and the ToT also conducted training for CRC supervisors and school directors at CRC and District level.
- The CRC supervisors, DEO and ZEO statisticians were overseeing the filling, retrieval and authentication of filled questioners by the school Directors,
- The process of gathering data was implemented over a maximum of 20 days, depending on the number and size of institutions in each of the districts.
- Workshop and training on the ASC questioner also conducted at Regional, Zonal and District level for statisticians and CRC supervisors and school principals as well. The objective of the workshops is to create awareness about how to fill the questionnaires. Questionnaires by school directors were completed within 7days. Finally, verification and approval of the filled census questionnaires have taken place by respective district Education officials
- Subsequently checking, verification, retrieval of authenticated questionnaires and settling conditions for data entering have taken place by the Zonal officials.

II. Data Processing and Verification

Data entry had been done by data entry clerks hired for entering data under the supervision of the EMIS technical team at zonal level. It was taken place using the so called StatEduc software that operating on a local area network. During data verification, the data verifiers were check the error within encoded data and also clear the data accordingly. After data verification at zonal level, all the data bases were collected and merged at regional level to have regional level data. The last process was data verification & refining at regional level by Zonal statisticians under the supervision of regional EMIS team, so as to clean errors and ensure its final quality level.

III. Data Validation

After the Regional EMIS team carried out the final verification stage, Following that, the 2010 (2017/18 G.C) draft education annual Abstract had been developed and then distributed for the directorates of the Regional Education Bureau for comments to validate the document, and finally after the comments were incorporated in the publication the validation step were ended, lastly such kind of Regional annual abstract were developed.

Executive Summary

The Regional Education Bureau gathers, compiles, analyses and disseminates educational information annually that covers all education subsectors i.e. Pre-primary, Primary, Secondary, Preparatory, Non-formal Education and College of Teachers' Education/CTE. In the same phenomenon almost, all education data has been collected from all institutions and then compiled and analyzed in this publication. Students' performance obtained from National and Regional Examination was also analyzed as indicated in the findings. The five years trend of education data and information as well as the summary of key data is presented here under;

1. Trend of Equitable Access in the last five Years

As indicated on Table 1 below, the number of institution's, were somehow increased most specifically in primary and secondary schools, as one can see from the table the Average Annual Growth Rate (AAGR) of these institutions were 8.03% and 2.53% for secondary and primary schools respectively. Whereas, AAGR of ABE centers was negative because the number of institutions was less than the final year than the initial year, the decreasing of AAGR may be natural because one can judge that the missed ABE centers may be upgraded to regular schools, however the issues have to be identified by research whether those centers were progressed to regular schools or closed by other reasons.

As Table 2, shows from the year 2006 to 2010 E.C, the enrolment was significantly increased in some institutions such as in pre-primary, preparatory grade 11-12 and primary schools' grade 5-8. When we look at the table the AAGR of those institutions were 9.35%, 9.18% and 6.21% respectively. As specified on the table one can observe the rest of institutions change of AAGRs.

Regarding to five years trend of access rates, specifically related to GER, as shown on Table 3, the AAGR of gross enrolment rate of all institutions were indicated, however the GER growth rate of pre-primary, preparatory grade 11-12 and primary grade 5-8 were magnificently higher than the rest of institutions, and that was 10.18%, 5.7% and 3.69% respectively.

I. Number of Institutions

TABLE 1: FIVE YEARS TREND OF NUMBER OF INSTITUTIONS

Five Years Trend of Number of Institutions (2006-2010)						
Institutions	Year					AAGR
	2006	2007	2008	2009	2010	
Kindergartens	1402	1543	1631	1657	1726	4.16%

GRAPH 1: FIVE YEARS GRADE 1 AIR AND NIR TREND

As the Graph1 shows, the five years grade 1 trained of AIR were above 100%, it means the indicator briefs that most of the kids joined the system were above school aged. In the same way the NIR was also reveals the same trained as well, except in 2006 and 2007 E.C., registered a little bit less than 100%.

GRAPH 2: PRIMARY EDUCATION GER FIVE YEARS TREND

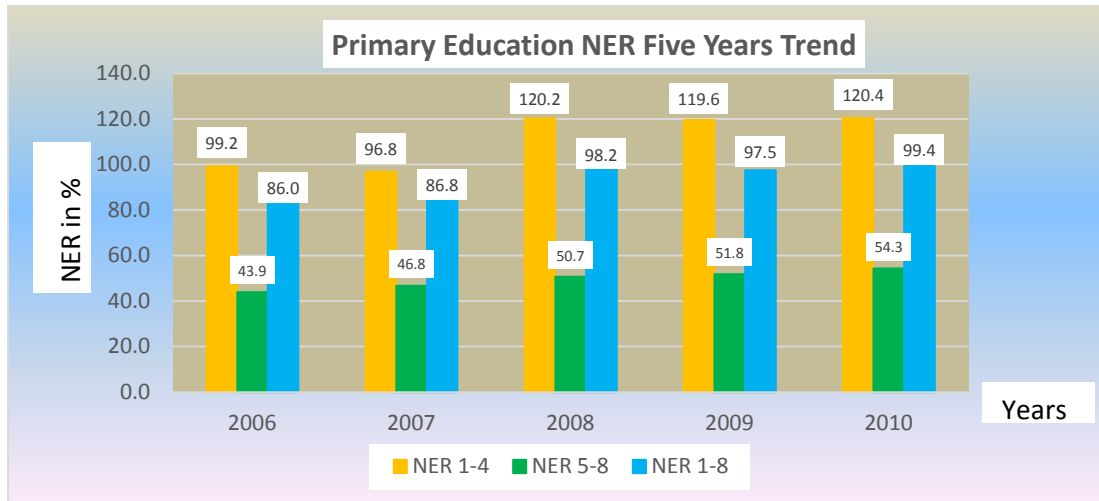

As observed from the graph 2 above, the Grade 1-4 Regional GER was enumerated as 124.1% by 2006 (2013/14 G.C) and increased to 145.2% by 2010 (2017/18 G.C). It is clearly seen from the graph that, the number of over aged and under aged children in the system has not decreased yet.

As Graph 2 and Graph 4 shows, the AAGR of Gross Enrolment Rate of primary and secondary first and second cycles were 3.1%, 3.7%, 2.9%, 2.5% and 5.7% respectively for grade 1-4, 5-8, 1-8, 9-10 and 11-12. As one can observe from the figures the growth rate of grade 5-8 and grade 11-12 were exceed from the rest.

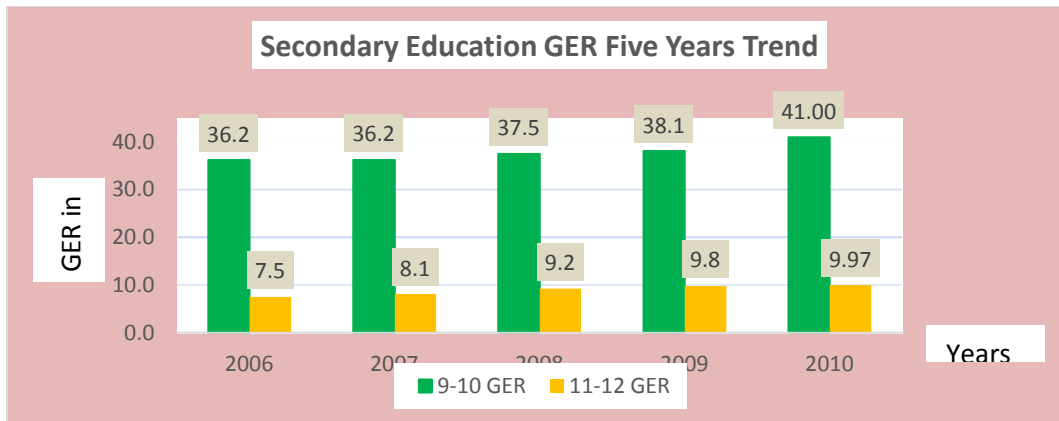

Regarding to Grade 5-8 the Regional GER was 56.2% in 2006 (2013/14 G.C) and slight increased to 67.6%, as the data indicates, the students enrolled in primary first cycle was left the system without joining the second cycle primary. So, the issue needs farther investigation in figuring out why these were happened and putting the remedial action for the gap shown. As one can observe from the graph, the GER of Grade 1-8 in 2006 (2013/14 G.C) inclined from 92.5% to 106.8% by 2010 (2017/18). Therefore, the data indicates still over aged kids were involved in the system from year to year.

As shown from Graph 3 and Graph 5, the Net Enrolment Rate differs in increments in primary and secondary first and second cycle, from the starting year 2006 to final year 2010, however when we look at the AAGR of all primary and secondary schools' grade 1-4, 5-8, 1-8, 9-10 and 11-12 the growth rate was 3.9%, 4.3%, 2.9%, 2.4% and 6.3% respectively. As we observe from the figures the growth rate of grade 5-8 and grade 11-12 were a little bit higher than the others.

CHAPTER ONE

EQUITABLE ACCESS

Over View of Pre-Primary Education Program

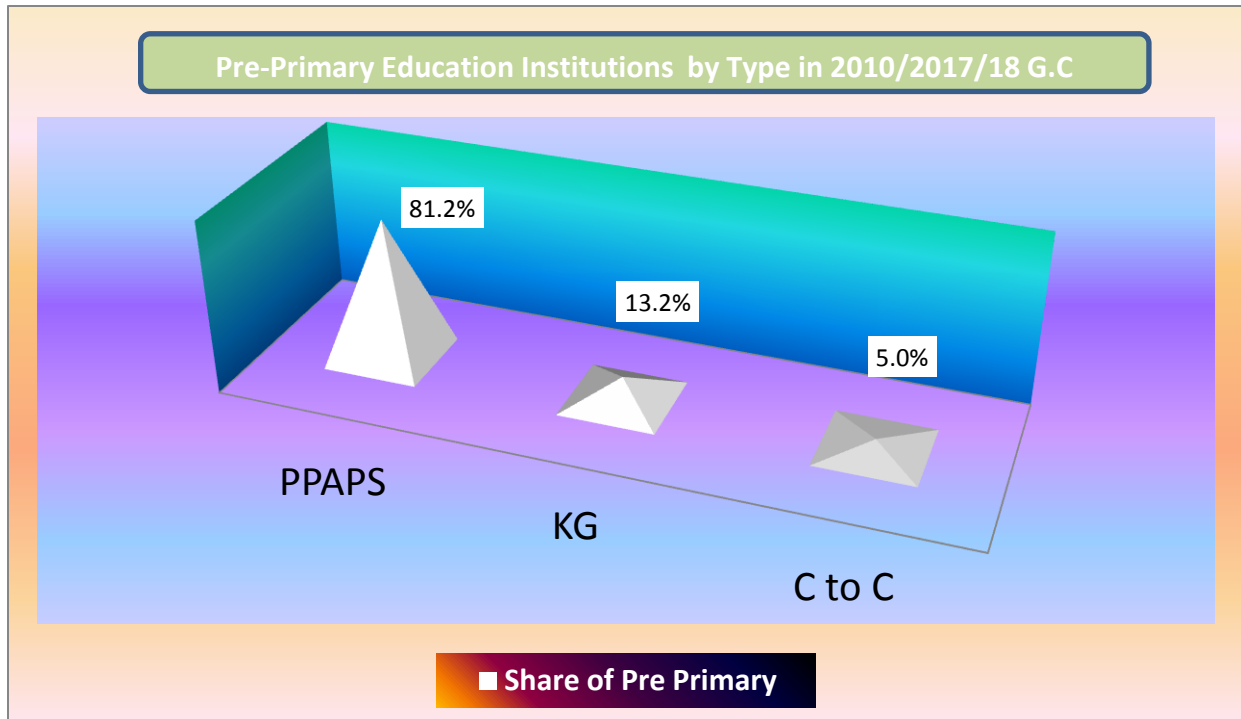

Education which is given to four to six years old children before they enter formal schools is called pre-primary education. Pre-primary education includes kindergartens, “O-class” and child to child programs. Kindergartens are predominantly operated by communities and non-governmental organizations such as faith-based institutions mostly in urban area. Government has been involving in pre-primary attached to primary schools (“O-class”) and child to child programs to address disadvantaged rural children of the level. In this regard Oromia Education Bureau recently embarked on development of the pre-primary sub sector since constructive impact on further learning in primary education and beyond significantly dwells on Early Childhood Development (ECD) education. Developments have been under taken to boost the performance in this subsector to achieve EFA goals; for instance, the development of the early childhood curriculum & teacher training are among the achievements.

1.1.1. Pre-Primary Institutions

There were 13,110 (1,726 KG, 10,729 PPAPS and 655 C to C) pre-primary institutions those responded to the 2010 (2017/18 G.C) ASC. The number of the former institution has increased and the number of latter two institutions have decreased when compared with that of 2009 (2016/17.G.C). Accordingly, the number of KGs has increased from 1,657 to 1,726; whereas the number of PPAPS has decreased from 11,216 to 10,729 and Child to Child centers have decreased from 883 to 655. Graph1 below also shows us that among 13,110 pre- primary schools in 2017/18 G.C. the majority (81.8%) were pre-primary

attached to primary schools (PPAPS) followed by KG (13.2%) and then Child to Child centers (5.0%).

GRAPH. 1.1.1: PRE-PRIMARY EDUCATION BY TYPE

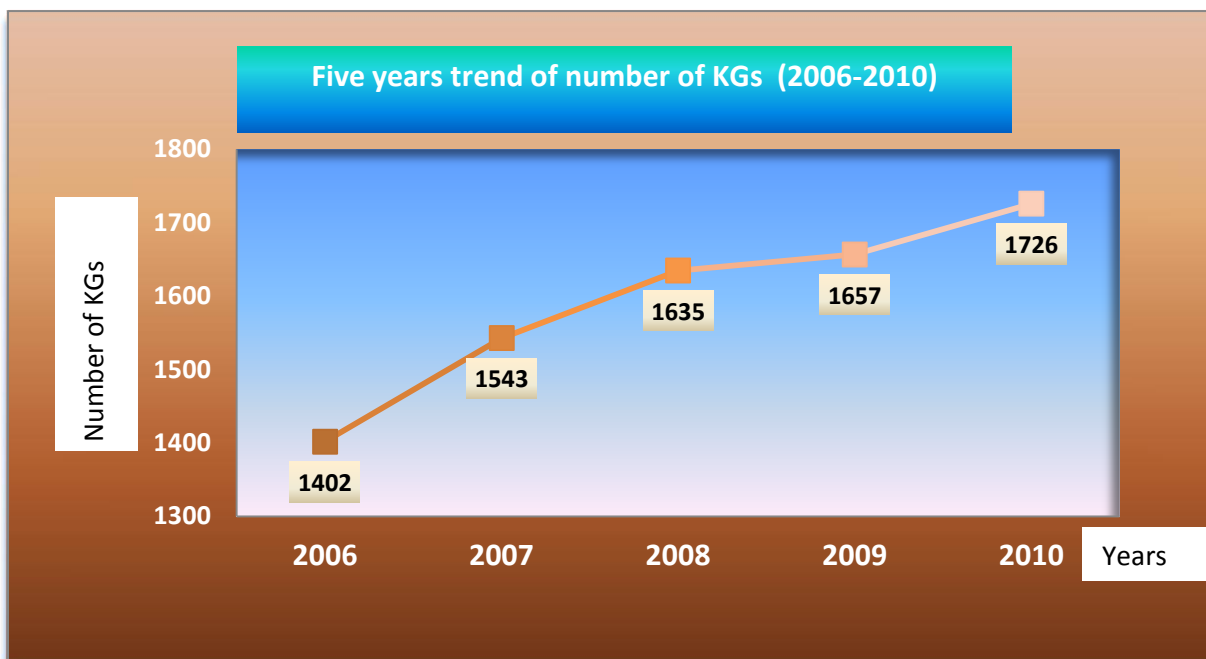

Since the development of the ECD curriculum was introduced, there is a direction that all Government primary schools have to conduct the PPAPS program. Based on the National Policy for ECD, Oromia National Region State Education bureau has been put in to practice since 2002 to benefit vulnerable and disadvantaged children of age 6 who do not have access to kindergarten by annexing it to public primary schools especially in rural areas for one year. That is why most of primary schools in the region 73.9% were involved in the implementation of program as annexes. But 26.1% of primary schools were not implementing the program in 2017/18 G.C that needs due attention by the concerned body to benefit children of the level.

The other modality to benefit children of age 4-6 is engaging them in Kindergartens. The number of these institutions has shown increment from

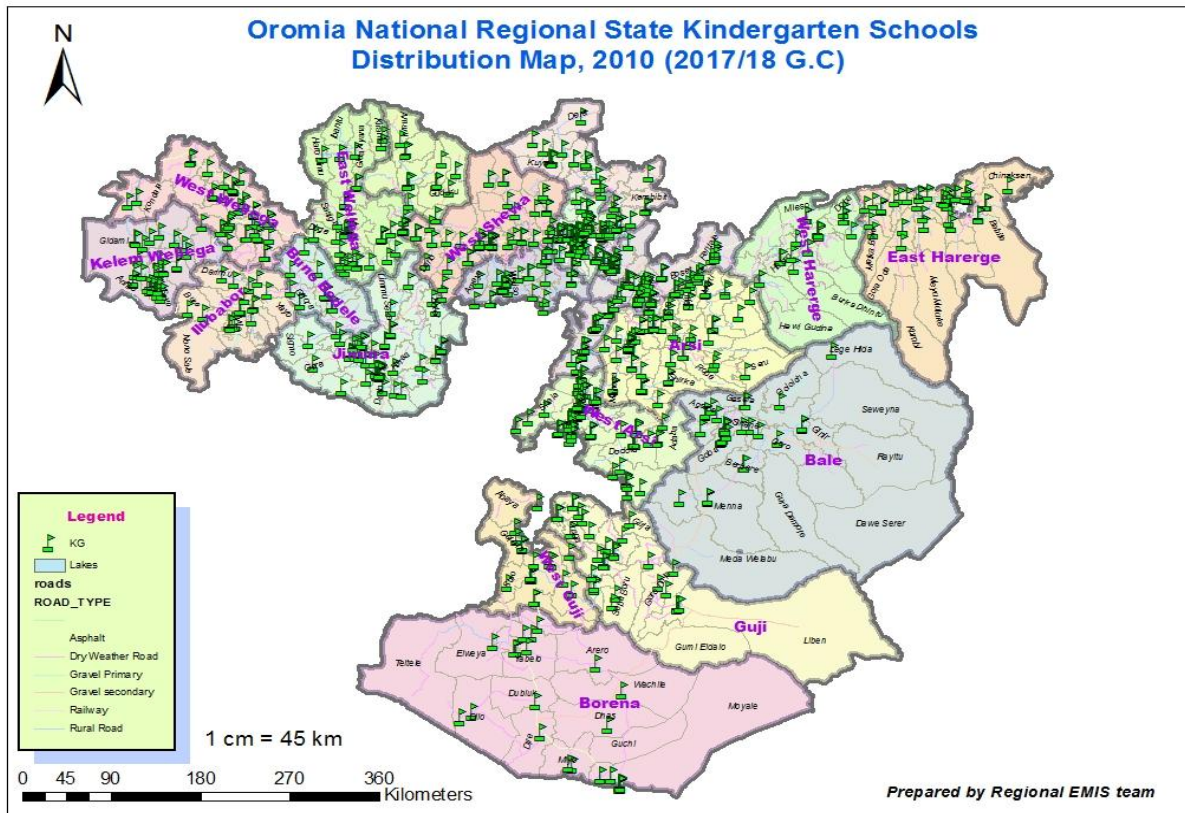

year to year. Accordingly, there were 1,402 KGs in 2006 and increased to 1,726 in 2010. Graph 1.1.2 below also shows five years trend of number of KGs.

GRAPH. 1.1.2: TREND OF NUMBER OF KINDERGARTENS

Regarding distribution, most of KGs are concentrated in urban areas of the region mainly owned by private and non-governmental organizations. Map 1 below shows the distribution of KGs those their location data have collected in 2017/18 G.C. As can be seen on the map most of KGs in the Region are located in urban areas and along the main roads. As we can observe from the distribution map; all zones and administrative towns in general and Zones like Borena, Bale, Guji, Horo Guduru Wollega and both Hararge zones need due attention in increasing access of kindergarten schools in all unreached woredas.

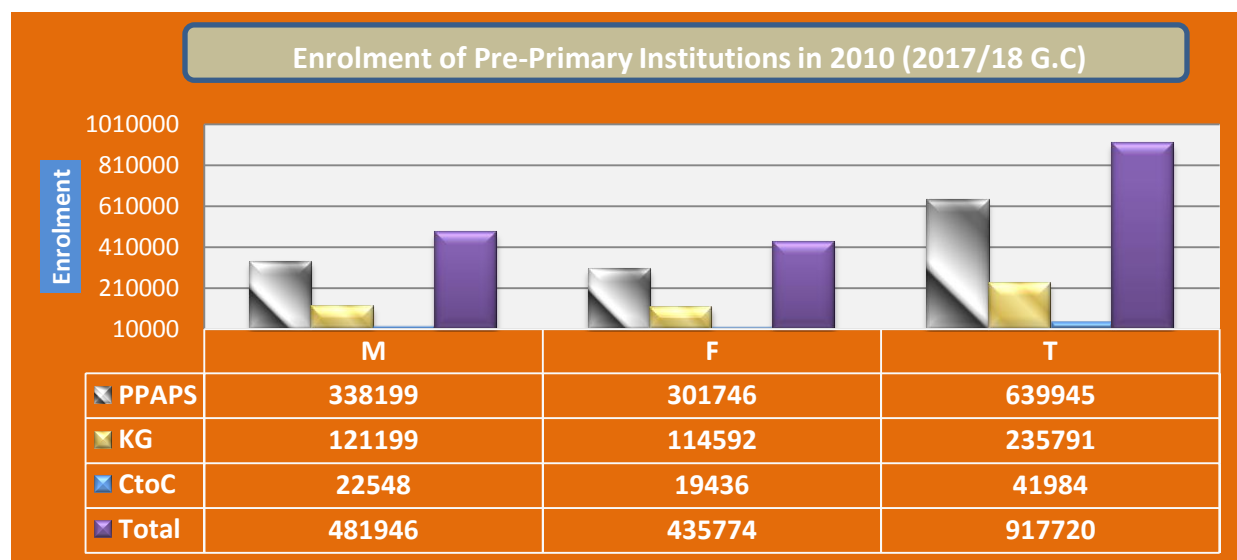

Map 1: Kindergarten Schools Location Map at Regional Level

1.1.2. Enrolment in Pre-Primary Education

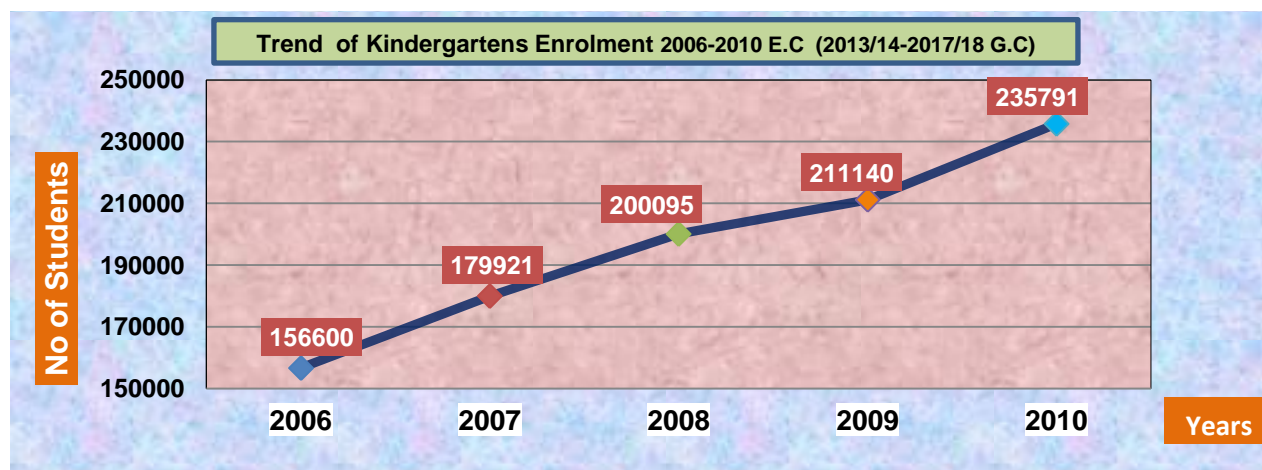

Graph 1.1.3 below shows that the total number of enrolments of pre-primary education in 2010 is 917,720 with 52.2% of total is boys. Of these, the share of PPAPS enrolment reaches 639,945 (69.7%) followed by KG which was 235,791 (25.7%). The enrolment share of C to C centers for preprimary education is 41, 984(4.6%).

GRAPH. 1. 1.3: ENROLMENT OF PRE-PRIMARY INSTITUTIONS

Graph 1.1.4 below shows five years trend of KG enrolments. Accordingly, the number of KG enrolments has increased from 156,600 in 2006 to 235,791 in 2010.

GRAPH. 1. 1.4: TREND OF ENROLMENT OF KINDERGARTENS

Although the number of children enrolled in preprimary education has been improving from year to year, it needs to be moved forward faster to improve the low GER of the sector in comparison to the high number of pre-primary school age children. Table 1.1.1 below shows the SAP of pre-primary, number of enrolled children and GER of pre-primary education. It indicates that most of children are still out of preprimary schools and the GER is still very low. Policies and strategies need to be implemented with the Growth and Transformation Plan of Education sector, to achieve the desired fast growth.

TABLE 1.1.1: NUMBER OF PRE PRIMARY INSTITUTIONS, SAP AND ENROLMENT

Number of Pre Primary Institutions, SAP and Enrolment in 2010 (2017/18G.C.)																				
SN	ZONE	No of Schools				SAP age (4-6)			Enrolment

1.1.3. Gross Enrolment Rates in Pre-primary Education

GER of pre-primary education is defined as the percentage of total number of children in the level irrespective of age out of the total population of 4-6 age children in the region or in a given zone.

The Gross Enrolment Rate (GER) for Kindergarten (KG), Pre-Primary Attached to Primary Schools (PPAPS) and Child to Child program in 2010 were 7.6%, 20.7% and 1.4% respectively. The average GER of preprimary education at regional level in the year have reached 29.7% (M= 30.9%, F= 28.5%). As indicated in graph 1.1.5 and table 1.1.2 below this figure is different from zone to zone and town to town. The pre-primary GER of majority of zones in the region are quite lower than pre-primary GER in Administrative towns. Especially the reason, why the pre-primary GER of Administrative towns like Sebeta (526.3%), Burayu (323.5%) and Dukem (300.8) which are greater than 300% have to be identified through research.

GRAPH. 1.1.5: ZONAL AND ADMINISTRATIVE TOWNS COMPARISON OF PRE-PRIMARY GER

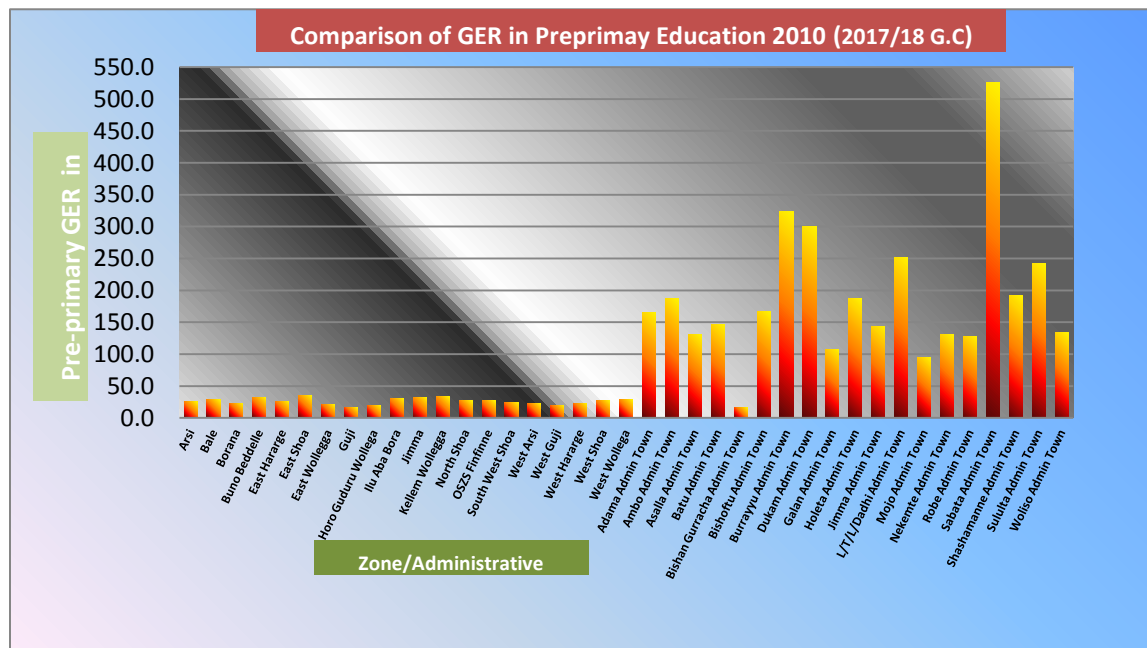

Table 1.1.2: Pre Primary Education GER

Equitable Access in Primary Education

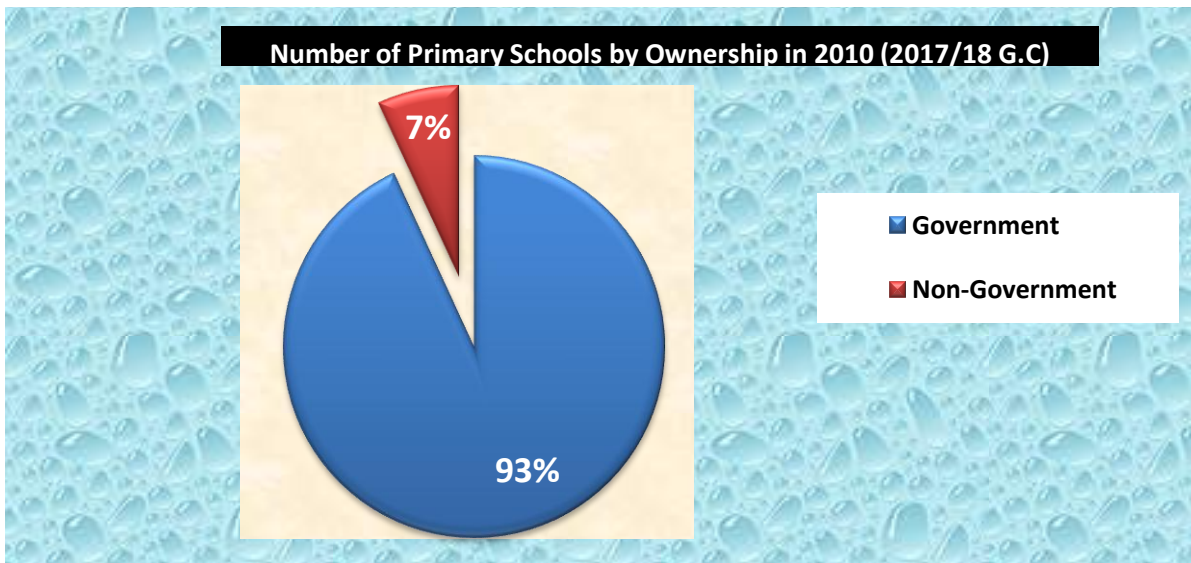

In Ethiopia, primary education is defined as education in Grades 1-8 that can be categorized in to two cycles; 1st cycle (grades 1-4) and 2nd cycle (grades 5-8).The program is normally designed on a unit or project based on basic education to develop pupils' ability to obtain and use information they need, about their home, environment/community or the country.

1.2.1. Number of Primary Schools

I. Number of Primary Schools by Ownership, Cycle & Number of CRCs

There were 14,519 primary schools in the Region of which all responded to 2010 (2017/18 G.C.) ASC. This number shows an increment of 210 schools (1.47%) as compared to 14,309 primary schools in 2009 (2016/17 G.C). As shown in Graph 1.2.1 below among 14,519 primary schools 13, 520 (93%) were government owned whereas the rest 999 (7%) were owned by non-government organizations.

GRAPH. 1.2.1: NUMBER OF PRIMARY SCHOOLS BY OWNERSHIP

On the other hand, table 1.2.1 below also shows these primary schools in each Zones and Administrative towns by cycle. Accordingly; out of 14,519 primary schools 3,810 are primary first cycle (grade 1-4) and 10,709 are primary second cycle (grade 5-8) schools.

II. Geographical Locations of Primary First Cycle (Grade 1-4) Schools Distribution in the Region

MAP 2 MPRIMARY FIRST CYCLE GEOGRAPHICAL LOCATIONS IN THE REGION

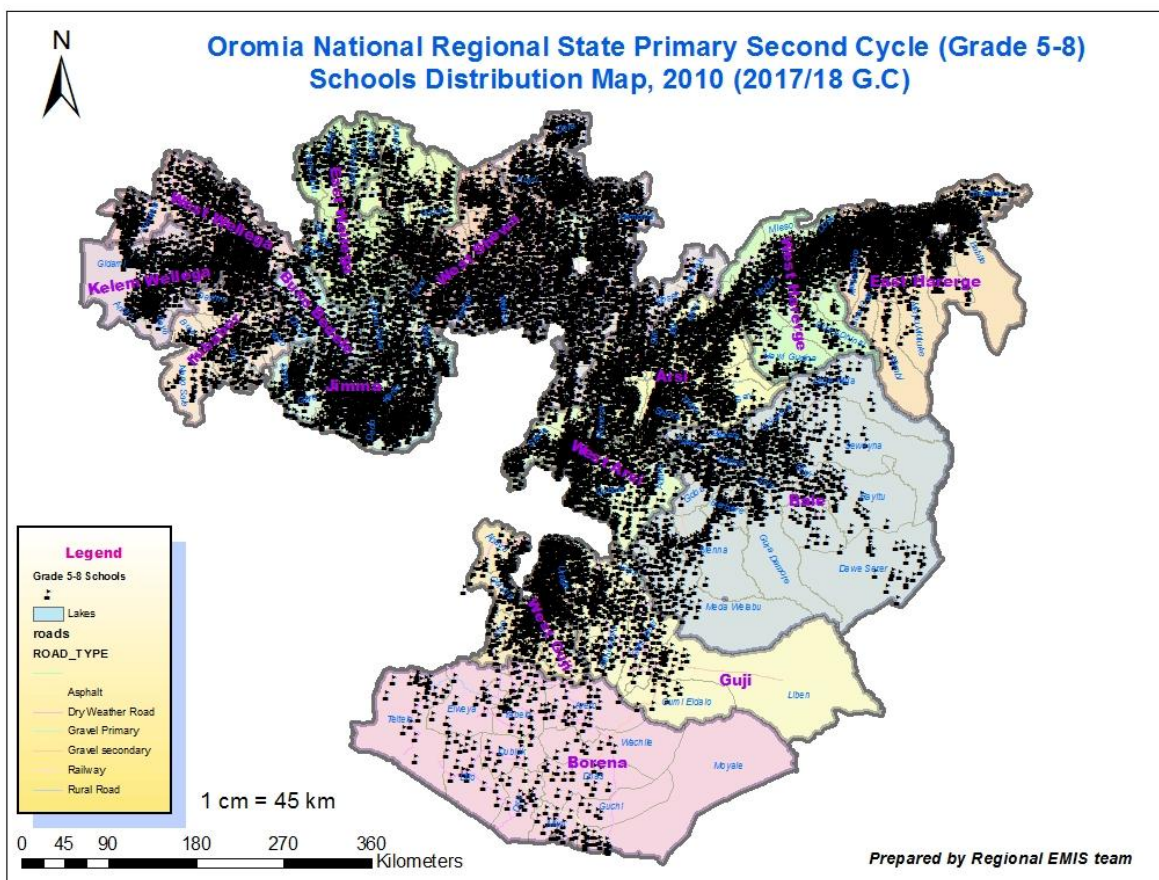

Map 2 above, shows the distribution of primary 1st cycle schools in the Region. As we can see from the map primary first cycle schools are very dense in Northern and central parts of the region, whereas scattered in the South East areas of the region where those area are dominated by pastoral society.

As the map indicates, most of pastoral areas are still unreached to primary 1st cycle within 3 km buffer zone; in order to achieve government policy “every child has not to move more than 3 km from his/her home for schooling.” So, support and attention of government is needed to access those pastoral areas for schooling.

Primary Second Cycle (Grade 5-8) Schools Distribution in the Region

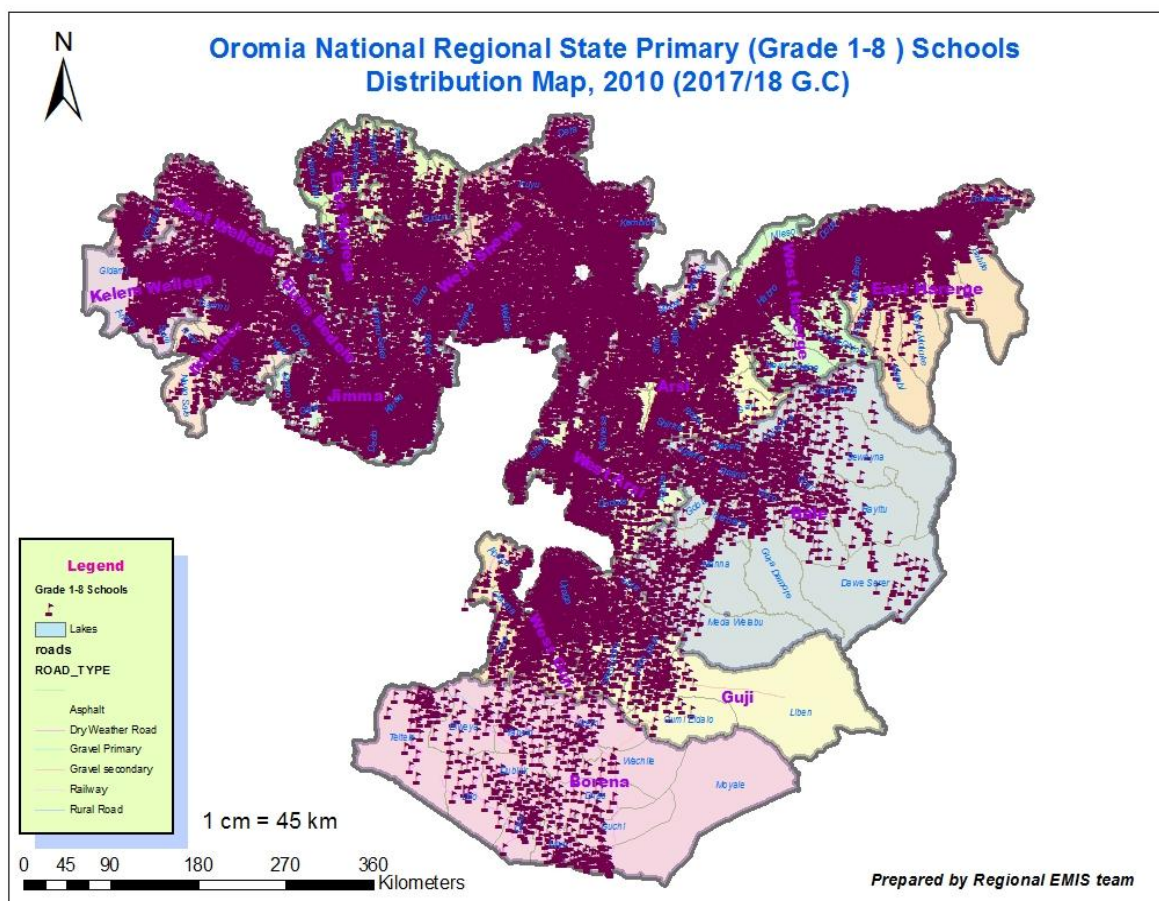

MAP 3 PRIMARY SECOND CYCLE SCHOOLS GEOGRAPHICAL LOCATIONS IN THE REGION

Map 3 above shows the distribution of primary 2nd cycle schools in the Region. As we can see from the map the schools are dense in central and North East & west areas of the region, whereas scattered in similar areas as indicated for primary 1st cycle. The point data on the map shows schools by grade level with different color for (Grade 1-5, Grade 1-6, Grade 1-7, Grade 5-8 and Grade 1-8), and the map also shows the accessibility of road to the schools.

All Primary (Grade 1-8) Schools Distribution in the Region

MAP 4 PRIMARY SCHOOLS (GRADE 1-8) GEOGRAPHICAL LOCATIONS IN THE REGION

Map 4, shows the distribution of all primary schools in the Region, it means those schools having grade level (1-8). As we can see from the map the schools are highly dense at central, North East and North West areas of the region, whereas scattered in Southern part of the region. The map also shows the accessibility of major roads to the schools. As the map indicates, most of pastoral areas are still unreached of primary schools within 3 km buffer zone, so that it needs special attention from concerned bodies.

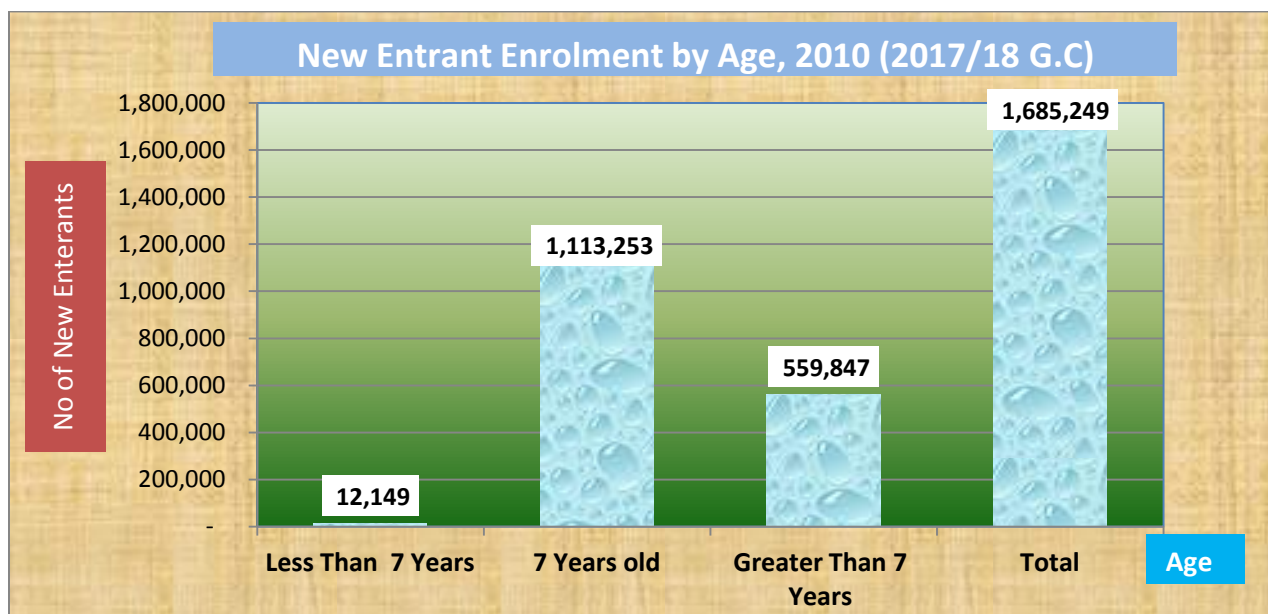

1.2.2. Primary Education Enrolment

1.2.2.1. New Entrants to Grade one in Primary Education

I. New Entrants by Age

The Annual School Census of 2010 E.C incorporates new entrants to grade one by age. The government recognized the official school beginning age as 7 years and it's upon this that the findings in the figure below are summarized.

GRAPH 1.2.2. NEW ENTRANT ENROLMENT BY AGE

From graph 1.2.2 above, it is possible to observe that a total of 1,685,249 new entrants (896,390 Males and 788,859 Females) have been registered in the year. When compared by age, the biggest number of new entrants (66.06%) is 7 years old which is the official government recognized age of primary school entry. Results show that 0.72% of the entrants were underage whereas 33.22% of the new entrants were over age. On the other hand this figure represents 91.78% (92.00% Males and 91.88% Females) of the total enrolment of grade one in the year.

II. New Entrants by Zone and Administrative Towns

Table 1.2.6 below shows the number of new entrants by age in their respective zones and Administrative towns. Since the number of new entrant depends on the size of population we can't interpret in such away.

1.2.2.2. Primary Grade1-8 Enrolments

I. Primary Enrolment by Grade and Gender

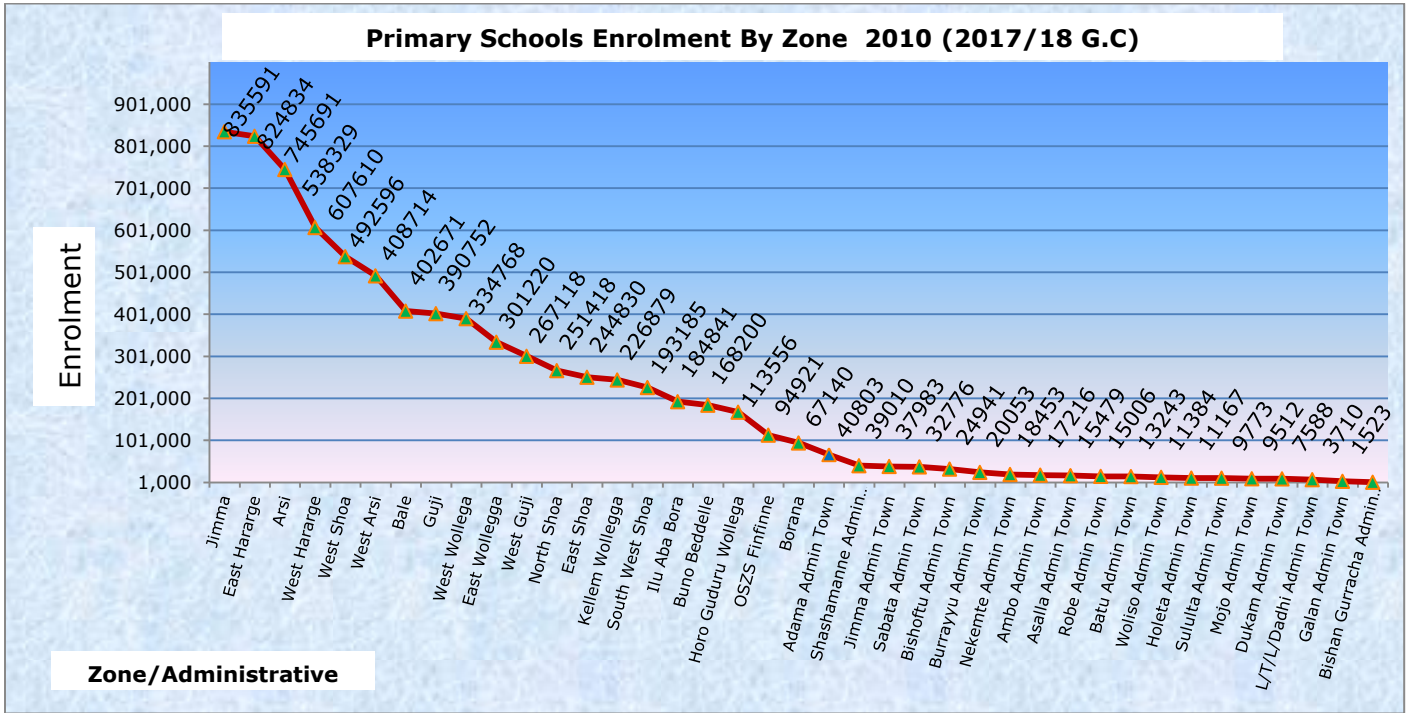

In the 2010 (2017/18 G.C) ASC, enrolment was captured by grade and gender to establish their percentage distribution for better planning and allocation of school facilities as well as soliciting for support from various stakeholders. A total of 8,024,484 (Male 4,323,736 and Female 3,700,748) pupils have enrolled in the year. Considering pupil enrolment distribution by grade, higher enrolment figures were registered in lower classes and gradually decreases as the grade goes up. Accordingly, as shown in graph 1.2.3 below grade one enrolment accounts 22.9% and the share of grade eight is about only 5.8%. In general, the percentage distribution of pupils by class from graph tells that there is a high dropout rate and repetition rate when we move from grade one to grade eight in the system.

GRAPH 1.2.3. PERCENTAGE OF DISTRIBUTION OF PRIMARY EDUCATION ENROLMENT BY GRADE

II. Primary Enrolment by Zone, Ownership, Locality and Program Mode

Enrolment was categorized according to Zones/ Administrative towns to establish which zones have the highest and/or lowest enrolment rate. Enrolment rate again depends on SAP.

Concerning ownership of primary schools, the role of government is much greater than that of non-governmental organizations. Graph 1.2.6 below shows that 96.7% (96.8% Male and 96.4% Female) enrolment belongs to government schools, whereas, 3.3% (3.2% Male and 3.6% Female) enrolment belonged to Non-Government schools. Enrolment of primary education can be categorized by locality (urban 80.1% and rural 19.9%), program mode (regular 99.6% and evening 0.4%) and language of instruction (Afan Oromo 95.5% and Amharic 4.5%). Table 1.2.8 and 1.2.17 also shows all the above data by zone and Administrative towns.

Graph 1.2.6 Primary Enrolment share by Ownership, Program and Language

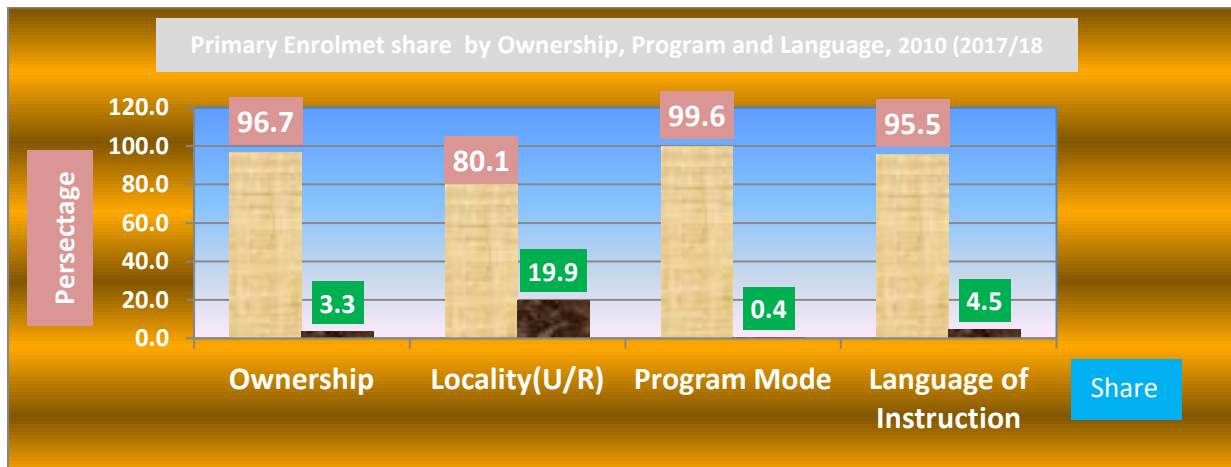

TABLE 1.2.7. PRIMARY ENROLMENT BY GRADE GOVERNMENT AND NON GOVERNMENT SCHOOLS

Primary Enrolment by Grade Government and Non Government Schools in 2010 (2017/18 G.C)

1.2.2.3. Enrolment of Children with Special Needs

The issue of special needs data has also addressed in the process of collecting educational data of 2010 (2017/18 G.C) ASC. Graphs 1.2.7, 1.2.8 & 1.2.9 below illustrate enrolment with Special Needs by type of disability in primary first and second cycle. In this academic year there were 48,356 (Male 28,138, Female 20,218) Special Needs enrolment in the region. Amongst, 7,788 (16.11%) have partial and sever physical difficulty, 6,888 (14.24%) have partial and sever vision difficulty, 8,727 (18.05%) have partial and sever hearing difficulty and 7,144 (14.77%) have partial and severe mental difficulty and the other types of disabilities such as multi disabilities, autism, communication difficulties, learning difficulties, behavioral and social difficulties incorporate 17,809 (36.38%). This data indicates that, there are a lot of children with Special Needs who are currently not attending schools throughout the region as comparing to 10% (As UNESCO estimate) of school age population of their level. The above figure accounts only 0.60% of the total primary enrolment in the region. The existence of such large number of students with special needs in the region requires designing and implementing the already existing inclusive policy and strategy in order to provide them the support of teachers training, physical infrastructure, provision of learning equipment and preparing special schools where it is needed. Therefore, the issue needs our attention to make them getting opportunity to learn in an inclusive environment and keeping their right to learn. Table 1.1.20 below also shows Special Needs enrolment by Zone as well as Administrative towns by type of disability.

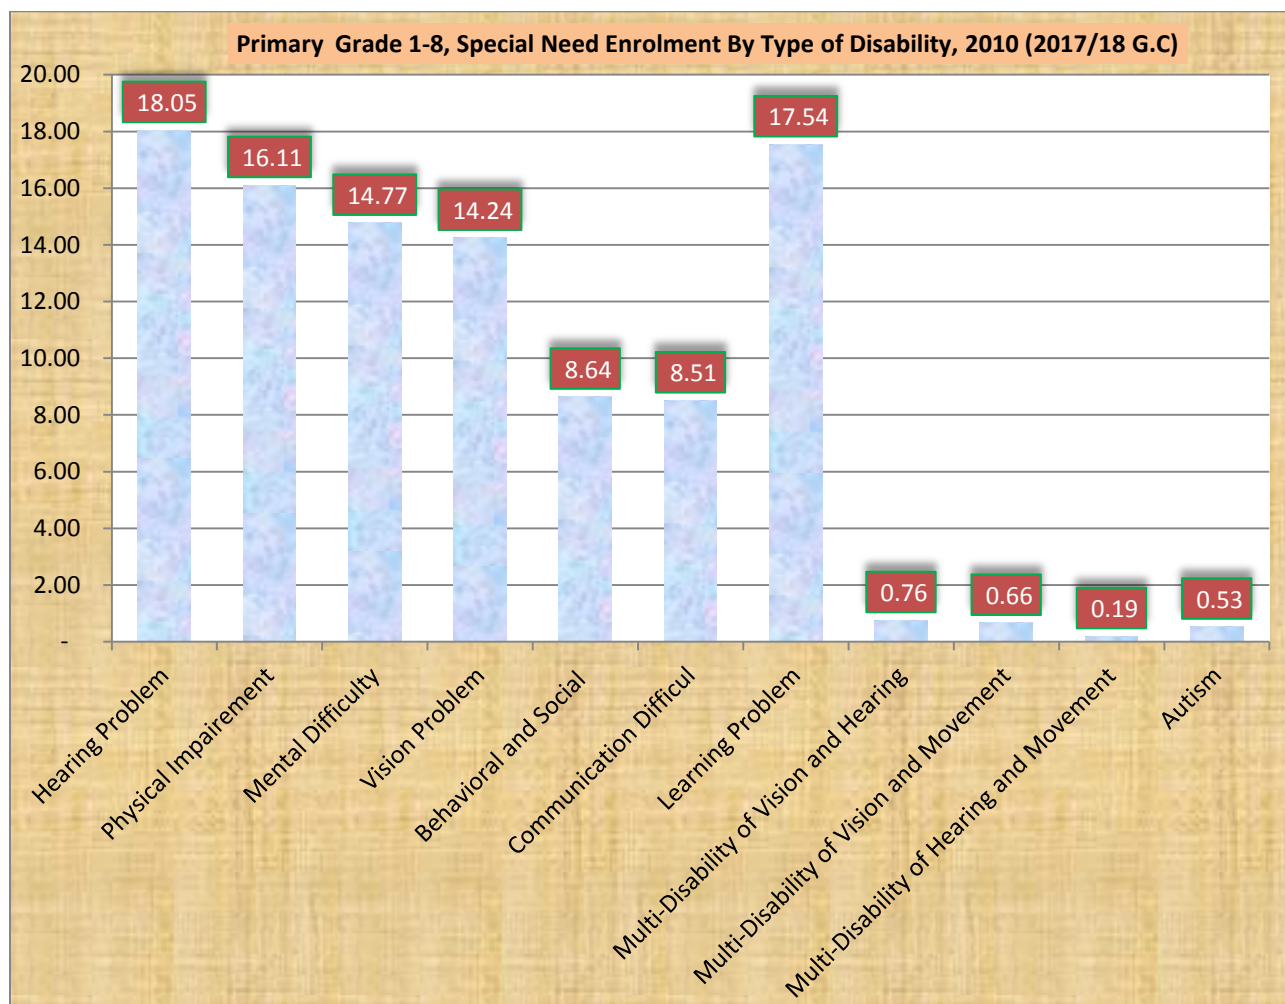

GRAPH 1.2.7 PRIMARY FIRST CYCLE (1-4) SPECIAL NEED ENROLMENT BY TYPE OF DISABILITY

GRAPH 1.2.8 PRIMARY SECOND CYCLE (GRADE 5-8), SPECIAL NEED ENROLMENT BY TYPE OF DISABILITY

GRAPH 1.2.9 PRIMARY GRADE 1-8, SPECIAL NEED ENROLMENT BY TYPE OF DISABILITY

Comparison of Primary Education Special Need Enrolment by Zone

As shown in graph1.2.10 below, the zonal analysis on children with special needs in primary schools shows that West Shoa, Borana and East Hararge have the largest share of special needs enrolment with their respective enrolment which accounts 1.58%, 1.28%, 1.17%. On the other hand Bale, Kellem Wollega and OSZS Finfinne zones have the least share of special needs enrolment in respective to their enrolment which accounts 0.17%, 0.28%, 0.3%. Concerning administration towns Bishoftu, Nekemte and Burrayyu Administrative Towns have relatively the highest share 2.05%, 1.53%, 0.99% when we compare with their respective enrolment. Whereas Robe administrative town is the only administrative town with no special needs enrolment filled by yearly education census in the year.

1.2.2.4. Orphans in Primary Schools

Proportion of Orphans in the Region

Orphan students are those who have lost both their parents due to different reasons. The 2010 (2017/18 G.C) ASC indicates that there were 53,354 (28,933 boys and 24,421 girls) those have lost both of their parents that accounts 0.66% (boys 0.67% and Girls 0.66%) of the entire pupil enrolled in primary schools. The regional analysis of orphan student in primary schools indicates that among the 20 zones in the region OSZS Finfinne, South West Shoa and West Shoa had the highest proportion of orphans that accounts 1.14%, 1.00% and 0.96% respectively. Concerning the 19 administrative towns Bishan Guracha, Gelan and Sululta administrative towns have the highest proportion of orphan pupils rating 11.95%, 3.18% and 2.25% respectively. The total number of orphans in the primary education is determined and expressed as a proportion to the total enrolment is indicated in tables 1.2.21 and 1.2.22 below.

1.2.3. Primary Education Enrolment Rates

1.2.3.1. Intake Rates

Intake rate is used to indicate the extent of new entrants to the first grade of primary education. It indicates the proportion of children who join the primary education system for the first time in terms of official school age for the first grade. It compares children who come to school for the first time, registered at first grade (grade 1) with children of official school admission age (7 years old children). Under this umbrella Apparent Intake Rate (AIR), Net Intake Rate (NIR), Early Starters and Late Starters are analyzed.

Apparent Intake Rate (AIR)

AIR is the percentage of new entrants (irrespective of age) in Grade 1, out of the number of children of the official primary admission age 7, in a given year. Sometimes, it is also called the Gross Intake Rate (GIR). AIR tends to reflect those students, who may have not been enrolled in school at the appropriate age, and often reflects the “backlog” of students who could not be enrolled before. A high Apparent Intake Rate indicates a high degree of access to the first grade of primary education. The calculation includes all new entrants to first grade (regardless of age). The Apparent Intake Rate can be more than 100%, due to over- and under-aged children entering primary school for the first time and/or due to inconsistencies in population data. Here is the formula to calculate AIR.

$$AIR = \frac{\text{Number of New Entrants in Grade 1}}{\text{Population at the official school - entrance age}} \times 100$$

As shown on graph 1.2.11 above, AIR of the Region was greater than 100% for the last five years; which was because of over and under age children enrolment. The AIR has been fluctuating from year to year. As the data shows, there are children in the system which have not been enrolled in schools until this year, and often reflects the “backlog” of children who could not enrolled before.

Although the known Ethiopian government school entrance age is 7 years old for grade 1, children older than the official school age are registered to attain grade 1 and made Apparent Intake Rate over 100% as can be seen from table 1.2.23 above.

As indicated in the table it is possible to see that, AIR of the region in 2010 (2017/18 G.C) is 170.0% (M=179.2% and F=160.5%). The table also shows that all zones and all administrative towns except Bishan Guracha have AIR greater than 100%. Concerning GPI eight zones and one administrative town (Bale, West Gujii, Guji, South West Shoa, West Shoa, East Wollega, East Hararge, West Hararge, Horo Guduru Wollega, Kellem Wollega, North Shoa & Batu Administrative Town,) have GPI less than that of the regional average (0.90). The rest Zones and Administrative towns have GPI greater than the regional average.

From the table 1.2.24 above, it is possible to see that a total sum of 1,685,249 new entrants have joined grade 1, where 896,390 are Male and 788,859 are female. The largest number of new entrants (66.06%) was children of 7 years old which is the official government recognized age of primary school entry. The data shows that 0.72% of the new entrants were underage whereas 33.22% of the new entrants were overage. (See the above table for more information)

Net Intake Rate (NIR)

Net Intake Rate shows new entrants in the first grade of education system who are of the official school-entrance age, expressed as a percentage of the population of the same age. The calculation requires new entrants in the first grade of primary education which are of the official school-entrance age and population at the official school-entrance age. The method of calculation is as follows:

$$\text{NIR} = \frac{\text{New entrant in 1st grade of primary education who are of the official school entrance age}}{\text{Population at the official school entrance age}} \times 100$$

A high Net Intake Rate for primary education of official primary school-entrance age children indicates a high degree of access for official school entrance age to the first grade of primary education

As can be seen on graph 1.2.12 above, the trend of NIR in the last five years has been fluctuating at regional level. The graph also shows that NIR of Grade 1 by 2006 was, 97.9% (M=101.8%, F= 93.8%) and then this rate has move up to 124.8% (M=130.8%, F= 118.8%) by 2008. In 2010 the figure decreased to 112.3% (M=117.8 & F= 106.7%).

Table 1.2.25 above also shows the NIR, GG and GPI by Zones and Administrative towns. Among all zones in the region East Shoa, OSZS Finfine, Borena have the lowest NIR (88.0%, 83.5% and 80.5%) respectively. On the administrative towns side Sebeta and Dukem administrative towns have NIR greater than 100% which is illogical.

1.2.3.2. Primary Education Gross Enrolment Rate (GER)

Gross Enrolment Rate is defined as the enrolment in a specific level of education, regardless of age expressed as a percentage of the official school-age population corresponding to the same level of education in a given school year. GER is a crude measure of education coverage. Since it includes under-aged and over-aged pupils, GER can be greater than 100%, and frequently seen in developing countries to address the backlog of students didn't attend schools because of different reasons, such as financial needs, family issues, or absence of schools.

The data required to calculate GER is, the enrolment in a specific level of education, regardless of age and official school-age population corresponding to the same level of education. The method of calculation is as follows:

$$(GER) = \frac{\text{Total enrolment in a specific level of education, regardless of age}}{\text{official school - age population corresponding to the same level of education}} \times 100$$

GER does not appear to be a good indicator of school coverage. Although early or late entry is a minor issue that all children attend school is most important. Consequently, the GER is often considered as an indicator of the system's physical capacity rather than one of school coverage.

A GER of 100% would not imply that all children are attending school those have not got education due to different reasons yet and doesn't show that the schools have the capacity to educate all children of school age.

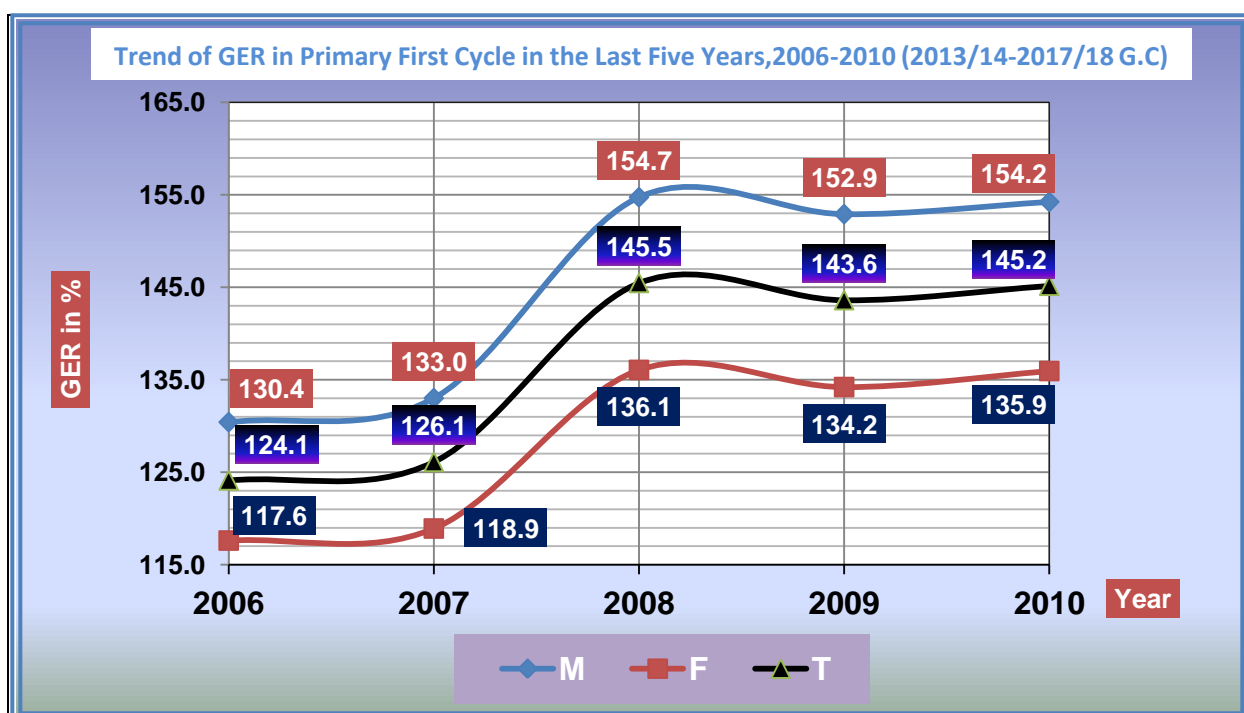

I. Gross Enrolment Rate of Primary First Cycle /1-4/

Gross Enrolment Rate of primary first cycle is the rate calculated simply by dividing the number of students enrolled in first cycle primary (irrespective of their age) to the population of 7-10 years old

$$. \text{Grade 1 - 4 GER} = \frac{\text{All age grade 1-4 enrolments}}{\text{School Age population of age 7-10}} \times 100$$

The Gross Enrolment Rate (GER) of Primary First Cycle /1-4/ education of the year is 145.2% (154.2% for boys and 135.9% for girls). This implies that there is an existence of overage and underage pupils enrolled in primary first cycle schools.

GRAPH 1.2.13 TREND OF GER IN PRIMARY FIRST CYCLE IN THE LAST FIVE YEARS

Graph 1.2.13 above shows, by 2006 (2011/12 G.C) the first cycle primary GER of the region was 124.1% (M=130.4%, F= 117.6%) and increased to 145.2% (154.2% for boys and 135.9% for girls) by 2010 (2017/18 G.C). It is clearly seen from table 1.2.26 below that the number of over age and under age children in the system has not decreased yet. As the data shows, 14 zones and 2 administrative towns (Bishan Guracha and Modjo) have GER of primary first cycle below

the regional average 145.2%. While the rest zones and administrative towns have above the regional average.

Concerning the GPI, eight zones and two Administrative Towns, (Batu & Robe) have GPI less than the regional average which is 0.88. The rest zones and Administrative Towns have GPI equal to or greater than the regional average. Among 19 Administrative Towns 11 of them have GPI greater than or equal to one that implies girls have got equal or more access to the first cycle education as compared to boys in those Towns.

The other method in analyzing gender issue is comparing the gender gap of the level. Gender gap is expected to be zero, which indicates whether both sexes have got equal chance to join school equally or not. Negative gender gap indicates female participation is greater than that of male and positive gender gap indicates male participation is greater than that of female. As illustrated in the same table, among all zones and Admin Towns, no town or zone have GG equal to 0. Among the 20 zones and 19 administrative towns in the region, six zones and four Admin Towns of the region have gender gap greater than the regional average which is 18.29%. Gujii, West Guji and Bale Zones have the highest GG (38.16%, 38.0% and 34.0%) favoring to male whereas Dukem, Lega T/L/Dadhi and Sululta Administrative towns have the highest GG (-99.08%, -54.48% and -36.58%) favoring to female respectively.

II. Gross Enrolment Rate of Primary Second Cycle /5-8/

Gross Enrolment Rate of primary second cycle (5-8) is the rate calculated simply by dividing the total number of students enrolled in second cycle primary (irrespective of their age) to the total population of 11-14 years old.

$$\text{Grade 5 – 8 GER} = \frac{\text{All age grade 5 – 8 enrolments}}{\text{School Age population of age 11 – 14}} \times 100$$

GRAPH 1.2.14 TREND OF PRIMARY SECOND CYCLE (5-8) GER IN THE LAST FIVE YEARS

As shown on graph 1.2.14 above, the Gross Enrolment Rate of primary second cycle (5-8) shows increment for the last five years. It was 56.2% (M= 59.2%, F= 53.1%), in the year 2006 (2013/14 G.C) and increased to 67.6% (M=73.4%, F= 61.6%) by the year 2010 (2017/18 G.C). As the data indicates the participation of students in primary second cycle needs serious attention. Table 1.2.27 below also shows the GER of the level by zone and administrative town.

Total		1901961	1874411	3776372	1396288	1154988	2551276	73.4	61.6	67.6	11.8	0.84

Accordingly, the GER of second cycle primary of 8 zones and 18 administrative towns exceed the regional average which is 67.6% (M=73.4%, F= 61.6%). The rest twelve zones and one administrative town have registered less than the regional average. Bishan Guracha administrative town and Borena Zone have the least GER of all with 21.3% and 34.7% respectively.

Regarding to GPI, among 20 zones in the region 9 of them (West Guji, Guji, West Hararge, East Hararge, Bale, Kelleme Wollega, Ilu Aba Bora, West Wollega and South West Shoa) and only one Administrative Towns (Batu) has registered GPI less than the regional average which is 0.84. The rest Zones and administrative towns have GPI greater than or equal to the regional average. On the other hand only one zone (Borena) which has GPI equals to 1 (Female & Male participation in the cycle are equal), and 7 administrative towns have GPI greater than 1.

III. Gross Enrolment Rate /GER/ Primary (1-8)

Gross Enrollment Rate of primary education (1-8) is a crude measure of primary educational coverage, which indicates the percentage of total enrollment in primary schools irrespective of age out of the corresponding primary school age (7-14) population. Apparently, it includes under-aged and over aged pupils. So that GER can be greater than 100%.

$$\text{Primary GER} = \frac{\text{All age grade 1 – 8 enrolments}}{\text{School Age population of age 7 – 14}} \times 100$$

Trend of GER for primary education in the region has shown slight increment for the last five years. As can be seen from graph 1.2.15 below it has increased from 92.5% (M=97.3%, F=87.6%) in 2006 (2013/14 G.C) to 106.8% (M=114.3%, F=99.2%) by 2010 (2017/18 G.C).

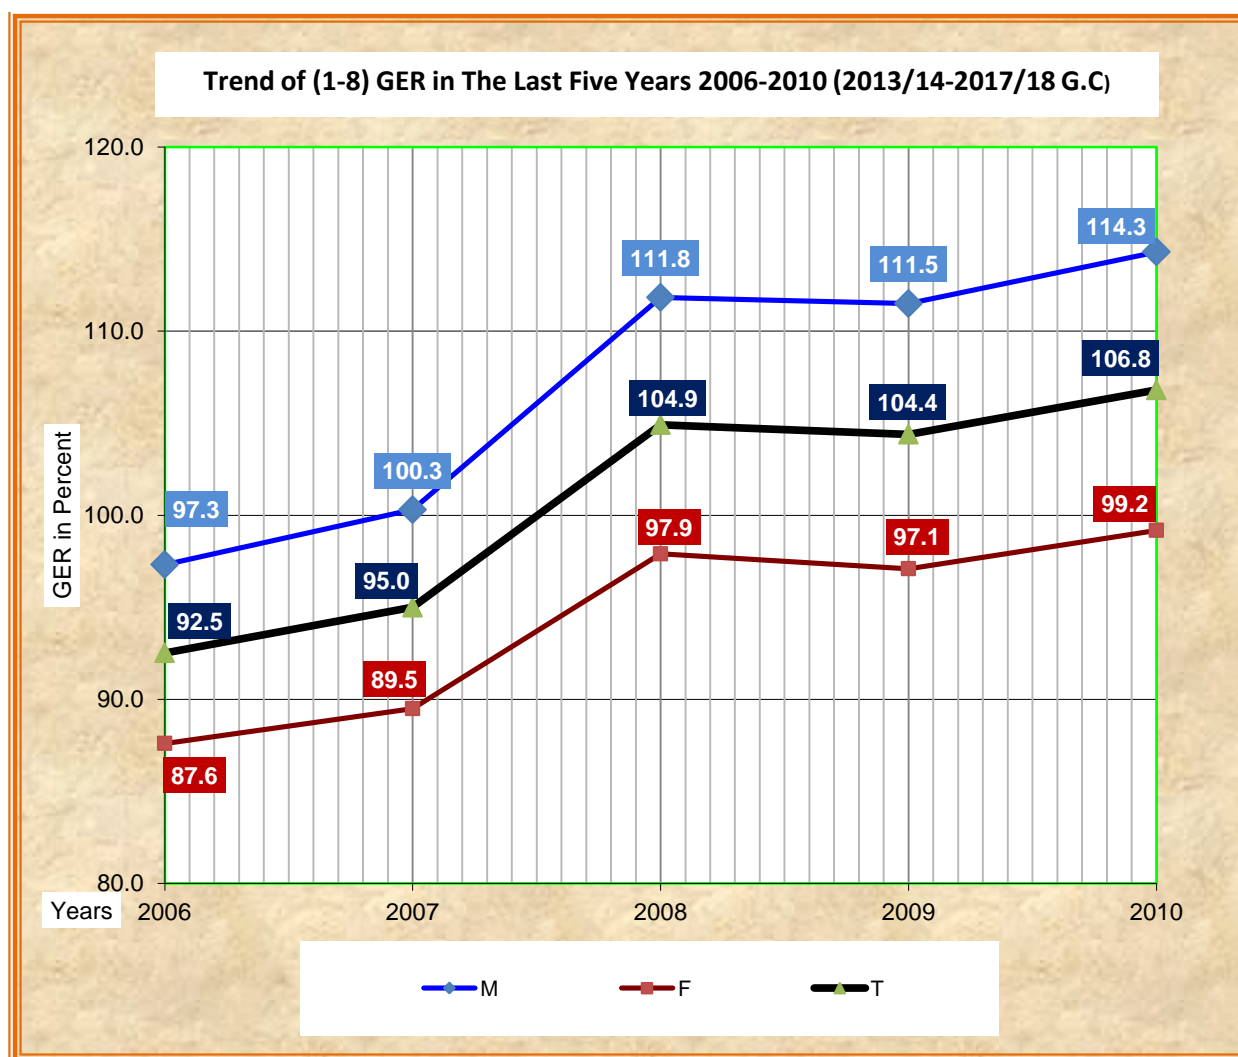

Table 1.2.28 below also illustrates primary education GER, GPI and GG of the region by zone and administrative towns. Accordingly, among 20 zones and 19 administrative towns in the region 12 zones and 2 administrative towns in the region have GER below the regional average in the academic year which is 106.8%. To the contrary, the rest of zones and administrative towns have above the regional average. Regarding GPI, eight zones and two administrative towns have registered GPI less than the regional average which is 0.87; while others have GPI above or equal to the region average. Among them only Gelan Administrative town have GPI equal to 1.0, which means female children have got equal access to primary education with Male.

1.2.3.3. Net Enrolment Rate (NER)

It is the rate of the official school age group enrolled for a given level of education expressed as a percentage of the corresponding school age population. NER is the better way of measuring organized timely school participation and is a more refined indicator of school and enrolment coverage in terms of explaining the proportion of pupils enrolled from the official age group. NER is usually lower than the GER since it excludes over-aged and under-aged pupils. NER of primary education is calculated by dividing the number of proper age for primary education (ages 7-14 for Ethiopia) by the number of children of school age (7-14) population.

$$NER = \frac{\text{Total Enrolment in a specific level of Education with official age – group}}{\text{Official school age population corresponding to the same level of Education}} \times 100$$

A high NER denotes a high degree of participation of the official school-age population. The theoretical maximum value of NER is 100%. Increasing trends can be considered as reflecting improvement in participation of official school age population at the specified level of education. When NER compared with GER, the difference between the two ratios highlights the incidence of under-aged and over-aged enrolment. If the NER is below 100% then the difference with 100% provides a measure of the proportion of children not enrolled at the specified level of education. However, some of these children might be enrolled at other levels of education.

The NER is measure of school coverage for theoretical age groups, but is unfortunately not well to adapting measuring overall coverage. NER is severely affected by the inaccuracy of school age population data. Children's reported ages as per school censuses are often wrong due to children's or their teachers' ignorance, particularly when the registration of births is not widespread, or due to amendments to the birth register.

I. Net Enrolment Rate (NER) in Primary First Cycle (1-4)

It is the percentage of students who enrolled in primary first cycle, whose age is 7-10, compared to the school age population of this level; that is total population of 7-10 years old.

$$\text{Grade 1 – 4 NER} = \frac{\text{Grade 1 – 4 enrolments of age 7 – 10}}{\text{School Age population of age 7 – 10}} \times 100$$

Graph 1.2.16 below shows, the trend of last five years NER of first cycle primary at regional level. Accordingly, the NER of primary first cycle was 99.2% (M=103.4%, F=94.9%) in 2006 (2013/14 G.C) and the rate goes up and reaches to 120.4% (M=127.2%, F=113.4%) by 2010 (2017/18 G.C.). At normal circumstance the NER at any education level never exceeds 100% that implies all school age children of the level have joined schools. But from the year 2008 (2015/16 G.C) till this year the NER of primary first cycle at regional exceeds 100%

Thus, we need to dig out the root cause of data inflation (i.e NER> 100%) for it being beyond the optimum rate from 2008 (2015/16 G.C) to 2010 (2017/18 G.C).

GRAPH 1.2.16 FIVE YEARS TREND OF PRIMARY FIRST CYCLE NER

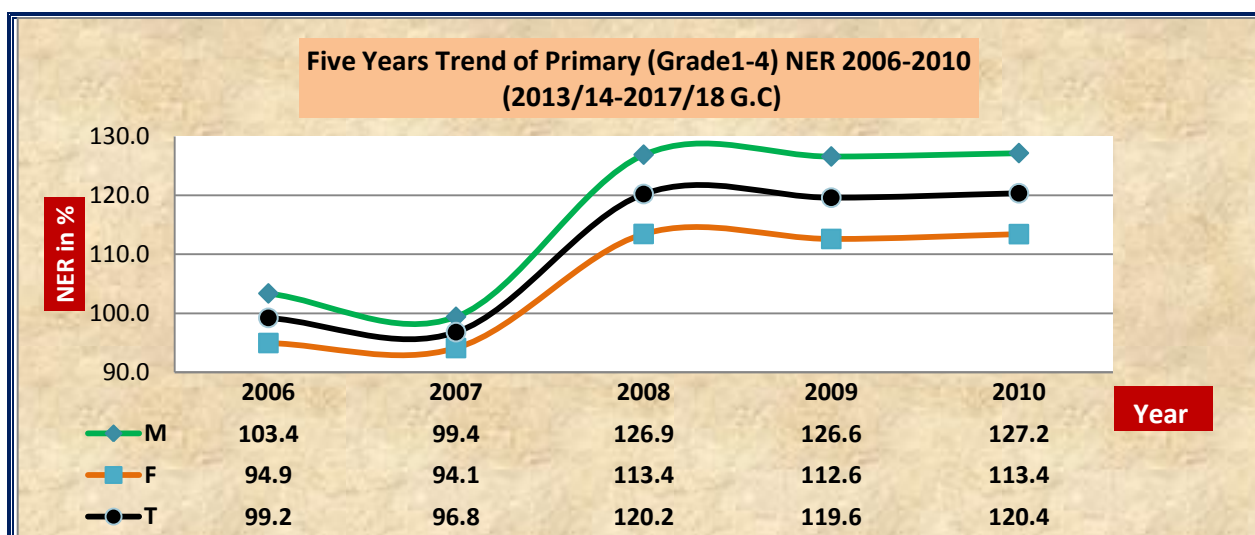

Table 1.2.29 below also demonstrates NER, GPI and GG of primary first cycle of the region by zone and Administrative towns. Accordingly, four zones (Borena, OSZS Finfinne, East Shoa, and North Shoa) as well as one Administrative town (Bishan Guracha) have NER less than the ideal value which is 100%. The other zones and administrative towns have NER greater than 100%. The case of administrative towns like Sebeta, Lege Tafo Lege Dadhi, Dukem and Sululta those NER exceeds 200% needs to be identified by research. Regarding GPI, eight zones and one administrative town have less than the regional average GPI (0.89). The rest 12 zones and 18 Administrative towns have GPI greater or equal to the regional average, among them 10 administrative towns have registered GPI greater than or equal to 1.0

II. Net Enrolment Rate (NER) in Primary Second Cycle (5-8)

Net Enrolment Rate /NER/ at primary second cycle is the proportion of enrolment of students in primary second cycle of the age (11-14), with eligible school population of age (11-14).

$$\text{Grade 5 - 8 NER} = \frac{\text{Grade 5 - 8 enrolments of age 11 - 14}}{\text{School Age population of age 11 - 14}} \times 100$$

GRAPH 1.2.17 FIVE YEARS TREND OF PRIMARY 5-8 NER

As graph 1.2.17 above indicates, the trend of the NER of primary second cycle education in the region has shown a little bit progress for the last four years. Accordingly, in 2006 (2013/14 G.C) it was 43.91% (M=45.16%, F=42.64%) and then by showing a bit increment it rose to 54.29% (M=58.00, F=50.52%) by 2010 (2017/18 G.C), with the average annual growth rate of 3.47%. As the growth rate indicates, NER of the level shows insufficient increment. So that, it is recommended that a serious attention should be given for the issue to resolve.

Table 1.2.30 below also shows NER of second cycle primary education of the region by zones and Administrative towns. Accordingly, eleven zones and one administrative town have registered NER of primary second cycle less than the regional average, 54.29%. But nine zones and eighteen administrative towns have registered NER greater than the regional average. Regarding to GPI, among the 20 zones in the region ten of them have GPI less than the regional average (0.87). The rest ten zones and all administrative towns have GPI greater or equal to the regional average, among zones only Borena zone as well as seven administrative towns have registered GPI greater than or equal to 1.0

III. Net Enrolment Rate (NER) in Complete Primary (1-8)

The Net Enrolment Rate (NER) for complete primary can also be calculated in a similar way of calculating NER for primary first cycle and second cycle. It is the proportion of the appropriate school age (7-14) children enrolled in primary school with the total school age (7-14) population. When the first and second cycle NER separately compared with complete primary in the region, it would take more time to achieve 100%. This is because those children in first cycle primary of age 11-14 who are over aged for first cycle, and students of age 7-10 who are under aged for the second cycle are included while calculating NER for complete primary.

$$\text{Primary grade 1 - 8 NER} = \frac{\text{Grade 1 - 8 enrolments of age 7 - 14}}{\text{School Age population of age 7 - 14}} \times 100$$

GRAPH 1.2.18 FIVE YEARS TREND OF PRIMARY 1-8NER

As illustrated on the graph 1.2.18 above; the NER of primary education has shown very low increment from 2006 (2013/14 G.C) to 2007 (2014/15 G.C). But it has shown steady increment and boomed to 98.2 in 2008 (15/16 G.C) and slightly decreased to 97.5% in 2009 (2016/17 G.C.) and increased slightly and reached 99.4% in 2010 (2017/18 G.C)

Table 1.2.31 above shows complete primary education NER of the region by Zone and Administrative Towns. Accordingly, among all zones of the region, the NER of eleven zones and two administrative towns were less than the regional average of primary education NER, 99.4% (M=105.6%, F=93.05%). On the other hand, nine zones and thirteen administrative towns have NER above the regional average. Furthermore, among all zones and Administrative towns only seven zones and one administrative town have GPI below the regional average (0.88). The remaining zones and administrative towns have GPI above the regional average. Among these eight administrative towns have registered GPI greater than or equal to 1.00 which means equal or more accessible for female students.

1.2.4. Primary Gender Equity in the Last Five Years

What is Equity?

Education is considered to be one of the best channels to reduce socioeconomic inequalities, and especially, a powerful tool to reduce their trans-generational transmission. The level of qualifications and degrees obtained throughout schooling determine an individual's future socioeconomic status to a certain extent. Education systems are therefore expected to offer each child similar chances of success, based on merit over and above personal characteristics beyond their control (gender, area of residence, and so on). Given that schooling options are likely to be affected by individuals' financing ability and other specific characteristics, it is important to determine the extent to which education systems, especially those that are publicly funded, take these factors into account to limit their impact on individuals' access to school and results.

The Absolute Gap in Performance between Two Groups

The absolute gap in the performance of two groups A and B (such as urban and rural indicators or boys and girls) is calculated by subtracting the chosen performance indicator for group A from that for group B. The absolute gap is interpreted as the amount by which it is necessary to increase the performance indicator for group B (rural or girls in this instance) to achieve equity between the two groups.

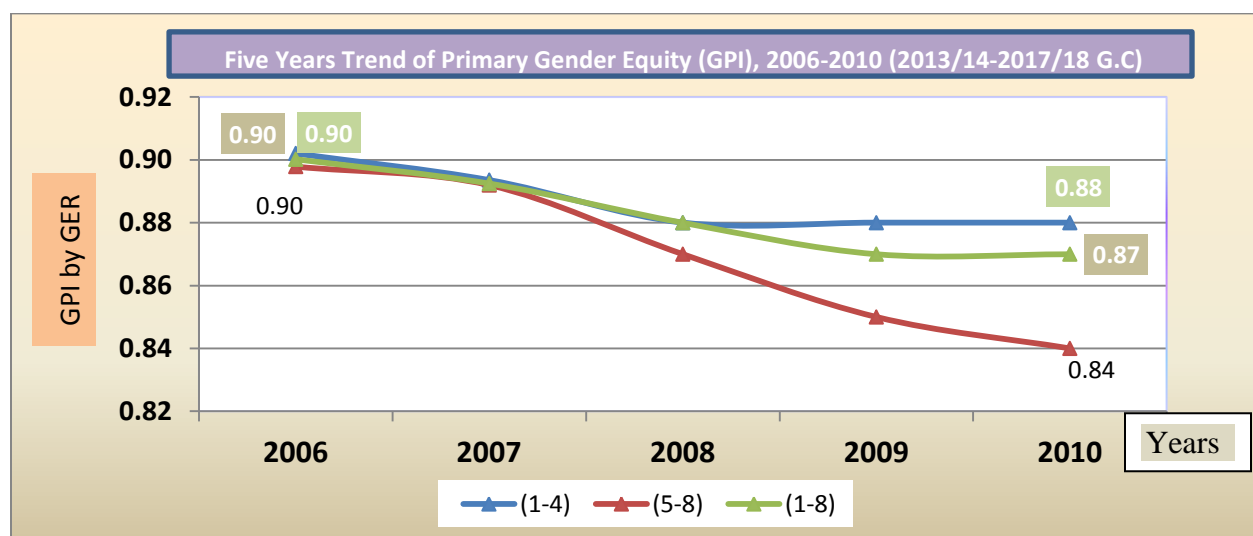

The Parity Index

The parity index comparing groups A and B is obtained by dividing the performance indicator of group B by that of group A. The parity index provides the factor by which it would be necessary to multiply the group B indicator (or divide the group A indicator) to achieve an equal value for both groups. Parity between the two groups is achieved when the parity index is equal to 1. An index value above 1 indicates an advantage for group A (numerator); conversely, an index value below 1 indicates a disadvantage for group B. The greater the divergence of the index from number one the greater the disparity between the two groups.

TABLE 1.2.32. FIVE YEARS TREND OF PRIMARY GENDER EQUITY INDICATORS BY GER

Five Years 2006-2010 (2013/14-2017/18 G.C) Trend of Primary Gender Equity												
Year	Primary (1-4)				Primary (5-8)				Primary (1-8)			
	GER		GPI	G G	GER		GPI	G G	GER		GPI	G G
	M	F			M	F			M	F		
2006	130.4	117.6	0.90	12.8	59.2	53.1	0.90	6.0	97.3	87.6	0.90	9.7
2007	133.0	118.9	0.89	14.2	62.6	55.8	0.89	6.8	100.3	89.5	0.89	10.8
2008	154.7	136.1	0.88	18.7	67.0	58.0	0.87	9.0	111.8	97.9	0.88	13.9
2009	152.9	134.2	0.88	18.8	68.9	58.9	0.85	10.0	111.5	97.1	0.87	14.5
2010	154.2	135.9	0.88	18.3	73.4	61.6	0.84	11.8	114.3	99.2	0.87	15.1

Graph 1.2.19 Five Years Trend of Primary Gender Equity indicators by GER

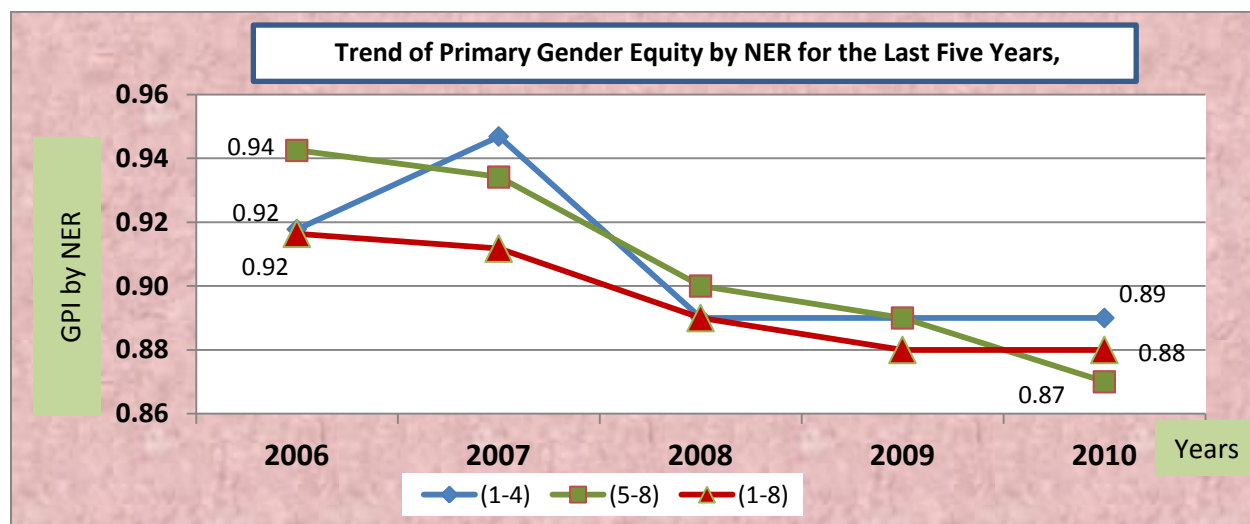

It is possible to see from table 1.2.32 and graph 1.2.19 above that the primary education gender gap has been increasing while the GPI has been decreasing for the last five years by GER. For example, the GG at regional level has been 9.7 in 2006 (2013/14 G.C) and then increased to 15.1 in 2010 (2017/18 G.C), whereas the GPI at regional level has been 0.90 in 2006 (2013/14 G.C) and then decreased to 0.87 in 2010 (2017/18 G.C). Which indicates that the participation of primary education favour male than female.

TABLE 1.2.33. FIVE YEARS TREND OF PRIMARY GENDER EQUITY BY NER

Five Years, 2006-2010 (2013/14-2017/18 G.C), Trend of Primary Gender Equity by NER												
Year	Primary (1-4)				Primary (5-8)				Primary (1-8)			
	NER		GPI	GG	NER		GPI	GG	NER		GPI	GG
	M	F			M	F			M	F		
2006	103.4	94.9	0.92	8.5	45.2	42.6	0.94	2.6	89.7	82.2	0.92	7.5
2007	99.43	94.1	0.95	5.3	48.4	45.2	0.93	3.2	90.7	82.7	0.91	8.0
2008	126.9	113.4	0.89	13.5	53.2	48.1	0.90	5.1	103.9	92.4	0.89	11.4
2009	126.6	112.6	0.89	14.0	54.8	48.7	0.89	6.1	103.5	91.4	0.88	12.0
2010	127.2	113.4	0.89	13.8	58.0	50.5	0.87	7.5	105.6	93.0	0.88	12.6

GRAPH 1.2.20 FIVE YEARS TREND OF PRIMARY GENDER EQUITY BY NER

As can be seen from table 1.2.33 and graph 1.2.20 above, gender equity of full primary (1-8) by NER has been expressed as Gender Gap 7.5% and GPI 0.92 respectively in 2006 (2013/14 G.C). After five years Gender Gap has increased to 12.6% and GPI has decreased to 0.88 in 2010 (2017/18 G.C) which shows the participation related to gender goes apart; male participation is increasing and female participation is decreasing from year to year.

1.3 Equitable Access in Secondary Education

Government continues to address challenges associated with ensuring quality and inclusive education in the Secondary sub-sector. The sub-sector is charged with the duty of providing places for the masses of Primary Education. This is also in line with government commitment to the achievement of the 2nd growth & transformation plan.

Secondary education is composed of two cycles, these are General Secondary Education (9-10) and Preparatory classes (11-12). General secondary education (9-10) is designed to continue the basic programs of the primary level, but teaching is typically more subject focused and requires more specialized teachers for each subject area. The end of this level often coincides with the end of compulsory education. A preparatory class (11-12) is the final stage of secondary education and the entry point to the higher institution. Therefore, instruction is often organized and even more along subject lines and teachers, typically need a higher or more subject-specific qualification. Let us look at different indicators of secondary education of our region.

This chapter gives key statistical indicators about equitable access in the Secondary sub-sector in year 2010 (2017/18 G.C).

1.3.1. Number of Secondary Schools

I. Secondary Schools by Ownership & Cycle

Both table 1.3.1 and 1.3.2 below show secondary schools in the region by zone, administrative town, ownership and cycle. Accordingly, 94.5% of secondary (9-10) schools are owned by government as compared to 5.5% of the secondary (9-10) schools are owned by Non-governmental organizations. Regarding preparatory (11-12) schools 96.9% and 3.1% the schools are under the ownership of Government and Non-government respectively. Concerning the unseparated schools (9-12) 74.5% are under the ownership of non-governmental organizations. As the data shows Government involvement is seen to be higher than non-governmental organizations. In terms of zonal distribution, the intervention of non-government organization is in 9 zones and 14 administrative towns in secondary schools.

Table 1.3.1 Number of Government and Non-Government Secondary School

I. Geographical Locations of Secondary schools

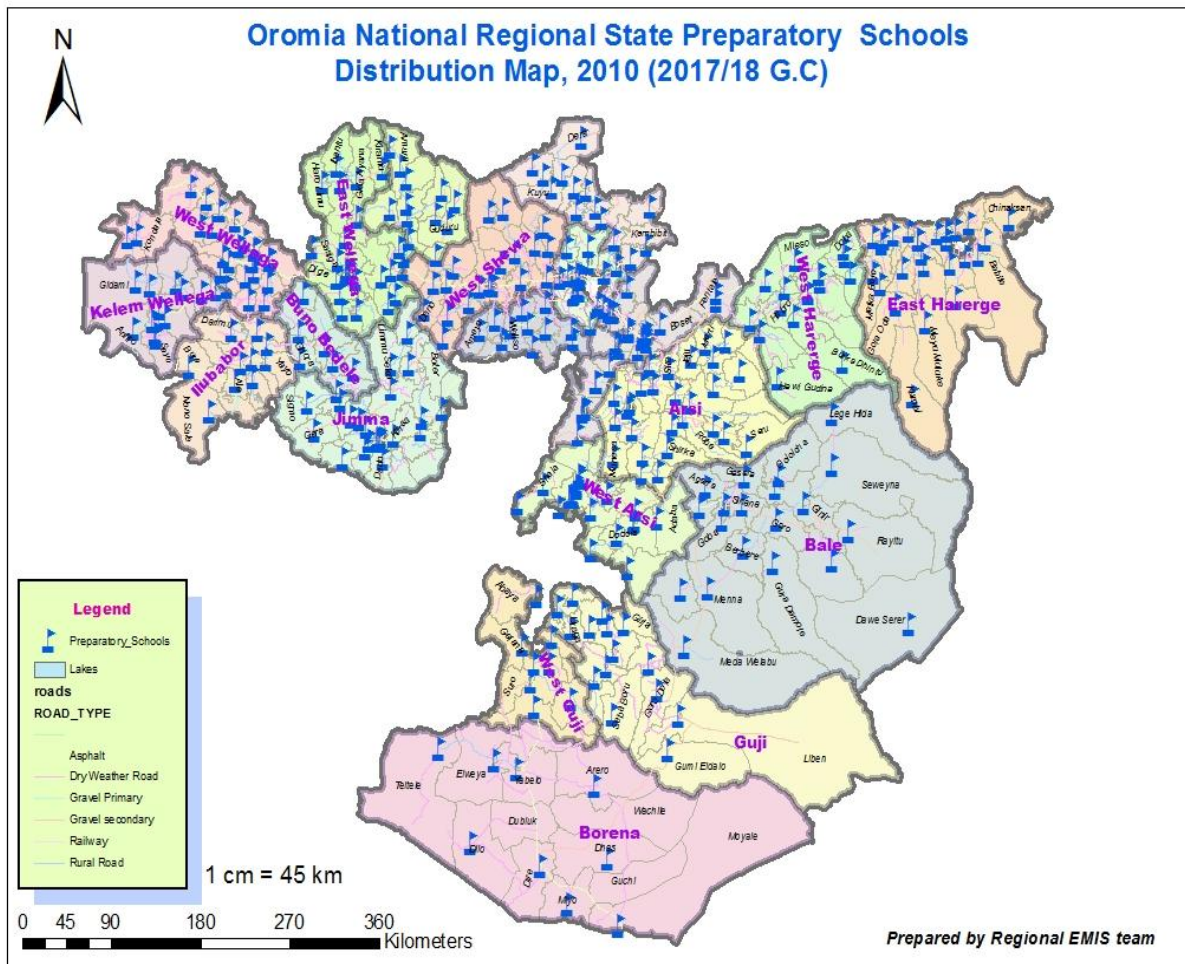

MAP 5: GEOGRAPHICAL LOCATIONS OF SECONDARY FIRST CYCLE (GRADE 9-10) SCHOOLS

Map 5 above shows the distribution of secondary (9-10) schools in the Region.

As we can see from the map the schools were relatively denser along the main road of the central and North East & west areas of the region for secondary first cycle and scattered in the other areas,

MAP 6: GEOGRAPHICAL LOCATIONS OF PREPARATORY (GRADE 11-12 SCHOOLS)

As can be seen from map 6 above the distribution of preparatory schools were also more scattered than secondary schools, specifically in the south eastern area of the region like Borena, Guji and Bale Zones. The point data on the map shows schools by grade level with different colors. The map also shows woredas and the accessibility of the road to schools by type of road.

1.3.3. Secondary Schools Enrolment Rates

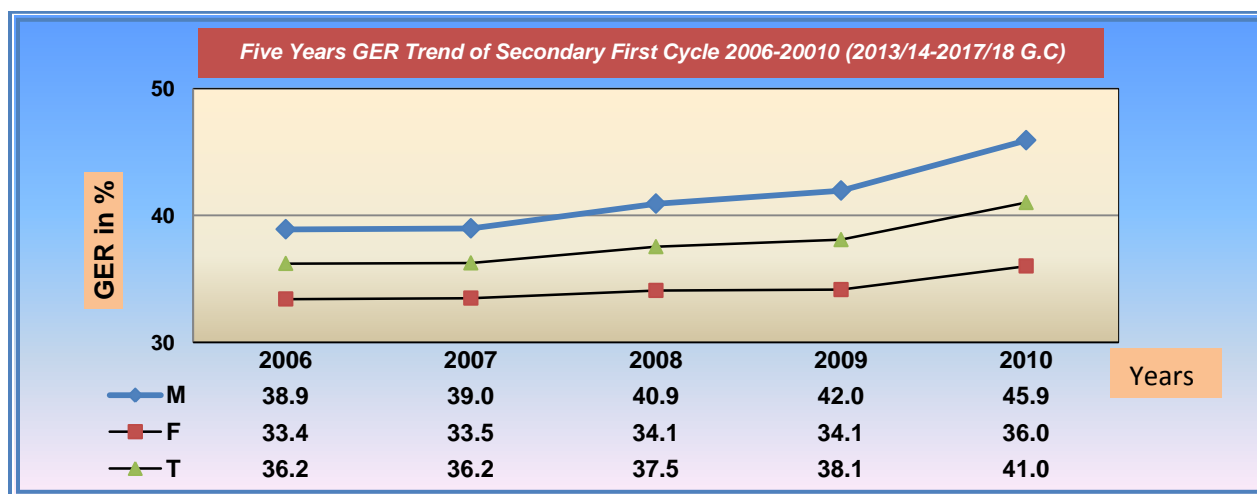

Access is the extent to which the secondary school age population is able to join this particular level of education. Equity implies a reduction in disparities based on gender (Male/Female) and geographical location (Urban/Rural). Equity also ensures that, all students in every school will be able to avail themselves of the services, technology, materials and the qualified teaching staff that able to achieve educational success. Besides, it indicates fairness in the distribution of opportunities for education, and is the main indicator that shows educational performance.

I. Gross Enrolment Rate (GER) of General Secondary Education Grade (9-10)

GER of general secondary education (grade 9-10) is the proportion of all enrolments regardless with school age population at this level. It compares the total number of students in the general secondary school with the school-age population of this level. In Ethiopia, the official school age for secondary first cycle is from 15-16 years old.

$$\text{Grade 9 – 10 GER} = \frac{\text{All age grade 9 – 10 enrolments}}{\text{School Age population of age 15 – 16}} \times 100$$

GRAPH 1.3.1 FIVE YEARS GER TREND OF SECONDARY FIRST CYCLE (GRADE 9-10)

Graph 1.3.1 above shows the last five years trend of GER of secondary first cycle. Accordingly, it was 36.2% (M=38.9%, F=33.4%) in 2006 (2017/18 G.C) and increased to 41.0% (M=45.9%, F=36.0%) by 2010 (2017/18 G.C). Even though the reasons were not yet identified through

research, the GER of the level is not in a position of improvement for the last five years.

Thus, whatever the reason it needs serious attention from educational officials and concerned bodies.

The table 1.3.13 above also shows the GER of 2010 (2017/2018 G.C) for secondary school (9-10) at regional level by zone and administrative town. Accordingly, eight zones and eighteen administrative towns have GER above the regional average, 41.0%. From the same table it is possible to see that there are fifteen administrative towns those have GER greater than 100%. Even though, the causes haven't been identified with basic research yet, the major suspected reason behind the GER exceeding 100% in those administrative towns is that, students who are living in surrounding zones and woredas came to those towns to attend their high school education. This may led to the increment of enrolment in secondary education. That is why the rate goes beyond the expected rate when it is calculated in respect of school age population of those towns. Concerning GPI, nine zones and ten administrative towns have registered above the regional average, 0.78.

Graph 1.3.2 below shows the gender gap of Secondary Education (9-10) that there was fluctuation of GG in the last five years. Accordingly, the gender gap of (9-10) was increased from 5.5% in 2006 (2013/14 G.C) to 9.9 % in 2010 (2017/18 G.C).

GRAPH 1.3.2 FIVE YEARS TREND OF SECONDARY (9-10) GENDER GAP

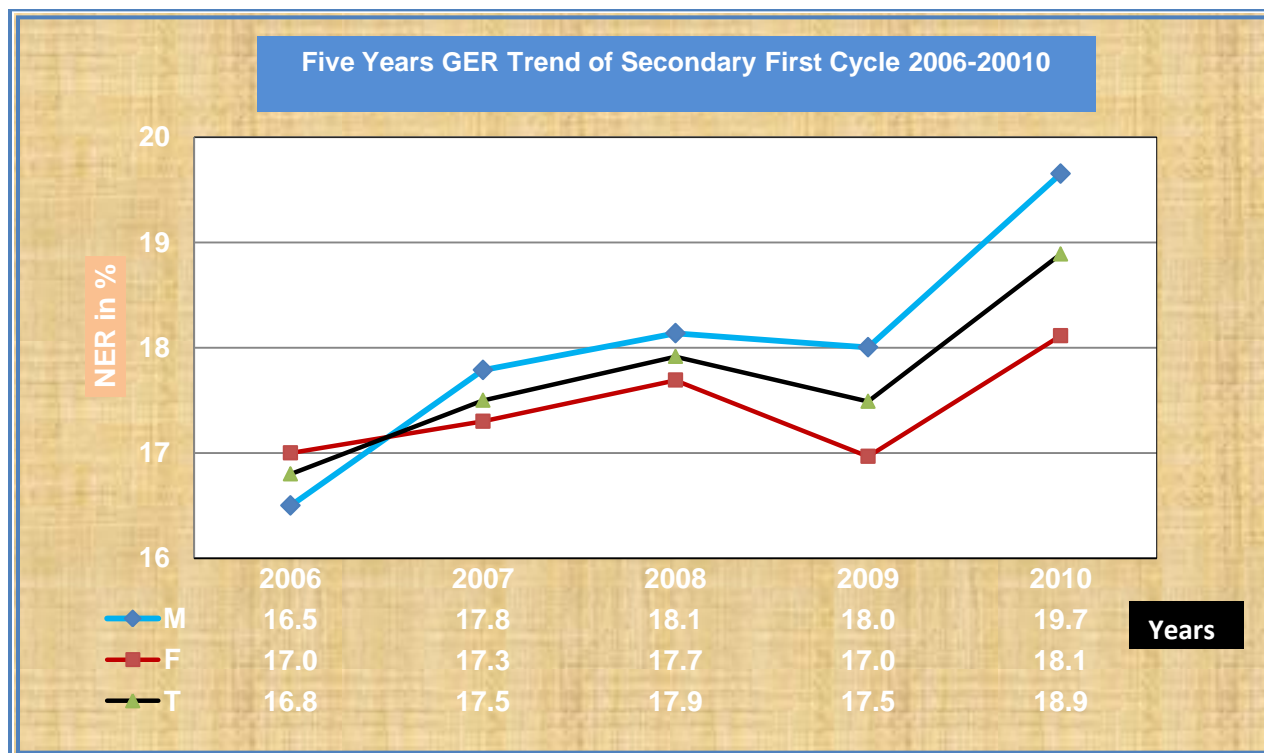

II. Net Enrolment Rate (NER) in Secondary First Cycle (9-10)

For this level, we consider students enrolled in secondary first cycle whose age is from 15-16 and compare it to the total number of populations belonging to the mentioned age group.

$$\text{Grade 9 – 10 NER} = \frac{\text{Grade 9–10 enrolments of age 15–16}}{\text{School Age population of age 15–16}} \times 100$$

GRAPH 1.3.3 FIVE YEARS NER TREND OF SECONDARY FIRST CYCLE (9-10)

Graph 1.3.3 above indicates the NER of secondary education (9-10) of the last five years. It was 16.8% (M=16.5%, F=17.0) in 2006 (2013/14 G.C) and rose to 18.9% (M=19.7, F=18.1%) in 2010 (2017/18 G.C). As the data indicates NER of the level didn't show significant change during the last five years. So, the issue needs attention from the education officials and concerned bodies.

Table 1.3.14 above also shows the NER of secondary first cycle (9-10) education at regional level by zone and administrative towns. Accordingly, thirteen zones and one administrative town have registered below the regional NER average 18.9%. Specially, Borena, West Guji, West Harerge and West Arsi zones as well as Bishaan Guracha administrative town have NER less than 10%. On the other hand, the NER of Dukem and Sebeta Administrative towns exceed 100% which is illogical. Therefore, the issue needs particular attention to improve the huge gap shown in these zones and illogical NER of those Administrative towns.

I. Gross Enrolment Rate (GER) of Preparatory Schools (11-12)

GER of preparatory education (grade 11-12) is the proportion of all enrolments regardless of age with school age population at this level. It compares the total number of students in preparatory school with the school-age population of this level. In Ethiopia, the official school age for secondary first cycle is from 17-18 years old.

$$\text{Grade 11 – 12 GER} = \frac{\text{All age grade 11 – 12 enrolments}}{\text{School Age population of age 17 – 18}} \times 100$$

GRAPH 1.3.4 FIVE YEARS TREND OF GER FOR PREPARATORY (11-12)

As shown in graph 1.3.4 above, the GER of preparatory (11-12) has shown a little improvement in the last five years as it was 7.5 % (M=8.7%, F=6.3%) in 2006 (2013/14 G.C) and increased to 10.0 % (M=11.4%, F=8.5%) in 2010 (2017/18 G.C).

Table 1.3.15 below also shows the GER of preparatory by zones and administrative towns. As shown in the table, most of preparatory school student enrolment is concentrated in urban areas. Among the 20 zones in the region 15 of them have GER below the regional average 10.0%. The least GER registered zones are Buno Bedele (3.71%), Ilu Aba Bora (4.26%) and West Hararge (4.29%). On the other hand, five zones; Horo Guduru Wollega (25.29), West Wollega (24.23), East Wollega (18.92), Kelem Wollega (14.29%) and West Shoa (13.79%) have registered above the regional average. Regarding to administrative towns, only Bishan Guracha administrative town (3.73%) has registered below the regional average. The rest 18 administrative towns have registered above the regional average GER which is 10.0%. However, only Dukem (60.10%) and Nekemte (58.28%) administrative towns have registered GER above 50%

Regarding GPI, the performance registered in preparatory education is somewhat low when compared with primary (1-8) and secondary (9-10) education. Accordingly, the GPI of preparatory in 2010 (2017/18 G.C) at regional level is 0.74. Concerning zones and administrative towns, ten zones and seven administrative towns have registered above the regional average.

I. Net Enrolment Rate (NER) of Preparatory Schools(11-12)

For this level, we consider students enrolled in schools (11-12) whose age is from 17-18 and compare it to the total number of populations belonging to the mentioned age group.

$$\text{Grade 11 – 12 NER} = \frac{\text{Grade 11 – 12 enrolments of age 17 – 18}}{\text{School Age population of age 17 – 18}} \times 100$$

GRAPH 1.3.5 FIVE YEARS TREND OF PREPARATORY SCHOOLS NER

As shown in graph 1.3.5 above, NER of Preparatory schools (11-12) has been increasing for the last four years, and has decreased in 2010. For example, it was 3.8% (M=4.0, F=3.5%) in 2006 (2013/14 G.C) and then rose to 5.6% (M=5.9%, F=5.4%) in 2009(2016/17 G.C). In 2010 (2017/18 G.C) it has decreased to 5.2% (M=5.8%, F=4.7%).

In table 1.3.16 above, the NER and GPI of preparatory schools in 2010 (2017/18 G.C) have shown by zones and administrative towns. As illustrated in the table, zone and administrative town's performance concerning NER is quite far apart from one another. Accordingly, the three high NER registered administrative towns are Dukem, Ambo and Adama have 37.13%, 28.09% and 26.65% respectively. Whereas Bishan Guracha administrative town has been registered the least NER which is 0.7%

Regarding zones, West Guji, South West Shoa and Oromia Special Zone Surrounding Finfinne are the three least NER registered zones which have 1.8% and 1.9%, 2.0% respectively.

Concerning gender parity index /GPI/, it had been 0.92 in 2009 (2016/17 G.C) and this value has decreased to 0.82 in 2010 (2017/18 G.C).

None Formal Education

1.4.1. Alternative Basic Education /ABE/

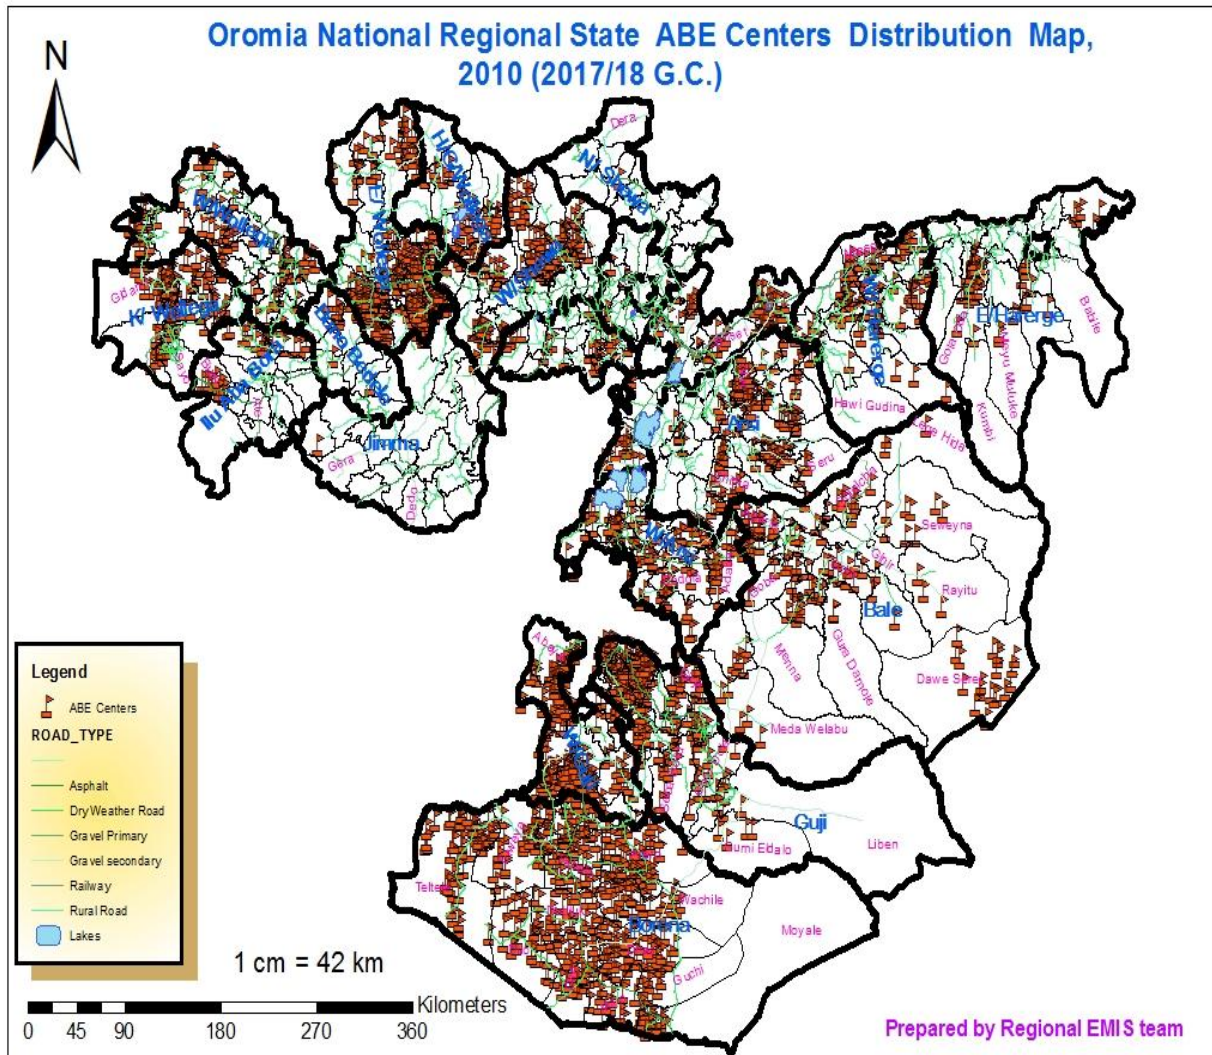

Basic education is the whole range of educational activities taking place in various settings (formal, non-formal and informal) that aimed to meet basic learning needs. In Dakar Framework, the term is having an implication similar to the broad EFA agenda. The program should receive wide spread public support for reasons that include considerations of literacy as fundamental human right. As the fact indicates, illiteracy accompanies poverty and a low life expectancy. Alternative Basic Education (ABE) is intended to address the Primary education needs of children who are substantially older than primary school ages of 7-14. Moreover, ABE enrollments have contribution in reporting GER and NER of 1st cycle primary with regular program. In paying attention for the issue, our region has planned to reduce illiteracy in this regard. Even though, great efforts have made to meet the access, still hard work is expected to attain the plan. In this publication under this title we attempted to specify the data of Alternative Basic Education (ABE) and Integrated functional adult literacy (IFAL) program.

Table 1.4.1 below elaborates the number of ABE centers by ownership at regional and zone as well as administrative towns. Accordingly, among the total number of 1963 ABE centers 93.99% (1845) of them are owned by government. The rest of 6.01%, 118 of them are under the ownership of non government organization. Concerning zonal distribution Borena, East Wollega and Guji (24.05%, 12.53% and 12.23%) respectively have the largest share of ABE centers in the region. North Shoa zone has no ABE centers. On the other hand, the share of administrative towns is very low, and 12 administrative towns have no ABE centers.

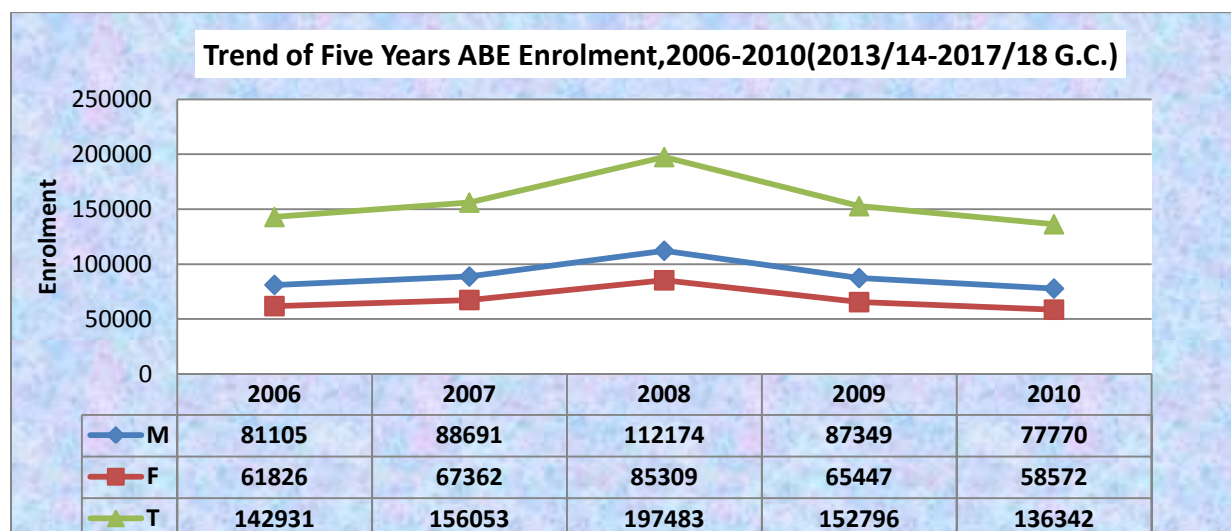

MAP 7: DISTRIBUTION OF ABE CENTERS

As can be seen from map 7 above, ABE centers are relatively dense in southern and western parts of the region. Specifically, they are common in Borena, Guji, West Arsi, East Wollega, Kelleme, and Arsi zone. On the other hand, Bale, North Shoa, East Shoa, Jima, Ilu Aba Bora and East Hararge zones are zones where ABE centers are scarcely distributed.

Trend of ABE Enrolment

GRAPH 1.4.1 FIVE YEARS TREND OF ABE ENROLMENT

As indicated on table 1.4.2 below although ABE enrolment was slightly increasing from 2006 (2013/14 G.C) to 2008 (2015/16 G.C), it has shown decreasing in 2009 (2016/17 G.C) and 2010 (2017/18 G.C). It is clear that this approach has played significant role in addressing children who have not got chance to join primary education. But due attention has not been given to strengthen the sector. For example; large number of children is still not joining school in the region. Hence, even though basic research didn't attempt to identify the cause yet, our assumption for the challenges happened might be; low community participation, low supervision and low follow-up of education sector at grass-root level, less interest and motivation of ABE facilitators, low participation of NGOs (both local and international) to promote the ABE program in the region and the like are an expected assumptions. Therefore, we recommend that the issues needs serious attention and follow up.

CHAPTER TWO

EDUCATION QUALITY

Quality Indicators in Pre-Primary Education

Although education quality cannot be indicated with only quality indicators in this subsector listed below; Pupil Teacher Ratio (PTR) and Pupil section Ratio (PSR) are the commonly used indicators. Efficiency indicators provide a picture on the teaching-learning process; classroom environment in terms of overcrowding, pupil–teacher contact, and availability of teaching-learning materials. For all these indicators, a lower value leads to reduced levels of overcrowding or reduced competition for classroom resources and implies better learning conditions.

I. Teachers in Pre-primary Schools

In pre-primary education almost all teachers those care for the children in PPAPS are from Primary first cycle schools to work side by side. Child to child program is held by trained young facilitators under full supervision of neighboring primary school. Only Kindergarten Schools have their own teachers. In table 2.1.1 below it is possible to see that there were a total of 6,460 teachers registered in Kindergartens where 69.4% of them are females.

II. Pupil Teacher Ratio (PTR)

PTR gives an indication of contact between pupils and teachers in a classroom. If it is lower, then there is high chance of contact between a teacher and pupils and teachers will have enough time to take care of children and check homework and class work as well. In other words, the lower the PTR the better teaching learning process would be. As shown in table 2.1.1 below the Pupil Teacher Ratio (PTR) of KG in the academic year reached 80:1 at regional level. Administrative towns have better Pupil Teacher Ratio (PTR) of KG, 39:1 than Zones which is 111:1.

III. Pupil Section Ratio (PSR)

As shown in table 2.1.1 below, the regional average Pupil Section Ratio (PSR) of KG in the academic year reaches 51:1 in general. Administrative towns have average Pupil Section Ratio (PSR) of KG, 41:1 than Zones average which is 50:1.

2.2. Quality Indicators in Primary Education

Quality of education is the key indicator to detect whether a given country is on the right track to achieve the intended goal of its education system. Quality of education system may refer to many different characteristics, such as quality of inputs into education system, process, quality of educational outputs and outcomes. Here in this publication we focus on quality, in relation to educational inputs such as teacher's qualification, text book distribution and class size in our education system.

2.2.1. Teachers in Primary Education

I. Qualification of Teachers in Primary Education

One of the main factors, which affect the quality of education, is the qualifications of the teacher. That is, whether the educational qualifications of the teacher meet the requirements of the level he/she is teaching. According to national standards, primary education requires teachers with minimum qualification of Diploma from College of Teachers Education.

The performance of pupils in primary schools is greatly affected by the quality of the teaching staff. The Annual School Census 2010 captured the total number of teachers in the primary sector by zone and gender. A total of 152,685 (90,378 Male and 62,307 Female) teachers were registered in all primary schools, with male teachers comprising a higher percentage of 59.0%. As illustrated from table 2.2.1, 2.2.2 and 2.2.3 below percentage of qualified teachers for primary first cycle schools at regional level is 73.7% (M=67.4% & F=79.9%), where as in primary second cycle schools the percentage of qualified teachers is 95.7% (M=95.0% & F=97.2%). The percentage of qualified full primary/1-8/ teachers is 83.5% (M=82.2% F=85.4%) at regional level. Consequently, the data indicates that the qualification of teachers is another area which needs special attention from concerned bodies particularly for primary first cycle.

II. Primary Natural Science and Mathematics Teachers

Findings of National Learning Assessment and other studies revealed that; primary school students' performance in Mathematics and Science (M&S) as poor. Students were passive participants in classroom. That is why the project called SMASEE (Strengthening Mathematics and Science Education in Ethiopia) has launched and implemented for the past few years. The premise behind this project is that there is strong association between teachers' competency and students' performance in M&S education and needs to improve teachers' competency in teaching M&S.

Data of natural Science and Mathematics for primary teachers also collected and identified in Government and non-Government Schools. Accordingly table 2.2.5 below indicates that there were 58,984 (Male=37,534 and Female=21,450) natural science and mathematics teachers in primary schools. Among all 152,685 primary school teachers of the region, natural science and mathematics teachers have a share of 58,984 (38.6%). These indicate more than 1/3rd of teachers in the region are involved in science and mathematics, which shows our recruitment of teachers, is on the right track that realizes the intention of country towards science and technology.

Regarding to gender participation among 58,984 natural science and mathematics teachers 37,534 (63.6%) were Male and 21,450 (36.4%) were Female. Specifically among 58,984 teachers 13,827 (23.4%) of them are graduates of Mathematics, 6,641 (11.3%) in Physics, 7,295 (12.4%) in Chemistry, 9,226 (15.6%) in Biology and 19,405 (32.9%) in Natural Science and 2,590 (4.4%) in mathematics and basic science.

2.2.2. Different Ratios in Primary Education

I. Primary Education Pupil Teacher Ratio

This is one of the most common indicators of quality education used in educational planning. It is believed that a lower number of pupils per teacher indicate that pupils will have better chance of contact with their teachers with in manageable class room. The standard set for pupil teacher ratio for primary education is 50:1. Findings from 2010 school census reveal that the overall PTR of the year is 53:1 as indicated in table 2.2.8 below:

It is indicated in the findings that, West Hararge, East Hararge, and Guji zones are with the highest PTR by having 70, 66 and 65 respectively in 2010 (2017/18 G.C.) This might be due to low attraction and retention of teachers in the area as compared with the Administrative Towns such as Lega Tafo Lega Dadi, Gelan, Sebeta and Burayu with the lowest Ratio of 26, 29, 29 and 29 respectively, where attraction and retention is high. This can be lessened by increasing incentive schemes for teacher like; constructing more teachers' houses and improving the social infrastructure in those Zones with higher Student to Teacher Ratios is recommendable. As shown from Graph 2.2.1 below, the PTR trend of the last five years shows that it has been improving at a rate of 1.1%.

II. Primary Education Pupil Section Ratio

Pupil section ratio (PSR) it is also one of the educational quality indicators that indicate average number of pupils per class rooms. It gives a rough estimation of class size, assesses the efficiency of resource utilization and it also used to assess the teaching- learning process. The standard set for pupil section ratio for primary education is 50:1. But as can be seen from graph 2.2.2 below the trend of PSR of the last five years in the region haven't reached the standard. Rather, as it is indicated on the graph, the trend of last five years of PSR in primary school has moved from 58:1 in 2005 to 60:1 from 2008 (2015/16 G.C) to 2010 (2017/18 G.C). Furthermore, on the table 2.2.8 below PSR of 2010 (2017/18 G.C.) has shown at zonal and administrative town. Accordingly, West Hararge, East Hararge, and Guji zones are with the highest PSR by having 82, 74 and 69 respectively in 2010 (2017/18 G.C.) On the other hand, Administrative Towns such as Dukem Lega Tafo Lega Dadi and Burayu are with the lowest PSR by having 37, 36 and 34 respectively.

2.2.3. Primary Schools Facilities

Research has found that school facilities can have a profound impact on both teacher and student outcomes. With respect to students, school facilities affect health, behavior, engagement, learning, and growth in achievement. Thus, researchers generally conclude that without adequate facilities and resources, it is extremely difficult to serve large numbers of children with complex needs. In this publication some school facilities availability and their status has been tried to be analyzed. Some of these school facilities include toilet, water, electricity, laboratory and others.

I. Primary Schools Toilet Availability

As can be seen from table 2.2.11 below among 14,519 primary schools in the region 13,222 of them (91.1%) have reported as they have toilet. Still large number of schools has no toilet for their students that may contribute for high dropout of students in the system especially of girls. The condition of the toilets can be categorized as improved (43.3%) and traditional (56.7%) respectively. Concerning ownership, among 13,520 government owned and 999 non-government organizations owned primary schools in the region 12,240 (90.5%) and 982 (98.3%) schools have reported that they have toilet. In the same table availability of toilet is also shown by zone and administrative towns. Accordingly, among the 19 administrative towns 15 of them reported that all their primary schools have toilet. Among the 20 zones East Hararge, Borana and Bale zones have the least percentage of toilet availability by having 74.5%, 75.9% and 77.9% respectively.

II. Primary Schools Water Availability

Water is one of the most school facilities that schools must own. According to the 2010 school census among the 14,519 primary schools in the region only 5130 (35.3%) reported that as they have water. Most of primary schools 9,389 (64.7%) in the region has no water for their students that may contribute for high dropout of students in primary schools. Concerning ownership, among 13,520 government owned and 999 none-government organizations owned primary schools in the region only 4,202 (31.1%) and 921 (92.2%) schools have reported that they have water. Table 2.2.12 below shows availability of water by zone and administrative towns.

Accordingly, among the 19 administrative towns 8 of them reported that all their primary schools have water. Among the 20 zones West Guji, Kellem Wollega and East Hararge zones have the least percentage of water availability by having only 20.2%, 18.8% and 16.7% respectively.

III. Primary Schools Electricity Availability

Electricity is also one of the most school facilities that schools must own. But among the 14,519 primary schools in the region only 3804 (26.2%) reported that as they have electricity. Most of primary schools 10,715 (73.8%) in the region have no electric. Concerning ownership, among 13,520 government owned and 999 none-government organizations owned primary schools in the region only 2885 (21.3%) and 919 (92.0%) schools have reported that they have electricity. Table 2.2.15 below shows availability of electricity by zone and administrative towns. Accordingly, among the 19 administrative towns all have registered above the regional average and 8 of them reported that all their primary schools have electricity. Among the 20 zones West Hararge, Bale and East Hararge zones have the least percentage of electricity availability by having only 11.6%, 15.6% and 16.4% respectively.

IV. Primary Schools Library and Laboratory Availability

a. Primary Schools Library

A library is an important source of knowledge to young minds in schools. It develops the important habit of reading among the students. The school library plays a great role in the life of students by serving as the store house of knowledge. The importance of a library in a school cannot be over emphasized. So that, every school should have a library. While the role of the school library remains constant, its design, digital platform, strategies and tools could change as technology changes.

Availability of the libraries in primary schools in 2010 (2017/18 G.C) has shown in table 2.2.16 below. Accordingly, among 14,519 primary schools in the region only 6,627 (45.6 %) of the have reported that they have library. West Hararge, East Hararge and Borana zones have the least availability of library by having 26.7%, 18.3% and 12.2% respectively. Concerning administrative town all of them have availability above the regional average.

b. Primary Schools Laboratory

Recent studies in Ethiopia indicated that students beginning from lower grades have serious knowledge deficits in science and mathematics; this signifies that the quality of science education in primary and secondary schools, which is critical foundations for latter educational development, is at crisis. A high-quality science education in primary schools contributes to developing scientific literacy and would be expected to influence students to study the enabling sciences at secondary education. So as strengthen science education in primary schools' availability of science laboratory in schools is important. A science laboratory is a workplace for the conduct of scientific research. It helps students to remember the concepts better. It helps to transfer the experience to other learning situations. It is a facility that provides controlled conditions in which scientific research, *experiments* and measurement may be performed.

Information of laboratories in primary schools of the year 2010 (2017/18 G.C) has also shown in table 2.2.16 below. Regarding laboratory among 14,519 primary schools in the region only 1804 (12.4%) of have reported that they have laboratory. Among the 20 zones and 19 administrative towns only Modjo, Jimma and Adama administrative towns have reached availability of laboratory above 50%.

VI. Primary Schools Finance

The Government funding procedure is passed through two steps process. The first involves fiscal transfers from the federal government to the regions and the second from regional governments to *woredas*. Accordingly, Woredas allocate the block grant for primary and secondary general education and the regional education Bureau for preparatory schools, based on the enrollment they had. Additionally, the GEQIP school grant also allocated accordingly based on the number of students enrolled in pervious academic year.

However, all levels of schools independently generate additional budget from different sources, for example by generating their internal income, community participation and NGO donation. Tables 2.2.18 below illustrate the overall revenue of Government primary schools. It demonstrates the financial information of the year, which was collected from the annual school census questionnaire. The tables indicate revenue of the region by zonal level.

Quality Indicators of Secondary & Preparatory Education

Among the major educational inputs those contribute a remarkable role to ensure quality of secondary education are the availability of sufficient and qualified teachers, class size and text books. As compared to the primary education the percentage of qualified teachers, student-teacher ratio and student-section are better for secondary & preparatory education in the region. The minimum qualification required for first cycle is BEd/ BA/BSc and is MEd/MA/MSc. for preparatory school teachers.

2.4.1. Secondary & Preparatory Education Teachers , Principals and Vice Principals

I. Secondary & Preparatory School Teachers qualification

The strength of any educational system largely depends on the quality and commitment of its teachers. The teacher is the most important resource in an education system in any society. The teacher also plays a major role in the delivery of quality education.

As per the education policy, a secondary school teacher in Ethiopia should hold at least a first degree. The performance of pupils in secondary schools is greatly affected by the quality of the teaching staff. The Annual School Census 2010 captured the total number of teachers in secondary & preparatory schools by zone and gender. The information about secondary and preparatory teachers has illustrated in tables 2.4.1, 2.4.2, 2.4.3, 2.4.4, and 2.4.5 below. Accordingly there were a total of 34,200 (M=28,732 and F=5,468) teachers where 26,328 (M=21525 and F=4803) are in secondary (9-10) and 7872 (M=7207 and F=665) in preparatory schools respectively. The percentage of qualified teachers for secondary schools at regional level is 94.5% (M=67.4% & F=79.9%). The percentage of qualified preparatory school with degree and above qualification is 94.4% (M=94.7% & F=91.4%) where as with qualification of Masters and above the qualified percentage of teachers fails to 18.6% (M=18.3 & F= 22.0%) at regional level. Consequently, the data indicates that the qualification of teachers especially of preparatory schools needs special attention from concerned bodies.

II. Secondary and Preparatory schools Grade 9-10 and 11-12, Natural Science & Mathematics Teachers

Information about Science and Mathematics teachers in secondary and preparatory schools also collected to show the ratio among all teachers. According to table 2.4.7 below among all 32,400 secondary and preparatory schools teachers in the region 39.7%, 13,578 (Male=11,982 and Female=1,596) were natural science and mathematics teachers. Specifically among 13,578 SMASEE teachers 4,346 (32.01%) of them are graduates of Mathematics, 3,094 (22.79%) in Chemistry, 3,020 (22.24%) in Physics and 3118 (22.96%) in Biology.

Table 2.4.7 Secondary Grade 9-12, Natural Science & Mathematics Teachers by Specialization

Secondary and Preparatory, Grade 9-12, Natural Science & Mathematics (SMASEE) Teachers by Specialization (All Government and None Gov), 2010 (2017/18 G.C)

2.1.1. Different Ratios in Secondary and preparatory Education

I. Secondary and Preparatory schools Student to Teacher Ratio

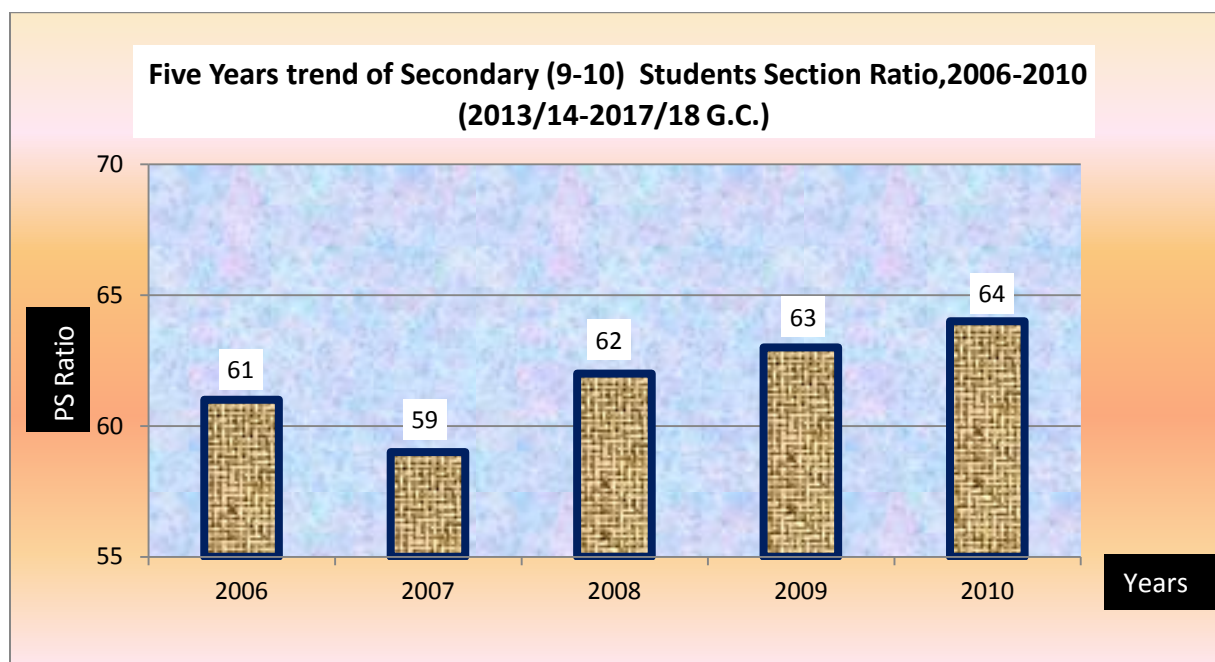

Teacher to student ratio of secondary & preparatory education (9-10) and (11-12) in 2010 (2017/18 G.C) at zone and administrative towns is shown in table 2.4.15 below. Accordingly, teacher to student ratio of secondary & preparatory education (9-10) and (11-12) were 1:27 and 1:21 respectively. As data shows Borena, Bale, Dukem Administrative town & West Hararge Zones have the least teacher to student ratio in secondary first cycle (9-10) which are 1:15, 1:21, 1:22 & 1:22 respectively. On the other hand Robe and Nekemte Administrative towns as well as Kellem Wollega Zones have registered the highest teacher to student ratio which is 1:37, 1:36 and 1:34 respectively. In preparatory grades (11-12) Bishan Guracha, Gelan Administrative towns, Ilu Aba Bora Zone have the least teacher-student ratio which is 1:5, 1:9 and 1:10 respectively. On the other hand, Nekemte, Burayu, Adama & Jimma Administrative towns have registered the highest teacher to student ratio which is 1:37, 1:31 respectively.

II. Secondary and Preparatory schools Student to Section Ratio

Graph 2.4.1 Five Years trend of Secondary (9-10) Students Section Ratio

As can be seen from graph 2.4.1 above, the trend of Student-Section ratio for secondary first cycle /9-10/ has been fluctuating from year to year. Accordingly; in 2006 it was 61:1 that tells us far from the standard and shows a slight improvement in 2007 to reach 59:1 and again rose to 64:1 in 2010.

As shown in table 2.4.16 below section to student ratio of secondary & preparatory education (9-10) and (11-12) in 2010 (2017/18 G.C) were 1:64 and 1:55 respectively. As data shows Horo Guduru Wollega, Bale and Borena Zones have relatively minimum section to student ratio in secondary first cycle (9-10) which are 1:60, 1:58, & 1:53 respectively. Among the 19 administrative towns Adama, Gelan and Woliso Administrative towns have registered the lowest section to student ratio which is 1:50, 1:49 and 1:42 respectively. On the other hand Burayu administrative towns, Holeta administrative towns and Guji Zone have the highest section to student ratio of 1:106, 1:85 and 1:75 respectively. In preparatory grades (11-12) schools Buno Bedelle zone, Bishoftu, Gelan and Bishan Guracha administrative towns have the least section to student ratio which is 1:33, 1:27, 1:24 and 1:11 respectively. On the other hand, Jimma Administrative town is the only town that have registered the highest section to student ratio which is 1:155.

2.1.2. Secondary and Preparatory Schools Facilities

Researchers conclude that without adequate facilities and resources, it is extremely difficult to serve large numbers of students with complex needs. In this publication some secondary school facilities availability has been compiled. Some of these school facilities include water, toilets, electricity, library, laboratory, internet, computers and others.

I. Secondary and Preparatory Schools Water Availability

Water is one of the most school facilities that secondary and preparatory schools must own. Accordingly, among the 1,428 secondary and preparatory schools in the region only 891 (62.4%) reported that as they have water. Concerning ownership, among the 1,322 government owned secondary and preparatory schools in the region 785 (59.4%) and all 106 (100%) non-government organizations owned schools have reported that they have water. Table 2.4.18 below shows availability of water by zone and administrative towns. Accordingly, among the 19 administrative towns all (100%) secondary and preparatory schools in 18 of them reported that they have water. Among the 20 zones Guji, Ilu Aba Bora and West Guji zones have the least percentage of water availability by having only 38.2%, 38.0% and 32.5% respectively.

Although number of schools reported that they have water are 891, this number has increased to 955 when they are counted by source of water, for the reason that some schools may get water from more than one source. Accordingly as shown in table 2.4.20 among the 955 secondary and preparatory schools 520 (54.5%) of them get water from pipeline. If it is analyzed by ownership among as shown in table 2.4.21 below among the 840 government owned secondary and preparatory schools those reported water availability by source of water 447 (53.2%) of them get water from pipeline. As shown in table 2.4.22 below among the 115 non- government organizations owned secondary and preparatory schools those reported that they have water by source of 73 (63.5%) of them reported that they get water from pipeline.

II. Secondary and Preparatory Schools Toilet Availability

As can be seen from table 2.4.23 below among 1428 secondary and preparatory schools in the region 1,329 (93.3%) of them have reported as they have toilet. Still 6.7% schools have no toilet for their students that may contribute for high dropout of girls. Concerning ownership, among 1,322 government owned and 106 non-government organizations owned secondary and preparatory schools in the region 1,224 (92.6%) and 105 (99.1%) schools have reported that they have toilet.

In the same table availability of toilet is also shown by zone and administrative towns. Accordingly, among the 19 administrative towns all of them reported that all (100%) of their secondary and preparatory schools have toilet. Among the 20 zones West Hararge, Ilu Aba Bora and South West Shoa reported that all (100%) of their secondary and preparatory schools have toilet. But West Guji, Bale and North Shoa zones have the least percentage of toilet availability by having 80.0%, 79.7% and 76.3% respectively.

Table 2.4.24 below also shows the condition of the toilets in secondary and preparatory schools. Accordingly among the 1329 secondary and preparatory schools those have toilet, 768 (57.9%) of them have improved toilet and 560 (42.1%) of the have traditional toilets. By ownership category among 1,224 government owned secondary and preparatory schools in the region 689 (56.3%) of them have improved toilet and 537 (43.7%) have traditional. Among 105 non-government organizations owned secondary and preparatory schools 80 (76.2%) of them have improved toilet and 25 (23.8%) have traditional toilet.

III. Secondary and Preparatory Schools Electricity Availability

Electricity is also one of the most necessary school facilities that secondary and preparatory schools must have. As can be seen from table 2.4.25 below among the 1,428 secondary and preparatory schools in the region 1115 (78.1%) of them reported that as they have electricity. Concerning ownership, among 1,322 government owned and 106 none-government organizations owned secondary and preparatory schools in the region 1,010 (76.4%) and 105 (99.1%) of the schools have reported that they have electricity. In the same table below the availability of electricity by zone and administrative towns has been elaborated. Accordingly, among the 19 administrative towns unlike Ambo (71.4%) and Burayu (88.5%) administrative towns, schools in the other 17 towns have reported that they have electricity. Among the 20 zones Guji, Bale and West Guji zones have the least percentage of electricity availability by having only 69.1%, 64.5% and 55.0% respectively.

Table 2.4.26 below also shows electricity availability by source electric power at regional, zonal and administrative town level. Accordingly among 1,115 secondary and preparatory schools those have reported that they have electricity at regional level, 986 (69.0%) of them reported that they get electricity from hydro. On the other hand out of 1,010 government owned and 105 none-government organizations owned secondary and preparatory schools those reported that they have electricity, 884 (66.9%) and 102 (96.2%) of them get electricity from hydro respectively.

Secondary and Preparatory Schools Laboratory and Library Availability

a. Secondary and Preparatory Schools Library

The importance of library in schools is un debatable. So that, every school should have a library. While the role of the school library remains constant, its design, digital platform, strategies and tools could change as technology changes.

Availability of libraries in secondary and preparatory schools in 2010 (2017/18 G.C) has shown in table 2.4.30 below. Accordingly, among 1,428 secondary and preparatory schools in the region only 1,068 (74.4%) of the have reported that they have library. Among the 20 zones West Guji, Bale and Buno Bedele zones have the least availability of library by having 57.5%, 56.6% and 54.1% respectively. Concerning administrative towns only Nekemte (71.4%) and Sululta (50.0%) administrative towns have registered below the regional average.

b. Secondary and Preparatory Schools Laboratory

A high quality of science education in secondary schools contributes to developing scientific literacy and would be expected to influence students to study the enabling sciences at higher education. So as strengthen science education in secondary schools' availability of science laboratory in schools is important. A science laboratory is a workplace for the conduct of scientific research. It helps students to remember the concepts better and to transfer the experience to other learning situations. It is a facility that provides controlled conditions in which scientific research, *experiments* and measurement may be performed.

Information of laboratories in secondary and preparatory schools of the year 2010 (2017/18 G.C) has also shown in table 2.4.30 below. Regarding laboratory among 1,428 secondary and preparatory schools in the region only 473 (33.1%) of have reported that they have laboratory. Among the 20 zones and 19 administrative towns, secondary and preparatory school in only Modjo, Lege Tafo Lege Dadhi and Holeta administrative towns have 100% laboratory availability.

CHAPTER THREE

EDUCATION INTERNAL EFFICIENCY

Primary Education Internal Efficiency

Education system is said to be efficient if maximum output is obtained from a given input or if a given output is obtained with minimum possible input. The problems of measuring efficiency in education however are considerable. There are several indicators used to measure the efficiency of the education system.

The Internal Efficiency Rate (IER) is the ratio of number of student's years that should be, ideally spent to carry out a certain number of students at the end of primary cycle out of the number of students-years effectively spent.

$$\text{IER} = \frac{\text{Student's years that should be ideally spent}}{\text{Number of student's years effectively spent}}$$

Internal Efficiency Rate (IER) is calculated with different methods such as Transverse, Longitudinal and Pseudo-Longitudinal Methods. In this case we have deployed a Longitudinal Methods for calculating internal efficiency rate.

Formula for Calculating IER by Longitudinal Method

$$\text{IER} = \frac{(\text{Survival Rate (Longitudinal Method) for the final grade}) * (\text{Duration (in years) of the education level})}{\text{SUM of Survival Rates (Survivors) From the first to the final grade of the same education level}}$$

TABLE 3.1.1 PRIMARY EDUCATION INTERNAL EFFICIENCY RATE (IER)

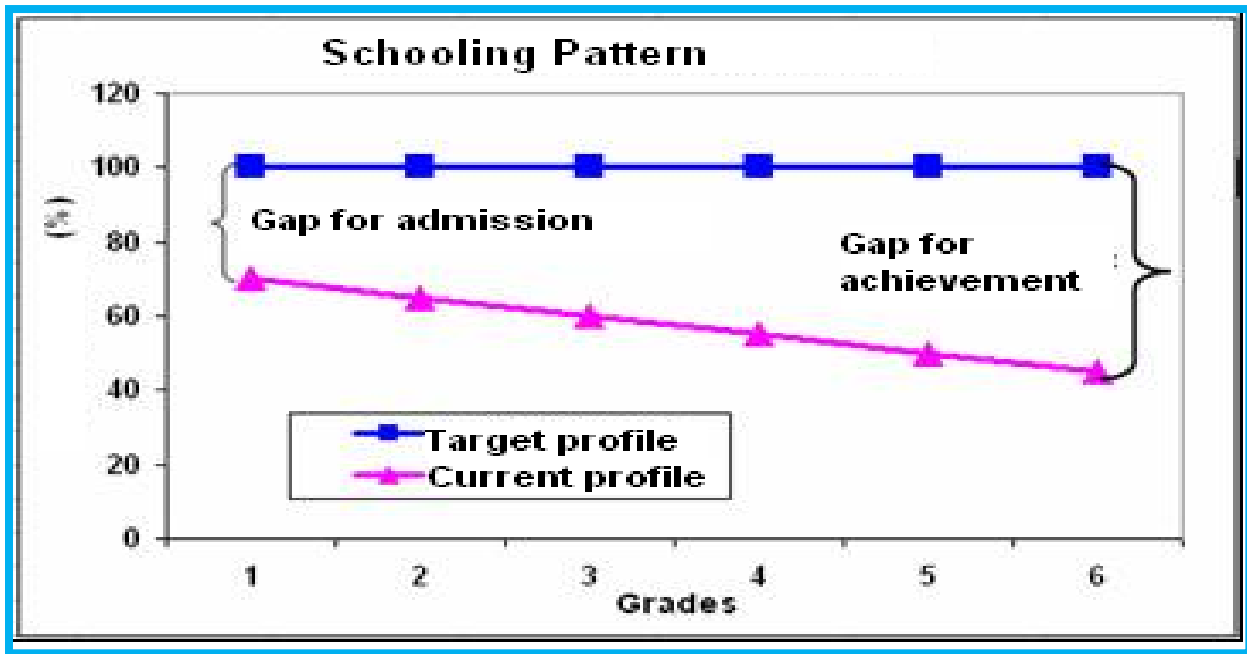

Internal Efficiency Rate (IER) with Longitudinal Method in 2010 (2017/18 G.C)								
Grades	G1	G2	G3	G4	G5	G6	G7	G8
Survival Rates/Retention Rates	100	68.43	52.52	48.30	41.70	37.69	30.57	29.31
Efficient Students-years	234							
Effective Students-years	409							
IER	0.57							
1-IER (wasted Resource)	0.43							

Interpretation of the Internal Efficiency Rate

Internal Efficiency Rate is a number between 0 and 1. The more this ratio is close to 1, the more the system is efficient. It is complementary to 1 (1-IER) is interpreted as the percentage of resources wasted, because these resources have been used to finance dropouts and repeaters.

Schooling Profile /Enrolment Pattern/

The schooling profile is, constituted of Age-Specific Enrolment Ratio for a given cycle of the education system.

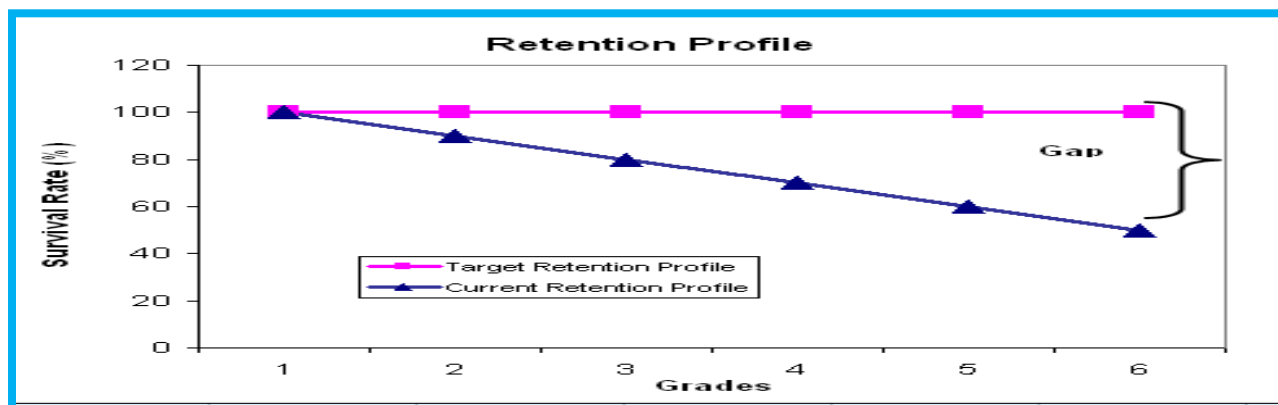

The schooling pattern interpreted as the student flow through the education cycle. Its trend determines the efficiency of the system to keep students in the system until they complete their schooling.

The value of the schooling profile resides mainly in its ability, as per indicated in graph 3.1.2 below, the level of enrolment for each grade and to easily distinguish between access and retention issues. It especially distinguishes between the two main factors of weak cycle completion: weak first grade access and high dropout during the cycle. The figure graphically illustrates the most common situations. Thus, a flat schooling profile constitutes retention ideal for the system (no dropout). Conversely, a slanted profile reflects the scale of dropout throughout the cycle and indicates low internal efficiency.

Retention Profile

The retention profile is, constituted by the series of survival rate at each grade level. It measures the capacity of the system to keep students in the system until they complete their schooling. Data required to determine retention profile are enrolment and news entrants by grade at least for two years

FIGURE 3.1.2 RETENTION PROFILE

Survival Rate (SR)

A survival rate approaching 100% indicates a high level of retention and low incidence of dropout. Survival rates may vary from grade to grade, giving an indication of grades with relatively more or less dropouts. The distinction between survival rates with and without repetition is necessary to compare the extent of wastage due to dropout and repetition.

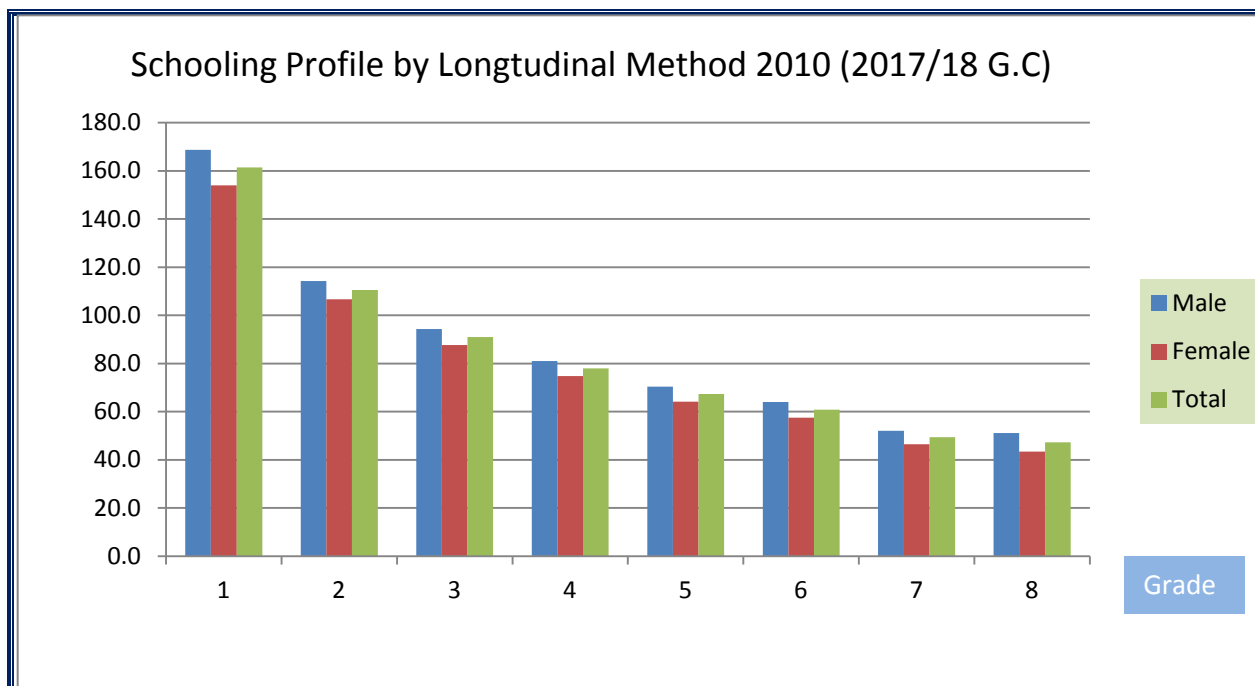

Schooling Profiles and Retention Profiles by Longitudinal Method

Schooling profiles present the advantage of providing more detailed information on enrolment than the simple average offered by the GER. It gives a visual representation of schooling careers, from cycle access to completion. It also enables the analysis of retention, providing a more precise enrolment diagnosis. There are three main approaches to building schooling profiles; however in this section we will be reviewed only the longitudinal method. These methods rely on different basic information offer a specific interpretation and complementary. The Longitudinal Profile follows one cohort of students through the cycle, and describes their progression through the successive grades of the cycle. Data required for Longitudinal Method are, new entrants by grade for consecutive years of the total duration of education level. For instance, in Ethiopia, we need data for 8 consecutive years and population at the official school entrance age 8 years ago to implement this method.

Graph 3.1.3 Schooling profile by Longitudinal Method

3.1.1 Internal Efficiency and Flow Rate

The quantitative goals of education systems are not limited to increasing the number of children enrolled but also to ensure that children who begin a cycle complete it (do not quit), and do so in the set number of years (do not repeat). Indeed, the pedagogical programs of each cycle are developed in such a way as to progressively provide learners with a coherent and self-reinforcing set of knowledge and skills. The early abandon of a cycle is thus likely to result in the partial or total loss of the knowledge and skills acquired in the years effectively attended. The most widely mentioned example is that of sustainable literacy, acquired during primary education. Indeed, even if many children know how to read and write before the end of the cycle, it has been empirically demonstrated that a significant share of students who did not complete the primary cycle lose their literacy after a number of years if they are not practicing.

Analyzing the flow of pupils through a cycle and evaluating internal efficiency consists of comparing the number of children that access the first grade of the cycle with the number that reach the last grade in the set number of years (without repetition).

Promotion, Repetition and Dropout rates are the paths of student flow from grade to grade and characterize the efficiency of the education system in generating graduates. These rates are used for evaluating, monitoring and projecting the efficiency of students flow in our education systems. In this publication the primary education system of Oromia can be evaluated in terms of promotion rate, repetition rate and dropout rate.

3.1.1.1 Primary Education Promotion Rate (PR)

Promotion Rate is the proportion of pupils enrolled in a given grades that reach the next grade in the following year. The data required in this calculation is new entrants in grade *j* for year *T* and enrolment in grade *j-1* for year *T-1*. It is also interpreted as a high level of promotion rate indicates a high level of retention or survival rate.

$$PR = \frac{\text{New entrants in grade } j \text{ for year } T}{\text{Enrolment in grade } j-1 \text{ for year } T-1} \times 100$$

GRAPH 3.1.4. PRIMARY EDUCATION PROMOTION RATE

3.1.1.2 Primary Education Repetition Rate (RR)

I. Repetition Rate

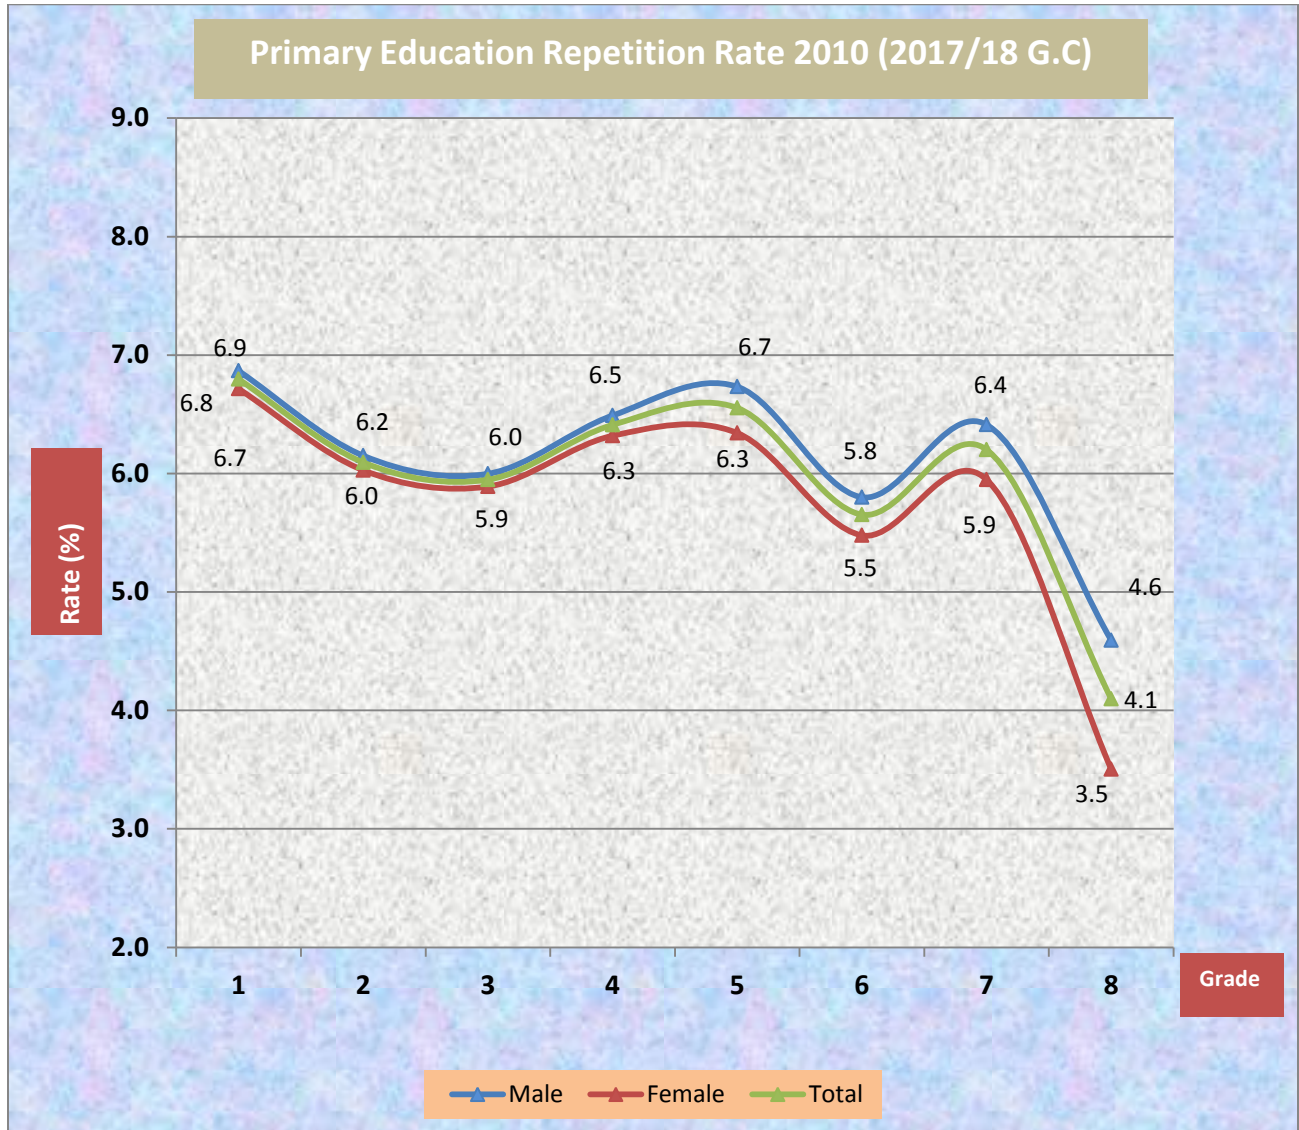

Repetition Rate is the proportion of pupils enrolled in a given grade for a given year who studied in the same grade for the previous year. Data required for this calculation is repeaters of grade *j*, in year *T* and enrolment of grade *j* of year *T-1*. It is interpreted as a high level of the repetition rate indicates a high level of repetition of grades. Repeating has impact on the system. Because

1. Repeaters have wasted the resources they had used while they repeat in the same grade.
2. They occupied a school space that can be used by the other new comers.

The formula to calculate Repetition Rate is;

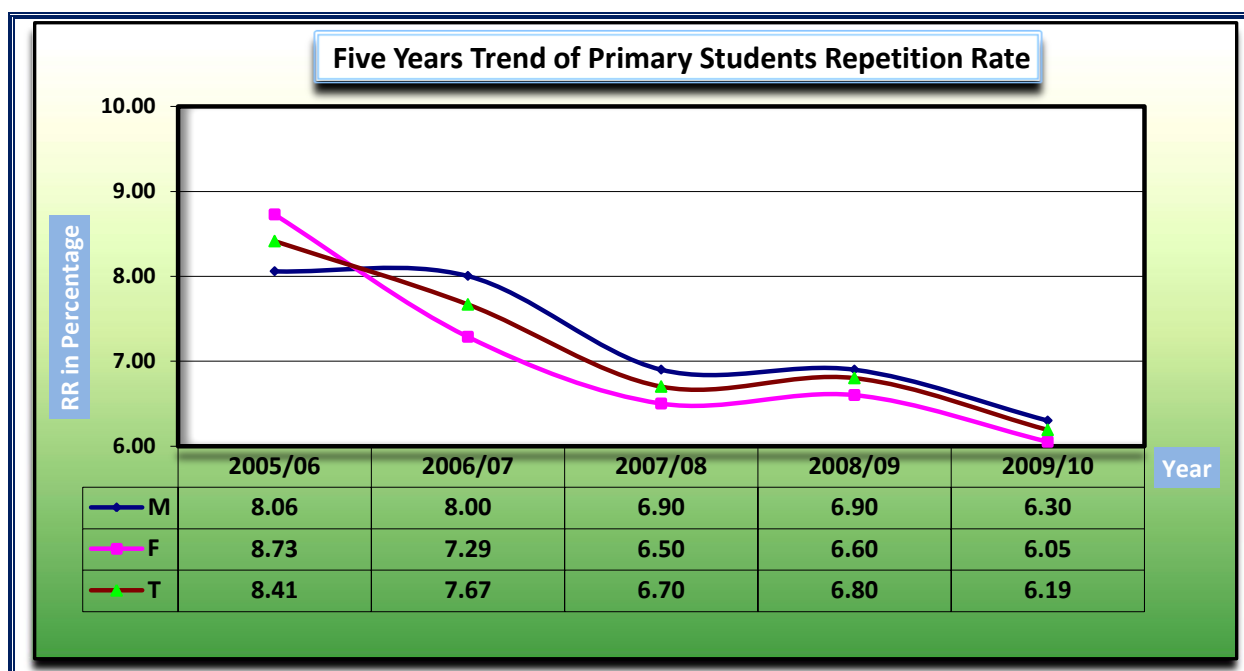

$$RR = \frac{\text{Repeaters of grade } j, \text{ year } T}{\text{Enrolment of grade } j, \text{ year } T - 1} \times 100$$

GRAPH 3.1.5. PRIMARY EDUCATION REPETITION RATE

From the above graph 3.1.5 it is clear that repetition rate in grade 1 to 7 is almost similar where that of female repetition rate is a beat less than Male repetition rate in all grades. The repetition rate for Grade 8th is lower than other grades.

GRAPH 3.1.6 FIVE YEARS TREND OF PRIMARY STUDENTS REPETITION RATE

As shown in graph 3.1.6 above repetition rate has decreased from 8.41% in 2006 (2013/14 G.C) to 6.19% in 2010 (2017/18 G.C). However, there is some evidence that administrative data understate the level of repetition, as some students may be recorded as new entrants when actually they have dropped out of school and return to the same grade. This is particularly frequent in Primary first cycle.

II. Primary Education Dropout Rates (DR)

Dropout rate is proportion of pupils who withdraw from education system for more than one year. It corresponds to the difference between one and the sum of promotion rate and repetition rates. Data required for the calculation of dropout rate are, Promotion Rate and Repetition rate. High dropout rate interpreted as an obstacle in the achievement of UPE. Dropout problem has different impact on the system. Because;

1. Dropouts have wasted the resources.
2. They occupied a school space, which could use the other new comers if they readmitted.
3. They have not acquired the minimal levels of literacy and numeracy if they dropped out in early grades.

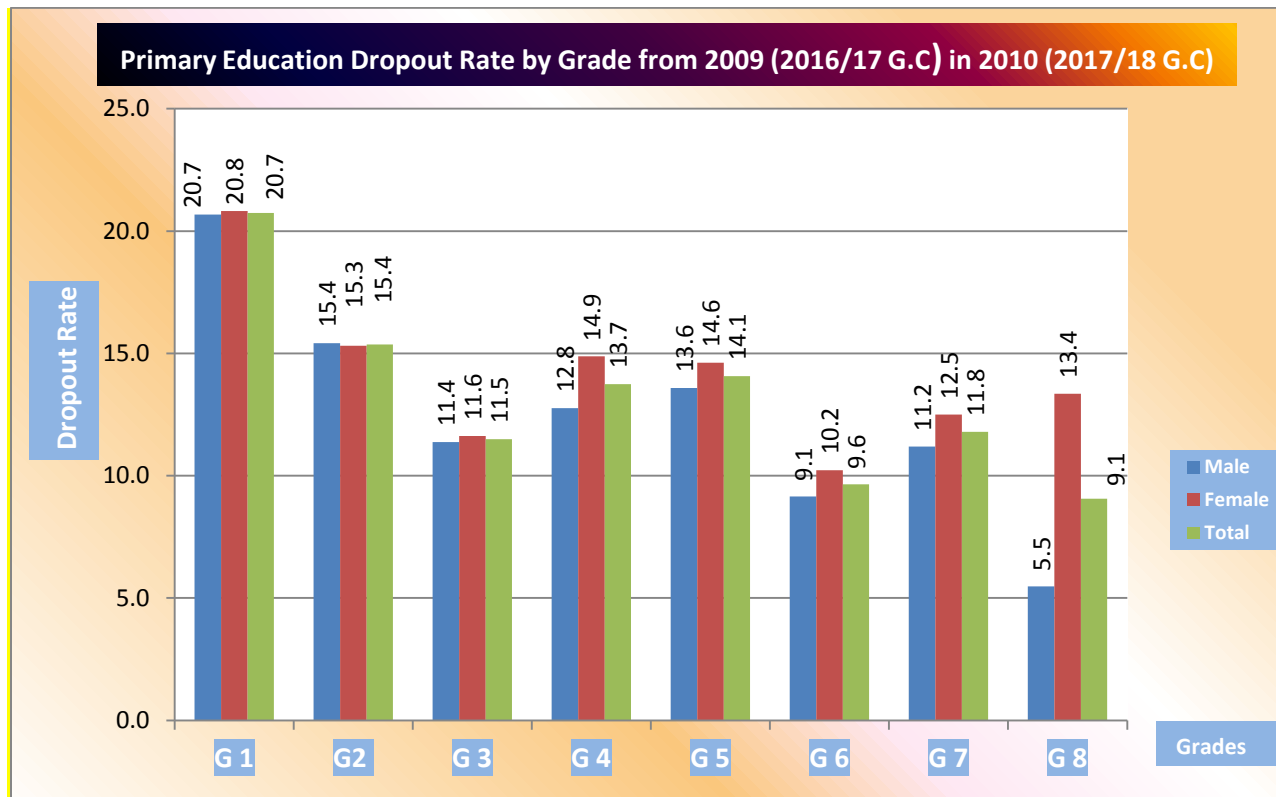

There are two main reasons lead parents to withdraw their children from school, direct, indirect and opportunity costs (school supplies are too expensive, children's help/work is needed at home to contribute to the family economy or take care of younger siblings); and

Parents' perceptions of school time tables are thought inappropriate, academic expectations are thought too stringent and so on. Demand for education is therefore closely related to supply.

The formula to calculate dropout is,

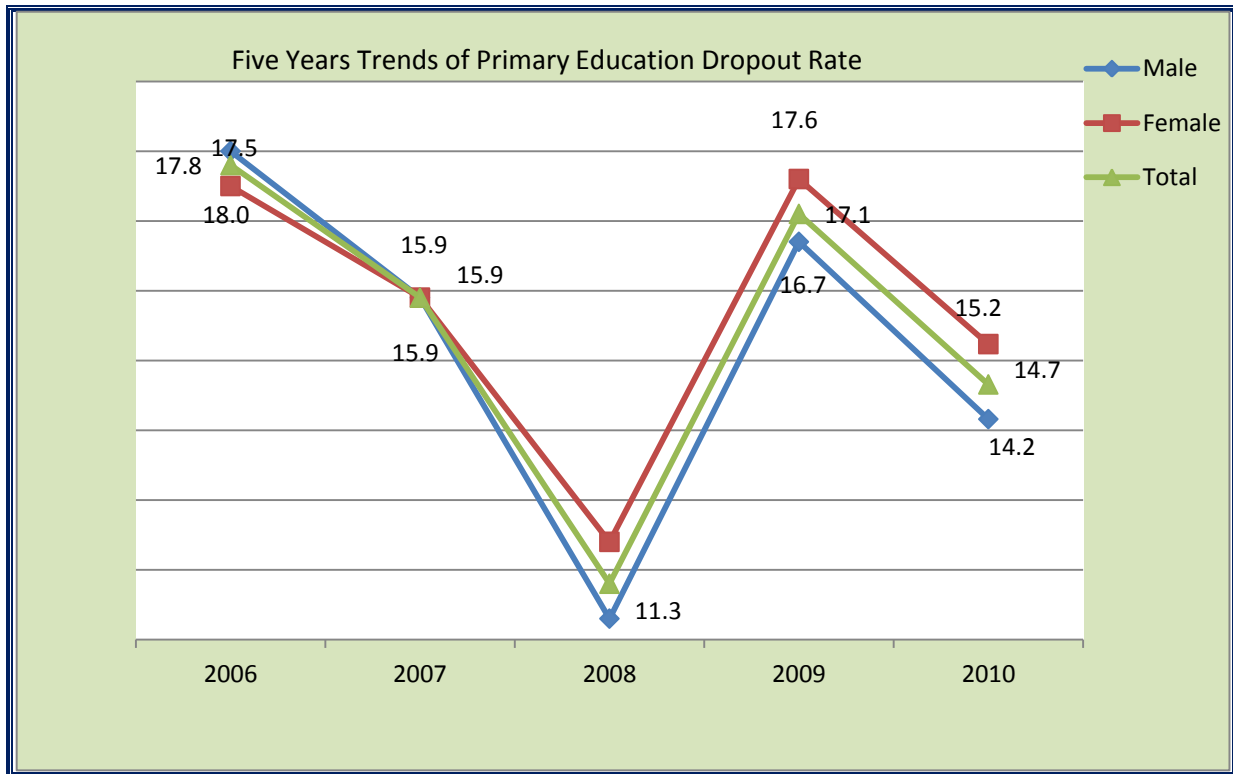

$$\text{Drop-out Rate} = (100 - \text{promotion rate} - \text{repetition rate})$$

GRAPH 3.1.7. PRIMARY EDUCATION DROPOUT RATE BY GRADE

As shown on graph 3.1.7, in 2010 (2017/18 G.C) the Dropout rate are higher in Primary first cycle than in primary second cycle. It was 20.7% at grade 1 and 9.1% at grade 8. Apparently graph 3.1.8 below indicates the comparison & trend of five years dropout. As shown, it has decreased from 17.8% in 2006 to 14.7% in 2010. The trend of Grade 1 dropout on graph 3.1.9 also shows that it decreased from 23.6% in 2006 to 20.7% in 2010 (2017/18 G.C).

GRAPH 3.1.8. FIVE YEARS TREND OF PRIMARY EDUCATION DROPOUT RATES

III. Transition Rate (TR)

Transition Rate is new entrants to the first grade of primary second cycle (5th grade) or the beginning of secondary first cycle (9th grade) in a given year, expressed as a percentage of the number of pupils enrolled in the final grade of primary first cycle or primary second cycle education in the previous academic year respectively. Data required for calculating is new entrants in first grade of primary second cycle or first grade of secondary first cycle for a given Year **T**, *and* total enrolment in final grade of primary first cycle or primary second cycle for Year (**T-1**). For example, if the increment of transition rate of primary students to secondary is raised, in the same way the proportion of pupils from primary education who reaches secondary education also elevated up. Method of calculation for **TR** is the following;

$$\text{Grade 4 Transition Rate or TR to grade 5} = \frac{\text{New entrants in 5 th for Year T}}{\text{Enrolment of 4 th for Year T - 1}} \times 100$$

$$\text{Grade 8 Transition rate or TR to grade 9} = \frac{\text{New entrants in 9th for Year T}}{\text{Enrolment of 8th for Year T - 1}} \times 100$$

GRAPH 3.1.10. FIVE YEARS TREND OF TRANSITION RATE IN PRIMARY EDUCATION

IV. Primary Completion Rate

Primary Completion Rate is highly dependent on the accuracy of the single age population for both points of measurement (for Grade 8, age 14 and for Grade 5 age 11) Table 3.1.7 below shows the Completion Rates for both Grade 5 and Grade 8.

A high primary completion rate indicates a high degree of coverage, whether the pupils belong to the population of official/typical graduation age (14 years) or not. A school is classified as incomplete when it does not offer all the grades of a given cycle. In such cases the risk of dropout is high, especially if no alternative school nearby offers the missing grades.

Definition: Total number of new entrants who registered for grade 8 living examination regardless of age, expressed as percentage of the total population aged 14 years.

The Primary Completion Rate is internationally an established measure of the outcomes of an education system and calculated with the following formula, Where;

“New entrant in last Grade” = (Total pupils in last Grade (Grade 8) – repeaters in last grade (grade))

$$\text{Completion Rate} = \frac{\text{New entrant in last Grade}}{\text{Population of official age in last grade}}$$

Bishan Gurracha Administrative Town, Borena and West Hararge zone were the least performing zones of primary completion rate of 14.7%, 25.3% and 28.5% respectively.

1.1.1. Primary Education Cohort Analysis

A *cohort* is defined as a group of persons who jointly experience a series of specific events over a period of time. Accordingly, we may define a pupil cohort as a group of pupils who join the first grade of a given cycle in the same school year, and subsequently experience the events of promotion, repetition, dropout or successful completion of the final grade, each in his/her own way.

There are three ways to analyze the internal efficiency of an education system by means of the cohort pupil flow method, depending on the type of data collected: (i) true cohort, (ii) apparent cohort, and (iii) reconstructed cohort. The ideal way to obtain a precise assessment of educational wastage is through the use of the *true cohort method*. This involves either a tracer (longitudinal) study to monitor the progress of a selected cohort of pupils through the education cycle, or through a retrospective study of school records in order to retrace the flows of pupils through the grades in past years.

The true cohort method is costly and time-consuming, and it requires good and reliable school-records with information on individual pupils. For this reason, this method is not yet widely used. In the absence of individualized pupil information, internal efficiency in education can be assessed by putting in to consideration the enrolment data by grade for at least two consecutive years using either the apparent or reconstructed cohort methods.

The apparent cohort method is applied when there is no data on repeaters. Then the enrolment in grade 1 in a particular year is compared with enrolment in the successive grades during successive years, and it is assumed that the decrease from each grade to the next corresponds to wastage. This method, the most commonly used so far, produces very approximate estimates of drop-out, and its main weakness is that it assumes that pupils are either promoted or drop-out of the school system. This method is quite appropriate for countries practicing automatic promotion from grade to grade.

A more pertinent and commonly used method is the reconstructed cohort method; we also used this method for this publication. Reconstructed cohort method is less dependent on the availability of detailed data over time. To apply this method, data on enrolment by grade for two

consecutive years, together with data on repeaters by grade from the first to second year, are sufficient to enable the estimation of three main flow-rates: promotion, repetition and dropout. Once obtained, these rates may be analyzed first of all by grade to study the patterns of repetition and drop-out. Then they can be used to reconstruct a pupil-cohort flow in order to derive other indicators of internal efficiency. This is illustrated as follows.

Flow Rates Using Data on Enrolment and Repeaters

The methodology of the reconstructed cohort flow model is based on the fundamental concept that for pupils enrolled in a given grade in a given year, there can be only three eventualities: (a) some of them will be promoted to the next higher grade in the next school year; (b) others will repeat the same grade in the next school year; and (c) the remaining pupils will drop-out of school in the course of the year.

Hypothetical Flow Diagram of the Cohort through Primary Education

Assumption of Cohort Analysis

The flow of a fictitious cohort of 1,000 pupils through the primary education cycle of our Region can be reconstructed as stated below, based on three assumptions:

1. At any given grade, the same rates of repetition, promotion, and drop-out apply, regardless of whether a pupil has reached that grade directly or after one or more repetitions (hypothesis of homogenous behavior), it also assumes that no pupil skips a grade, i.e., there is no double promotion.
2. There will be no additional pupils (new entrants) in any of the subsequent years during the life time of the cohort, other than original cohort of 1,000 pupils; and no in-migration or out-migrations throughout the cohort years.
3. Pupils in a grade are, allowed to repeat only twice. However, in reality a pupil may repeat a grade more than twice. In this case, the assumption remains constant and allows only for the repeating of the grade twice.

In analyzing hypothetical flow diagram of reconstruction cohort method of primary education system, one can analyze as follows. There was a total of 1,809,847 pupils registered in grade 1 in 2009.

To reconstruct the history of 1,809,847 pupils entering grade 1, it is easier to express this starting cohort as an index of 1,000 pupils, and all operations are consequently translated in 'per thousand' terms. Thus, when applying each flow-rate for grade 1 to this fictitious cohort of 1,000 pupils (instead of the actual 1,809,847 pupils), one can find that 68 pupils repeated grade 1 (6.8%) 207 dropped-out (20.7%), and 725 were promoted to grade 2 (72.5%) and so on. It may be noted that the first diagonal row in the diagram below (next page) is obtained by multiplying the successive promotion rates for successive grades and successive years. The repetition and dropout rates are then applied to obtain the second, the third and the fourth rows.

From this flow diagram, one can draw a number of interesting observations. For instance, out of the initial 1,000 pupils entering grade 1, only 180 graduated from the cycle without repeating any grade; 86 graduated with a one-year delay, i.e. they repeated once; 23 graduated with two years delay, i.e. they repeated twice.

In addition, this flow diagram enables the computation of the main indicators of internal efficiency. For example, the figures in the boxes below give the number of pupils reaching a particular grade, thus enabling the calculation of the survival rates by grade. One can observe that 778 out of the 1,000 pupils in the cohort (or 77.8%) reached grade 2. These figures can be easily derived from the upper part of the diagram, by summing the number of drop-outs from each grade and each year and subtracting that sum from the enrolment in the same grade. For grade 1 we obtain $207+14+1 = 222$ drop-outs, which when subtracted from 1,000 would give 778 survivals. Finally

Multiplying graduates by the number of grades ($289 \times 8 = 2,312$) would give the ideal number of pupil-years required to produce the graduates. The ratio between the latter and the actual number of pupil years used by the cohort, i.e. 4,872, gives the coefficient of efficiency ($2,312 \div 4,872 = 0.475$ or 47.5 percent).

The years input per graduate (16.9 years) is obtained by dividing the total number of pupil-years spent by the cohort (4,872) by the total number of graduates (289). The years input per graduate can then be compared to the ideal number required, which is simply the duration of the education cycle 8 years of the cohort.

3.1.4 Internal Efficiency of the Cohort in Primary Education

Pupils Year by Grade of the Cohort

TABLE 3.1.14. PUPILS YEAR BY GRADE OF COHORT

Pupils Year by Grade of Cohort Analysis								
sex	Grade							
	1	2	3	4	5	6	7	8
M	1073	826	689	608	526	444	402	345
F	1072	826	689	606	508	424	378	319
Average	1073	827	690	607	517	434	390	332

I. Indicators of Retentions by Grade of the Cohort

A. Survival Rate of the Cohort

The purpose of survival rate is to measure the holding power and internal efficiency of the education system. It illustrates the situation regarding retention of pupils from grade to grade in school, and conversely the magnitude of dropout by grade. Survival rate is the proportion of cohort pupils who reached the subsequent grade expressed as a percentage of pupils enrolled in the first grade of a given cycle in a given school year. It also used to measure the impact of repetition and dropout on internal efficiency. Survival by grade obtained by adding the number of pupils who eventually will promoted to the next higher grade. In each grade, some pupils promoted to the next grade without repeating a grade and others after repeating once or twice.

TABLE 3.1.15. PRIMARY EDUCATION COHORT ANALYSIS SURVIVAL RATE BY GRADE

Primary Education Cohort Analysis Survival Rate by Grade (%)								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	77.5	64.8	57.0	49.2	42.1	37.8	33.1	31.0
F	77.7	65.0	56.9	47.7	40.3	35.7	30.8	26.5
Average	77.8	65.0	57.0	48.5	41.2	36.7	32.0	28.9

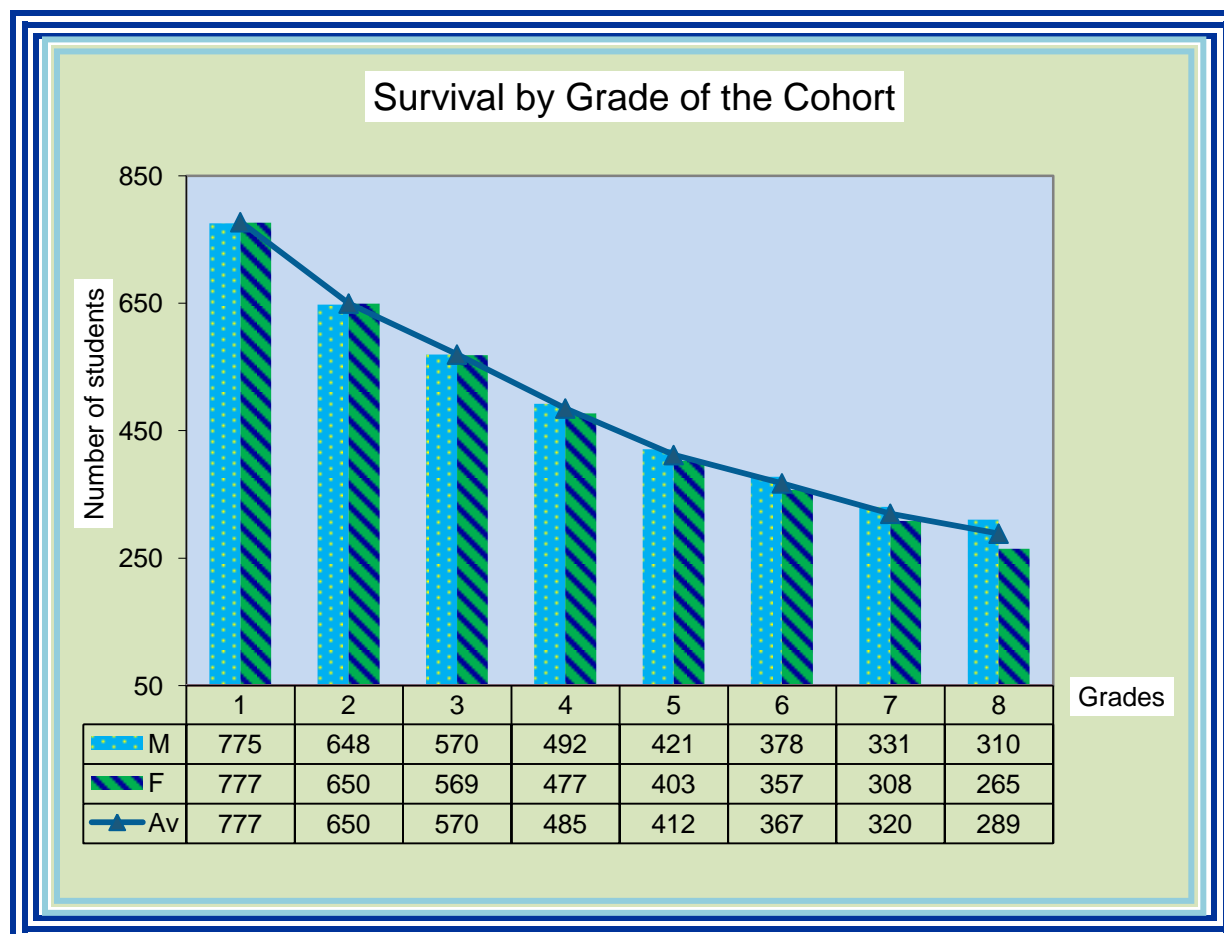

As the table 3.1.15 above shows among 1000 students enrolled in grade 1, only 77.8% (M=77.5%, F=77.7%) are survived to complete grade 1 in the cohort. The rest 22.3% (M=22.5%, F=22.3%) left the school before completing grade 1. In addition 48.5% (M= 49.2% and F= 47.7 %) students survived to complete first cycle primary.

From the 1000 pupils started the cohort, only 28.9% (M=31.0%, F= 26.5 %) will finally survive at grade 8. This shows that 69.0% (M=73.5%, F=71.1%) of students left the system without completing primary education. So we can imagine how the issue needs serious attention from the concerned bodies.

TABLE 3.1.16. NUMBER OF PUPILS SURVIVED IN EACH GRADE OF THE COHORT

Number of Pupils Survived in Each Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	775	648	570	492	421	378	331	310
F	777	650	569	477	403	357	308	265
Average	778	650	570	485	412	367	320	289

GRAPH 3.1.11. SURVIVAL BY GRADE OF THE COHORT

As shown in the graph 3.1.11 above as the levels of the grade increases from grade 1 to 8 survival rates of student's decreases. Hence more students leave the system before completing grade 8.

B. Dropout by Grade of the Cohort

As shown in the table 3.1.17 below, most of the students left the system early in grade 1 and 2. About 22.2% (M=22.4%, F=22.3%) of the pupil of the cohort left the system before completing grade one. Majority of children leave the system at an early stage compared to dropouts at upper grades. This is an undesirable situation, to which planners and decision makers should pay immediate attention to it.

TABLE 3.1.17. PERCENTAGE OF DROPOUT BY GRADE OF THE COHORT

Percentage of Dropout by Grade of the Cohort(%)								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	22.4	12.7	7.8	7.6	7.1	4.0	4.5	1.9
F	22.3	12.6	8.0	9.0	7.4	4.3	4.7	4.3
average	22.2	12.7	7.9	8.3	7.3	4.2	4.6	3.0

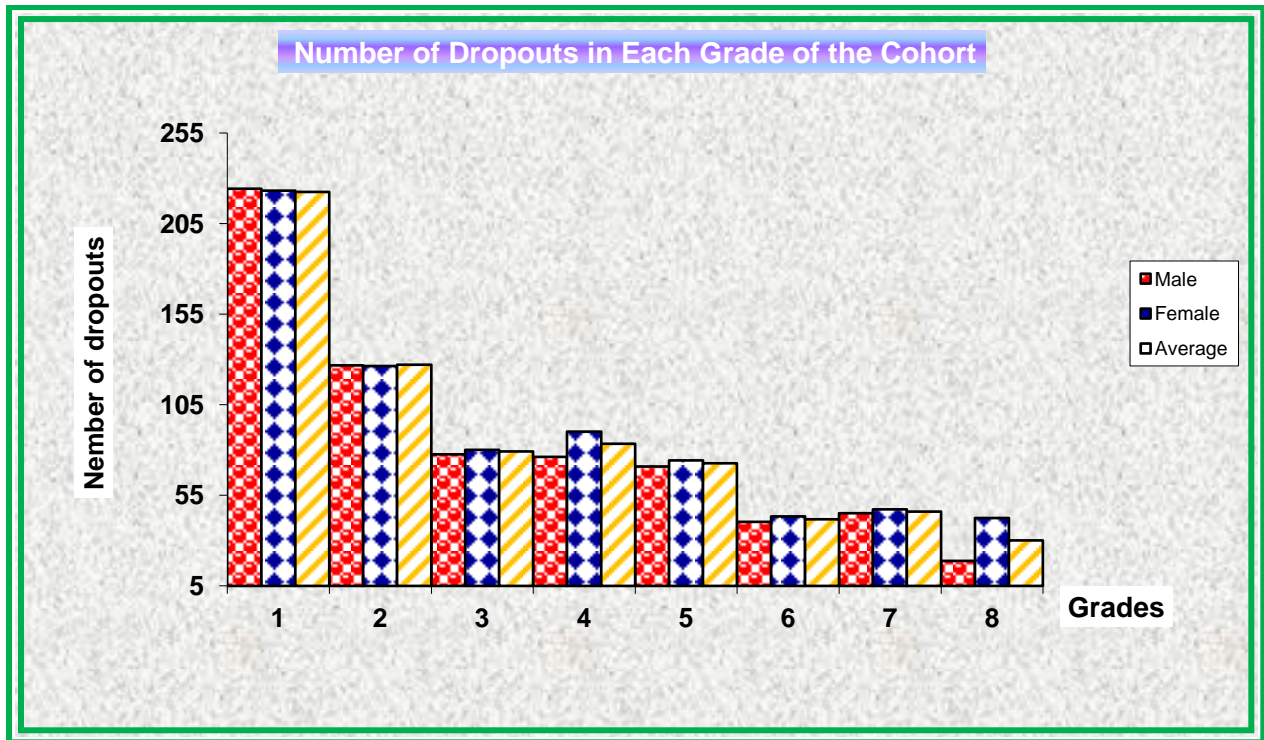

Dropout is the proportion of students who leave the system at each grade. It is the most serious problem in education system. As the cohort data on the table 3.1.18 below shows that among the cohort of 1000 pupil, 222 of them left the school before completing grade one.

TABLE 3.1.18. NUMBER OF DROPOUT BY GRADE OF THE COHORT

Number of Dropout by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	224	127	78	76	71	40	45	19
F	223	126	80	90	74	43	47	43
Average	222	127	79	83	73	42	46	30

As shown in table 3.1.18 above the number of dropout by grade is high in grade 1 and the low in grade 8.

GRAPH 3.1.12. NUMBER OF DROPOUTS IN EACH GRADE OF THE COHORT

C. Repeaters by Grade of the Cohort

TABLE 3.1.19. REPEATERS BY GRADE OF THE COHORT

Repeaters by Grade of the Cohort

	1	2	3	4	5	6	7	8
M	74	51	41	39	35	26	26	16
F	72	50	41	38	32	23	22	11
Average	73	50	41	39	34	25	24	14

The cohort data on the table 3.1.19 above shows that, among the cohort of 1000 pupils 73 of them repeated at grade one, number of repeaters gradually decreases from grade to grade while it goes up to the higher grade as shown on the table.

GRAPH 3.1.13. NUMBER OF REPEATERS OF THE COHORT BY GRADE

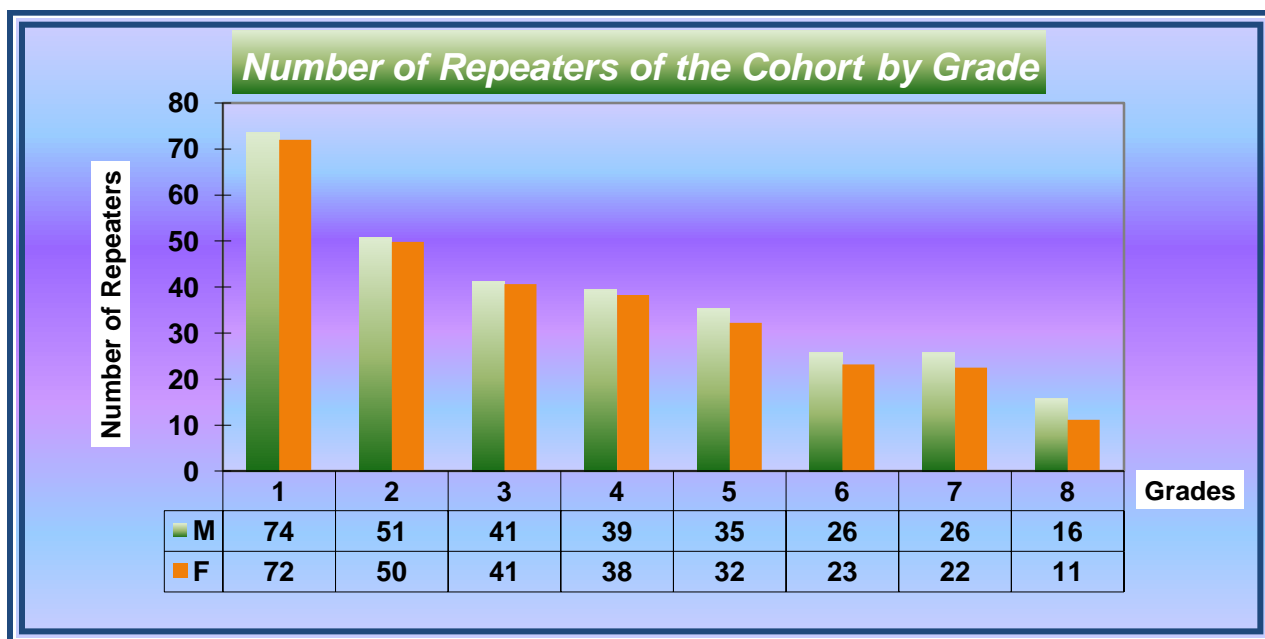

TABLE 3.1.20. PERCENTAGE OF REPEATERS BY GRADE OF THE COHORT

Percentage of Repeaters by Grade of the Cohort								
Sex	Grade							
	1	2	3	4	5	6	7	8
M	7.4	5.1	4.1	3.9	3.5	2.6	2.6	1.6
F	7.2	5.0	4.1	3.8	3.2	2.3	2.2	1.1
Average	7.3	5.0	4.1	3.9	3.4	2.5	2.4	1.4

Table 3.1.20 above shows that 7.3 % (M=7.4%, F=7.2%) of pupils of the cohort repeats at grade 1. When we compare both levels, majority of children repeat in the early grades than the upper one.

D. Number of Graduates from the Final Years of the Cohort

Graduates from the final year is the number of pupils who eventually graduate (Complete) from the final year of the cycle. In other words, those who successfully complete primary first cycle of 4 years of study and promoted to the first grade of second cycle primary (Grade 5) or those who successfully complete second cycle primary of 8 years of study and promoted to first cycle secondary (Grade 9). According to the cohort shown on table 3.1.11, out of 1000 pupils registered in 2009 E.C at grade one, 375 pupil's will graduate grade 4 without repeating any grade during their stay in school. Another 119 pupil's will also graduate grade 4 after repeating once and 23 of them will graduated after repeating twice in any of the grades. Number of graduates of first cycle primary for this cohort is 517.

Similarly, 180 pupils will graduate grade 8 by 2016 E.C. without repeating, 86 pupils will graduate grade 8 in 2017 E.C by repeating once, finally 23 pupils will also graduate grade 8 by 2018 E.C by repeating any of the grade twice. According to the cohort, the possible number of pupil graduates from the complete primary system or grade 8th is only 289. Accordingly, only about 28.9% of the pupils complete primary education out of 1000 pupils of the cohort system. Unfortunately about, 711 (71.1%) pupils of the cohort were left the system before completing primary education.

Therefore, Educational planners, policy makers, decision makers, stakeholders and communities must work towards finding the solutions to improve this huge gap.

The table 3.2.1 above illustrates that by 2010 (2017/18 G.C.) the repetition rate of secondary school (9-10) at regional level was 6.8% (M=7.3%, F=6.1%). Zones and administrative towns are having different average value than the regional average. For instance, Dukem, L/T/L/Dadhi, Robe, and Sebeta Administrative Towns have the lowest repetition rate, or highest promotion rate, 0.0%, 0.3% and 1.5% and 2.6% respectively. On the other hand, Gelan Administrative Town, South West Shoa, East Hararge, and Batu town have the highest repetition rate, or lowest promotion rate, 17.2%, 14.9% and 13.3% and 11.5% respectively.

This table also elaborates the repetition rate in preparatory school by indicating repetition rate, 2.5% (M=2.8%, F=2.1%), at regional level. The mean data have difference in values across the region. For instance, Holeta, Dukem, and Burayu Administrative Town have the highest repetition rate of 20.7%, 18.9 % and 11.4% respectively.

Regarding to dropout, table 3.2.1 demonstrates that 10.3% (M=10.9%, F=9.7%) and 6.3% (M =4.8%, F=8.1%) for grade 9 and 11at Regional level respectively. Burayu and Modjo Administrative Towns have largest dropout rate of grade 9, 56.4% and 41.3% respectively. For grade 11, the highest dropout was registered in Sululta and Gelan Administration towns, 49.5%, and 21.9% respectively. Conversely, the least dropout for grade 9 was registered in Nekemte, Ambo and Holeta Administrative Towns 3.2%, 5.4%, and 5.5% respectively. Regarding to grade 11 Jimma Zone, Burayu and Robe Towns had the least dropout rate, which was 1.0%, 1.2% and 1.8% respectively.

CHAPTER FOUR

TERTIARY EDUCATION

4. College of Teachers Education (CTE)

Colleges of Teachers' Education (CTE) are institutions those aimed to train teachers for primary schools. There are 12 CTEs in the region in 2010 E.C, those have been striving to fulfill the desired teachers in quality and quantity wise for the sector in regular, evening and weekend diploma program, in addition to these instructions, they have been fully dedicated to in-service-training that helps TTI (certificate) teachers to upgrade to the Diploma level in summer program too.

In this publication enrolled, graduated and attrition of candidate teachers in different Diploma program as well as permanent and part time staff of CTEs are included.

4.1. Enrolment in Diploma Program

4.1.1 Enrolment in Regular Diploma Program

As can be seen from table 6.1 below in 12 CTEs, a total of 17,197 (10,133 male & 7,064 female) of which 41.08% are female candidate teachers were enrolled for regular diploma program, for three years study amongst; 14,735 (8,698 male & 6,037 female), 2,310 (1,344 male & 966 female) and 152 (91 male & 61 female) candidate teachers have been attending training in New modality, Cluster and Linear modalities respectively.
